There is more than the Best Powder, Wads and Shot in Peter's Ammunition.

There's Profit In It

If you wish quick returns on the money invested—
If you would sell ammunition that requires no pushing—
If you would give customers ammunition of superior quality at the price charged for the inferior kind—

SELL
PETER'S LOADED SHELLS
AND CARTRIDGES

They have proved themselves in the severest tests at the traps and in the game fields to be the most satisfactory brand—
Sell a proved ammunition and increase your trade. Don't push an unreliable brand and drive customers to your competitors.

The Most Advertised **PETERS CARTRIDGE CO.** The Best Known

CINCINNATI, O.

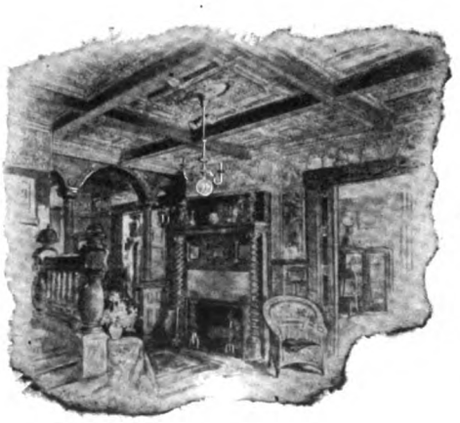
HARDWARE

Northrop's Metal Ceilings

The latest and the best designs in Metal Ceilings are finely illustrated in our new catalog. You ought to have a copy.

Name anything you wish in the way of metal ceilings or walls for rooms of any size, shape, kind or purpose, and you'll find that the original

Northrop Metal Ceilings



are still unequalled in sharpness of stamping, simplicity of construction and architectural fineness.

Every Hardwareman ought to handle Northrop's Metal Ceilings. Any mechanic can put them up.

Remember: If you'll send us the particulars about any room, we'll submit drawings and prices.

Northrop, Coburn & Dodge Co.

LET ME DO YOUR COOKING

Why worry, watch and fret over a hot stove when you can put your meat, vegetables, custards — in short, the whole meal, for the whole family, into my ample shelves and cook it, as food never was or can be cooked in any other way over ONE BURNER of stove, range, gas, gasoline or oil stove?

I come in both round and square shapes both kinds have whistles. Prices $2.00 $2.50, $3 00, $4.50 up.

No watching; no basting; nothing overdone nor underdone: I am the

IDEAL
Combination Steam Cooker and Baker

made of heavy tin *or copper*, with ALL COPPER, seamless drawn tank; seamless top. No sharp corners on me to catch the clothing or hands or to retain grease and dirt. I BLOW MY WHISTLE 20 minutes before water needs replenishing; never go on a strike or talk back. I CUT THE COST OF FUEL and WORK IN HALF, save time and wear and tear on your temper and vocabulary. I hold 12 one quart cans in canning fruit. Write right now for

FREE BOOK --- 48 Pages

It tells you all about me. Gives full details; letters from people all over the land who would not do without me for ten times what I cost.

TOLEDO OOOKER CO. DESK T TOLEDO, OHIO

— AGENTS WANTED —

☞ **This ad will appear in all the leading ladies' journals and magazines during the next three months, and will create orders upon the dealers.**

Steam Cookers Direct From the Factory

Why deal with middlemen when you can buy your steam cookers direct from the

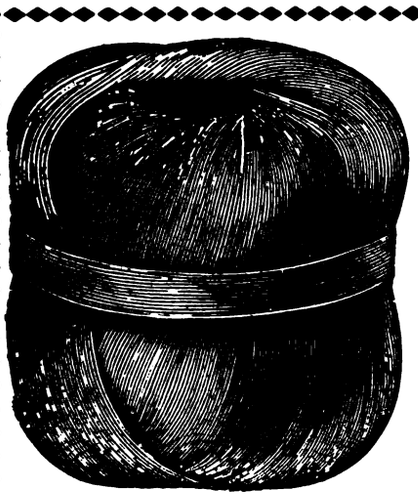
Largest Steam Cooker Factory in the World?

Our experience covers over twenty years in the manufacture of the famous

Ideal Steam Combination Cookers and Bakers

THESE are the **only cookers in the world made absolutely perfect**, with both round and square shapes having whistles. **They cook an entire meal over one burner of any stove**; reduce fuel bills nearly on -half. Meats are made savory and tender; vegetables retain their natural flavor. Hold twelve one-quart jars in canning fruit. Seamless dome tops and copper tank bottoms.

"This is the Cooker with the whistle that calls the Cook and is the Cook's delight."



Send for our handsomely illustrated catalogue and compare our cookers and prices with others, you will place your order with us. We can make prompt shipments at all times.

Mr. Dealer

Do you know there's a demand for a good steam cooker which you should supply? **Ideal Steam Cookers** are advertised thoroughly in all the national publications from Ladies' Home Journal down. Get our proposition, it means profits—**Dollars**—to you. Our lines are complete. We make all good kinds; Square (with whistles), Round (with whistles), in all desirable sizes, at all prices,

HURWOOD TOOLS

We are so particular in the choice of the quality of steel for all our tools and exercise so great care in their making, that hardwaremen everywhere hold them in high esteem for these very reasons.

*

If you have never handled any of our Screw Drivers try our

Extension Screw Driver

Electricians and piano manufacturers say it has no equal for their business.

*

It does double duty—is really two screw drivers in one.

*

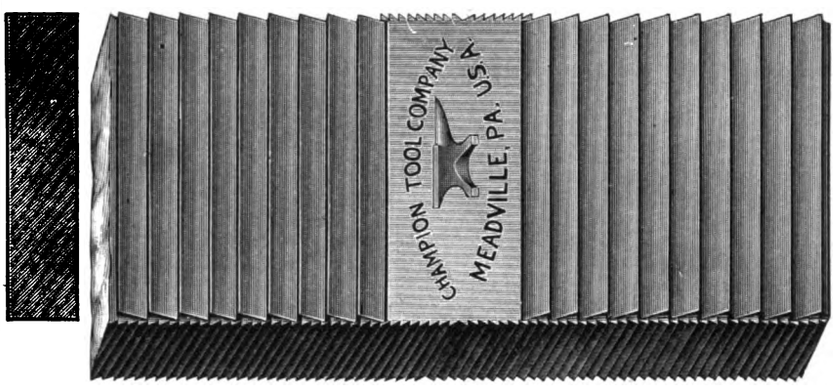
You ought to see the rest of our line of Screw Drivers fully described in

Our Catalog!

You ought to have a copy on hand always. A postal will fetch it.

*

HURWOOD MFG. CO.,



Bridgeport, Conn., U. S. A.

The Champion Hoof Plano

(Patented)

WILL

Outwear a rasp.
Cut faster than a rasp.
Do perfectly smooth work; cannot be excelled for levelling the foot.
Not clog; not jump.
Yield a nice profit if added to your stock.

Exact appearance of Centre Section of 16 Inch.

Tool No. 64. Made in two Sizes: 16 in. and 18 in.

Tool No. 65. Made in 14 in. size only.

We quote interesting prices on:

RIVETING HAMMERS
CARPENTER'S PINCERS
BLACKSMITH'S TOOLS
FARRIER'S TOOLS

STAR HACK SAWS

1884 1904

ENOUGH SAID,

THE STARS TELL THE STORY.

MILLERS FALLS COMPANY,

28 WARREN STREET,
NEW YORK.

The

"NEVERFAIL" OIL and GASOLINE CAN

Galvanized Iron

THE BEST BY TEST

Mr. Dealer ! if you are not already selling these cans, you should be ! You cannot keep them if you show them ! One minute taken in showing the advantage of these cans means a sale. They are great profit producers and trade winners. Everyone you sell opens the way for other sales. They are Perfection personified.

Do not let your competitor get ahead of you. Order at once and reap the reward yourself. You have everything to gain in handling this line, as we guarantee each and every Can to give entire satisfaction to your customers. You take care of your customers ; we take care of you. If quality and satisfaction counts with you, we must and will get your business.

Our price and terms are alike to all, which are as follows :— Five Gallon size, $12.00 per dozen, Three Gallon size, $10.50 per dozen, less 5% 30, net 60 days. We allow the freight on all orders of one dozen and over east of the Mississippi River and north of the Mason & Dixon Line and a maximum of $1.00 per dozen in the rest of the United States ; 25c. allowed for freight on orders of one half dozen.

Will you not grant us the privilege of seeing the color of your ink, by sending us your order for future or immediate shipment ? We feel certain that if we can get you started on our line, we will have no trouble in holding your trade.

No. Eqo Silver dial, steel platform.

Received Highest Award at World's Fair, St. Louis.

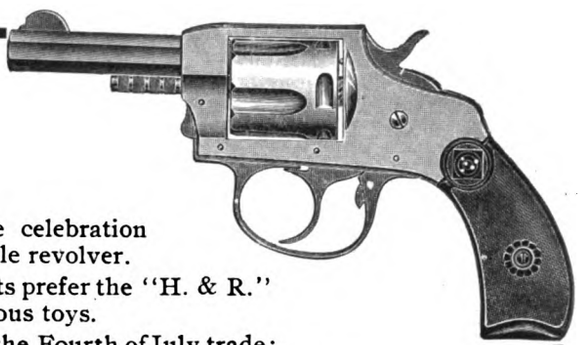
Rust--Storm--Fire--Proof Metal Shingles

and Tiles from Tin, Galvanized Tin and Copper

are the best for suburban or country houses.

We have the largest variety of styles. They require no painting or after care. We have

A Profitable Proposition FOR Every Hardwareman



Get in line—write us and be convinced.

Mention HARDWARE.

The National Sheet Metal Roofing Co.

339-345 GRAND ST., JERSEY CITY, N. J.

4th of July

A safe and sensible celebration may be had with a reliable revolver.

Boys and careful parents prefer the "H. & R." Avoid cheap and dangerous toys.

Especially adapted for the Fourth of July trade:

YOUNG AMERICA DOUBLE ACTION 22 cal. R. F.
YOUNG AMERICA BULL DOG - - 32 cal. R. F.
YOUNG AMERICA DOUBLE ACTION 32 cal. C. F.
H. & R. DOUBLE ACTION M-1905, 32 cal. C. F.

Harrington & Richardson Arms Co.

WORCESTER, MASS, U. S. A.

Makers of H. & R. Single Guns.

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

Catalogue and information free.

American Steel Roofing Co.
Middletown, O.

5 10 15 Cents Specialties

made by us are of such high quality that you will wonder how we can afford to sell them at that price. Take our

Dandy Ice Pick

for instance.

It's 11 inches long and weighs 8 ounces, head nickel-plated all over; handle of hickory, varnished and polished.

An excellent seller.

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality.

Take Axle Grease for instance: if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

Its the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs barrels. The question is: how mnch do you need?

FRAZER LUBRICATOR COMPANY,

85 Murray St., New York.

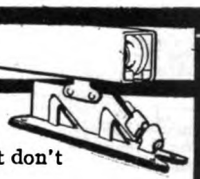
Whenever Hardwaremen Discuss

the relative merits of various brands of Axle Grease, and the conversation turns to

Profits in Axle Grease

invariably the concensus of opinion expressed is that

Snow Flake Axle Grease Is the Most Profitable



to buy—the most profitable to sell. It's made of good stuff; lasts longest; sells quickest; has found a ready market for 21 years. Need more be said?

SNOW FLAKE AXLE GREASE CO.,

FITCHBURG, MASS.

THE MEN WHO KNOW

insist on having Richards' Royal Door Hangers, those that don't can be easily shown their exclusive features,

Say all the nice things about other door hangers, there yet remains one fact true only of the **RICHARDS ROYAL**

Ball Bearing Trolley House Door Hangers

They are the most reliable business builders for the dealer. because they insure the highest degree of satisfaction among consumers.

The remarkably smooth and noiseless action of the ROYAL is due to tightness of all parts and the fact that the wheels run on hard maple, the best wood for this purpose as it keeps a level and even surface and is not easily warped.

If you aren't selling Richards Hangers it will pay you to learn more about them. Write us for our book of Facts and Figures.

HOW PREPARE?

There's no surer way than to make of every purchaser a permanent customer.

So far as the paint and varnish department is concerned, this result can be made doubly sure by handling the NICE brands. They make friends for the dealer, put good profits in his till and keep the "rainy day" a long way off. One very popular member of the Nice family is

"NICE"

REGISTERED AGATE TRADE MARK.

FLOOR FINISH

It is tough, elastic, durable beyond comparison and always produces a smooth handsome finish, unaffected by water, alkali or atmospheric conditions.

It has put the finishing touch to thousands of floors in hundreds of the finest buildings in the land to say nothing of its general use.

Made by the same careful system that has made

"NICE" LIQUID FILLER
"NICE" PASTE FILLER
"NICE" VARNISHES

the standards everywhere.

WRITE FOR BOOKLET.

EUGENE E. NICE
272-274 So. 2nd St., PHILADELPHIA

THE NEW DETROIT No. 11

BEAUTY & SAFETY

SIMPLICITY ACCURACY

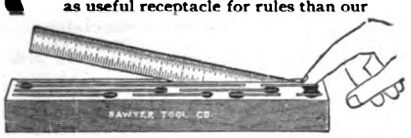
Not A Toy, But A Gun. Price, $2.50

The Detroit Rifles are the choice of the sportsman and the lovers of a fine and convenient .22-Cal take-down Rifle. This Rifle shoots either .22 short or long cartridges; the barrel is 22 inches long over all, and is made from the solid bar of steel especially selected for us; it is rifled as fine as the highest-priced Rifles; the stock is made of black walnut, nicely finished.

This Rifle is absolutely safe, as the cartridge cannot be fired until the breech mechanism is closed and locked; it is of latest pattern *Self-Cocking.*

If your Jobber does not handle the DETROIT write us.

THIS RIFLE is a Money-Maker for the JOBBER.



MANUFACTURED BY

DETROIT RIFLE CO., 12 to 18 W. Atwater St., Detroit, Mich.

DEALERS

Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.

Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

PFLUEGER'S PATENTED "REVERSIBLE HINGE" INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING

NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.

The ENTERPRISE MFG. CO.

Akron, Ohio, U. S. A.

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE,

General Industrial Agent,

Seaboard Air Line Railway,

Portsmouth, Virginia.

We have a good location for your plant.

"The Proof of the Pudding Is the Eating"

That's exactly the case with

L & G 800 Butcher Knives

They are made of special steel carefully hammered and finely tempered.

Every Blade Warranted

We've made them ever since 1837.

Sixty Eight Years On the Market

Our Butcher Knives, like the rest of our line of

Fine Table Cutlery

have "improved with age." There's nothing like them on the market. They can't be beat in quality nor price.

Get a copy of our catalog— Make up a sample order and we feel confident you will send us many duplicate orders.

Don't delay—
Write to-day.

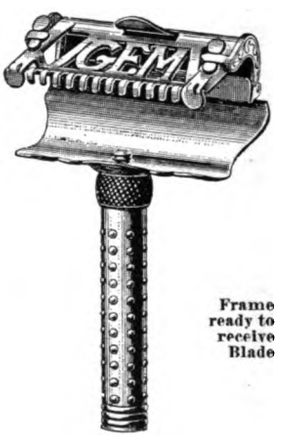
"Every Cloud Has

Its Silver Lining"

The dark cloud spells **"Dull Business"** with the Hardwareman but here is the "silver lining:"

The Gem Rigid Model

When all other things fail to sell there is always a lively demand for the Gem, simply because it is an irresistible seller. The man who sees the Gem must have it. Its few parts, simple adjustment, and many points of excellence are too apparent not to be noticed.



It is positively the Best. Search the world over—you will not find its equal at any price.

You can depend upon it every time

and never be disappointed. One of the reasons for this is that material suited to the particular needs is used. *We use brass where brass is best, galvanized iron where that is best, etc. We know that galvanized iron fire pot tanks will stand the service longer and are easier to replace or repair* than if made of brass. For the benefit of those who think differently we supply brass tanks on either the No. 1 or No. 5 fire pots without extra price. Take your choice. "Your money back if you are not pleased," is our guarantee. Jobbers sell at factory price.

No. 5 Fire Pot. $4.50 Net

Packed one dozen in a case. Shipping weight, 100 lbs. per case. **SCHOFIELD & CO., Mfrs., Freeport, Ill**

THE MEN WHO KNOW

insist on having Richards' Royal Door Hangers, those that don't can be easily shown their exclusive features,

Say all the nice things about other door hangers, there yet remains one fact true only of the **RICHARDS ROYAL**

Ball Bearing Trolley House Door Hangers

They are the most reliable business builders for the dealer, because they insure the highest degree of satisfaction among consumers.

The remarkably smooth and noiseless action of the ROYAL is due to tightness of all parts and the fact that the wheels run on hard maple, the best wood for this purpose as it keeps a level and even surface and is not easily warped.

If you aren't selling Richards Hangers it will pay you to learn more about them. Write us for our book of Facts and Figures.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—If you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

HARDWARE

Russell & Erwin Manufacturing Co., New Britain, Conn., and 45 Chambers Street, New York, are distributing to their customers two handsome and attractive Crsytaloid Hangers; one is devoted to the exploitation of the Russwin Door Check, and the other to the Russwin Unit Lock. The green background and gold lettering of the hangers would command attention in any Hardware store in which they were suspended.

✤

Mr. A. R. Pritchard, former founder, treasurer and general manager of the Rochester Stamping Company, of Rochester, New York, announces that he has severed his connection with that concren to associate himself with the Pritchard-Strong Company, of the same city. He will have supervision of the technical details surrounding the Pritchard-Strong Company's products, which will include lanterns, Hardware specialties and a varied line of practical and useful sheet metal house furnishing goods of the highest possible quality. Mr. Pritchard's experience of nearly a score of years in catering to the exacting demands of the American public in this line should be of much value to the new company.

COLDWELL LAWN MOWERS CARRY OFF THE HONORS.

At the Botanical Show held recently in Regent Park, London, the Coldwell Lawn Mower Co.'s exhibit received the very highest award, possible of achievement. They were placed on exhibition there, by E. C. Ross, the manager of the London office.

LAWN RAKES.

The Twin Rake Manufacturing Company's Rake plant at Ladoga, Ind., has been purchased by the American Fork & Hoe Co., of Cleveland, Ohio, so that they are now prepared to manufacture a general line of Lawn Rakes with which to supply the trade from the works at Ladoga as well as from the other works of the company.

THE CRONK AND CARRIER MANUFACTURING CO.

Have found it necessary to extend their plant and equip it with the machinery they need for their additional wants. In enlarging they intend to add premises that will give them a building 40x100 feet, and they hope when this is established to be able to keep abreast of their orders, which have tasked their efforts very much during the present year.

MICA IN NORTHERN AUSTRALIA.

In the northern territory belonging to South Australia a deposit of mica was discovered in the beginning of this year near Mount Johnson, 120 miles northeast of Alice Springs (in the center of Australia and under the Tropic of Capricorn). A London mica firm declared the specimens submitted to it to be of excellent quality, especially for electric construction, when their value is diminished by red and black streaks. Those pieces that are perfectly pure are also pronounced of high quality. They are very easily worked. The samples commanded prices from 2½d. to 7s. per pound. The lower prices, which since then have dropped another 15 per cent, were paid for plates 2 inches square, while the higher prices were paid for plates 8, 10 or more inches square.

J. STEVENS ARMS & TOOL CO. REQUIRE MORE SPACE.

The J. Stevens Arms & Tool Company, of Chicopee Falls, Mass., with the many new additions to their long line of Firearms and the increasing demand for their Stevens-Duryea Automobiles, have been forced to arrange for more floor space and are making many changes and additions to their large factories. The A. G. Spalding & Bro. Co., who manufacture golf, athletic goods, etc., here, have vacated the part of one of Stevens' large factories they occupied for many years, moving into their own plant, which they recently bought at Chicopee, thus giving the Stevens Company space for the Automobile department, which they have re-modeled and are building a large addition thereto, thus enabling them to concentrate the automobile work in one factory and devote the entire "Hill Plant" to the shotguns, double and single. The factories the Stevens Company now own and occupy give them 10¼ acres of floor space for their exclusive use, thus enabling them to continue increasing their output.

AN EXPLANATION.

The Avery Stamping Company recently received the following letter from one of their customers:

> "The writer found that one of the leading wholesale Hardware firms of your city was selling the retail Hardware trade in Indiana shovels at practically wholesale prices the past Winter, and was advised that they were made by your concern, and while we do not wish to press the matter, will state that if you have anything good in the way of prices to offer, we are certainly in position to handle them to advantage through our Mining Drill & Tool Department."

Mr. Avery, of this firm, offers the following explanation: "A Cleveland jobber has been for several years selling shovels under the name Avery Shovel Company, which has naturally brought about much confusion. This is the firm mentioned above. The shovels made by our firm, The Avery Stamping Company, bear the following brands: 'Never Break,' 'National,' 'Buckeye, 'Mohawk' and 'Knoxall.'"

ARKANSAS RETAIL HARDWARE DEALERS' ASSOCIATION.

A well patronized souvenir programme has been received from the Arkansas Retail Hardware Dealers' Association prepared to commemorate the annual meeting which took place at Little Rock, June 21st, 22nd and 23rd. A large meeting was brought together and a finely represented one as well. The proceedings of this convention were made unusually interesting by a full attendance of its members and a number of Hardware dealers of the State were added to the rolls. Manufacturers and jobbers were present with delegates representing them in greater numbers than ever. Among the noted visitors who graced the occasion with their presence may be mentioned Saunders Norvell, the hard working chairman of the Wholesale and Retail Joint Committee on Catalogue House Competition and M. L. Corey of the National Retail Association. A number of useful and original papers were read by the members and the general discussion was availed of by many, and much of an interesting and useful character was the result.

INCREASE OF IMMIGRATION.

The Department of Commerce reports that 521,320 immigrants have arrived at the various ports of this country in the six months ending April 30th last. This is an increase of nearly one-third over the arrivals for the same period last year. The arrivals from Russia continue to increase rapidly, and more than 95,000 have come from that country during this six months.

JAPANESE IN TEXAS.

The American consul at Tamsul, Formosa, notifies the State Department that Japanese newspapers are carrying the advertisement of a Japanese promoter, who is going to establish a big agriculture colony of Japs in the American State of Texas. The promoter, whose name is Kinzaburo Gaba, says he is going to start with about 49,000 acres of grazing land in Texas. He thinks the Japanese can succeed in America only at agriculture.

HISTORY OF THE BOLT AND NUT INDUSTRY,

A volume devoted to a complete History of the Bolt and Nut Industry of America has recently been issued. The author is W. R. Wilbur, of Cleveland, Ohio, and the book is dedicated to Isaac P. Lamson, president of the Lamson-Sessions Company, of Cleveland, who has long had the desire that the annals of the Bolt and Nut Industry of the industrial resources of the country, should be collated and compiled for the benefit of future generations, and carefully preserved; this was the particular reason for the labor of preparing this interesting volume. The book comprehends in its 400 pages of contents upwards of 50 illustrations, and includes the portraits of those prominent among the pioneers in this branch of industry. The author acknowledges the aid given him so generously by the leading men in the business. The book is very neatly bound in cloth, with leather backs and corners, presenting a fine appearance. A general summary of important periods in the history, the application of improved machinery, the issue of patents bearing upon the work, and a number of other important details complete the information contained in the volume, which must be regarded as a valuable addition to trade literature in a branch that deserves the interest given to it.

Editorial Trade Review

The time has arrived when a certain amount of consideration must be given to laying out the vacations for the working force of every leading Hardware establishment, and to do so intelligently gives those who stay home in the meantime a degree of work to help the store perform its duties. The time allotted to vacations is this year well earned; in fact, the seasons of hard work are so well defined throughout the year that scarcely any time can be said to be a loafing time, and that makes it thoroughly enjoyable when it does come, and we go forth to seek green fields and pastures new to recuperate exhausted energies and return refreshed.

The fact that the workers are expected to take hold on business and do a lot of extra work when called upon, without grumbling, makes employers look more readily about the employee's comfort; more favorable hours are given them during the Summer months in the way of closing, half holidays on Saturdays becoming the regular thing, making excursions over Sunday practicable; and they only too willingly avail themselves of them, and a willing disposition should and does make itself manifest in return for this voluntary consideration.

This is the season to expect slackened sales, and adding to stock is not a movement liberally indulged in during the months of June and July, when a more quiet time is looked forward to. Unusually good sales have been the rule during the Spring season just passed, and few will have occasion to find fault with the times, as the trade will be found in many instances exceeding any previous year. Some goods have figured largely in the movement, to a greater extent even than could have been calculated, even a 40 to 50 per cent. advance. This prosperous condition is evident in the demand for Lawn Mowers, Green Wire Screen Cloth, Cream Freezers and Hammocks, and more especially Steel Goods and Scythes and Snaths. The crops of all kinds bid fair to eclipse any previous season, with wheat, corn, oats and hay adding to the farmer's wealth to an unusual degree, and the fact of such a prosperous condition being certain, makes possible the fact that Fall trade will be especially brilliant in any event. The cotton crop is a problem, however, and the hope is for a shorter crop than last year, but time alone can demonstrate the conditions which surround this important staple.

Some of the Jobbers are getting ready for the semi-annual inventory, June and July in some sections being the dullest months in the year to encourage the work. Southern Jobbers are prone to this, as they want to estimate the profits, and then certify to them before the season gets far advanced. May their anticipations be realized to the fullest extent and no disappointment ensue!

Prices have been held up in a manner throughout the six months that acted favorably on the markets. No slumps from handling large stocks, though nearly all the lower quotations on wire nails, which have been kept steady remarkably well this season, being made by the jobbing fraternity for divers reasons, to tempt the retail buyer, the principal one.

THE CONSUMER'S END.

One of the difficulties encountered by the dealer in agricultural implements is the fact that, while the machinery he handles is much of it of a rather complicated nature, it goes into the hands of men who as a rule are not machinists. Most dealers try to overcome this by sending out a competent man to set up and start the machine. Of course, it works all right while he is there, to keep everything in first-class order. After he goes away and the farmer is thrown upon his own resources, the trouble begins.

Nine out of ten farmers will agree with the statement that the very point at which they have their most serious trouble is one the book of directions skips entirely or describes under names confusing to one who is totally unfamiliar with that particular machine. It is so very simple to the manufacturer that he overlooks a lot of things the user wants to know. Usually it is the little things that make the trouble, and they are always hardest to locate. More than once the writer has sat on the questioner's bench and figured on mechanical equations containing twice as many unknown quantities as a well regulated algebra will permit, while inwardly cussing the fellow who ought to have said less and told more.

It seems to be a different problem for the man on the roof to see things from the standpoint of the fellow just starting up the ladder. There is no question, however, but that a large proportion of the machines sent out on trial and which have been condemned are less at fault than are the men who give instructions as to their use. The fact that the expert can run the machine does not count with the farmer so long as he cannot run it himself; also he wants instructions covering the difficulties he himself encounters; in other words, he wants them written from the user's rather than the manufacturer's view-point.

One big general agent for agricultural machinery has undertaken to solve the problem for himself in a unique way and get next the troubles of his customers. With each machine sent out goes a card which, when properly filled out by a purchaser, is good for payment on repairs up to a certain amount (depending upon machine purchased). Before the card is honored it must be filled out with a statement of the customer's troubles, if any, in getting satisfaction out of the machine before accustomed to it; what point of the instructions seemed most incomplete; in short, a brief history of the buyer's trouble equation. By comparing these cards the dealer is frequently able to locate points wherein, under the directions sent out by the manufacturer, there is particular danger of dissatisfaction, and to guard against that point accordingly. In the case of a number of machines he has found enough complaints regarding some minor and overlooked part to warrant him in issuing supplemental directions of his own. Then, too, these cards are a wonderful help to the expert starter in showing him at just what points of management he should be specially careful to instruct the buyer. Often the point seems trivial and unimportant, but when these incoming cards from the frequency of their complaints show that there is a general demand for instruction at this particular point, the lesson gathered from the cards is counted more to be relied on than the pre-conceived opinions of the seller.

I am not at all sure but there would be less friction between buyer and seller, less frequent complaints, and fewer returned goods if dealers would generally adopt this conscientious effort to see things from the buyer's standpoint in other lines of the trade as well as in agricultural machinery.

CONVENTION ECHOES

JOBBER: When you sell goods to catalogue houses you bring about a demoralization of prices and damage seriously our business and that of the retail trade, therefore you should either refuse absolutely to sell to those houses, or if you do sell them, do so only under an iron-clad contract that they will maintain the price.

MANUFACTURER: I realize the force of your argument, and am willing to make a sacrifice by refusing future orders from these houses, provided I cannot make a satisfactory price maintainence agreement. But if I adopt this policy and you continue to demand all or at least the larger part of my goods under your special Brands, how am I to get to the consumer with the goods bearing my own brand, which I have been making for years and for which there is a great demand, unless I go direct to the retailer?

JOBBER: Going to the Retailer direct is not to be thought of. The Hardware Jobber is here to stay and all goods sold in the trade should be sold through him. We must have special brands if we have to make them ourselves—in order to meet competition and to control our trade.

* * *

As predicted—or, perhaps, it would be better to say, "As it was hoped"—the Hot Springs Conventions were something more than a "talkfest." After several years of beating around the bush, manufacturers and jobbers are really getting down to business in the effort to adjust troublesome matters. They have at last admited that the three main questions, *i. e.*, Special Brands, Catalogue Houses, and Price Maintainance, are closely related—so closely, in fact, that it will be difficult, if not impossible, to settle one question without at the same time taking care of the others. It is true that jobbers and manufacturers are still far apart in some matters, particularly on the subject of Special Brands; indeed, to one unacquainted with previous work it would appear that on this subject the parties interested are about as far from agreement as possible. To the mind of the writer, however, it appears that a long step in the right direction has been taken. Previous discussions on this subject have been made, mostly in open meeting, where no one on either side could be expected to take any thing related to a firm stand for any policy. At Hot Springs the discussions were carried on in close executive sessions and the policy agreed upon announced in later meetings. Considerable warm talk was indulged in in some instances, even to the intimating by jobbers that in the event of the cutting off of their Special Brand "privilege" they would turn manufacturers, and the suggestion from some, on the other side, that the Hardware business might not find it impossible to get along without the jobber.

The main argument advanced by the jobbers in support of their side of the question is that the handling of Special Brand goods permits them to make a living profit.

IN THEIR RESOLUTIONS THEY SAY:

"We plead guilty to the indictment contained in paragraph three of said report and desire to enter a confession in avoidance—confess that we have objected to using factory brands and avoid any criticism therefor, because some manufacturers allowed their factory brands to be handled and exploited at a margin not above the cost of doing business, hence we were compelled to seek shelter under brands of our own, which action we have found meets the endorsement of many of our customers."

In other words, if the policy of "Price Maintenance" was strictly adhered to by the makers of Hardware, there would be no need of Special Brands. Speaking of the charge that Special Brand goods cannot be uniform in quality, the jobbers' resolutions say:

"If, as charged in paragraph six, that competition in prices is the forerunner, or John the Baptist of deterioration in quality, may not the deterioration come under factory brands, because we claim that we are just as jealous of our reputation as any manufacturer can be of his—that we will not consent to a lowering of grade, and that if it is done the manufacturer is at fault in not giving us the grade contracted for.

"Paragraph seven can be held to apply to both factory and private brands, in that either or both may be of inferior quality and not be defective.

"We desire to controvert the declaration in paragraph nine and insist that the knowledge of who produces a certain article can in no wise concern a person who will use it, because in any case the retailer looks to his jobber to correct any evils, and the consuming customer looks to his retailer, hence it is not necessary to hand out a pedigree with every article sold.

"The reasoning in paragraph ten contemplates that a user will never be disappointed in anything except those under a private brand, and further, that the guaranty of a jobber is nil.

"In answer to paragraph eleven, we will say that the reputation of private brands will not become impaired if manufacturers are as careful in their manufacture as they are in their own, and we trust they will at least claim to do honest work."

A QUESTION OF HUMAN NATURE.

It would seem to the writer that the question of quality in Special Brands resolves itself into a question of human nature.

When a manufacturer takes a Special Brand contract at a price below that for which he would sell goods bearing his own brand, is it not human nature for him to attempt to make good the reduction of price in some way? Can he be expected to put into the ninety cent Special Brand article exactly the same quality and workmanship as he puts into the article that bears his own brand and sells for a dollar? It is not only human nature, but it is business—and cannot be justly called sharp practice or trickery.

Jobber "A" asks Manufacturer "B" for Special Brand Goods in order that he may undersell his competitor, Jobber "C," who may be handling "B's" goods bearing his factory brand. Is it to be expected by any one with full reasoning power that "B" will make Special Brands for "A" at a lower price than he charges "C" for the factory brand goods and put exactly the same quality in both? Will fair-minded persons accuse "B" of dishonesty if he reduces the quality of "A's" goods in proportion to the reduction in price?

The suggestion in the manufacturers' resolutions that unless present conditions improve "it will be impossible long to restrain manufacturers from selling through such channels as will carry their own best goods to the consumer," was barely noticed in the answering resolutions of the jobbers, their only comment being that these views "are pessimistic and that no such calamity awaits them."

Mr. Bogardus in his address on the Catalogue House question demonstrated conclusively the close connection between that question and Special Brands, and voiced the sentiment of practically every retailer in the country when he said: "I would cut out the growing evil of Special Brands." Mr. Norvell said in his address:

"IT IS A CASE OF WHO SHALL CONTROL."

That's the case exactly. Is the entire Hardware business of the country to be controlled by two or three hundred jobbers against the will of thirty thousand retailers and several thousand manufacturers? Mr. Norvell placed much emphasis on his statement that Special Brands had been the salvation of many small manufacturers who, in the absence of Special Brand contracts, would have been unable to get his goods on the market. Here again is the question of control. The small manufacturer brings out a good article; he attempts to interest the jobber and is met with the statement: "We have no time to work up a demand for new and untried things—but if you will create a demand or make that under our brand we will handle it." To the manufacturer with larger resources the same statement is made; he goes to the retail dealer direct and if, after the expenditure of much time and money, he establishes a demand and then fails to turn over the business to the jobber, what a hue and cry is raised!

The Special Brand discussion has come to a question of "Give and Take." Neither jobber nor manufacturer can be expected to make the whole sacrifice.

Let the manufacturer, by a readjustment of prices, if need be, make it possible for the jobber to handle his factory brand goods at a profit. Let him refuse to accept orders from catalogue houses or insist upon the maintenance of prices. And in return, let the jobber return to his original place in the trade, that of distributor, and give his whole attention to pushing to the front goods bearing factory brands with quality and workmanship backed up by the maker.

Secretary Corey, of the National Retail Association, exhibited with considerable pride a telegram stating that the Inland Empire Hardware Association at their meeting in Spokane, Washington, had voted to join the National Organization.

* * *

In the June 10th issue a slight error was made in the Special Brand Resolutions, caused by the dropping out of two lines of type. It occurs in the latter part of the third paragraph from the last, which in our report reads as follows: * * * "We invite this consideration with the assurance that we certainly can and do furnish similar goods with special brands."

This should read: "We invite this consideration with the assurance that we certainly can and do furnish goods bearing our standard brands fully equal in quality, and certainly at as low prices as those at which we will furnish similar goods with special brands."

* * *

THE FALL CONVENTIONS.

There seems to be, among the members of the two larger associations, a feeling somewhat akin to dissatisfaction with the idea of holding the November Convention in Washington. At the Atlantic City meeting last year it was voted to hold the 1905 convention at the country's capitol apparently without giving careful consideration to that city's facilities for entertaining the 600 or 700 members and guests who would very likely be in attendance. There is certainly no one hotel or even two in that city with capacity large enough to take care of so many people; and if the conventioners are to be distributed among a half dozen hotels, it will be practically impossible to secure a proper attendance at any of the meetings. Furthermore, the argument is advanced that Washington is so filled with attractions that it will be extremely difficult to secure united action on either entertainment or business matters, and it would be a case of "every man for himself." A prominent official of one of the associations stated at Hot Springs: "We can't afford to go to Washington unless every one can be well cared for, and if we cannot secure at least four hundred rooms in not more than three hotels located near together, I will be emphatically opposed to going there."

Virginia Hot Springs has been mentioned in case the place of convention is changed, and considering the success of the recent meeting at that place, it is expected that many of those who attended the Southern Jobbers' Convention will favor such a change.

"NO FLIES HERE."

In detailing in a recent issue the many virtues appertaining to the use of "No-Flies-Here," the new insecticide, manufactured by the Preservaline Manufacturing Co., 41 Warren Street, New York, we neglected to mention the fact that high-bred horses are particularly susceptible to the attacks of flies, for being of particularly fine stock they are high strung, nervous and not used to hardships like the ordinary, common dray horse. It is also a fact not quite fully known that most blacksmiths when they shoe such horses, before treating them apply No-Flies-Here, and thus the horse stands quieter while being shod. We have seen other blacksmiths apply it to the horses after they have been shod to protect them after they have left their hands. Millionaires having the finest stables may not have any flies in their stables, the horse is just as susceptible to being attacked by a horse-fly after he has left the stable as the commonest animal, while if treated with No-Flies-Here the horse is protected. The same remarks apply to registered cattle, particularly Jerseys. These should be protected and produce better results if treated with this insecticide, for it is known that if a cow is nervous or irritable it does not give the full quantity of milk, nor as rich and healthy a milk. Nothing annoys cattle so much, and particularly at milking time, as flies, but an application of No-Flies-Here alleviates all that. Many a humane person has applied it to his dog to protect the animal from fleas, for as it keeps insects off it has a tendency to cause the fleas to leave the dog. Whenever No-Flies-Here is applied to dogs for this purpose, they should be kept outside for about 24 hours, so that the fleas do not scatter in the house.

"WHERE ARE THE BUSINESS MEN?"

The *Saturday Evening Post*, Philadelphia, raises a very pertinent question when it asks: "Where Are the Business Men?" In explanation it says:

"What the business of this country is suffering from is the decline of the business man. We have too many 'captains of industry' who look at business simply as a means to dividends; who know nothing of the practical workings of the industries they 'organize' except the showings on condensed balance-sheets; who think the business man is merely a plodding, routine fellow. These 'captains of industry' are very daring and dazzling—so dazzling that crowds gape at them as at a successful bandit in Sicily. But they are very dangerous also.

"Aristotle said: 'The best fertilizer for the field is the heel of the farmer.' And this is equally true of all the other fields of industry. We shall find it out from painful experience presently. The financiers, with their palaces and their showy families, with their vast enterprises 'floated' by a few hours' work under the shadow of the New York Stock Exchange, cannot take the place of the business man—no, not even with the assistance of the great lawyer to flim-flam the moral code."

These observations will strike the average business man as being very true, for nearly every man in the commercial world has now had the opportunity to observe at close range the operations of a "promoted" industrial combination, which is usually called, for short, a "trust." It is becoming very apparent that these combinations are, as a rule, governed by men who may be excellent bankers or lawyers; but who are not such shining successes as manufacturers and merchants. With such men dominating the Board of Directors, men are engaged as leading officials, ranking over the manufacturing and sales managers, who may know the difference between a purchase-money mortgage bond and a debenture bond; but frequently do not know whether the goods produced by the combination are sold to farmers or jewelers. In other words, the directors and officers, those who are responsible for, and should direct, the management of the business, are not business men, but are simply skilled in creating and marketing stock and bond novelties. Therefore, it is not surprising that these large combinations so often come to grief.

SICKELS & NUTTING COMPANY'S NEW CATALOGUE.

Sickels & Nutting Company, 35 Barclay Street and 40 Park Place, New York, N. Y., have just issued a complete catalogue of their Hardware stock for the convenience of their patrons, and giving a good idea of what is necessary to run an up-to-date Hardware Jobbing business. It is a cloth-covered volume of the standard catalogue size, well printed on excellent paper and of about 340 pages. As they say: It is not intended to represent their full line, but is issued more especially to call attention to seasonable goods, their various specialties and the many lines for which they are New York agents, while at the same time soliciting as heretofore the mail orders, in the filling of which this catalogue will be found of great assistance. They state that they are pleased to buy for their customers any goods that can be purchased in New York, which they regard as the greatest market of the country, in order that purchases of the wants may be condensed and the shipment of the various items made together, thereby saving expense and trouble. While enumerating for convenience the various leading brands of goods they handle, representing a number of the leading manufacturers of the country, they also call attention to the large line of Specialties distributed under their own names with whose quality they are familiar and can strongly recommend. They are also New York agents for the following manufacturers of well-known lines of goods: Walden Knife Co.'s Pocketknives, Joseph Elliott's Razors, Wiss Shears, Scissors and Snips, Batcheller & Son's Steel Goods, Shelbe & Klemm Heavy Forks, Iowa Farming Tool Co.—Farm and Garden Tools, North Wayne Tool Co.—Little Giant Scythes and Grass Hooks, Derby & Ball Scythe Snaths, Peck Edge Tool Co.'s Hatchets, Cortland Door and Window Screen Co., Union Steel Screw Co.'s Wood Screws, Cycle, Popular Hercules and New Easy Lawn Mowers, Eagle File Co.'s Files and Horse Rasps, Simond's Crescent Ground Cross-cut Saws, Gifford-Wood Co.'s Ice Tools, The Samuel Winslow Skate Manufacturing Co.'s Ice Skates, Chase Horse Blankets and Robes, Acme White Lead and Color Works, Norwalk Lock Co.'s Locks, Ford Auger Bit Augers and Bits. In addition to this special catalogue, they also issue a separate and complete Builders' Hardware Catalogue, which they will be pleased to send upon application.

TIN PRODUCTION OF THE WORLD.

(From the Chamber of Commerce Journal, London, May, 1905.)

Recent German returns show that the tin production of the world amounted to 93,093 tons in 1903, an increase over the preceding year of 2,916 tons. According to these returns, 75 per cent of all tin comes from southeastern Asia, the following being the estimated output of the several colonies and countries: Malacca, 54,797 tons; Banca and Billiton, 20,060 tons; Bolivia, 9,500 tons; Australia, 4,191 tons; Cornwall, 4,150 tons; all other places, 395 tons. Although the production of tin has increased regularly from year to year, the output is not sufficient to supply the demand, as the stock on hand in the most important tin markets has constantly decreased. The United States consumes 43 per cent of the total tin production; Great Britain, 28 per cent; the other European countries, 22 per cent, and India and China together, 7 per cent. It is surprising that the United States, which during recent decades has made such enormous progress in exploiting its mineral resources, is not yet a factor in the production of tin, although considerable deposits are said to exist in South Dakota, Wyoming and in North and South Carolina. A year ago one tin mine was opened in South Carolina.

GETTING AFTER BUSINESS

By AMOS

Dobbs & Weaverling, of Peru, Nebraska, are looking after the trade in their territory in a manner that leaves little chance for the getting of much business by the Mail Order Houses. In a letter recently received from this firm they give as their plan of action the following:

Complying with your request of a few days since, I herewith enclose you the copies of a few of the advertisements we have been issuing recently in our campaign against the catalogue house. You will observe that we have not been backward in referring in plain terms to names, catalogues, etc. We have met with some criticism from our friends in doing this, for the reason that they think that in so doing we are bringing into too much prominence the concerns we are opposing, resulting to their own good.

We know that some people advocate the policy of never mentioning these competitors, but we are as free to talk of them to our customers when the occasion offers as they are to mention us. In doing this we show that we art not "whipped into silence" by the thought of the catalogue and its prices. This has a winning effect on the customer.

In the advertisements referred to we have made it a point to be as plain and honest as we know how to be. We have found them to be attractive and effective, bringing many inquiries, with a goodly percentage of sales resulting.

Our policy has been to print our prices along with the prices of same or similar articles found in the catalogue, with the freight added. We have not left it for the customer to figure out how much the freight will be. That would not pay. We do that ourselves, and then are prepared to stand back of our figures.

We always make it a point, when a customer comes into our store inquiring for a certain article, and then quoting us a catalogue price, to get the catalogue (we always keep the current number of the catalogue of several leading concerns on our desk), have him select the article, at the same time volunteering to get it for him at the price named, saving him at least the cost of remittance, providing he will wait patiently until its arrival. In the meantime, we use every effort to sell him the article we have on hand. If a saw, we point out the reputaion and the quality of a Disston over an inferior one quoted, or if another article, we follow the plan of talking quality. However, if he will not buy what we have, we take his money, forward it for him with the order to his catalogue house. We send the order to these places only when we cannot secure the same article, or with his consent as good a one, from our regular jobbers.

Now, what is the result of the above operation. To some it may not be apparent. However, it has been beneficial to us in two ways. First, we have probably prevented him from ordering other articles in order to make up a shipment; second, we have succeeded in convincing him that we sell any brand of goods as cheaply as the people who claim to control its entire sale, thus creating in the purchaser's mind as to the claims of the mail order concerns. At the most, we have been out only a few cents for remittance, which will probably make us dollars within the year.

In the following we reprint the text of two recent advertisements of this concern; these ads. were well displayed as they appeared in the local paper, each of them occupying eight inches double column. There is a ring of honesty about them that, connected with the prices quoted, should certainly bring results of the satisfactory kind:

MORE PRICES.

	S. R. & Co. Price.	Our Price
35c201 cross cut saw, 5½ ft.	$0.83	$0.80
Same 6 ft.	.90	.90
35c206 " " " 5 ft.	1.50	1.50
Same 5½ ft.	1.65	1.60
35c226 one man " 4 ft.	2.05	2.00
Same 5 ft.	2.53	2.50
Fulton saw 35c304, 26 in. hand	1.25	1.50
Fulton " " 28 in. "	1.43	1.40
Fulton saw 35c305, 28 in. rip	1.45	1.40
Fulton " " 30 in. "	1.66	1.65

DO YOU WANT A FULTON SAW?

If so come in and we will get you one and save you some money, at least the cost of remittance. CAN WE DO IT? Well, you bet. Last week we took up a whole page of the Pointer in telling you about our furniture department and how we could save you money over Sears Roebuck & Co. or any other mail order house. That article made us money, but there are a few people who thought we could not say as much for our Hardware department. WE CAN. FOR INSTANCE take page 43 of the catalogue. They give you a long distance spiel about "trust goods" meaning Disston goods (which by the way they no longer can supply by reason of broken contracts) telling the merits of their inferior goods—Fulton Saws, etc.

DOBBS & WEAVERLING.

Lack of space prevents the reproduction of a full page story from this concern, that recently appeared in *The Peru Pointer.* Part of the page is devoted to a comparison of the prices on a long list of goods the remainder being given up to a red hot arraignment of Catalogue House goods and methods; the following is one of the illustrations given:

For instance a man came into our store sometime ago. He wanted a certain well known saw. He also wanted a horse clipper. We had to sell the saw to him at a loss in order to meet the catalogue price. He also kindly allowed us the full catalogue price of $8.75 for the clippers, and here is the way the deal looked to us when completed:

Catalogue Price		Our regular price	
Saw	$1.35	Saw	$2.25
Clippers	8.75	Clippers	5.00
Total	$10.10	Total	$7.25

What he offered

Saw	$1.50
Clippers	8.75
Total	$10.25

We lost 90 cents on the saw, because he had seen the catalogue, but he offered $2.85 too much for the clippers because he had seen the catalogue.

This incident proves what? It proves that the catalogue seeks to deceive its readers by "cutting the life" out of the prices of the goods that are well known and have an established price, and then charging an extortionate price for goods which the public knows practically nothing of.

GASOLINE STOVES

In their latest catalogue, our Chicago friends, SEARS, ROEBUCK & COMPANY quote some prices on gasoline stoves. We never heard of the make they handle. These goods are an unknown quantity, having neither father nor mother. Here are some prices:

CATALOGUE PRICES.	OUR PRICES.
No. 22C540 2-burner stove $3.13. With freight added ..... $3.46.	2-burner "Quickmeal" a stove with a record. $3.50
No. 22C541 3-burner stove $4.25. With freight added $4.75	3-burner "Quickmeal" Nothing better is made $4.75
No. 22C544 3-burner stove with step attachment. $7.00. With freight added ..... $7.75.	3-burner "Quickmeal" with step attachment. $7.75

The reputation of "Quickmeal" goods is an enviable one and has been rightfully earned. They are absolutely the best at any price and we recommend them as such. Don't send your money to some mail order house that does not and cannot furnish such goods. They claim to sell cheaper but do they? Well, we think not. Compare the prices above and you will buy of

DOBBS & WEAVERLING.

E. M. Austin, Litchfield, Ill., is another Hardware dealer who does not seem to be worrying any about Catalogue House competition. In a recent letter he writes "There's always something

Digitized by Google

doing at Austin's. We advertise in the principal papers throughout Central Illinois which results in almost daily shipments to twenty surrounding towns." Every month Mr. Austin issues a circular usually 18 by 22 inches in size; about 4,000 of these are printed for house to house distribution and for posting. The goods shown in each circular are carefully selected with the idea of bringing to the front goods likely to find the most demand; a liberal supply of cuts are used—good ones—and prices are published in profusion. Litchfield is evidently blessed with at least one printer who knows his business for the style used on the Austin circulars is of the best. A great deal of matter is contained in each circular, but it is so displayed as to be read with ease.

* * * * * *

The *Herald* of Mt. Jewett, Pa., recently printed an editorial on the Catalogue House Question, which after reviewing the upgrowth of these houses and their methods of doing business, closes with the following:

The remaining point to be determined was, how the catalogue houses succeeded in securing the great volume of business, which by their own admissions, had turned, $6,000,000, profit to the coffers of a single concern within the period of one year.

The catalogue houses employed no traveling representatives, but this saving was much more than offset by the expense incurred in putting out millions of catalogues, which in the aggregate cost beyond what would be required to maintain a small army of traveling men, nor did they enjoy the advantage of personal acquaintance with their patrons, yet, here was the undisputed fact that millions of money was flowing to them each year, to their enrichment, and the manifest injury of the purchaser.

It required but the slightset investigation to make absolutely certain that printer's ink was their sole reliance, and at that, through one of the poorest of mediums—the cheaply printed, homely catalogue.

Wise merchants have been prompt to take advantage of this enlightenment, and to-day the live country paper is assisting the local merchant to refute and confound the claims of these "get-rich-quick" concerns, and retain to each respective community the proportion of the world's wealth where it belongs—where it has been earned."

* * * * * *

Jed Scarboro says some mighty good things when he gets to talking about advertising; among the "Ginger-isms" emanating from him are the following:

More things are damned by hot air than by faint praise.

Bunch your efforts. Strike early, often and everlastingly but be sure that you are striking every lick, in the same spot. Sheet lightning is showy, but it never sets barns on fire. It is the compact, concentrated brand that shatters things in its path.

The only way to hold old business is to hustle for new business. People like to do business with a growing house. Lack of growth suggests dry rot, stagnation. The only sure way to make things come your way is to go after them early and often.

If your advertising hasn't force enough to make people think as you want them to think, it is because your belief in your business is not as strong as that which you are trying to inspire in others. There is a certain ring to earnestness and honesty which cannot be counterfeited. Strong talk without a sound backing of fact in time, has a flat "plunk" to it like a plugged watermelon.

People, most generally, buy the things that have reputation back of them. Good advertising helps to make a good reputation for anything that is rightfully entitled to it.

AMERICAN WORKMEN.

In a recent address at Leeds, Mr. John Moseley, head of the Moseley Industrial Commission of Great Britain, composed of twenty-three English gentlemen who visited the United States last year to learn of the industrial methods of this country, said:

"America is forging ahead as a manufacturing country by leaps and bounds. Few who have not seen for themselves realize this fact. Americans have leaped, in a generation, from an agricultural community into the first place as manufacturers. America possesses, within herself, all the soils, climes and products that go to make a great nation. She has always realized what a boon education is, and many of her successes must be attributed to that.

"We in England manufactured for the world, and in our blind ignorance imagined that because we were the sole manufacturers the rest of the world was unable to manufacture. Now we are having a rude awakening. America, by means of an enlightened people, has brought science to bear upon industrial problems and has forced herself into the front rank. America realizes that merit meets with its reward, and metes out to the men the same treatment we do to our dumb animals. If one wants to get the best out of a horse, he has to stable it well. The same rule applies to human beings. If one wants to get the best out of a workman, he must treat the latter with consideration, pay him well and give him due reward for his labor.

"In America suggestions are welcomed, and when a workman has anything to say he is not snubbed. It is an inspiration to cross the Atlantic and see what progress is doing for the betterment of humanity. If we are to do good and prosper in the future, with our enormous possibilities we must take a leaf out of America's book."

THE SAN FRANCISCO TRADE.

On top of the office desks of San Francisco's publicity men of the retail Hardware and jobbers a copy of the June 10 issue of HARDWARE was the all around sight the writer met with this seventeenth of the month while on his rounds for trade news, and a goodly number of expressions were heard regarding the papers' extra finish touch, and its interesting write-up of the Virginia Hot Springs Conventions of the American Hardware Manufacturers' Association and the Southern Hardware Jobbers. Regarding things of special interest to the Pacific Coast, one said:

"Continue to report the situation still brilliant; that crop prespects as a rule are firm and prices for almost all farm and orchard staples high. The export trade of this port is making a most excellent showing. During May, last month, the exports were $5,075,000, against $5,758,000 in April and $2,706,000 in May, 1904. Most of this good business is with China and Japan. For the first eleven months of the current fiscal year the exports from San Francisco were $58,868,000, against $44,955,000 during the corresponding period in 1904. This Pacific Coast exhibit of general exports this year from San Francisco makes 1905 the record breaker. But our city is making great strides in other directions. Building operations are simply immense. New sky-scraping office buildings are rising on all sides, while vast areas of dwellings are going up, both here and across the bay. The eye is startled by the vastness of these operations and the question at once arises, 'where are all the people to occupy these buildings coming from?' The answer will probably be found in the reduced railroad passenger rates, which are bringing into California and San Francisco homeseekers by the thousands. Certainly the Pacific Coast cannot complain of dullness in any direction."

President Bennett of the State Retail Dealers' Hardware Association returned a few days ago from a month's sojourn in Southern California, feeling much better than when he started on the trip. Of course he had heard before his departure a report that had passed current hereabout to the effect that organization fellowship within the Southern Retail Hardware and Implement Association was anything but delightful, all owing to price-cutting on the part of some of the associations members, a case quite similar to that which two years ago very much disturbed the spirit of comradeship within the San Francisco Retail Hardware Association. The better state of feeling that accompanies State President Bennett on his homeward trip was owing to the fact that before leaving Los Angeles he saw the Southern California Association troubles nicely adjusted.

INDUSTRIAL PRESS ASSOCIATION.

SCIENCE IN FARMING.

To the Agricultural Department is largely due the credit of making of the American farmer a scientific agriculturist. Science is revolutionizing farming in the United States. There are 9,000,000 acres of heretofore worthless alkali soil in the West which will soon have been converted into a fertile domain valued at $600,000,000. The application of science is entitled to the credit. Science has discovered that beans, peas and alfalfa will grow in the wornout soils of the country and, besides being in themselves profitable, will so enrich the soil with nitrogen that other crops may afterward be raised. Wornout soils are being given new life through the application of scientific cultivation. Science is teaching the farmer how to combat disease of the soil and of live stock. It is teaching him how to adapt crop to soil. It is relegating the old-fashioned farmer, where he has not the intelligence and enterprise to keep up with the procession. Science is getting him out of the rut which his forefathers followed when the land was new. There are still farmers who sow and reap, feed their cattle and allow their farm implements to stand out in the open weather from Fall to Spring, in the same old way, but this class is growing smaller. Science—the Agricultural Department, agricultural colleges and the farm institute—has taught the farmer differently. There are some who are too shiftless and too careless to take advantage of the teaching, but they will soon be out of the way, and the sons who succeed will join the procession of progressive farmers, will adopt scientific methods and assist in bringing American agriculture up to the ideal standard.

HELPING THE DEALER.

Very effective work in interesting the conuumer in their machines is being done by the H. F. Brammer Manufacturing Co., Davenport, Iowa. Advertisements of their "O. K." Washing Machines are appearing in the following publications.

No More Wash Day Backaches.

The **OK** gets your clothes clean without rubbing them to pieces. Scientific construction enables the O.K. to do your work quicker and better than any other machine on the market. Being the only Rotary Washer with revolving steel ball gearing, it operates so easy that

An Eight Year Old Child Can Run It

while you're hanging up the clothes. There is no escape of steam from the O. K. Washer, therefore, no resulting sickness. Thousands in use. We urge that you see the O. K. at your local dealer's store.

	Circulation.
American Agriculturist	100,365
New England Homestead	41,185
Orange Judd Farmer	71,735
Farm and Home	365,808
National Stockman and Farmer	55,000
Ohio Farmer	100,000
Michigan Farmer	53,000
Farm Life	127,404
Home and Farm	104,072

Wash Hour, Not Wash Day

Look forward to getting your clothes dirty because with an O. K. Rotary Steel Ball Gearing Washer it's easy and a pleasure to get them clean in an hour's time. Our O. K. means satisfaction. We guarantee it and then stand behind our guarantee.

The **OK** **Cleans Without Rubbing the Clothes to Pieces.**

The only Rotary Washer with revolving steel ball gearing. Inside of the tub corrugated like a washboard. The wheel turns right or left, pin wheel or dasher reverses automatically, turning clothes back and forth through the hot soap suds. It does away with the wash day backaches. Go to your dealer's store and ask to see it.

All of this advertising refers the reader to the local Hardware store, it should materially increase each dealer's business in these machines. As a further help to the Hardwareman this firm furnishes dealers with electrotyped ads and cuts of the "O. K." machine. Two of these ads are shown herewith; they are attractive in design and strong in argument and will prove of much assistance to those dealers who will run them in their local papers.

* * *

North Brothers Manufacturing Co., of Philadelphia, Pa., have for years made it their practice to supply retail dealers, free of charge, with electrotyped ads for use in local papers, circulars, etc. We illustrate herewith a few of the ads describing their "Twin Freezers." The design work is especially appropriate and the text right to the point. At this time of the year every Hardwareman who handles the "Twin Freezers" should be using these ads in their home papers.

American Twin Freezer

Is fitted with

four scrapers.

Two are at work all the time, which insures constant freezing. And likewise accounts for the uniform smoothness of the different desserts made in the two sections of the partitioned can.

It's the only freezer that makes

2 flavors-1 freezing

See the freezer at

American Twin Freezer

is the only one with a

partitioned can.

This partition extends above the top of the can, pressing the lid tightly, thus preventing one dessert tasting of the other by reason of contents of one section getting into the other.

It is the only freezer that makes

2 flavors 1 freezing

See the freezer at

American Twin Freezer

—the only freezer in which

two different frozen desserts

can be made at the

same time

Any two flavors of ice cream, an ice and an ice cream, a sherbet and a custard, etc.

No tiresome crank to turn, either, simply rock a lever to and fro.

See the freezer at

American Twin Freezer

is a brand new invention. Saves bother and work.

No crank to turn.

Sit comfortably in a chair, and, while reading a book,

rock a lever to and fro

Even the smallest child can operate it.

It's the only freezer that makes

2 flavors 1 freezing

See the freezer at

OUR BRITISH LETTER.

(From Our Special Correspondent.)

London, June 13, 1905.

MR. CARNEGIE SURRENDERS THE PRESIDENCY.

The annual conference of the Iron and Steel Institute was recently held in London. During the last two years American industries have been kept very prominently before the Institute, in consequence of the presidential chair having been occupied by Mr. Andrew Carnegie, that eminently successful and prosperous American iron master, who, although always proud of being born a Scotchman, ever retains his strong love for the land in which he lived for so many years, and in which he built up so colossal a fortune. In vacating the presidential chair Mr. Carnegie spoke of the common fellowship between the English speaking races, and expressed a fond hope that the United States of America and Great Britain, would, in the future, be brought into still closer connection. The new president of the Institute, Mr. R. A. Hadfield, of Sheffield, in accepting the position, and thanking the Institute for the honor done him, referred to the opportunities for research in the United States, and raised the question whether the young men of Great Britain were given the same opportunities afforded to their fellow students in the United States. Mr. Andrew Carnegie, who has done so much to promote scientific research, at the meeting of the Institute, handed the new president a further substantial cheque towards the research fund.

ENDEAVORING TO SECURE A SHARE OF THE GAS STOVE TRADE.

There were several reasons which tended to prevent British ironmongers from holding their own in the gas stove trade, when the sale of gas cookers and gas stoves as first introduced. For many years the development of the industry was carried out by the enterprise and energy of the gas stove manufacturers, many of whom, in conjunction with the more enterprising ironmongers among their agents, held demonstrations showing the advantages of cooking by gas, over the older forms of open ranges and close-fire kitcheners. The gas companies soon realized that by an extended use of gas cookers the increase in the consumption of coal gas would be enormous and would consequently increase the dividends of their shareholders. It was found impossible to create a popular demand for gas cookers and gas heating stoves, in consequence of their initial cost. Many persons would gladly have availed themselves of the advantages of cooking by gas had the stoves been procurable at lower rates, and they would more readily have taken up the use of gas heating stoves had the cost been less. Ironmongers could not see their way to sell stoves on any deferred payment system, consequently the gas companies were forced into the business, and in many instances additional share capital has been created in order to supply gas consumers with the necessary stoves; the companies find it a profitable investment to buy stoves and sell them on hire purchase agreements, and also at almost nominal rates of hire. The introduction of these systems whereby the householder could obtain the use of gas cookers and heating stoves at nominal rates completely drove the retail ironmonger off the field. Still further, he gradually lost a considerable amount of his trade in gas fittings, many of the powerful gas companies taking up that branch of the business also; consequently, the ironmongers' workshop was robbed of much of its legitimate business. And during the last few years the consumption of gas fittings and materials in ironmongers' workshops has gradually become less and less. Quite recently a movement has been commenced by which it is hoped the retail ironmongers in Great Britain may recover some portion of their lost trade. Already there are several groups of ironmongers working in conjunction with local gas companies, under arrangements whereby satisfactory commissions upon sales of stoves and introductions for the hiring of gas cookers are being paid. The Ironmongers' Federated Association have recently had the question of further development in this scheme of cooperative trading brought under their notice; the latest outcome of which is a meeting of the representatives of the Croydon Gas Company (this company supplies an important suburban district of the Metropolis) and the members of the Croydon Ironmongers' Association. The result of the negotiations has not yet been made known but it is confidently hoped that some workable scheme, which will materially benefit the local ironmongers, will result.

IN WHAT WAY WILL ASSISTANTS' ASSOCIATIONS AFFECT EMPLOYERS?

Is a question which just now is being considered very carefully by many British ironmongers. The movement which began in Liverpool a year or so ago appears likely to be followed in other towns and there is every probability that before long ironmongers' assistants' associations, in many of the principal towns in England, will be formed. It is not anticipated that they will remain friendly organizations, through which members of one trade may meet together on one common platform to discuss the matters connected with the business in which they are engaged, and by mutual discussions become better acquainted with the different phases of the Hardware industry. The discussion of matters of trade interest will widen their knowledge and lead them to understand better the difficulties under which their employers carry on their business affairs. Careful enquiry among the ironmongers in Liverpool, who have had an excellent opportunity of testing the probabilities of the working of assistants' associations, show that the majority of the broad minded employers feel that the formation of associations will not only improve the assistants themselves, but will tend to benefit those by whom they are employed. The wider the knowledge the better the assistant will be worth his salt. It is quite possible that some of the more advanced may take the opportunity of using an association platform in order to agitate for higher wages, but it is not anticipated that any evil results will be felt. There is no doubt that in the retail ironmongery trade, where comparatively few assistants are employed in one establishment, individual selection will always be retained, and a different level of remuneration must exist in different establishments, all of which are carried on under varying conditions. The prospects of greater developments in the formation of assistants' associations are looked forward to with pleasure both by employees and employers.

PRICE MAINTENANCE INCREASING.

The policy of price maintenance is taking deep root in this country. Its growth—in the Hardware trade—has been slow but steady. There are now many specialties, which British Hardwaremen can safely handle, knowing full well that they run no risk of being undersold by other tradesmen. The advantages of price maintenance, not only among proprietry articles, but also among goods of every day sale, is now fully appreciated by retailers, and to a certain extent customers recognize that there is some satisfaction in purchasing price maintained articles, as they are not troubled by competitive prices, there being one standard price, below which it is impossible to procure these price maintained goods. The incandescent gas trade has offered many inducements to price cutters, so many mantles and burners of inferior makes being constantly launched upon this market by continental makers. The Welsbach Company have long maintained their prices, and other manufacturers of known repute have been enabled to dictate the prices below which their goods may not be sold. The general secretary of the Ironmongers' Federated Association has been able to achieve another price maintenance success in arranging with George Bray &Co., Ltd., for the price maintenance of their incandescent gas burners. The general excellence of all this firm's productions, and the high stand they take in the Hardware trade, will, doubtless, cause English Hardwaremen to do their utmost to support this step, knowing they will be able with confidence to recommend Bray's price maintained burners. The principal English lawn mower makers have long agreed to fixed prices, and this week Thomas Green & Son, Ltd., of Leeds, consented to sell their machines, in future, subject to an intimation upon their invoices to the effect that no machine shall be sold retail at a greater discount than 15 per cent. off list prices. These friendly schemes between makers and retailers make the traders "lives worth living," and help them to bear the strain which the competition of large household stores and catalogue-houses puts upon them. Speaking of lawn mowers reminds me that the catalogue of the Coldwell Lawn Mower Company, who have a branch depot in London, has been very well received in this country. It is an artistic production, and does great credit to American lithography and art printing. The artistic panel which this enterprising firm have also recently published and circulated among their agents, both in the United States and in Great Britain, is an exceptionally fine piece of work, and wherever displayed cannot fail to be productive of excellent results. The English branch of this firm are justly proud of their excellent machines, which are the outcome of the original invention of Thomas Coldwell, a native of Stalybridge in Lancashire.

POPULAR TALKS ON LAW.

Copyrighted by Wm. C. Sprague, President of the Sprague Correspondence School of Law.

Defence of One's House.

In our last talk we discussed Self-Defence. Akin to the right of a man to defend himself against an unlawful attack is the right to defend his home. The constitutions of twenty-seven of the States provide that one has a natural right to protect his property. "A man's house," says the old law, "is his castle, and he may take such steps as are reasonably necessary in the defence thereof against unlawful intrusion." Indeed, the law regards an assault on a man's habitation for a felonious purpose as an assault on his person or on the person of an occupant.

One is never bound to retreat from his house, and in general may even kill to prevent a forcible and unlawful entry. The exercise of the right to protect one's home must not exceed the bounds, however, of defence or protection, so that the kind of force that one may use depends somewhat on the nature of the attack and the purpose of it. Where an entry is by force and the purpose of it is to commit a felony, killing, if necessary to prevent it, is excusable, and any one in the house, even a lodger, is justified in the protection of the house by any means found necessary. One who has a reasonable fear that a felony is intended need not wait until the assailant gets within the house, but may meet the intruder on the threshold and use means fatal to the assailant if necessary to protect himself from death or great bodily injury. If the assailant, however, can be repelled otherwise, and the one assailed does not use any other means of defence, the latter is not justified in killing. If the intruder flees the person assailed is not justified in pursuing and committing an injury.

It is held that the term "house" includes a place of business or a rented room occupied as a bedroom. When one is attacked in the yard the courts hold that he should before taking life retreat into the house, if there is a reasonable opportunity so to do. Where one has peaceably entered the house the owner or occupant is not justified in using force to expel him, without first demanding or requesting that he leave; but where the entry was by force a preliminary request is not necessary before using force in ejecting the intruder. Where one or more persons assemble about a house and threaten to break in, the occupant is not justified in shooting until he gives warning.

A man was held to be justified in killing where on returning home at night he found the door fastened against him, broke it open, entered and in a fight that ensued killed the intruder. It has been held that the act of entering at a window in the night will not excuse the use of a deadly weapon without first warning the intrduer to desist. Where a house is occupied in violation of law, as for gambling purposes, the occupant, or owner, cannot justify force used in putting out a person from a gambling room for disorderly behavior.

Decisions are pretty well agreed that a man cannot defend his real property, other than his dwelling, to the extent of taking life; but in a Michigan case a building thirty-six feet away from the dwelling, in which the owner's servants slept, was declared to be a part of the dwelling. As to personal property, one may not take life in defending his rights, save where the effort is to deprive him of his property by a forcible felony such as robbery or burglary.

SPREAD OF THE AUTOMOBILE INDUSTRY.

(From Consulaire Verslagen en Berichten, Amsterdam, April 13, 1905.)

According to a statement by the administration of direct taxes, the number of automobiles in France in 1903 was 19,886, or, in round numbers, 20,000. This is a marked increase over the preceding year. In 1899, when the first census of these vehicles was held, their number was 1,438; in 1900 it was 2,354, in 1901 5,286, in 1902 11,000, and in 1903 19,886. The greatest number in any department is 4,510, in the Department of Seine. As automobiles are an article of export and of great utility to the less wealthy class, it is hoped that a drop in price will popularize their use.

One incident of the industry is the decrease in the number of horses. From 1903 to 1904 the number of horses in Paris dropped from 91,016 to 90,147, a difference of 869. In 1901 there were 133,892, making a difference of 43,000 as compared with 1904. At Lyons the same thing was observed, although there the underground railway may have contributed. The 20,000 vehicles represent a value of about 200,000,000 francs.

During the first two months of 1904 automobiles to the value of 2,012,000 francs were imported, as compared with 640,000 and 512,000 francs for the same periods in 1902 and 1903. Although there has been an increase in the imports, still it bears no comparison with the exports, which for the same two months were 42,836,000 francs in 1904, 31,455,000 francs in 1903, and 17,941,000 francs in 1902.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED MAY 29, 1905.

383,449. STEP LADDER. J. Eiben, Oconomowoc, Wis
383,516. TACK OR NAIL HOLDER. W. H. DePuy, New York, N. Y.
383,544. PIPE WRENCH. J. Rose, Franklin, Mass.
383,638. LOCK. G. B. M. Foust, Pittsburg, Pa.
383,643. DOOR CHECK. A. Johnson, Camillus, N. Y.
383,683. WASHING MACHINE. J. H. Allen, Keyser, W. Va.
383,829. LAWN MOWER. J. V. Rowlett, Richmond, Ind.
383,831. EXTRACTOR FOR COFFEE POTS. J. C. Slaughter, St. Louis, Mo.
383,833. FOLDING COOP OR CRATE. T. J. Stille and O. Q. Stille, St. Louis, Mo.

PATENTS EXPIRED JUNE 5, 1905.

383,855. TONGS. A. Biber, Des Moines, Iowa.
383,896. LAWN MOWER. J. W. McClellan, Middletown, Ohio.
383,927. LAWN MOWER. F. M. Waters, Springfield, Ohio.
384,003. WEATHER STRIP. J. Thompson and J. A. Stephens, St. Joseph, Mo.
384,043. SCREW DRIVER ATTACHMENT. L. Kiblinger, Jackson, Ia.
384,102. SPRING HINGE. G. W. Warner, Freeport, Ill.
384,103. SPRING HINGE. G. W. Warner, Freeport, Ill.
384,108. LOCK. E. S. Winchester, Boston, Mass.

PATENTS ISSUED JUNE 6, 1905.

791,513. BUCKSAW FRAME. S. Toles, Galt, Canada.
791,516. WASHBOARD. B. F. Tyler, Coshocton, Ohio.
791,541. HAND CLOTHES SPRINKLER FOR LAUNDRY USES. C. Danforth, Oberlin, Ohio.
791,597. WASHING MACHINE. M. C. Wilkin, Decatur, Ill.
791,599. COMBINATION TOOL. J. A. Abolt, Eldon, Iowa.
791,619. COAL HOD ATTACHMENT. T. A. Girardot, Coldwater, Ohio.
791,644. WRENCH. H. A. Paquette, Fairmount Heights, Md.
791,658. VEGETABLE CUTTER. B. C. Steffens, Milwaukee, Wis.
791,669. SAFETY LOCK. J. S. Brandon, Cheyenne, Wyo.
791,756. WASHING MACHINE. J. H. Dorval, Wildrice, N. D.
791,809. MONKEY WRENCH. T. Olson, Pittsburgh, Pa.
791,814. WRENCH. W. M. Pitzer, San Francisco, Cal.
791,881. SAD IRON. J. Cook, Paterson, N. J.
791,917. COMBINATION TOOL. E. D. C. Koeth, Doerun, Mo.

PATENTS EXPIRED JUNE 12, 1905.

384,234. LANTERN. J. Charleson, Brooklyn, N. Y.
384,238. BOLT. C. Diebolt, Canton, Ohio.
384,311. WASHING MACHINE. J. H. Doub and F. Robbins, Walnut, Kan.
384,411. COFFEE STRAINER OR FILTER. T. Babin, Houma, La.
384,487. IRONING MACHINE. T. S. Wiles, Albany, N. Y.
384,553. SASH FASTENER. R. C. Elliott, Prairie Creek, Ind.

PATENTS ISSUED JUNE 12, 1905.

792,603. DOOR FASTENING. R. C. Catron, Westfield, Ill.
792,150. SHOE POLISHING STAND. W. M. Morton, Kansas City, Mo.
792,202. CHIMNEY CAP. E. C. Dean, Economy, Pa.
792,213. WRENCH. S. B. House, Chatsworth, Cal.
792,244. DOOR LOCK. B. E. Westlin, Arlington, N. J.
792,374. PLIERS. W. C. Wolford, Confluence, Pa.
792,436. LADDER. E. A. Meacham, Riverside, Cal.
792,480. COMBINATION TOOL. J. D. Wages, Atlanta, Ga.
792,487. WRENCH. J. W. Woodard, Allendale, S. C.
792,560. WRENCH. W. H. F. Tenny, Syracuse, N. Y.

PATENTS EXPIRED JUNE 19, 1905.

384,607. SASH HOLDER. I. Brokaw, Litchfield, Ill.
384,634. HEEL FOR BOOTS OR SHOES. C. H. Martin, Bridgeport, Conn.
384,739. CAN OPENER. J. Blakeslee, Story City, Iowa.
384,743. WRENCH. B. T. Bryan, Evansville, Wis.
384,879. HOE. S. H. T. Tilghman, Worcester County, Md.

PATENTS ISSUED JUNE 20, 1905.

792,595. SASH FASTENER. C. L. Holland, Boston, Mass.
792,679. SCREW DRIVER OR SIMILAR TOOL. J. Swan, Seymour, Conn.
792,678. FIRE POT FOR COOKING STOVES. C. M. Stroud, Hastings, and A. J. Murdock, Minneapolis, Minn.
792,719. TOOL HANDLE. H. E. E. Molkenthin, Coeur d'Alene, Idaho.
792,802. PLATE SHEARS. C. Swan, Corry, Pa.
792,814. WINDOW SASH. G. Burkhart, National Military Home, Ohio.

EXPOSITION AT MILAN ATTRACTING ATTENTION.

To Be Held in 1906 and to Be Made of International Importance—Italian Chamber of Commerce Working for Its Success.

The Italian Chamber of Commerce in this city is working zealously to attract the interest of the American industrial world to the Exposition at Milan in 1906. It is the intention of the directors of the exhibit to make it one of international importance and no labor or expense will be spared to this end.

Following as it does the great French and American fairs, the reputation of Italy as a collector of art and scientific treasures is at stake. The king has taken a personal interest in the affair and all the energy and patriotism of the Italian people will be bent to make the Milan Exposition rank both high in importance and interest and broad in scope.

It was the original intention to hold the exhibit this year as a fitting celebration of the inauguration of the Simplon tunnel, but as the completion of this great work has been delayed, the date of the exposition has likewise been deferred to 1906.

The fair which will be held in the town park at Milan will open in April and close in November and the world is asked to compete. The sections embrace "Carriage by Land and Water," "Aeronautics," "Providential Institutions" and "Decorative Arts." The "Fine Arts" section is to be altogether national.

TO HAVE DECIDED CHARACTER.

In formulating programmes for the exhibition and in inviting the inventors, industrial manufacturers and artists of the whole world to take part it is intended each branch shall have a decided character. The undertaking is intended to exhibit the most prominent features of modern art, to reveal the multifarious progress of industry and to put in evidence the various attitudes of the various people.

The products to be exhibited are to be selected according to their technical perfection and originality, both with respect to the artistic excellence and to the applications of science.

"Such ends could not be reached," says the executive committee, "if the ordinary production of goods, invading the show rooms of the forthcoming exhibition, transformed them into overloaded stores."

They have therefore so framed the rules as to govern the differences between the distributing commissions and individual exhibitors.

Italy is going to show that her arts and industries are proceeding with a firm and rapid step in the way of progress, enlivened as they are by a powerful spirit and led by an experienced and vigilant sense of modern life. In the competition of all civilized nations she has the right to claim a conspicuous place, owing to the excellence of her artists, the knowledge of her men of science, the culture of her manufacturers, and the geniality of all her children.

SPECIAL APPEAL MADE.

A special appeal is made to all shipbuilders and manufacturers of nautical machinery and appliances to take part and the committee expresses the hope that it may induce the Italian nation to take a deep interest in the solution of the important maritime problems and diffuse among the inland portion of the population an elevated and broad conception of the navy.

Besides the exhibit of means of communication and transport by land and water and the artistic display of fine arts, visitors will find another sight, not less interesting and new, in the working hall for Industrial Arts. This hall will exhibit the manufactures of industrial arts in full action with their latest means of production, and in awarding prizes the jury will consider the intrinsic merit of the products and the technical merits of the system by which the products exhibited have been manufactured.

SPECIAL RULES ADOPTED.

In the organization of the different exhibits the committee has decided to establish the following rules in addition to the general rules.

Machines not furnishing a "finished or perfect product" can be admitted to the working hall only in so far as they form an integral part of any manufacturing installation. Thus for instance a dynamo or a pump by itself could not be admitted, but if he belongs to a whole, as for instance, to a cotton mill, its admission will be allowed.

New technical processes for the manufacture of various articles will be welcomed.

Hand-work will be admitted, provided it be applied to artistic productions.

Besides the exhibition of machines, apparatus, etc., a show of samples will be allowed.

As to rewards, the final judgment will be determined by the novelty of the exhibits. Special prizes, in money, regulated by special programmes, will be fixed in categories for new machines. The admission of trifling objects should be avoided, but the committee will gladly meet any exhibitor's demand, provided the exhibits are of industrial interest.

ORIGINAL WORKS ADMITTED.

In all the branches of industry to which art in its different forms can be applied, only original works will be admitted, though imitations of old styles will be excluded but elements of any style and time may figure in a show of modern decorative art, provided the artists and manufacturers succeed in transforming them, so as to meet both the aesthetic and practical test, because the individuality and originality of the products exclude the servile imitation inspired by merely commercial aims.

A committee of selection will judge, according to a special regulation, whether each product sent to the show of decorative art has an original character, and whether the artistic and industrial features are harmoniously combined in it.

The committee will open, near the modern one, a retrospective exhibition of industrial art, to illustrate, by means of well-selected models, the progressive development of artistic forms as applied to certain branches of industrial production, as, for instance, the history of the manufacture of dishes, glasses, chairs, swords, or window glass.

A unique feature of the Milan exposition will be a selection devoted to what the committee aptly calls "Providence." "The most advanced countries," it says, "are those which have given the greatest development to providential institutions and have devoted care and study to the culture of social economy.

CANNOT NEGLECT PROVIDENCE.

An exhibition which is a review and proof of all the conquests of human activity cannot neglect providence, which represents so prominent a part in the manifestations of modern life. Side by side with the marvels of science and labor a show of providence offers to the general attention the means of protection and defence by which the physical and intellectual existence of the working men is to be surrounded, insured and approved; a show of providence is intended to be a field of study and competition in the research of all guarantees that can protect both the personality of the workman and the productive energies of civil society."

"A new problem," the committee continues, "rises in the field of providence and forces itself upon the minds of economists and legislators, that of the insurance of workmen against enforced leisure. In this field Italy expects to gather from foreign institutions, and legislation the elements from which she will derive the solution of the problem, and increase, by means of further legislative expedients and of new forms of free providence the security of her workmen. This is the reason why it was thought well to ask foreign countries to compete in this special department."

FOR MARITIME EXHIBITS.

A special section will be reserved for models, plans, methods and tackle pertaining to maritime fishing, which will include fishing materials and gear, corals, sponges, pearls, mother-of-pearl agriculture, fish culture, oyster culture, preserved fish, fish oils, salt works and similar industries.

In consequence of the change of date of the exposition from 1905 to 1906 the following modified regulations have been adopted:

Applications must all be handed to the executive committee by May 31, 1905. Exhibits must be delivered within the precincts of the exhibition accompanied by certificates of admission between December 15, 1905 and February 1, 1906; excepting exhibits in the section of fine arts for which special rules are laid down. Machinery, heavy and bulky goods requiring motive power, foundations, erection or decorations must be delivered by December 1, 1905. Exhibitors whose exhibits have not been arranged by February 28, 1906, will forfeit their right to the space allotted them. The committee is entitled to remove, at the dilatory exhibitor's expense, all arrangements which shall not have been finished in the allotted time.

*

THE AMERICAN LAVA COMPANY, Chattanooga, Pa., have mailed us one of their private mailing cards, 11x7 inches, advertising their "Lava," of which they present a number of illustrations showing the many purposes to which it may be put. It is a material possessing strength, hardness and splendid insulating properties, which is unaffected by heat or acids and is worked cheaply and accurately. It is sawed, turned, milled, drilled, threaded and otherwise machined into any shape with accuracy and uniformity. If you use Lava, they can make inducements in quality and price, if given a chance to quote. If you don't use Lava write now for free samples.

RECENT TRADE PUBLICATIONS.

GEORGE W. PITKIN CO., Chicago, Ill., have sent us a copy of their latest Paint Catalogue, No. 54. It is neat and attractive in design and is provided with a small brass chain and ring in the upper left hand corner by which it may be hung and kept handy for ready reference. They include in this catalogue all of the products made by them, illustrating the labeled packages in most instances, in order to give the trade and their customers generally a correct idea of the manner and style in which their goods are put up. All jobbing goods have been purposely omitted in this catalogue, as they have endeavored to restrict it to a size that will permit the ready finding of any article. Particular attention is called to the time guarantees on Pitkin's Premium Paint and Pitkin's Barn Paint which appear on each package, and are given in their catalogue. They state: "We make good our guarantee without quibbling whenever complaints are properly brought to our attention." Catalogue may be had upon request.

NORTHROP-COBURN & DODGE COMPANY, 40 Cherry Street, New York, N. Y., manufacturers of Northrop's Metal Ceilings, have sent us a copy of their handsomely illustrated catalogue, No. 8, in which they present a number of their designs, shown in appropriate combinations suitable for all classes of buildings. They will be pleased to advise you regarding the pattern best adapted for your ceilings or the cost of same, but they advise that unless you are near enough for their representative to call that you send a diagram of the room showing its size at ceiling line, mentioning its use, height and size of cornice desired. Two rooms can be furnished at a less cost than one. When these particulars are received, a blue print copy of the ceiling plan will be sent to the customer, showing the arrangement of the patterns, etc. These ceilings have all the improvements in construction and refinement of design that long experience has proven desirable. Besides ceilings, they show patterns for side walls, stair wainscot, tiling, patterns for bathrooms, etc. Their catalogue is well worth having, and may be obtained for the asking.

KLIP-KLIP COMPANY, Rochester, N. Y., have printed a series of circulars, envelope size, with which they are exploiting both the Klip-Klip and Klip-Klip, Jr. Klip-Klip, they claim, is the best combination of a nail trimmer, cleaner and file now on the market, made of solid German silver. Costs 25 cents, and they state, will last 25 years. Klip-Klip, Jr., is a complete set of manicure tools, combined in one small instrument. It is made of the finest steel, heavily nickeled and is guaranteed to give entire satisfaction. Your money back if you want it. Klip-Klip Junior costs 15 cents, and will last 15 years. Send for a set of these attractive circulars and learn more of these necessary little manicure instruments.

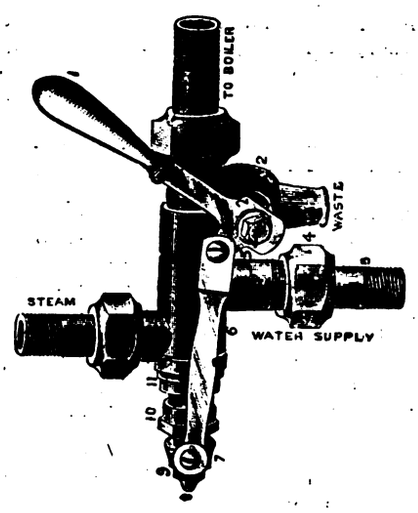
AMERICAN SHEET AND TIN PLATE COMPANY, Pittsburgh, Pa., have made us the recipients of two of their latest catalogues, one business and the other pictorial. The business one is a "Roofing Catalogue," in which they treat exclusively upon the metal building material manufactured by them, and thereby to better acquaint the trade with their facilities. The demand for their various formed products has grown so enormously that the necessary additions to their equipment, to properly care for the increased trade, have brought their annual capacity to approximately 100,000 tons. The information contained in this little booklet will be found useful and valuable to the trade in general. The Pictorial Catalogue is a handsome production and has been prepared with a desire to give the architect and the builder, the roofer and the property owner an idea of the many processes through which a piece of ore must pass before it becomes the base of an M. F. Terne Plate. The book is designated "From Underfoot to Overhead." They have carefully omitted statistics in this book, because they wish you to consider its reading a pastime, not a study. However, the terms used, and the descriptions given, are accurate to the letter, and photographs have been added that a clearer understanding of every process can be gained. Any one at all interested in metal will find pleasure in watching the progress of a piece of ore, while the tables and general information contained in the booklet will be of great value to the man who estimates or does the work. Their aim is to prove that "The Terne which turns the elements" is all they claim it to be. Either or both the above books will gladly be sent upon request.

FLETCHER, TERRY & COMPANY, Forestville, Conn., have issued an illustrated price list of their patented interchangeable and standard styles Glass Cutters, circle cutters, etc., in presenting which they express their belief that they offer a superior article both as to finish and durability. Their cutters are made on newly designed and specially constructed machinery, for this class of work. They claim that their method of making cutters produces a far better quality of cutters than any other makes. They call especial attention to their superior finish on holders. Their patented interchangeable device is a model of simplicity. It combines both strength and durability, yet it is sold at a price that makes it the cheapest dozen glass cutters in the market. They use only the best grade of steel, hardened uniformly, and thoroughly tested to a glass cutting edge. They have had years of experience in making glass cutters and state they feel safe in making the assertion that their cutters are equalled by few and excelled by none. Send for pamphlet.

F. D. KEES, Beatrice, Neb., are the manufacturers of Gossett's detachable suspension hinge for hanging screens and storm windows, and they have recently issued an envelope size pamphlet catalogue exploiting the same. They do away with nails, buttons, hooks or common hinges. They allow the screens to swing open at the bottom for the removal of flies—the storm windows for ventilation. The same pamphlet illustrates their Revolving and Aajustable Flower Stands and Window Flower Pot Brackets. They have also sent us a folder illustrating their corn huskers made in seven styles, all of which are deservedly popular; the latest is the Kees Korn King. This has a self-cleaning double hook placed in center of hand, held firmly in position by three straps and buckles; does not interfere with the free motion of the hand and fingers. A broad, heavy wristband supports the wrist. For detailed information regarding their products, write for circulars.

DIAMOND SAW & STAMPING WORKS, BUFFALO, N. Y., in their new and attractive envelope size catalogue, illustrate and describe their popular line of "Sterling" hack saw blades and frames. The blades are made for use on railroad and structural work, power machines, hand frames, brass founders' use, for cutting mica and slate tubing saws, for bicycle manufacturers and repair shops, etc., etc. Of the frames they illustrate nine different styles, each superior in its use. For further information, prices, etc., write to manufacturers for catalogue, which will be gladly sent.

FORT WAYNE ELECTRIC WORKS, Fort Wayne, Ind., are distributing a catalogue of "Summer Comforts." The book is in long envelope size and for fine appearance is exceptional, and must be seen to be appreciated. The cover is skyblue, with gilt and green ornamentation. The book is well printed in blue ink on heavy white coated paper, and is illustrated throughout. They state: "Progressive thinkers agree that favorable surroundings have much to do with the success of any undertaking. Work and play alike are made easier and more enjoyable by agreeable environs. Electric fan motors supply, in the heated Summer days, more real comfort to humanity than any other one modern convenience." Wood fan motors, they state, supply so much of this comfort that they are themselves known as Summer Comforts. The little book mentioned above is their exponent. Send for a copy.



PEARSON JACK COMPANY, 64 Federal Street, Boston, Mass., manufacturers of the Pearson Car Replacing Jack, Pearson ratchet pulling jack, Pearson ratchet pulling and pushing jack, Pearson ratchet journal jack, Goodwin break beam clamp and the U. S. car pusher, in their May, 1905, catalogue, illustrate and describe the same in a very comprehensive manner. The company call especial attention to their car replacing jack, which they state at the present time is in use on 225 steam roads in the United States, and also among the leading railways and tramways of the world. It is made with socket bearing head and foot. They claim "It is a valuable addition to a wrecking equipment; a useful tool for trestle and bridge work; a handy device in shops for placing cars on center; works at an angle with same force as if working perpendicular; weight under perfect control." Capacity, 50 tons per pair; weight, 85 pounds each; length, closed, 28 inches, and hoist, 14 inches. Send for catalogue of Specialties.

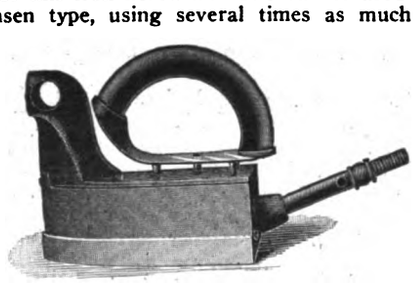
NEW GOODS AND SPECIALTIES.

EXCELSIOR BOILER FEEDER.

N. A. Watson, Erie, Pa., is engaged in manufacturing the Excelsior Boiler Feeder, of which we present an illustration and which is used for lifting water from well or creek, heating and forcing into the boiler when the engine is standing, as well as running, and no adjusting for varying steam pressure; it is operated by the use of one lever, any one can manipulate it. It is claimed to possess a number of advantages over other appliances made for similar uses, viz.: Its simplicity, its independence

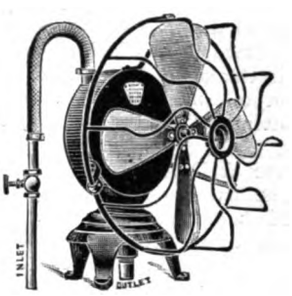


EXCELSIOR BOILER FEEDER.

of the engine; dispenses with heaters; to friction, all parts being stationary; less liable to get out of order than a pump; and, if desired, will feed water through a heater. Its simplicity of construction is remarkable, as it differs materially from other machines for a similar purpose. It has but one barrel and the most simple arrangement of tubes for lifting and forcing water that can be obtained. The user, with a common wrench, can remove the union on feed line, and at once remove the forcing tube, which is the most liable to get obstructed by dirt; he also can remove packing box on the end of machine and draw out the steam rod, when he can at once see through all parts of the machine, as they are all in line. No movable parts in its internal construction to cut or wear; no valve, no springs; tubes or jets are placed there solid on a firm seat or shoulder; but they can be moved and replaced with new ones when necessary, by the use of a common wrench and removing the union on feed line.

THE I. M. E. GAS-HEATED SAD IRON.

The Central Manufacturing Co., 196 State Street, Binghamton, N. Y., is placing upon the market through the Hardware trade an entirely new gas-heated sad iron for domestic and steam laundry use, and for either natural or artificial gas. We give an illustration of this iron herewith. The burner used is of an improved Bunsen type, using several times as much air as gas,



THE I. M. E. GAS-HEATED SAD IRON.

so that the expense of heating is merely nominal. The manufacturers explain that there is no escaping flame, nor is the use of the iron accompanied by any smoke, soot or smell; as the flame is entirely enclosed, the bottom of the iron is always clean and ready for use. The weight of the iron is about six pounds, and its length six and one-half inches, its width four inches. The handle is of semi-circular pattern, and never gets hot, being protected from the body of the iron by an air space. It can be made hot enough, the makers say, for ironing a wet table cloth, or cool enough for a cambric handkerchief.

THE "ARCTIC" WATER FAN.

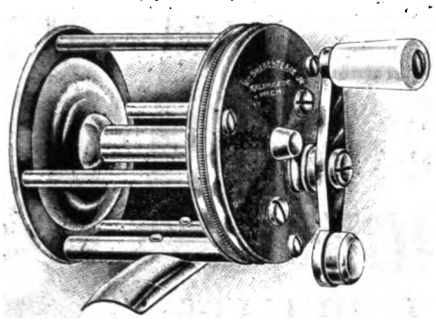
The A. Rosenberg Company, Baltimore, Md., are the manufacturers of the Arctic Water Fan which is a 7 inch water motor with a 12 inch fan calculated to run with any pressure at normal cost to operate. Furnished complete with 12 inch (4

THE "ARCTIC" WATER FAN.

blades) brass fan and brass guard; can be attached to any spigot or water pipe; can be supplied in plain or decorated finish; weighs 12 pounds net, 22 pounds, boxed. Send for circulars of Adjustable Fans.

HUTCHIN'S ROLLER SWING.

The American Machine Co., Wilmington, Delaware, are adding to the usual Summer specialties of the Hardware trade by manufacturing Hutchin's Roller Swing, an illustration of which is given herewith. It is described as being an ornament to any lawn or porch, and, furnished as it may be, with their patented tilting canopy top, a shady place is always within reach. It is



HUTCHIN'S ROLLER SWING.

strong and well made, carrying four adult passengers. It is provided with a lower platform having two steel concave tracks on each end, and on this is placed the foot platform, which is hung on four flanged wheels. The upper platform carrying the seats has on each corner a convex steel track riding upon the circumference of the flange wheel of the foot platform, giving an easy motion like the ball bearings of a bicycle. The Swing is made of hard wood and the finest of steel, handsomely finished in red and black; 33 inches wide and 8 feet long. Actual weight of swing alone, 170 pounds, and with canopy attached, 190 pounds. The illustration shows four ladies playing a game of cards, for which it is well adapted, and shows the use of the table made as an addition to the swing. This table can be attached to any of their swings. The upright posts are set in a socket. The table is fastened in any position by simply turning a thumb screw. It can be lowered for children or raised to a reasonable height. It is handsomely finished, and when not in use the table turns down between the standards and can be lifted off the sockets and put away. Write to the manufacturers and get what further information they have of this salable specialty.

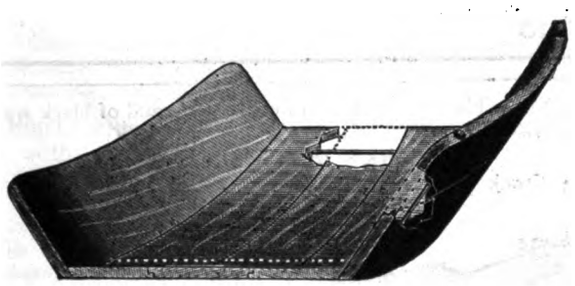
THE UNIVERSAL REEL.

William Shakespeare, Jr., Kalamazoo, Mich., is the maker of the Shakespeare Universal Reel shown in the accompanying illustration, which is a handsome quadruple mutiplying reel, built



THE UNIVERSAL REEL.

like a watch, from finest steel and brass, and nicely nickel finished. Every part and piece is accurately made to a thousandth part of an inch by highly skilled watchmakers. Easily taken apart by simply removing three screws, and all parts exposed and easily cleaned. This reel is one of the strongest, yet lightest, reels made, and it spins with marvelous ease and absolute silence. They are made to be retailed at a moderate price that commands attention wherever they are introduced. For further particulars write to the manufacturers as above.

THE MAJESTIC TRAY.

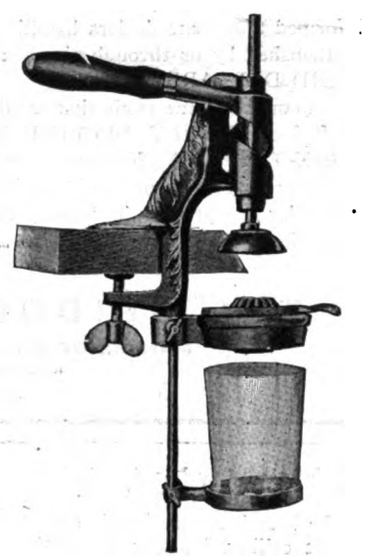
The Michigan Wheelbarrow & Truck Co., Saginaw, Mich., are placing upon the market through the Hardware and Supply trade a full bolted wood wheelbarrow tray, upon which the company was allowed a patent November 29, 1904, which has usefulness as well as novelty embodied in its construction. This tray is made with the idea of overcoming the troubles which so many

THE MAJESTIC TRAY.

users of wheelbarrows complain of, in finding the front and bottom of the wheelbarrow check or split before it has been long in use. The bottom of the Majestic tray, as the above tray has been named, is made of three pieces ship-lapped; these pieces are held together with two steel rods, which pass through the bottom of each, holding the pieces firmly together. The front of the tray is made of two pieces ship-lapped and has two ¼-inch bolts extending through at each end, holding the pieces together. They are now making this tray with the bottom rods extending through the front and back boards; this keeps the front intact and exempt from any springing away from the bottom, and makes good the claim of the maker, that it is the strongest wood tray upon the market.

THE BROWNIE SPRING ICE SKATE.

The Brown Spring Ice Skate Co., Webster, Iowa, are the manufacturers of the Brownie Spring Ice Skate, which is made in



THE BROWNIE SPRING ICE SKATE.

all sizes and styles, suitable for ladies as well as gentlemen, a cut of the latter style being given herewith. This is the Screw and Heel Lock Lever Spring Skate and is made in four grades; the best with blades of welded steel finely finished; the next grade with blades of special rolled solid steel. These are the two best styles. The toe and heel clamps are simultaneously adjusted by a thumb screw lever, shown by the dotted lines and securely locked by aid of same at back of the heel. It is referred to as being a strong and durable skate for the purpose, and one that can be quickly fastened without removing the gloves from the hands. All parts can be removed and cleaned and it is fully warranted. It is claimed by the makers that the spring attachment makes skating a greater pleasure and saves strength. For fancy curves, heel and toe skating, and for fast work forward and backward, it has no equal. The spring being located at the forward part of the skate, increases or softens the action of the skater as he or she ends the stroke in accordance with the will of the skater; in making the stroke the spring will yield to forward part of foot, allowing the toe to go over with a soft and easy feeling, thus relieving the ankles and legs from the strain experienced with the old-style rigid skates.

AMERICAN LEMON SQUEEZER, No. 50.

Logan & Strobridge Iron Co., New Brighton, Pa., make another Lemon Squeezer possessing some of the characteristics of the "Premier," which we showed up last issue; it is called the American Squeezer, No. 50, and can be attached readily to

AMERICAN LEMON SQUEEZER NO. 50.

bench, table or bar. The metallic parts which come in contact with the juice are heavily coated with pure tin to prevent corrosion; has an adjustable glass holder and a handle that is heavily polished nickel or oxodized copper, and they are packed in a strong box or six in a case. This squeezer is strongly recommended by the makers especially for bars, hotels, restaurants, clubs, soda fountains and similar places.

THE BARD ADJUSTABLE BUSHING.

The Bard Adjustable Bushing, made by the Armstrong Manufacturing Company, of Bridgeport, Conn., has some new features which will recommend it at once to all users of Bushings, as well as to the trade in general. This Bushing is fitted with hardened jaws, which are moved to and from the center by means of a cam plate, and by fastening the plate with the thumb screw, the jaws are firmly held in any desired position. The adjustable jaws make a perfect center for the pipe or rod, fit closely around the same and insure the cutting of a straight thread. When necessary a crooked or drunken thread can be cut with this bushing as easily as with a ring bushing. When once attached to the die stock it can always remain there. It does away with the necessity of carrying a number of loose ring bushings, and saves the time now lost in hunting for and changing the bushing for each size of pipe. The winding of tin or paper around pipe or rod is avoided. This Adjustable Bushing can be furnished to fit the Genuine Armstrong Stocks and Dies No. 1, No. 2, No. 2½ and No. 3.

DETROIT RIFLE No. 11.

The Detroit Rifle Company, 12-18 West Atwater Street, Detroit, Mich., are calling the attention of the Hardware and Sporting Goods trade to their new Rifle No. 11, which for simplicity, conciseness and strength as a medium weight firearm, is quite complete. The barrel, 22 inches in length, is made of special steel

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

IMPORTANT NOTICE TO ALL DEALERS

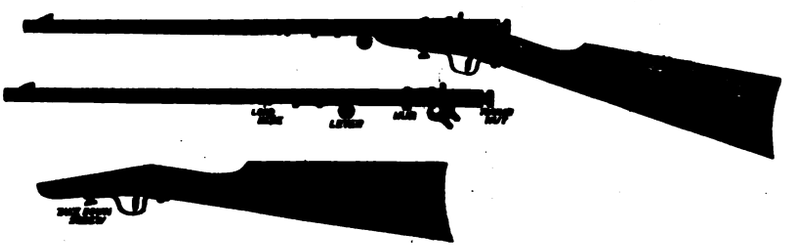
The List Prices of Jap-a-Lac Must be Maintained at all Times

We are informed that some dealers handling JAP-A-LAC have been so unmindful of their profit that they have cut the retail prices as established by us through six years of constant advertising and at an expenditure of more than TWO HUNDRED THOUSAND DOLLARS.

We wish to announce to the trade that we do not sanction any cutting of the list prices and

WE SHALL POSITIVELY DECLINE TO SELL JAP-A-LAC TO ANY DEALER WHO DOES NOT AT ALL TIMES MAINTAIN THE PRINTED LIST PRICES ON ALL SALES TO THE CONSUMER.

We shall be very glad to be promptly advised of any case where JAP-A-LAC is sold or advertised to be sold to consumers at less than the regular list prices. The co-operation of all the dealers and jobbers is earnestly requested that full protection may be afforded to dealers who are entitled to and shall receive every assistance from us to reap all the benefit of our extensive advertising.



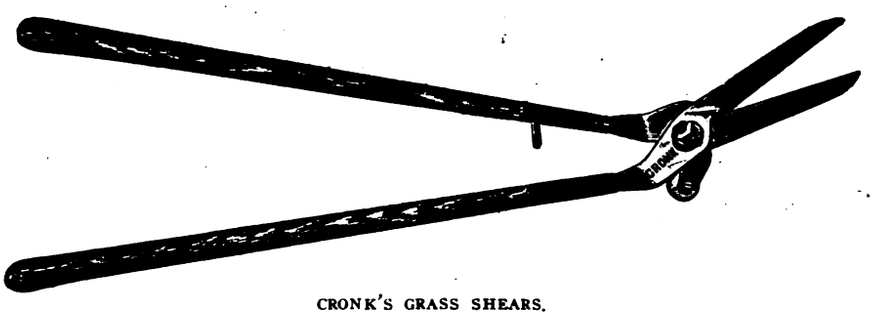
THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

ADDRESS: 641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

of superior quality, is accurately bored and rifled. Has the lever action, with positive and rapid shell ejector. The cartridge cannot be fired until the breech mechanism is closed and locked. It it chambered for .22 caliber, long or short, rim-fire cartridges.



DETROIT RIFLE NO. 11.

Either black or smokeless powder can be used. Smokeless powder will not foul the barrel as quickly as black powder, and the rifle will retain its accuracy after repeated firing. It has a knife-blade front sight with adjustable rear peep sight. The take down principle is very simple and convenient; merely turn the take down screw of hub, when the barrel can be separated from stock, making a package easily carried; to put together, this action is reversed. All metal work on the Detroit Rifle No. 11 is finished Rifle blue, the stock is 19 inches long and of black walnut finely finished.

CRONK'S GRASS SHEARS.

The Cronk & Carrier Manufacturing Co., Elmira, N. Y., are introducing to the Hardware trade a new Grass Shear which is a desirable addition to the tools and appliances of the up-to-date gardener, and is destined to meet with an extensive sale, for trimming around fences and paths. We present an illustration

CRONK'S GRASS SHEARS.

of it. The blades are made of high quality tempered steel, and the shears are provided with a roller to guide it and assist its use. Further particulars can be had by addressing the manufacturers as above.

REVIEW OF THE MARKETS.

WIRE NAILS: The Wire Nail market is on the average reported in good condition, with the usual rumors of slight concessions to large buyers by small mills. The larger mills find the stocks yet in Jobbers' hands have an influence on direct orders, but prices are held firmly. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers.....$1.80
Carload lots to retailers..... 1.85

New York.—A satisfactory demand has been felt by the Jobbers of late, especially from outside points that get their supplies in this city, consequently the market continues in firm condition, quotations being as follows: Single carload, $1.99. Small lots from store, $2.05.

CUT NAILS: No extraordinary business is reported in the Cut Nail market, which is confined to positive requirements. Quotations are as follows:

Carload lots $1.80
Less than carload lots to jobbers..... 1.85
Less than carload lots to retailers..... 1.95

f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York.—The local business continues unchanged and business only moderate. New York quotations are as follows:

Carload on dock.....$1.94
Less than carloads on dock..... 1.99
Small lots from store.....$2.00 to 2.05

BARB WIRE: The market is unchanged. Mill orders are by no means large, most of the Jobbers having a fair stock for the end of the season. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: A moderate demand is the prevailing state of the market. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots.....$1.65
Retailers, carload lots..... 1.70

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

AXES: A meeting of the Axe Association was held in this city recently, when the announced advance of 25 cents, to go into effect July 1st, was confirmed, which will make the price of Single Bit Axes, base weights, $6.75 per dozen, and Double Bit Axes, $8.75 per dozen. It is also intimated that a further advance of 25 cents is likely to be made October 1st.

BINDER TWINE: General market quotations f.o.b. Eastern factories, may be given as follows:

White Sisal (500 feet to the pound)..... 9½ @ 9¾
Standard (500 feet to the pound)..... 9½ @ 9¾
Standard Manila (550 feet to the pound)..10½ @ 10¾
Manila (600 feet to the pound).....11½ @ 11¾
Pure Manila (650 feet to the pound).....13 @ 13¼
Less than carload lots quarter of a cent extra.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12¼ to 12½
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8¼

Less ¼ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....51 cents per gallon.
In lots of 5 barrels or more.....50 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE PHILADELPHIA TRADE.

The proverb says "It is the unexpected that happens" but it is not always so in business and so we are by no means surprised when the latter part of June finds trade tapering off and salesmen leaving the road for a brief holiday. The vacation season is now approaching—many of the younger clerks are already away and history will probably repeat itself in finding trade quiet from now until the middle of July. This, however, does not give any ground for complaint, as it is simply in the usual course and trade for the six months as a whole has been quite satisfactory and in some cases more so than for the same period of last year, while there seems to be no reason why a good volume of trade should not be expected in the Fall. The crop prospects are most encouraging and there does not appear to be any untoward financial clouds on the horizon, and after vacations have been enjoyed dealers will probably return to their work with fresh vim and increased hopeful energy. It is pleasant to acknowledge that collections are now showing some improvement. Country trade is beginning to realize money on the sale of Spring products and are now disposed to pay their bills and make new purchases to replenish their stocks. On the whole the present condition may be described as more than satisfactory while the prospects for the future are hopeful.

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

June is showing an improvement in trade. A wet May makes good hay and in this section it is the important crop. Collections are improving with orders. Those who think our good times are over are mistaken. We may travel in the valley sometimes, but we shall soon strike an up grade, when the business highway will follow the ridge out of 1905. The present outlook makes this a fair guess. The country is not nearly used up yet, and its youth carries in it hope and expectation that we have not yet reached high noon. The tendency to settle down and accept the common place after gray hairs begin inclines us to the feeling that the country has passed its bloom, but the young blood and brains keep perpetual youth in the nation, and nothing but moral decay makes it old. We are at the beginning of a world career. Our politicians are to become statesmen. Our millionaires, billionaires, and we are to control the political, financial and moral destiny of the planet. The great trust is yet to come in the combination of nations, and we are to be its promoter, and it will guarantee the giving and getting of justice among men and nations. Notwithstanding this outlook, we are just now made to blush by the shameful assumption that American citizens are incapable of self-government. It is an impeachment of Republic Government. While there is not a single example in England, where street railroads have been taken under municipal control that has not proved a public benefit, bringing lower fares, better service and higher wages to employees, we are being told it will be disastrous in America, on account of the difference in the form of government. Perhaps we should change ours for one that would make us more competent. The only argument offered against the municipal control of public utilities in this country is the incompetence of the people to manage their own business, and this has been the stock argument against every attempt to increase popular government, and will be to the end of time. Those that "hold the bag" for corporations may believe this, but the people do not. The fight to get and maintain popular government is not yet over.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. Lockwood, President.

THE PITTSBURGH TRADE.

Trade during the first half of June has shown some improvement over May. There appears to be more "tone" to the buying, retailers taking better quantities. For some mysterious reason the early Spring trade this year was not up to expectations, the goods were not absorbed readily by consumers, consequently retailers bought in small quantities. This condition appears to be passing, and we look for a steadily increasing trade for the rest of the year. Early closing on Saturday begins June 17th and extends until September 15th. The trade will please be informed that during this time orders should be in hand early Saturday morning to be shipped that day. LOGAN-GREGG HARDWARE CO.

Digitized by Google

THE CHICAGO TRADE.

A month ago, when our teamsters' strike was giving the most trouble, we very much feared that it was going to interfere with our sales to a considerable extent. We are pleased to state, however, that in comparison with figures for May of one year ago that we can show figures in favor of the month just past, and the strike at this time seems to be gradually wearing itself away. The cool and wet weather has somewhat retarded the sales of Window Screens, Screen Doors and Ice Cream Freezers until we were favored with the more seasonable weather of the past week. Since then we find that all Spring and Summer goods are going out in large uqantities. There seems to be more building going on, both in the city and suburbs, as well as with our country trade. There is a good demand for Mechanics' Tools and Builders' Hardware. Prices are keeping along about the same as six weeks ago, with the exception of a slight shading in articles used in building. Collections are very good indeed, money seems to be plenty, with prospects for a good Summer's business unusually fine.

Wells & Nellegar Company.

THE COLUMBUS TRADE.

It hasn't been very long since we were continually hearing complaints about the cold, wet weather, but we are not hearing any kick of that kind now. On the contrary, it is "Gosh, ain't it hot!! Did you ever see such hot weather?" It is the same old thing, namely, you can't have the weather to suit every one. The fact is, the weather is ideal just now, good and hot and plenty of rain. Everything is doing full time, growing twenty-four hours a day. Trade is brisk and the hurry season is now on in full force. Every one wants quick shipments, especially on harvesting tools. The demand for lawn mowers and screen goods still continues. We had a boat launching in our city last week. The boat is not as large as some of the ocean line of steamers. As near as we know, she draws about two feet of water and no doubt some beer. Just now she can be hauled a distance of about a mile (the Scioto has lots of water in it just now.) Later on, we presume the Paul Jones (her name) will be stationary. There is no use talking, our river is great (for mud), but when you talk about steam and electric railroads, we are strictly in it and don't have to take a back seat for any body. River navigation is too slow any way. It may satisfy some cities, but not a hustling city like Columbus. If flying machines will be quicker than steam or electricity, you may be assured Columbus will fly. Everything looks encouraging for a good year. Prices are pretty firm on most lines and some goods are higher. We hope nothing will happen to interfere with what now seems to be a prosperous year.

The Smith Bros. Hardware Co.

THE DAVENPORT TRADE.

In the place of our usual trade letter, we send you herewith a tabulated list of changes of the prices of Nails, Barb Wire, Plain Wire and Polished Fence Staples, from December 23, 1898, to February 2, 1905, inclusive. Any of your readers can easily figure that the present prices of these goods are considerably below normal, as shown in this table of changes. These changes have been carefully noted by our Mr. Neuhaus and we think will be of interest to buyers of this line of goods.

Sickels, Preston & Nutting Co.

THE NEW ORLEANS TRADE.

(Special Correspondence, New Orleans, June 17.)

For the past month trade has been pursuing the even tenor of its way, so far as domestic business is concerned, the general volume running about even with what was current at the same time in the year previous. The features of the month have been the efforts made by some of the local Hardware houses to develop the West Florida trade, and by others to upbuild the Brownsville trade to Texas and the upper Mexican coast. In addition, there has been a lively squabble between the officials of the New Orleans Board of Trade, backed by several of the larger Hardware houses, and the officers of the Heavy Hardware Association relative to the management by the Board of Trade of the campaign to capture Panama contracts from the government, and to obtain a larger and a better share of the general Panama business.

The general run of Hardware business, in the between-seasons times that are now on, has been fairly even. Implements have fallen considerably behind what was expected of them, especially in view of the fact that the sales just prior to planting time were exceptionally large. Mill supplies are perhaps slower than within the twelve months. Interior fittings, general building Hardware, etc., and Builders' Hardware, is leading all else—especially in the city trade.

In the city there is a larger sale of vehicles of the better sort than for some time, and the rapid advance being made in the way of paving and improving the streets, and making them available for the use of good teams and for pleasure driving, is giving an impetus to that line.

The sections buying best are the cane belt in Louisiana, the pine lands, and the truck farming region of Mississippi and Louisiana. The cotton planters of Louisiana, and of the hill country in Mississippi are buying rather well. The crop prospects in the lowlands are poor, the bad weather having resulted in a greater decrease in acreage than was anticipated—and in a much poorer crop on the land planted than was looked for. Throughout the cotton section, it is agreed by all those who have looked into the matter, that the acreage reduction will be fully fifteen per cent. The condition of the crop, in all June 1 reports, was about 75 per cent. Reports within the ten days are to the effect that the situation has improved but little. This has kept the June buying from equalling what it would have reached under normal circumstances. However, it is generally believed that with the small crop now in sight, the prices will be such that the situation will be more than equalized, and that the purchasing power of the cotton country during the autumn will fully equal what it was last year.

DISPUTE ANENT PANAMA.

At the banquet of the Heavy Hardware Association held two weeks ago, James W. Porch, the president, and a number of others, took occasion to comment on the fact that New Orleans would have to improve its methods of handling Heavy Hardware before it could hope to gain a fair percentage of the Panama contracts. A meeting was ordered for the coming week for the purpose of seeking to ascertain just what improvements would be best. The facts of this discussion became public property, and the officials of the Board of Trade took occasion to reply with some heat that the special Panama committee which had charge of the Panama situation, was doing all that could be hoped for, and that if the trade would have a little patience the results would be forthcoming.

In the light of this controversy, the Hardware world watched with some concern the letting of the heavy and ordinary Hardware contracts in Washington after May 15-17-18. New Or-

leans, while getting some fairly good contracts in other lines, obtained very little in the way of Hardware. The bidders were frequently, and almost always, well toward top of the lists of bidders; but were seldom within the fortunate number at the very top. As a result, Woodward-Wight & Company obtained a contract for some wire; Stauffer-Eshleman & Co., for some nails, and so on.

In recapitulation: Woodward-Wight & Company has sold and is now having inspected for the Panama Canal Commission, 2,700 copper wire door screens.

Stauffer-Eshleman & Company is preparing to send down to the Isthmus when the occasion requires 2,000 kegs of cut nails.

Alfred Hiller & Company, Ltd., will, after June 1, begin shipping a small order of 3,000,000 brick.

Along the shores of the Gulf Coast, the Commission is looking to pick up at a reasonable cost, according to the Taft-Roosevelt "no-hold-up" manifesto, a sea-going tug.

These contracts are merely the exceptions to the general rule that New Orleans got left on the big contracts opened May 15.

W. H. Goehrs, inspector for the Panama Canal Commission, was inspecting the 2,700 copper wire screens recently. The screens are meant for the Ancon hospital, and the contract for them is by odds the largest ever given in New Orleans. The wire is of the finest copper, 18-mesh, and 31-gauge, insect-proof, mist-proof, almost damp-proof. It is calculated to withstand the effects of the tropical climate, not to rust nor corrupt, and to protect fever-stricken or otherwise ailing gringoes or greasers from all the ills of the Isthmus. The screens are three times as fine and close as the ordinary wire screens used in this more favored country.

Stauffer-Eshleman & Company is expected to get the order for 2,000 kegs of cut nails, at a cost to the government of $1.99—the lowest known opposition bid being $2.05 by another local firm. Some of these nails will probably go to make the frames to hold the 2,700 screen doors in the Ancon hospital.

It is said that the representatives of the Panama Canal Commission are now seeking for a sea-going tug. Where and how she is to be found as soon as she is wanted is not known. It is deemed probable that the officers in search will locate the vessel within the next week or ten days.

In this connection, it is said that Major H. G. Gallagher, U. S. A., purchasing agent for the Panama Canal Commission, is going to be detailed to the Philippines, and D. H. Ross, formerly with the Illinois Central, will be installed in his place in Washington. In the same connection, it is said that the reorganization in the Washington and Panama ends of the canal work, will soon extend down to the various offices scattered through the country, and that railroad experts in supply purchasing lines will soon be in charge of almost the entire work of buying for the commission.

Even more recently, Woodward-Wight & Company, A. Baldwin & Company, and several other local firms have obtained small orders from the Commission. However, the greatest surprise in the way of obtaining orders, came when St. Louis obtained $6,000 worth of orders for picks and shovels, etc.

In speaking of the matter, one of the Hardwaremen said yesterday: "There is no good purpose to be served by concealing or denying the situation. New Orleans is not getting her share of the trade. It is very well for the transportation people to say they will get the tonnage when we have the freight. It is all very well for the jobbers to say they could get the freight if the free transportation was in sight.

"There is neither the free transportation nor the freight that we should have. There are lots of other things we should have also, together with some things and persons we should not have.

"That New Orleans is not getting her share of trade is admitted.

"That something should be done is admitted.

"The special committee of the Board of Trade proposed a solution of the problem, after obtaining certain guarantees and concessions from Washington—and the proposals were emasculated, and the great business convention proposition is 'sleeping if not dead.'

"The Hardwaremen have determined to do for their own allied interests what it has been proven impossible for the united jobbers of the city, working through the Board of Trade, to either take up concertedly or accomplish after it had been taken up.

"What our steps will be, it depends on the developments of the next few days to determine. One thing is certain. Something is going to be done. We have got tired of leaving the situation in the hands of any commercial organization torn by conflicting interests.

"You remember the old saying that if you want a thing done do it yourself—if you want it left undone, give it to some one else, or to the Board of Trade."

More recently, the Hardwaremen here have been wrought to the point of anxiety by the recurrence of the question of limiting the trade between the United States and Panama, to the ships carrying the American flag. The Board of Trade, and the special Panama committee, held special meetings, and sent urgent telegrams to the President. Such a measure would mean that for a time New Orleans would be absolutely out of the running insofar as Panama business might be concerned.

THE INLAND EMPIRE IMPLEMENT AND HARDWARE DEALERS' ASSOCIATION.

The first semi-annual convention of the Inland Empire Implement and Hardware Dealers' Association, organized in February last, was held in Spokane, Wash., on the 7th and 8th inst. The sessions were held in the Moorish Room of the Hotel Spokane. There was a very gratifying attendance, as 85 members were present. The meeting proved a pronounced success, and promises well for the future of the association. The Board of Directors held a meeting on the 7th to study the preliminaries by which the work of the convention would be facilitated.

The convention was called to order Wednesday afternoon by C. L. Butterfield, of Moscow, Idaho, president, who delivered an address.

Secretary E. W. Evenson, of Spokane, followed with a report, in which the work of the association since its organization was reviewed. The purport of his report was as follows:

The membership had doubled and the financial condition was of the best, all bills being paid and there being a nice balance in the treasury. Membership had been solicited by mail from every eligible dealer in the territory embraced by the association. He spoke of the advisability of affiliation with the National Retail Hardware Association and recommended that steps be taken in that direction.

In doing so he called attention to the magnificent work being done through the National Association in an effort to control the catalogue house problem. He said that dealers in the Inland Empire were not very generally aware of the magnitude of the business done by catalogue houses in their territory. He showed that one town alone had sent about $23,000 to large Eastern catalogue houses during 1904. These figures were obtained from a friendly postmaster, who, at the solicitation of the secretary, had kept track of the money order business in this line during 1904. It averaged $75 for every business day in the year ending April 1, 1905.

He also called attention to the fact that some dealers who were not members of the association were trying to make capital out of the fact that they were not members, by statements to their trade that the association was in the nature of a trust, and was organized to boost prices. Also that the association was trying to force such dealers into joining through pressure brought by jobbers and manufacturers. Hence, it was that such dealers posed as martyrs before the buying public, and were trying to get business through such influences.

To cover such cases the secretary recommended the adoption of the following amendment to the by-laws: "No rules, regulations or by-laws shall be adopted in any manner stifling competition, restraining trade or pooling profits." The secretary also moved the adoption of an amendment which shall admit traveling men and traveling freight solicitors to honorary membership at $2 per year. These amendments were adopted.

E. E. Plough, of Wilbur, Wash., then delivered a poem entitled "The Implement Man," which was graphic in its delineation of the many troubles that beset that class of dealers.

At the Wednesday evening session D. F. Anderson, of Rosalia, Wash., read a paper entitled "A Business and a Profit, and How They Are Related."

Mr. Anderson's paper was followed by a general discussion of the subject, after which A. J. Porter, secretary of the Western Lumberman's Association, addressed the meeting on

MUTUAL FIRE INSURANCE.

Mr. Porter presented facts and figures, which indicated that when the profit was taken out of insurance it didn't cost much. The remainder of the evening session was taken up with a discussion of this topic, many of the members expressing themselves in favor of forming a company, and quite a number putting themselves on record as willing to insure with it.

INSURANCE COMMITTEE'S REPORT.

Mutual insurance was again taken up on Thursday morning. W. P. Lucas, Davenport, Wash., of the Insurance Committee, read an exhaustive report, showing that Mutual Fire Insurance associations, correctly organized, and rightly safeguarded, were capable of protecting the insured, and at the same time effecting a great saving over board rates. This saving would prove an inducement in getting new members and holding the old ones and making the organization stronger. The committee recommendned the formation of the Inland Empire Implement and Hardware Dealers' Mutual Fire Insurance Association under the laws of Washington, to be strictly a mutual company confined to members of the association. Policies to run for one year, and to be limited to $3,000 for any one risk, and not to exceed one risk in each block. The plan outlined was that where two or more risks were taken in one block the proposed company should reinsure the risks in excess of $3,000 in an Eastern mutual company, and that no member shall be liable for an amount in excess of his annual premium. The report went into all the details, the plan of organization, such as rates, meetings of policyholders, election of trustees and officers, filling vacancies, duties of officers, assessments, dividends, reserve funds, etc.

After a little discussion the report was unanimously adopted, and Mr. Lucas moved that the chair appoint a committee of five to take charge of the affairs of the proposed company and complete its organization. This motion prevailed, and the president appointed the following Committee on Insurance: W. P. Lucas, chairman; J. R. Stevenson, A. B. Salmon, F. H. Hilliard and E. W. Evenson.

The matter of joining the National Retail Hardware Association then came up for discussion, and it was unanimously decided to affiliate with the National Association. The dues of $1 a year are to be collected by a special assessment of $1 from each member.

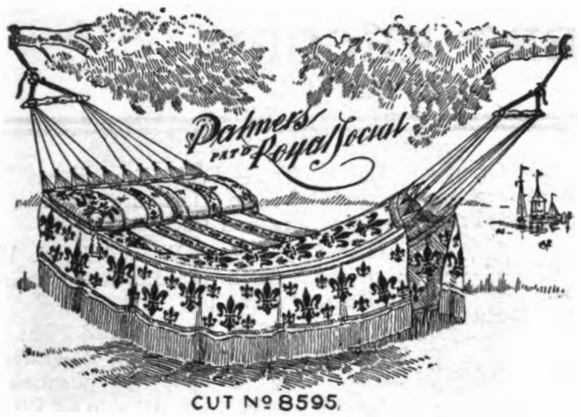
J. H. Berge, of Davenport, Wash., who was to have read a paper on "The Man Up the Street," was unable to be present at the meeting, and sent a humorous letter to the secretary, which was read and thoroughly enjoyed.

THE BANQUET.

The convention formally adjourned at noon Thursday. In the evening an elaborate banquet was very much enjoyed, at which about 175 persons sat dawn. F. H. Mason, of Holley, Mason, Marks Hardware Company, acted as toastmaster. The speakers and their topics were as follows: "Our Successful Association," by President C. L. Butterfield; "Maintaining Prices," by E. M. Brannick, Studebaker Bros. Manufacturing Company, Portland, Ore.; "The Power of the Press and the Power of the Association," by T. M. Shearman, of the *Implement and Vehicle Record*, San Francisco; "The Age Limit," by George A. Davis, of the Pacific Steel & Wire Company; "What I Know About Gas Engines," F. H. Shaw, of Shaw-Wells Company; "The Inter-Pacific Northwest, or What Is Known as The Inland Empire," by State Senator Reiter, of Davenport; "Pictures of the Inland Empire," by I. C. Hattabaugh, of Grangeville, Idaho; "Some Beauties of the Long Distance Telephone," by J. D. Chickering, of Holley, Mason, Marks Hardware Company. The banquet closed with a selection by the Elks' Quartette.

A CONTINUOUS PERFORMANCE.

F. E. Meyers & Bro., Ashland, Ohio, have recently purchased two lots adjoining their principal three-story machine shop department of their factory, on which they expect to build an additional machine shop 60 by 300 feet. This addition had been decided upon within a few days, and is remote from the foundry addition 75 by 200 feet, now in process of construction. They report an excellent trade and prospects justifying the large additions that have been required on short notice.



OUR BRITISH LETTER.

(*Concluded from page 22.*)

BUILDING TRADES' EXHIBITIONS.

Building Trades' Exhibitions are becoming popular and manufacturers of improved building materials and builders' ironmongery are aware that many builders, architects and others interested in the manufacture and consumption of building materials gladly avail themselves of the opportunity which building trades' exhibitions offer, in order that they may see, examine and compare the different productions which present day inventive genius launches upon the market. For some years past an annual Building Trades' Exhibition has been held in the Agricultural Hall, London, with considerable success; the tendency now appears to be to carry these exhibitions beyond the confines of the metropolitan area, and to hold them in different provincial centres. The promoters of the London Exhibition have just arranged to hold a similar exhibition in Glasgow in the Spring of next year, and it will, doubtless, afford traders and others, in Scotland and the North of Ireland, a splendid chance of becoming familiar with the latest developments in builders' ironmongery. American Hardware plays an important part among the sundry stands of builders' cabinet ironmongery at such exhibitions, and, doubtless, the American manufacturers of goods specially suitable for the requirements of this country, will not be slow to see they are well represented on that occasion. Ironmongers are not particularly keen about building trades' exhibitions, at the same time they fully recognize that consumers and customers too, may, by their appreciation of new goods, help to increase their use, and so, indirectly benefit the ironmongers' trade in Builders' Hardware. The tendency of the present day inclines towards the use of Hardware of improved designs; and artistic lock furniture, cabinet brass foundry, and even sash window fittings are becoming very popular; and among these are many specialties of American make.

TRADE NOTES.

Cincinnati, Ohio.—The American Tool Works Company has appointed the Van Dyck-Churchill Company, of New York and Philadelphia, as its representatives for New York State and Eastern Pennsylvania. The Western Pennsylvania and Pittsburgh territory will be looked after by Somers, Fitler & Todd, of Pittsburgh.

Hamilton, Ont.—The Canadian Shovel Company will erect a new factory building, the structure to cost $15,000. It will be located at the foot of Henry Street, and will be a one-story structure 200x80 feet in size.

Lagoda, Ind.—The Anderson twin-rake factory has been sold to the American Fork and Hoe Company, of Cleveland, Ohio, but it will continue to be operated here for at least a year. G. W. Anderson will remain as manager.

New York, N. Y.—The American Whip Export Co., of No. 54 Warren Street, which devotes itself exclusively to the export trade in marketing the product of the American Whip Co., is about to close up its local store and cease to carry a stock of goods at the above address. Offices have been taken at No. 14 Church Street, where export interests will be looked after as in the past.

Windsor, Ont.—William Moore and Robert Nelson have succeeded to the Hardware business of James Nelson & Brother in Windsor, and on May 13th, they opened their new store.

Poland, S. D.—D. P. Fargo & Son have been succeeded in the furniture and Hardware business by Fargo & Davidson.

Robinson, Kan.—Glenn & Furse have purchased the Hardware and furniture business of J. M. Walters.

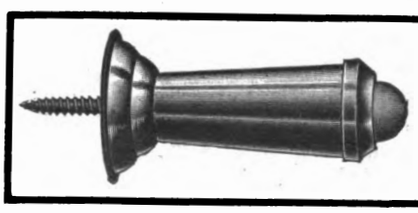
Severance, Kan.—S. P. Taylor has sold his Hardware business to Canine & Gregg.

So. St. Joseph, Mo.—F. B. Lacy has sold his Hardware and plumbing business on Illinois Avenue to P. L. and C. D. Bristol and W. B. Howe, who will continue the business under the firm name of Bristol Brothers & Howe. Mr. Howe will be active manager of the business.

Shenendoah, Iowa.—E. T. Kaster has sold his Hardware store to W. R. Ryerson.

So. St. Joseph, Mo.—J. D. Fullbright exchanged his Hardware store to E. L. Osgood for a farm near Lebanon.

St. Joseph, Mo.—Arrangements are being made by the Parrish-Erickson Hardware Company to establish a branch house in South St. Joseph. J. A. Feffer has lately acquiried a half interest in the company.



Toledo, Ohio.—The Heavy Hardware Co. will erect a four-story building on Huron Street, just south of Monroe Street. The structure will be brick and steel with a warehouse style of construction. The cost will be about $25,000. The Heavy Hardware Company will vacate its Summit Street location in September.

Vancouver, B. C.—The British Columbia Wire & Nail Co., Limited, has just purchased 20 nail machines to make ½ to 6-inch nails; also a drawing bench. The firm also bought a machine shop outfit and a staple machine. It has just concluded the purchase of waterfront property in Vancouver, which also has railroad facilities, and is now erecting large buildings for its shops. Its capacity for nails will range from 10 to 20 tons a day.

La Crosse, Wis.—The Summit Stove Co., of Geneva, N. Y., is completing preparations to establish a stove factory in this city. A large number of hands will be employed.

Littleton, N. H.—The Marston rake factory has been acquired by a new firm known as Flanders & Everest, who will continue the manufacture of the same line of goods as their predecessors.

ELEVATORS & DUMB WAITERS
We make a specialty of manufacturing them. Also appliances for same.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Abilene, Tex.—The Boone-Mueller Hardware Company has been incorporated with a capital stock of $10,000. Incorporators are E. H. Boone, John Mueller and C. H. McDaniel.

Akron, Ohio.—The Akron Hardware Supply Co., $25,000 capital stock, has been incorporated by Charles T. Inman, H. J. Smith, George J. Stubbs, H. J. Nickerson, Jr., Roy G. Russell.

Bartlett, Tex.—The Wilson Hardware Co. will engage in the Hardware and furniture business about August 1st.

Beaumont, Tex.—The Chambers Hardware Company has been incorporated with a capital stock of $30,000. Incorporators, C. R. Chambers, G. C. Kennedy, C. H. Chambers and H. T. Fuller.

Columbus, Ga.—The Bush-Phillips Hardware Company has been incorporated.

Covington, Ky.—The Mersman Hardware Co. has been incorporated with a capital stock of $50,000. The company will carry shelf Hardware, stoves, agricultural implements, paints, sporting goods, etc., at wholesale and retail.

Craig, Neb.—C. O. Hale has opened a new Hardware store.

Fergus Falls, Minn.—Frankoviz Hardware Company has been incorporated; capital $50,000; incorporators, M. Frankoviz, J. V. Matthews, Herbert Webber, Alof T. Sherping, N. F. Field, J. P. Vandersluis and James A. Brown, Minneapolis.

Fort Collins, Col.—Barkley-Bouton & Crain Hardware Company has been incorporated; capital, $20,000; Charles L. Bouton, L. D. Crain, Davis Barkley, Fort Collins, incorporators.

Guilford, Me.—The business of Page, Spearing & Co., Hardware, furniture and plumbing, has been incorporated as Page, Spearing & Co., Incorporated. The officers are: President and treasurer, F. H. Spearing; secretary, H. W. Davis, and manager, C. M. Drew.

Little Rock, Ark.—Gowdy & Galloway Company has been incorporated; capital $10,000, to do a general Hardware and plumbing material business. The officers are D. F. S. Galloway, president; John Gowdy, vice-president; C. L. Jones, secretary; Moorhead Wright, treasurer.

Matador, Tex.—The Matador Hardware Co. has been incorporated with a capital stock of $6,000.

McKeesport, Pa.—J. Steve Ryan has opened a new Hardware store on Walnut Street and Tenth Avenue. Mr. Ryan is thoroughly acquainted with all branches of the Hardware line, having received his early experience in the business in the extensive stores of his father, the late Maj. James F. Ryan, who was the pioneer dealer in this line of trade in this city.

Nashua, Neb.—J. T. Williams has opened a new Hardware store.

Newark, N. J.—Macknet & Doremus Co. has been incorporated, wholesale and retail Hardware; capital stock, $200,000; incorporators, Charles S. Webbe, East Orange; Stephen W. Gordon and Richard Doremus, Newark; registered office, 796-798 Broad Street.

Oswatomie, Kan.—The Laing Hardware Co. has opened up a new store.

Parkersburg, Iowa.—Frank Beck has opened a new Hardware store.

Parsons, Kan.—L. J. Allen will engage in the Hardware business.

Pontotoc, I. T.—Wilson & Bennett will engage in the Hardware business.

Sacramento, Cal.—A new Hardware firm, known as the Placer Hardware Company, has opened up business in this city.

Schenectady, N. Y.—On May 8th, a new Hardware store was opened, in the Edison Hotel Building. The store has been refitted and stocked with a new and complete line of first class Hardware by Stuart G. Spier & Son.

St. Cloud, Minn.—The Powell Hardware Co. has been incorporated with $25,000 capital stock.

St. George, S. C.—The St. George Hardware Company has been incorporated; capitalized at $3,000. The incorporators are: H. W. Nichols of Charleston, J. A. Hiers and S. J. and I. S. Hutto of St. George.

Wheeling, W. Va.—Louis Heiner has opened a new Hardware store at 1301-3 Market Street which is one of the largest in the State. The fixtures in the store are modern, and the entire three floors of the building are used, the upper floors to store heavy Hardware and builders' supplies. Mr. Heiner recently withdrew from the Heiner Hardware Company, of which he was the senior member. He has been engaged in the business for a number of years and is thoroughly familiar with it in all its branches.

Winnipeg, Man.—A new Hardware store has been opened on the corner of Portage and Sherbrooke Streets by Lennox & Butt. They will carry shelf Hardware, Builders' and Carpenters' supplies, house furnishings, etc.

Changes.

Burwell, Neb.—A. A. Graber has sold his Hardware and furniture business to T. H. Doran.

Central City, Neb.—Ross, Dye & Cowgill have succeeded to the Hardware business of Ross Bros.

Clitherall, Minn.—K. H. Robbin has bought the Hardware, stove, paint and sporting goods stock of H. Halverson.

Fair Play, Mo.—Brown & Adams have been succeeded in the Hardware business by T. W. Brown.

Frederick, Okla.—Carr & Pritcher have succeeded to the Hardware and implement business of Carr Bros.

Friendship, N. Y.—The Gould-Carter Company, Hardware dealers, have dissolved partnership. The business will be conducted by V. Perry Carter and Roy Carter, with W. C. Gould as manager.

Gravity, Iowa.—George N. Oxley has purchased the Hardware business of J. F. Chiles.

Harvard, Neb.—Hill & Tucker have sold their Hardware and furniture business to Quigle & Mitchellmore.

Hylton, Tex.—W. E. Duncan has been succeeded in the Hardware business by Duncan Bros. and Cave.

Iowa City, Ia.—G. W. and L. H. Hess have succeeded to the Hardware business of Hess & Company.

Knoxville, Tenn.—J. B. Ransdell has sold his Hardware business to R. R. Foster of Crystal City, Ky. It is the intention of Mr. Foster and his associates to greatly enlarge the business and later to enter the wholesale field.

Le Mars, Iowa.—The Moore Hardware Co. has changed its name to the Hansen Hardware Co.

Pesotum, Ill.—T. R. Ludwig has taken possession of the Hardware store which he recently purchased from J. L. Barthel.

Pocahontas, Ark.—Williams Bros. have been succeeded in the Hardware and furniture business by L. E. Williams.

Potomac, Ill.—A. B. Duncan has sold his Hardware stock to Emil and Frank Leonard.

San Sabe, Tex.—Longley & Martin have succeeded to the Hardware business of I. W. Longley.

Skidmore, Mo.—J. M. French & Company have sold their Hardware and furniture business to G. A. Wolf.

St. Charles, Iowa.—Collins & Sloan have succeeded to the Hardware and implement business of Cooley & Collins.

Storm Lake, Iowa.—Charles Werner has purchased the Hardware business of E. Mattress & Son.

Stroud, Okla.—H. H. Burling has purchased the business of the Stroud Hardware Co.

Tiega, Tex.—J. J. Smith has sold his business to the Harris Hardware Co.

Wenatchee, Wash.—Perkins & Homer have sold their business to the Scheble Bros. Hardware Co.

Sulphur, I. T.—The Couch Hardware Co. has sold its business to the Chickasha Hardware Co.

West Point, Neb.—The partnership of Nieburg & Stoltzmann, Hardware dealers, has been dissolved by mutual consent. Mr. Stoltzmann retires, his interest having been purchased by his partner, G. L. Nieburg.

West Warren, Mass.—William Clark has sold his Hardware and general store on Main Street to William H. Snow of Athol.

Wayland, Mo.—B. and W. Grate have sold their Hardware business to E. W. McCoy.

Wheeling, W. Va.—The J. L. Kimmins Hardware store was sold to M. N. Cecil, who will continue the business at the old stand. The business will be expanded. Mr. Cecil is well known among a large circle of business associates. Mr. Kimmins retires on account of ill health. He has been engaged in the Hardware and lumber business here for the past seven years.

Wilmot, S. D.—A. V. Beldon has sold his Hardware and harness business to A. G. Lewis.

South Bend, Ind.—M. P. Runyan disposed of his Hardware and furniture business at 110 and 112 West Colfax Avenue, to J. A. Moore, of Bloomington, Ill., who at once took charge of the stock.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Boston, Mass.—Motor Amusement Co. has been incorporated to manufacture amusement devices; capital, $40,000. President, W. L. Baker, Old South Building; treasurer and clerk, F. G. Tilton, Tremont Building, Boston.

Boston, Mass.—United Attraction Company has been incorporated; amusement business; capital, $25,000. President and treasurer, J. T. Benson, No. 4 Farragut Avenue, Somerville; clerk, J. W. Murdock, No. 27 School Street, Boston.

Denver, Col.—Elitch-Long Amusement Company has been incorporated by Mary Elitch-Long, Thomas D. Long, Edward Houck, incorporators; capital stock, $10,000.

Jersey City, N. J.—Dixie Manufacturing Company has been incorporated to manufacture sporting goods, etc.; capital, $75,000. Incorporators, Henry D. Gould, John O. Bollen, George Blum, all of Jersey City, N. J.

Pittsfield, Mass.—Central Automobile Co. has been incorporated; capital, $15,000; to manufacture automobiles. President, Franklin Weston; treasurer, L. A. Merchant; clerk, E. H. Kennedy, Pittsfield, Mass.

San Jose, Cal.—The Ostenberg Manufacturing Company has been incorporated. The directors appointed for the first year are Allie T. Wooster, Wantoma, Wis.; J. L. Mosher, San Jose; John A. Austenberg, San Jose; M. B. Sears, San Jose; A. W. Craig, San Jose. The corporation is formed to deal in gas and other engines and motors, to manufacture agricultural and other tools and implements.

Springfield, Ohio.—The Tennaut Auto-Tire Company has been incorporated by Irwin Tennaut, James Norman, H. A. Toulmin, Ira W. Wallace, Elwood Allen and Luther Neer. Capital stock $100,000.

Washington, D. C.—The Eureka Sight Finder Company has been incorporated to manufacture and sell gun sight finders and firearm attachments generally. The capital stock is $5,000, and the incorporators are J. Murray Burrell, Howard S. Wilkins, Joseph S. Atkins, George Henderson, William W. Cookson, Charles R. Luce, James E. Bell, Joseph Schoenagle and Geo. Robert Raby.

Changes.

Fort Worth, Texas.—The Wm. Henry & R. E. Bell Hardware Company have placed in stock a complete line of the famous Peters shells and ammunition, which are used so extensively by gun clubs and shooting galleries. Their order for shells and ammunition was so placed that the most particular trap or field shooter can secure any desired shell and special loads.

Sterling, Ill.—E. C. Bassett, proprietor of the Bassett bob sled factory, has completed the work of installing new machinery in his plant, and has now increased the capacity of the plant about 500 per cent. During the past two months Mr. Bassett has installed machinery in his plant at a cost of $2,000, and with the aid of the new labor saving machinery, and without hiring additional mechanics, he is able to do a vast amount of work, greatly increasing the capacity of the plant.

Westfield, Mass.—That part of the Hartford plant of the Pope Manufacturing Co. which is now used for the manufacture of bicycles is to be given over in future to the making of automobiles, and the making of bicycles will be immediately transferred to the company's bicycle plant at Westfield, where a part of that branch of the business is now carried on. The sales department of the bicycle business will remain in Hartford, so that the office force will not be affected by the change.

Miscellaneous.

In no country in the world is standardization in sizes of manufacturers given so much attention as in Great Britain. In the bicycle trade the appreciation of the advantages of uniformity is so great that a proposition for standardization not only in sizes, but in nomenclature, has been favorably received. At a recent meeting of the Automobile and Cycle Engineers' Institute, Charles Wheeler, chief engineer of the bicycle department of the British Post Office, read a paper advocating a uniform system of naming the various parts of a bicycle to enable bicycle users to communicate to manufacturers, etc. Mr. Wheeler endeavored to tabulate a workable system. His proposition will be considered in detail by a committee.

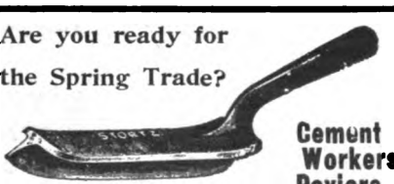
TRADE NOTES.

Jacksonville, Fla.—A transaction has recently been consummated by which the Council Tool Company of Wannanish, N. C., was bought out by a company in which Jacksonville capital is largely interested. The new company is capitalized at $100,000, and its officers are: H. E. Pritchett, president; P. L. Sutherland, vice-president; A. D. Covington, secretary; J. P. Council, of Wannanish, N. C., treasurer and general manager. It affords employment to several hundred men engaged in the manufacture of turpentine hacks, pullers, dippers and other naval stores specialties.

Jamestown, N. Y.—As soon as the weather conditions are favorable for such an undertaking William Hjorth & Son will commence the erection of a new factory building. The concern manufactures the Hjorth patent wrench, and will probably include other specialties.

Milwaukee, Wis.—J. P. Lindemann Sons & Co., Hardware manufacturers, have purchased a factory in Wauwatosa, occupying a site 1,400 by 400 feet. The price is said to have been $14,000. The plant will be rebuilt for the new owners.

Webster City, Iowa.—The National Hatchet Company has been incorporated, and will manufacture a patent tool which can be put to many and various uses. The officers of the organization are: E. E. Valentine, president; W. A. Norton, vice-president; G. A. Smith, secretary; H. R. Dodge, treasurer; J. R. Morris, manager. The company is capitalized at $50,000. The tool they will manufacture can be used as a hatchet, hammer, wire cutter, leather punch, nail puller, screw driver and has detachable jaws upon it. With a change of jaws the tool adds the following to its many uses: A hoof trimmer, pruning knife, bailing applier, stock marker, pipe wrench and some others.



Philadelphia, Pa.—The Penn Hardware Company announces that on and after October 1 it will be located at 4½ North Fifth Street, with samples and stock of Builders' Hardware. Frank West will be in charge.

The only properly galvanized Nails on the market

We guarantee our nails to be galvanized by the Hot Process with pure Spelter (zinc) and cooled by a patented method without submerging in water, therefore the nails are not made brittle and the strength is not affected.

Absolutely Smooth
Every Nail Perfect

We have the largest plant in the United States producing galvanized nails, our capacity being 300 kegs per day.

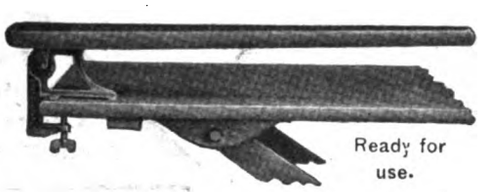
Keystone Nail Co., Inc.
Philadelphia, Pa.

CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.



Put up in coils 300 feet each.
Patent Metal Reel Frame with each coil.
Straps made in four widths: ½, ⅝, ¾ and 1 inch.
Patented in all countries.

CARY MFG. CO,
19 & 21 Roosevelt Street, New York.
Cable Address: CARLEIO

AUXILIARY IRONING BOARD

Turned back out of way.

Ready for use.

A Money Maker

USED THE YEAR 'ROUND - USED THE WORLD 'ROUND

A most substantial and satisfactory auxiliary to table or regular ironing board for ironing sleeves, shirt waists, etc. The turn-back feature is its great convenience. None other has it. Always in place. Never in the way.
It is not a cheaply-constructed article, but one built for every-day use and for universal satisfaction.

We have further information we will be glad to give you.
Better write for it.

W. H. GLENNY AND COMPANY, SPECIALTY MFG. DEPT.

ROCHESTER, N. Y., U. S. A.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

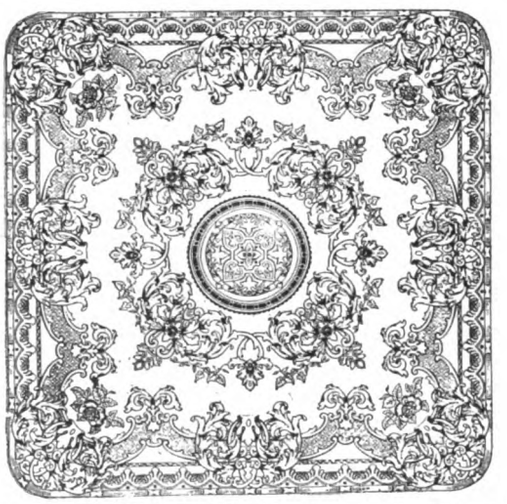
PACKING

Appearances count with your customers. Razor strops left hanging on racks or in open cases to collect dust leave a poor impression with your trade.

GIBFORD'S RED-E-FOR USE RAZOR STROPS



are packed in handsome boxes which, beside protecting them from dirt and grit, give a distinctive character to your cutlery counters and convey the idea of the quality of your goods to your customers. RED-E-FOR USE razor strops are right in price as well as in quality. Order a sample dozen from your Jobber and you will make 12 satisfied purchasers.

Write for our descriptive catalog. It's filled with information you need in selling razor strops.

"The Proof of the Pudding Is the Eating"

That's exactly the case with

L & G 800 Butcher Knives

They are made of special steel carefully hammered and finely tempered.

Every Blade Warranted

We've made them ever since 1837.

Sixty Eight Years On the Market

Our Butcher Knives, like the rest of our line of

Fine Table Cutlery

have "improved with age." There's nothing like them on the market. They can't be beat in quality nor price.

Get a copy of our catalog— Make up a sample order and we feel confident you will send us many duplicate orders.

Don't delay— Write to-day.

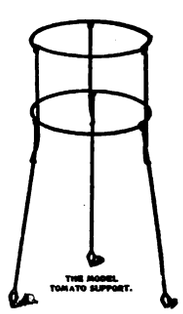
WHITE'S EDGE TOOLS

The feature that commends itself about White's Edge Tools is that they are easy going—they never cumber the shelves of a hardwareman.

Nearly Three-quarters of a Century on the Market

is the reason for this. They sell well because they are well made and because in all that time they have improved with age.



If you are looking for perfection in Edge Tools, look at White's. A single sample order will furnish conclusive proof.

Send for it to-day and be convinced.

L. & I. J. WHITE CO.

Buffalo, N. Y., U. S. A.

The Model Tomato Support

Is the only perfect, the best and cheapest tomato or plant support.

*

Made of heavy galvanized wire. Will not rust.

*

Meet it's Increasing Demand—Stock up now.

*

Easily handled. Comes in two sections. Complete height 34 inches.

*

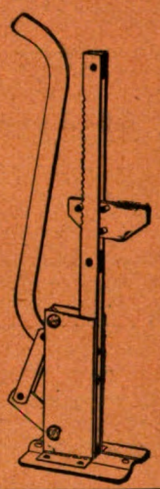
ALL THAT GLITTERS IS NOT GOLD



No. 1 Fire Pot. $6.00 Net

A brass fire pot tank as made by Clayton & Lambert Mfg. Co. is finely finished and a beauty, *but for actual hard service galvanized iron tanks are better.* Yes, we supply brass tanks when desired without extra cost. We are anxious to supply whatever our patrons want. *It is also our duty to warn them against making a mistake.* Bear in mind that no matter how good a fire pot is repairs are often necessary. Any mechanic can repair or even make a new galvanized iron tank. *Few can make simple repairs on brass.* Did you ever try it? Jobbers sell No. 1 Fire Pots at $6.00, with either galvanized iron or brass tanks.

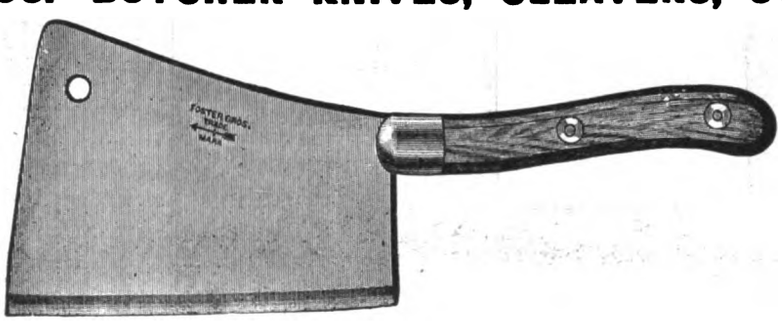
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

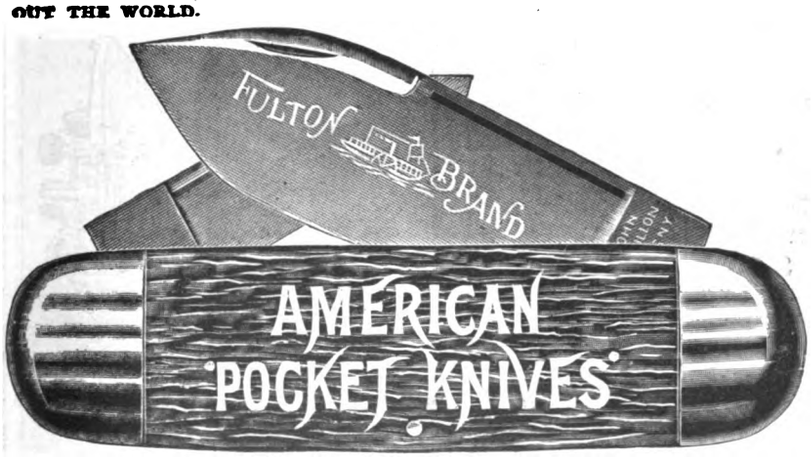


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

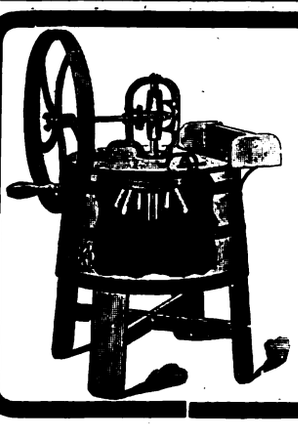
FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

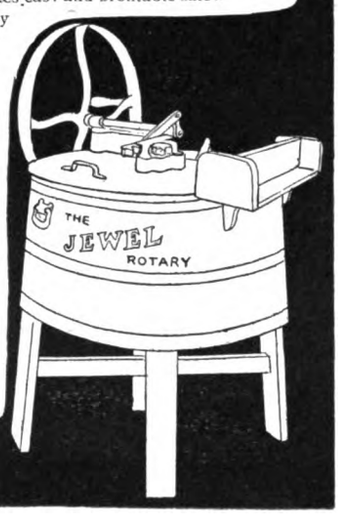
The Jewel Rotary

The Machine That Appeals to Economical Women



These justly popular washers are proving the fastest sellers and greatest trade builders in the hardware field. Their remarkably low price, **25% cheaper than any other rotary washer on the market,** gives dealers a forceful talking point, which combined with their cleanliness, ease of operation and effective work makes easy and profitable sales.

The Jewel has less machinery than any other rotary, making it much easier to operate and less liable to get out of order. It is durably made, finished in Mahogany finish, with two coats of varnish, outside castings Gold Bronzed, inside castings heavily galvanized. Furnished with stave legs if so desired.

Wherever these washers are introduced they sweep aside all competition of other Machines.

Write for full descriptions and prices of the 20 different machines we manufacture.

HARDWARE

We have received from Coes Wrench Co., Worcester, Mass., a well-gotten up calendar, good for one year, from June 1st, 1905, devoted to displaying artistically the newest Coes Wrenches manufactured by the company, the "Steel Handle" 6 to 21 inches and the "Key Model" 28 and 30 inches. The calendar is printed in three colors and is of a size to command attention in an office or factory where suspended, for which provision is made.

✤

Mr. O. L. Dortch, who is connected with the Gray & Dudley Hardware Company, Nashville, Tenn., has been promoted to general sales manager for the company. He formerly traveled Tennessee, Kentucky and Mississippi for this Hardware house. His promotion is deserved, and his many friends will be glad to learn of it.

✤

A folding card of appropriate design has been sent us by the Coes Wrench Company, Worcester, Mass., which on opening displays a hand holding a glass of wine and proposing a toast which is in honor of the Fourth of July, in the following words: "Our Country: May she be always in the right; but right or wrong—Our Country! We suggest this well-known toast of Commodore Stephen Decatur as a sentiment for the coming Independence Day. Our best wishes that the day may be a most enjoyable one for you, and that you may celebrate it gloriously."

"ADVERTISING FOR PROFIT."

The Manufacturers Advertising Bureau, 126 Liberty Street, New York, have just issued a new edition—the fifth—of the interesting Booklet under the above title, in which the proprietors of the Bureau give every possible publicity to their methods of doing a successful business; embellished as it is with the portraits of Benjamin R. Western and his son, W. Hull Western, it forms a booklet well worthy of preservation. A large number of letters from satisfied clients, consisting as they do of representative manufacturers. in various fields of activity, are included in its contents, endorsing their large experience in modes and methods, during the last twenty-five years of stimulating public demand. It deserves a wide circulation, and those interested largely in advertising will find it an attractive pamphlet.

ALABAMA PAINT AND GLASS CO.

The Alabama Paint and Glass Company has incorporated under the laws of this State with a capital stock of $25,000, $12,500 of which was fully paid in. They have purchased the entire paint stock of The Gray & Dudley Hardware Company, and will continue the paint business in The Gray-Dudley Hardware Company's store until October 1st, when they will move into their new building, No. 2015 Third Avenue. The incorporators of this company are: M. G. Heins, president; W. B. Morgan, vice-president; R. M. Billings, secretary, and Thomas Neal, treasurer. M. G. Heins for the past two years was manager of the paint department of The Gray & Dudley Hardware Company, and his success in this department is too well established to predict a future for him; W. Barnes Morgan is too well known to go into details. R. M. Billings was sales manager of the Southern territory for the Acme White Lead and Color Works, Detroit, Mich. These young and enterprising business men are embarking in a business, every department of which they are not only familiar with, but each one stands as a pastmaster in his especial department. The New Era Paint, which they will carry, is an old-established and well-advertised paint. It is unnecessary to say anything about its merits.

AN AUTO PLOW.

F. Burleigh Johnson, formerly well known throughout Kansas, has turned his talents to something useful by inventing an automobile plow. It is adapted especially to the western wheat country and will turn over from thirty to fifty acres of land per day. It consists of an automobile arrangement by which one automobile will pull sixteen ordinary plows. J. E. & Rine Caps, Kansas City, automobile manufacturers, have been interested in the proposition and will manufacture the machines. A charter has been granted under the title of the Farmer's Auto-Motor Company of Kansas City and Hays City.

NEW ENGLAND IRON AND HARDWARE ASSOCIATION.

The annual meeting of the New England Iron and Hardware Association was held at Newton, Mass., Tuesday, June 20. Through the courtesy of George P. Bullard the privileges of the Newton Club were extended to the association and their guests and a large number availed themselves of the opportunity. Dinner was served at 6.30 p. m., after which the annual election of officers and directors was held and reports of officers and chairmen of committees were received.

A number of amendments to the by-laws were made, including increasing the number of directors from nine to eleven, and empowering the old Board to select the two new members; making the clerk and treasurer eligible for membership in the Board, and making a quorum of the Board consist of five instead of four, as heretofore. Samuel A. Bigelow, chairman of the Nominating Committee, presented the following for directors, who were unanimously elected: J. T. Boyd, C. H. Breck, C. F. Bragg, C. F. Dowse, H. L. Doten, William Chamberlain, Oscar A. Shepard, William P. Hill and Roswell M. Boutwell. The directors then retired and elected Charles F. Bragg, president; William P. Hill, vice-president; John T. Boyd, clerk, and Charles H. Breck, treasurer. Mr. Bragg having served the association very acceptably, was accorded the unusual honor of re-election. Souvenirs in the form of leather card cases were distributed, and the meeting, which was one of the most successful ever held, was brought to a close with an address by Hon. John W. Weeks, Congressman from the Twelfth District of Massachusetts.

PACIFIC COAST METAL AND HARDWARE ASSOCIATION.

The Pacific Coast Metal and Hardware Association has elected Andrew Carrigan, of the Dunham, Carrigan and Hayden Company, president for the current year; L. C. Sheller, of the Union Hardware and Metal Company, of Los Angeles, has been elected vice-president; C. F. Prentiss, of the Thompson-Diggs Company, of Sacramento, second vice-president; R. W. Kinney, of Barker & King, of San Francisco, treasurer. An Executive Committee has also been elected, which includes A. A. Watkins, W. R. Wheeler, Andrew Carrigan, Wakefield Baker, Fred. R. Brand, H. M. Haldeman, Brace Hayden, H. J. Morton and Joseph Sloss.

The association has been holding its annual deliberations at Monterey, covering three days. The election took place there. During two days the greater part of the time was occupied with papers of interest, particularly to the metal and Hardware trade, being technical in character and dealing entirely with trade problems. On the last day of the cenvention pleasure was mixed in with business and the customary drives about Monterey and vicinity were taken.

"WHAT'S IN A NAME?"—A STEVENS FOR A NAME.

J. Stevens Arms & Tool Company, Chicopee Falls, Mass., are engaged in a contest for a name which they intend to apply to a new Boy's Rifle—one of the Stevens kind—"Accurate, Safe, Durable." The conditions of the contest are to say the least simple and elastic. The contestants are not restricted to one name only, but may send in as many as they wish, specifying them as first, second and third selections. The young or old of either sex, without restriction or limitation are eligible. Each competitor can secure but one Stevens as a prize, and the following is a list of them:

One of our popular, well-known Favorite No. 17 Rifles will be awarded to the person sending in the best name.

A "Little Krag" No. 65 Rifle will be presented to the contestant submitting the second best name.

A "Little Krag" No. 65 Rifle will be awarded to the contestant furnishing the third name.

A "Stevens-Maynard Jr." No. 15 to the fourth.

A Stevens "Tip Up" No. 41 Pistol to the fifth.

These firearms will be delivered free, all charges prepaid.

This offer terminates August 15, 1905. The contestants must conform to the conditions. Write on one side of sheet only; in plain legible hand. State name and address only. Date your communication. If a number of competitors submit the same names, the one sending the name first will receive the prize. Address the envelope Prize Rifle Committee, J. Stevens Arms & Tool Company, Chicopee Falls, Mass., U. S. A.

JULY 10, 1905.

Editorial Trade Review

Everything looks favorable for a continuance of the conditions that made the first six months of the year so eminently successful; without a drawback of sufficient importance to create a ripple in trade channels, and with every prospect ahead of satisfactory Fall trade. The approach of the Season is welcomed with hopefulness, and the trade is prepared to relax their efforts and enjoy a vacation season which they have done their best to earn. All hands are fully engaged in laying out the programme and energetically preparing for the period of rest and recuperation which they feel will come with it.

The buyers are making skeleton orders to be filled in when they return, in which the quantity will somewhat depend on the state of the market and the assurance of the crops from the latest reports. Great care will be devoted to this branch of the business, and it will be gauged by systematic hopefulness, with no speculative tendencies, beyond the estimated size of a favorable crop on which to base the amount of business.

There will be very little volume of current business, to prepare for which usually results in July in averaging stocks only for immediate wants, and the keeping of them in as moderate a condition as Summer trade will warrant; July being an unusually light month, the prices from now on will be regulated, and assume a favorite state for future business, with the ever-watchful buyer studying the market. Those who are now engaged in taking inventories and ascertaining results, will find they will show a grade of profits which it is only hoped will extend throughout the Fall; and, as crops from present indications give evidence of being of record size, there is no danger but what the careful merchant will have every encouragement for his successful labor. No slumps in prices have exerted a baleful influence, and they are in good condition to figure ahead and prognosticate the probable results.

The unsteadiness of some lines of heavy goods, that seem at times to show a weakness on account of their nearness to the raw material, are now in favorable condition for permanency. If anything, the tendency should be to sustain the goods that have been slightly advanced in price, as the continual advancing condition would seem to justify the present market. At any rate, the trade cannot complain of any great uncertainty affecting the market for Hardware, as the prices have been sustained on almost every hand.

MR. NORVELL ON SPECIAL BRANDS.

On another page of this issue we print an address recently delivered at Little Rock, Ark., by S. Norvell, Chairman of the Joint Catalogue House Committee. The address as printed is an exact copy of the manuscript received, and should be read by every one interested in the subjects of Special Brands and Catalogue House Competition.

Mr. Norvell and his associates on the Joint Committee have done a great amount of effective work on the Catalogue House question, but a perusal of his address would almost lead one to believe that this committee's work had been opposed at every point by Hardware manufacturers, to a man.

The speaker alleges that the Hot Springs Special Brand Resolutions "represent the opinions of only a small part of the Hardware manufacturers of this country." In making this statement he either intimates that the American Hardware Manufacturers' Association is an unimportant organization, made up of small manufacturers or else he ignores entirely the fact that those resolutions were the result of long and careful consideration by a representative committee and that they were passed at Hot Springs without a dissenting vote.

Mr. Norvell's address is an intimation that the entire membership of the American Hardware Manufacturers' Association is to be judged by the standard of those manufacturers either in or out of that association who have not refused to sell Catalogue Houses, and that on the other hand all jobbers are to be judged by the standard of those who sell to retail Hardware dealers only.

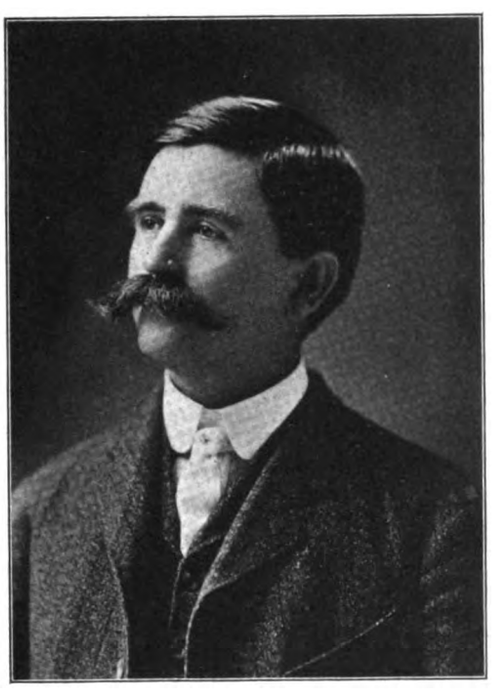
In intimating that retail merchants favor special brands Mr. Norvell denies the authority of President Bogardus of the National Retail Association and the majority of the executive offices of the State Associations to speak for their organizations, and the right of hundreds of retail Hardware merchants, who have gone on record as opposed to Special Brands, to speak for themselves.

Mr. Bogardus, at Atlantic City last year, said: "We (speaking of Retail Merchants) have to sell the goods that the people call for. If the brands of the manufacturers are well known all over the country the people will call for them; we cannot afford to spend our lives working up special brands simply because they are special brands. If the manufacturer after long years of faithful effort gives us first class goods and our customers want them, those are the goods that we want. We want to stand before our customers and say, 'Here are goods that we recommend; if they are not good bring them back.' We feel that we can say that to our customers about makers' brands. We are not always sure that we can say that on special brands."

At Hot Springs, Mr. Bogardus said:

"The retailer who at first thought the special brands would help him soon discovered that they were not always to be relied upon. That while the special brands on some goods mean steady reliable goods, that could always be counted on, it very often meant everything but steadiness and reliability. For one year the brands were put on by one factory and the next by another factory, because of a lower price and consequent reduction in quality until the brand meant nothing as to quality, but simply that the goods were made up for the jobber whose name they bore. * * * I would cut out the growing evil of special brands. If the jobber is needed to distribute the manufacturers' goods, and I do not see how he can be dispensed with, let the manufacturer arrange to protect him, by giving him prices that will encourage him to handle the manufacturers' standard brands."

Former addresses made by the chairman of the Joint Committee have been, in almost every case, brimful of facts and words of wisdom. Ridicule of the opposition is seldom if ever a wise defense and the good work so well begun is likely to be seriously retarded, if such a policy is continued. Nothing will be gained by ignoring the fact that nearly 600 makers of Hardware are refusing to sell Catalogue Houses, or of advancing the claim that the will of the 75 or 100 jobbers who insist on having Special Brands must control the entire Hardware business of this country regardless of the wishes of maker or retailer.



Thousands of dollars are being spent annually by American manufacturers of Hardware to create a demand for their factory brand goods, and the first man to get the benefit of this expenditure is the Retail Hardwareman. What, outside of a very few instances, are jobbers doing toward helping the dealer move the goods on his shelves?

ARKANSAS RETAIL HARDWARE ASSOCIATION

The sixth annual convention of the Arkansas Retail Hardware Association was held in Little Rock on the 21st, 22d and 23d of June. Gleason's Hotel being the scene of the gathering. The attendance was the largest and the meeting the best in the history of the organization.

The convention was called to order on Wednesday morning by President Hamp Williams, after which prayer was offered by Rev. John T. Christian. An eloquent address of welcome to the city was then delivered by the Hon. De E. Bradshaw, of Little Rock, to which an appropriate response on behalf of the association was made by Thomas B. Stewart, of Newport. W. A. Jackson, of Dardanelle, followed with a report as chairman of the Programme Committee, after which R. P. Allen, of Van Buren, read the Executive Committee report. The remainder of the morning session was taken up with announcements on behalf of the traveling men and of the retail and wholesale Hardware merchants of Little Rock, general remarks made by members and visting manufacturers, jobbers and travelers, and the appointment by the president of Convention Committees on Resolutions, Press, Finance, Auditing and Nominations.

HAMP WILLIAMS, PRESIDENT.

Conspicuous among those who made addresses were J. D. Warren, of Benedict, Warren & Davidson Company, Memphis, Tenn., vice-president of the Southern Hardware Jobbers' Association; W. P. Bogardus, Mounut Vernon, Ohio, president of the National Retail Hardware Association, and S. Norvell, of the Norvell-Shapleigh Hardware Company, St. Louis.

The report of the Committee on Membership showed that 37 members had been taken into the association since the last convention, making the present strength of the organization 114 firms.

— On motion the name of the association was altered, the word "Dealers" being omitted. The organization will hereafter be known as the Arkansas Retail Hardware Association.

"THE MATTER OF FREIGHT RATES"

was the subject of a very interesting address by A. R. Bragg, manager of the Merchants' Freight Bureau of Little Rock. Mr. Bragg strongly indorsed proposed legislation giving more power to the Interstate Commerce Commission in the matter of freight rate regulation.

J. J. Mandlebaum of the Fones Brothers Hardware Company told of the organization of the Little Rock Merchants' Freight Bureau, which, he said, had been the means of saving the shippers of the city many thousands of dollars. Not one claim against the railroad company made by Manager Bragg for the merchants, he said, had been turned down. Mr. Mandlebaum recommended the organization of similar freight bureaus in the different cities and larger towns of the State.

A motion was then made and carried that a resolution be prepared for adoption by the association indorsing the views of Mr. Bragg as set forth in his address.

W. P. Bogardus of Mount Vernon, Ohio, president of the National Retail Hardware Association, addressed the meeting on the work of the national body.

Mr. Norvell's address was as follows:

SPECIAL BRANDS AND THE CATALOGUE HOUSE QUESTION.

BY S. NORVELL.

I am here to talk to you on two subjects: The Catalogue House Question and Special Brands. These are two separate and distinct questions, but the committee of the American Hardware Manufacturers' Association diplomatically mixed up these two questions into one of those celebrated Hot Springs mint juleps and most of the mint was "Special Brands." I was invited to that meeting with the assurance that there would be "nothing doing." I therefore did not prepare a formal paper. I was entertained most generously by the manufacturers, and so it pains me deeply to make the following remarks, but I am a martyr to my duty as chairman of the catalogue house committee.

I intended to make only a few brief statements at Hot Springs. Just an hour or two before the time set for my address, I was handed the resolutions adopted by the manufacturers. No doubt all of you have read these resolutions. If you have not you should not miss them. Probably in all these years you have not fully appreciated the true depth of the depravity of the character of the jobber from whom you have been buying your goods. After reading these resolutions I went into that meeting and said a few plain things in defense of the Hardware jobber and of Special Brands. Part of my remarks has been published in the trade press, but entire paragraphs have been left out. It has been explained to me that when I faced the stenographer he took down what I said and when I turned from him he could not hear me and so that part of my remarks was not reported. I therefore welcome this opportunity to touch upon some points which were altogether omitted in the report of my Hot Springs address.

It would weary you if I attempted to review all the work of the Catalogue House Committee. A great deal has been published on this subject, many phases of the question have been discussed. It is enough to say that we are now reaching a stage in our work where nearly all the manufacturers in the Hardware, sporting goods and cutlery lines have been classified as to their attitude on this catalogue house question. There are certain manufacturers who continue to sell catalogue houses who resent the interference of the Catalogue House Committee. Notwithstanding the fact that they state ninety-five per cent. of their goods is sold through the Hardware jobbing and retail trade, and only five per cent. is distributed through catalogue houses, notwithstanding the fact that the jobbers of the National Hardware Association, the jobbers of the Southern Hardware Association, and the retail dealers connected with the National Retail Hardware Association have laid before these manufacturers the great evils that result to the jobbing and retail Hardware trade from the methods of doing business of such catalogue houses, that they have prayed them for relief, these manufacturers say to us, in effect, "you don't know what is for the good of the Hardware trade of this country. Your intentions may be the best in the world, but you are all wrong. We know all about it; we know the kind of medicine you need."

As I said before, I believe the recent

RESLUTIONS ADOPTED AT HOT SPRINGS

represent the opinions of only a small part of the Hardware manufacturers of this country; they stand very largely for the opinions of a comparatively few manufacturers who have declined to meet the views of your catalogue house committee. If we should put the ideas of these few manufacturers into the form of a creed it would read about as follows:

We believe, first of all, in protection—for ourselves.

We believe the Government should protect our infant efforts by high protective tariff so jobbers and retailers of this country will be compelled to buy from us exclusively.

We believe the people of this country should protect our machinery and our product by patents, so nobody else can make the same goods in which we deal.

We believe it is our duty to still further protect ourselves by forming trusts and combinations, so there will not be found any competition from among our own number.

We believe in selling our goods on the rebate system, by which we hold all jobber's profits on our goods for several months until he makes us a statement that he has not cut our prices.

Digitized by Google

We believe in having a fixed selling price for a certain territory so no one jobber can get more than a certain amount of business. This jobber might become too powerful. We can handle them better when they are divided.

We believe in not only selling the wholesale Hardware trade, but also in selling other class of jobbers, such as wholesale woodenware houses, wholesale grocers, etc.

We believe in not only selling wholesale merchants, but we also believe in selling catalogue houses at the same prices as we do jobbers.

We believe in selling whatever retail trade we please, we ourselves to decide what class of retail dealers is entitled to buy of us.

We believe in selling the foreign trade just as cheap as it is necessary to get the business, regardless of what we sell our goods for in the United States.

We believe it was "perfectly horrid" for President Roosevelt to intimate that the Panama Canal Commission should buy American goods at the same prices we sell them to foreigners.

We believe every class of trade, except we manufacturers, should look out for themselves and if they cannot take care of themselves they ought to go to the wall.

We believe the Hardware jobber should be perfectly satisfied for us to sell Hardware to woodenware and grocery jobbers.

We believe if a retail dealer cannot sell our goods and make a profit at the prices made on the goods by catalogue houses to consumers, he should go to farming or into some other business.

We believe it is our duty to kill off jobbers' special brands, as the sale of such brands is liable to interfere with our control of the situation.

We who do not make special brands ourselves believe the best way to kill the special brands made for jobbers by other manufacturers is to discredit, by resolution, all special brands in the eyes of the retail trade.

We believe when a retail dealer finds he is competing on our own brands of goods, not only with the retail woodenware trade, with the retail grocery trade, with the drug trade, but also finds himself in competition with the catalogue house to whom we sell, that such a retailer makes a serious mistake and is disloyal to us when he buys, from some jobber, special brands he can control.

We believe that the jobber who seeks relief from competition on our own brands by buying special brands, is not loyal to us, and if he does not stop handling such special brands we will threaten to run both jobbers and retailers out of business by selling our goods direct to consumers.

We believe, finally, in all kinds of protection for ourselves and no protection of any brand, either special or manufacturers' brands, for anybody else.

We believe it is presumptuous, impertinent and out of place for jobbers or retailers to suggest to us that we cannot sell our goods to whomsoever we please regardless of the general demoralization of the Hardware trade that may follow.

We believe it is perfectly proper for us to put whatever restrictions we wish upon the sale of our goods and to maintain these restrictions not only by withholding the jobber's profit but by declining to sell him goods if he does not follow our views.

We believe if jobbers and retailers should not like the manner in which we do business and if they should intimate they would not carry our brands, such jobbers and retailers are un-American.

We believe such action on the part of jobbers and retailers would savor of the boycott and trade unionism, and therefore they should be held up to criticism in all the trade press.

We believe as we do all the advertising the trade press should see only our side of a question.

We believe in dull times jobbers should load up with enough stock of our own brands, for cash, to last them several years, because they should know from experience in the last few years when business was good we were not able to turn out enough of our own brands to supply the trade.

We believe when the jobbing and retail trade of the country come at us with the catalogue house question, we are "foxy grandpas" when we stir up some mud and hide ourselves by bringing up the issue of special brands.

Mr. Norvell then proceeded to give an account of the work of the catalogue house committee. He called attention to the fact that jobbers associations in other lines, such as saddlery, dry goods, furniture, plumbing, etc., are taking up energetically the catalogue house question.

He stated he did not claim all jobbers' special brands are good, that that would be just as great folly as to claim all manufacturers' brands are of the best quality. He admitted there are abuses in special brands which should be corrected, but he expressed the belief that the resolutions of the manufacturers at Hot Springs would leave the impression upon the minds of the retail trade that all special brands of all kinds are of poor quality and put on the market to impose upon the retail dealer and consumer. He repeated the statement that the

ADVANTAGE IN SPECIAL BRANDS TO THE RETAIL DEALER

is exactly the same as the advantage to the jobber, that it put him in position to control a certain amount of his trade and that this was impossible with manufacturers' brands that can be bought of every class of merchants.

He stated the resolutions of the manufacturers left the impression that jobbers sell nothing but their own special brands. Every intelligent retail dealer knows that jobbers carry not only their own special brands, but a full assortment of manufacturers' brands. In the nature of the case, a jobber can successfully sell his own special brands to only one dealer in a town. No retail dealer would push a line of special brands upon which he had no protection against his competitors. Therefore, as it is the custom of all jobbers to sell a number of different dealers in a town such jobbers must sell manufacturers' brands to the others.

He maintained the resolutions conveyed the idea that certain manufacturers could not get their brands of goods before the consumer, except through the catalogue house. He challenged any manufacturer in the country to come out, over his own name, and state the reason he sells catalogue houses is because this is the only avenue through which he can reach the consumer. He said in making such a statement the manufacturers made a shot which went entirely too far.

He further claimed one of the greatest advantages of a special line of goods is that a complete line can be carried by a dealer under one brand, not only consistent in quality and finish but put up under the same style labels and in a similar class of packages. He said when a retailer advertised part of this line he advertised the entire line; if part of the line was satisfactory it led to purchases on the rest of the line, but on manufacturers' brands this naturally could not be true as each article is in a different style box, under a different brand, and the sale of one article which may be satisfactory does not in any sense or manner help the sale of the rest of the line that this dealer controls.

Mr. Norvell impressed upon his hearers that many improvements in the fashion of goods, in finish and in the manner in which they are put up had been suggested by jobbers. He called attention to the fact that on a number of lines the keen competition among manufacturers on their own brands had led to such

DETERIORATION IN QUALITY

such jobbers had found it advisable to bring out goods of superior quality under their own brands because they believed there was a demand for goods of high grade in these lines and that the retail dealer and consumer were willing to pay the price of a better article. He cited a number of instances where manufacturers, finding there was a demand for these goods of higher grade, had afterwards introduced them under their own brands.

He dwelt especially upon the fact that some of the principal jobbers in the country seemed to be in closer touch with the wants of the retail trade, particularly in the way of packages, than the manufacturers. He called attention, for example, to the fact that the manufacturers of Saw Screws put them up ½ gross in a box, and inquired how long it would take the average retail dealer to sell six dozen of a Saw Screw of one size. He stated several jobbers re-pack these goods one dozen in a box and he recommended that the manufacturers, as a whole, devote more attention to the convenience of the retail trade in this respect.

Mr. Norvell dwelt at length upon the point that the jobbers and retail dealers were not the aggressors in this catalogue house fight. He read extracts from literature of catalogue houses in which they gave the consumer to understand he was being overcharged and imposed upon by the retail merchant. He said the catalogue houses were simply reaping what they had sown, and that the jobbers and retailers of this country would certainly be men of very weak spirit if they did not use what weapons they could in retaliation against the aggressions of catalogue houses.

He spoke of the underhand methods being used by catalogue houses to obtain goods that had been denied them by the manufacturers. He referred to their broken pledges to the manufacturer in the way of maintaining prices. He called attention to their frequent misunderstandings and disagreements with manufacturers who had attempted to control their selling prices.

He especially criticised the logic of a manufacturer who said he would be compelled to sell a catalogue house because if he did not sell them this catalogue house would

SLAUGHTER THE PRICE OF HIS GOODS.

"Then," said Mr. Norvell, "you admit you are afraid of this catalogue house? You admit their tactics of cutting prices lead you to meet their views? Isn't the logical conclusion of this argument that the jobber in order to persuade you to do what he desires should demoralize the price on your goods and make you fear him, and then probably you will be as considerate of the desires of the jobber as you now seem to be of this catalogue house?"

"It is well known," said Mr. Norvell, "that the catalogue houses are secretly backing the movement for parcels post. Every intelligent jobber and retailer in the land knows what a tremendous blow the parcels post would be to the retail trade of the country and in the development of the small town."

Extracts, without names, were read from some very interesting letters from manufacturers on the catalogue house question. One manufacturer who makes a very small article sold by the retail trade in exceedingly small quantities, wrote a retail dealer, in reply to a letter, asking how retail dealers would send him an order for $100.00 worth of these goods he would make him as low a price as he made the jobber. This quantity of this item would last that retail dealer twenty years.

Another manufacturer who makes very expensive machinists' tools, admitted that he sold not only catalogue houses and the retail trade in large cities, but also sold direct to consumers, and at the same time expressed dissatisfaction with the small sales of the jobbing Hardware trade on his goods.

One of the head men in a catalogue house informed Mr. Norvell that a certain association of manufacturers decided they

Digitized by Google

would not sell catalogue houses. Two days after their meeting one of the members of this association called on this catalogue house and attempted to secure an order from them for his line of goods under special brands of their own.

Another manufacturer sold a catalogue house a very large quantity of defective goods at a special price. The catalogue house issued a postal card offering these goods at less than the cost to many jobbers. The matter was immediately taken up by the Joint Committee, and this manufacturer went to Chicago and persuaded this catalogue house to allow him to take back all the goods he had sold them. It is not known just what argument was used.

Mr. Norvell concluded his remarks by stating his experience with certain manufacturers in this catalogue house question reminded him of the story of the socialist who claimed men should have all things in common. A friend said to him, "now if you had $100,000 would you give me $50,000." "Certainly," said the socialist, "$100,000 is too much money for any one man to own." "Do you mean to say," said his friend, "if you had one hundred acres of land you would give me fifty?" "Without the slightest hesitation," replied the socialist. "Now," said the friend, "if you had two pigs would you give me one of them?" "Not on your life," answered the socialist, "you know I have two pigs." So with certain manufacturers. They offer us a great deal of aid and comfort and co-operation till we get down to a point where they run the risk of losing a little business.

MUTUAL INSURANCE REPORT.

The report of the Committee on Mutual Insurance, John M. Pittman, chairman, is as follows:

After a careful examination of all the testimony that we have been able to obtain we are of the opinion that we are not strong enough at present to organize a mutual company. Our investigation has convinced us that Hardware mutual insurance as presented by the National Association and by several of the State associations is perfectly safe and practicable.

We therefore earnestly recommend that the members of this association place a large share of their insurance with these companies, a list of which may be found in an article from *The Iron Age* published in our official programme for this year.

H. M. Coles of St. Louis, representing the Sheldon School of Scientific Salesmanship, made a formal address on "The Science of Salesmanship."

The following papers were read:

"Special Brands and Their Value to the Hardware Dealer," W. T. Avera, Pocahontas.

"The Evolution of the Stove Business," Felix G. Blackwell, Springfield, Mo., representing Buck's Stove and Range Company of St. Louis.

"Should Hardware Dealers Confine Their Buying Strictly to Hardware Jobbers and Manufacturers?" H. W. Patrick of Russellville.

Among others who spoke were W. W. Webber of the Webber-Ayers Hardware Company of Fort Smith; C. E. Speer of the Speer Hardware Company of Fort Smith; J. H. Hall, salesman ager of the Simmons Hardware Company; F. A. Sprague of the John Deere Plow Company of St. Louis; M. B. McNeeley of the International Harvesting Company of Little Rock; Evander Williams of Memphis; H. C. Thompson, Buck Stove and Range Company of St. Louis; F. O. Snow of the Capewell Horse Nail Company, Hartford, Conn., and others.

One of the papers read at the Friday morning session was entitled "Funny Things in the Hardware Business," in which W. O. Hardeman of the Fones Brothers Hardware Company, Little Rock, entertained the gathering with a recital of some amusing reflections and anecdotes from his 21 years' experience in the Hardware field of Arkansas.

The feature of the closing session was an address by the Rev. Sam P. Jones of Georgia, who happened to be in Little Rock. His subject was "Character," which he termed the foundation stone on which every business should be built in order to stand.

THE REPORT OF THE FINANCE COMMITTEE

showed the association to be in first-class condition, full credit for which was given to the secretary. The report of the Auditing Committee complimented the manner in which the books and accounts of the association were kept by the secretary.

OFFICERS CHOSEN.

The following officers were chosen for the ensuing year:

President, Thomas B. Stewart, Newport; First Vice-President, R. P. Allen, Van Buren; Second Vice-President, W. E. Dean, Portland; Secretary-Treasurer, C. E. Taylor, Little Rock.

The following members of the Executive Committee for the term ending 1907 were chosen: Hamp Williams, Hot Springs; R. F. Roys, Russellville; J. P. Simpson, Malvern; John R. Mott, Helena. The other members of the committee, those whose terms expire in 1906, are F. B. Gregg, Little Rock; C. T. Rosenthal, Batesville, and J. M. Pittman, Prescott.

C. E. Taylor was chosen representative to the meeting of the National Retail Hardware Association.

The following standing committees were appointed for the year ending June, 1906:

COMMITTEE ON FRATERNAL RELATIONS: J. F. Maxey, Ozark; I. P. Rudolph, Gurden; Herman Carlten, Lake Village.

PROGRAMME COMMITTEE: John A. Plummer, Marianna; J. L. Davis, Magnolia; H. W. Patrick, Russellville; W. L. Jeter, Jonesboro; R. P. Graham, Fordyce.

GRIEVANCE COMMITTEE: R. W. Merriwether, Paragould; L. E. Rowe, Pike City; Harry Hankins, Monticello; R. D. Jones, Magazine; A. T. Grimes, Walnut Ridge.

TRANSPORTATION COMMITTEE: K. G. McRae, Hope; Jno. B. Brown, Van Buren; H. E. Hawthorne, Newark; A. D. Malone, Plummerville; J. B. Hurley, Warren.

MEMBERSHIP COMMITTEE: W. A. Jackson, Dardanelle; W. W. McMinn, Newport; C. H. Stout, Black Rock; Ray Hayes, Wynne; Robert Conn, Stuttgart; C. F. Wingfield, Hope; G. H. Briant, Ashdown; W. F. Bracy, Little Rock; Lem Kirkpatrick, Argenta; L. D. Smith, Stephens; A. J. Lopp, Harrison; W. T. Avera, Pocahontas; Manly Fox, Clarksville; J. H. Morgan, Camden; L. A. Morgan, Strong.

ENLISTMENT COMMITTEE CHOSEN.

An Enlistment Committee, composed of traveling men who are honorary members of the association and who represent the various lines carried by the merchants, was also chosen.

A resolution of appreciation by the members for the work of the traveling men during the past year was also adopted, and the traveling men were admitted as honorary members to the association on payment of $1 dues.

The Committee on Resolutions reported the usual Resolutions of thanks which were adopted:

LITTLE ROCK THE NEXT PLACE OF MEETING.

C. E. Speer, W. W. Webber and Jesse Miller of Fort Smith extended a cordial invitation to the association to hold its next meeting in that city. It was, however, decided, after discussion, to meet again next year at Little Rock. A vote of thanks was tendered to the Fort Smith delegation for the invitation from that city.

BANQUET.

The Norvell-Shapleigh Hardware Company, St. Louis, tendered a banquet to the members of the association and other visitors on Thursday. The occasion was a most enjoyable one in every respect. The unique menu was as follows:

Blue Points. Cocktail.
Glaziers' Points. Sam Bigelow.
Radishes. Olives. Boston, Mass.
Consomme a la "Bridge Tool Company."
Boiled Mackinaw Trout, "Wonder Sauce."
"Blue Diamond" Back Terrapin.
Sweetbread Piqua a la W. A. Cook. Haute.
New Green Peas. Sauterne.
Crumley, 1864.
Filet of Beef—Sauce M. O. Martin. Atlanta, Ga.
New Asparagus. New Potatoes.
"Diamond Edge" Sherbet.
Broiled Jack Snipe, *aux* Dick Shapleigh. Champagne.
"Conqueror" Tomato. Chateau Fernley.
Missouri Strawberries. "Jersey" Ice Cream. 1904.
Atlantic City.
Assorted Cakes.
J. R. Walker, J. C. Flood,
W. L. Neel.
Coffee, "Black Prince." Benedictine—Asbury.
Cigars. The Jobbers' Friend.
"The Burning Shame." Hot Springs, Va.

The speakers of the evening included a number of well-known Hardwaremen, whose discussion of the attractive topics assigned to them, made the evening one which will long be remembered by those present.

NEW GLASS-MAKING MACHINE.

A genius has invented a machine for making handled glassware, which is being tried in the Indiana Glass Co.'s plant at Cicero, Ind., and which is thus described: "E. E. Hoffman, a glass worker and mold maker of Summitville, has completed and patented the nearest human machine that has ever entered the field of glassmaking in the tableware line. The machine does away with all skilled labor except that of one man, and reduces the number of employees to one-third the number required by hand process. The cost of 525 pieces of tableware under hand processes is approximately $15, while this machine makes a thousand pieces for half the money. It is a greater innovation in the line of tableware glass-making than the Lubbers machine was in the window glass trade. The Hoffman machine makes of one piece and at one process all handled ware, which hitherto required sticking on the handles. The hand workmen in the line are much exercised about the new knight in the lists which promises to bring a revolution in their trade."

ELECTRICAL SUPPLIES IN THE HARDWARE STORE

The local Hardware dealer is being affected more or less by Catalogue House Competition and as a result there is a tendency for him to branch into plumbing, steam fitting, and to a certain extent the business of electrical wiring.

Almost all of the Hardware houses in the smaller towns carry fixtures for both gas and electricity. They also should, if they do not already, carry batteries, bells, etc. These goods can be sold to the consumer, when handled in connection with the Hardware line, at a fair profit and still be sold for less than the small dealer can possibly afford to sell them.

The lighting in almost all towns and cities is done by a central lighting station or from an isolated plant. In either event the central station and the isolated plant must carry a stock of electrical supplies to meet their requirements or depend upon some local dealer in electrical supplies. There is not, as a general thing, enough business to justify a local dealer in carrying anything but the smallest possible line while, as a matter of fact, the demands of the consumer are varied greatly.

The small dealer in electrical supplies, doing wiring, must have a store in the main part of the town and must have some one constantly in attendance at the store while the owner is probably out working on contract work. This makes it necessary to make the rent and the clerk hire off of the very limited quantity of supplies that is sold.

Another matter that should be considered is that in a great many towns there is no one handling supplies except the central lighting station and when a customer desires to purchase a few lamps to replace those that have burned out he must go to the lighting plant, which is usually situated in some out of the way place, and when he gets there he frequently finds that during the day time there is no one in attendance. The location of the plant itself is such that it is hardly safe to send children as it is almost always along the railroad tracks and in an undesirable quarter of the town.

The inconvenience is as great to the lighting plant as it is to the customer and the lighting station as a general thing prefers to turn the lamp business over to some one who is in a store in the town. In some instances they have turned it over to the drug store, in other instances to groceries. Neither of these people carry wire, bells or batteries or any other kind of electrical supplies, while the Hardware dealer almost always carries a number of things which are electrical supplies as well as builders' supplies. In other words, the retail Hardware dealer is the logical person to distribute electrical supplies.

In some of the towns the lighting station has been following the practice of furnishing free renewals of incandescent lamps. This practice is gradually dying out and we think that within two or three years at the outside there will be no one furnishing lamps free.

The trade in electric lamps opens about the middle of August, but throughout the entire Spring and Summer there is a demand for sockets, wire, cleats, etc., that enter into the construction of new buildings. The Hardware dealer can look after prospective electrical business in new buildings at the time when he is looking for orders for Builders' Hardware. A good business in small electric signs can usually be worked up and contracts for special wiring for decorative purposes can be secured if the Hardware merchant puts into the business a sufficient amount of hustle.

In response to our inquiry as to their experience in this line the Bindley Hardware Co., Pittsburgh, writes as follows:

"We have your favor of the 25th, asking our ideas concerning the handling of electrical supplies by Hardware dealers. We would say to you we believe the retail Hardware trade is by all odds the best channel through which these goods can be handled. Electrical supplies enter so largely into the matter of new buildings and housefurnishings (which lines of goods generally the retail Hardwareman handles) that it seems as though an electrical supply department would be almost a necessary part of his establishment. In addition take the special lines of electric light lamps, with the various accessories which are liable to be bought by the average householder for his daily use; he is in the habit of going to the retail store for his housefurnishing supplies, and as the Hardware stores are generally conveniently situated it makes it a most natural place for him to go. About twenty per cent. of the trade handled electrical supplies in 1903, and we have no doubt but that in 1904 this amount increased to at least forty per cent., and if the natural advance continues in 1905 probably sixty per cent. of the trade will be handling electrical supplies."

The George Worthington Company of Cleveland, Ohio, also handle these goods to a considerable extent. They write as follows:

"Replying to your letter asking why retail Hardwaremen should handle electrical supplies, beg to advise that there are various reasons to advance in favor of the above.

"During the last three years there has been a noted increase of retail Hardware merchants who have added a line of electrical wiring supplies to their Hardware business, but in a large percentage of instances, we find that not only have the Hardware merchants put in a stock of electrical supplies, but have employed the services of an electrician and are now carrying on an electrical supply and construction business.

"In the smaller towns especially, you will very often find that the electric lighting plant is located in some out of the way place, and often the electrical contractor, who while doing a wiring business, finds his capital limited which prevents his carrying a stock of these supplies, and if his financial rating is such that the electrical jobber will not open an account with him, he very often has to look to some one in his town where he is better known, for his source of supplies. Naturally, the Hardware merchant is the one to look to. The lighting plants very often do not care for the wiring or supplies, leaving that to some one else, preferring to confine their business more to furnishing light alone.

"A few years ago the Hardware merchant started in the electrical business by carrying a stock of dry batteries, push buttons, bell wire, and other supplies needed for door bell work. After carrying this stock, he found that the public began to look to him for electrical incandescent lamps, and other necessary supplies for electrical repairing. Then, too, they had him furnish Builders' Hardware for houses, and he naturally drifted into furnishing gas chandeliers, and where houses were wired for electrical work, he began furnishing electrical fixtures, and then the combination gas and electrical fixtures, one thing leading to another, until to-day a goodly number of Hardware merchants can take a contract for not only furnishing Builders' Hardware, but can also contract for electrical wiring, furnishing fixtures, etc. Then the customer can confine his account to a lesser number of people. We also find the plumber and steam fitter taking up this line of work."

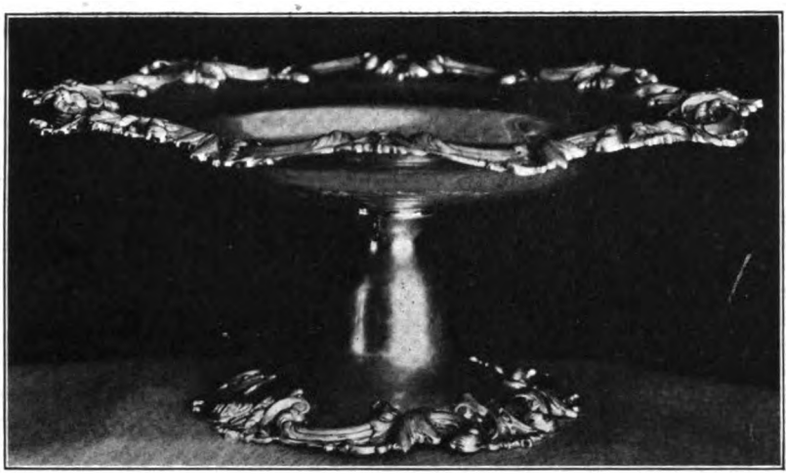
SEA-GRASS FURNITURE.

(From United States Consul Anderson, Amoy, China.)

A large trade is being built up along the lower Chinese coast in furniture made from bamboo and a certain sea grass which the Chinese have used for centuries in many ways, but which has heretofore not been used for furniture. Considerable of the trade is with the United States, chiefly by way of Hongkong. The manufacture of chairs and small tables from this material was commenced by two American citizens from the Pacific coast. They began making the well-known rattan furniture, and exported much of it to the United States. Casting about for new and novel materials, they hit upon this coarse grass, and, after considerable experimenting they found that upon suitable bamboo frames they could make fairly substantial and very pretty articles. The natives imitated their work, and now it may be said to be an industry common to many points along the coast. The grass is secured in the salt water marshes along the lower coast, especially below Swatow, and ranging toward Canton. It can be had in abundance, almost without limit, in fact, and its pliability and strength are such as to make it available for not only furniture, but for other purposes. It is greenish yellow, maintains its color and strength, and might be used to advantage in other industries.

The use of rattan furniture in China by both foreigners and natives is increasing, but exports are small in spite of low prices. The great freight charges due to its bulk make any great trade in it impossible. It is probable, however, that there will be a considerable increase in the export of raw materials for the manufacture of such furniture in the United States.

Excusable.



"It seems to me that Bliggins doesn't know his own mind."

"Well, you can't blame the man. He has been on the jury and has listened to arguments of opposing lawyers so much that he doesn't feel sure of anything."—*Washington Star.*

AN ACKNOWLEDGMENT.

I wish to thank most heartily my Special Train friends for the beautiful present that I have received from the committee, appointed by them en route from Hot Springs, June 9th. I am as much at loss for words to express my feelings in this matter, as when our mutual friend "Pop" Bennett made the presentation

STERLING SILVER COMPOTE PRESENTED TO A. EUGENE BOLLES, MANAGER OF HARDWARE.

speech to me in the Pullman car to which I had been inveigled by Mr. Muzzy.

The gift is one of the choicest I have ever been favored with, and it will prove one of the most pleasant memories of my life-

TOP VIEW OF THE SAME.

time, testifying as it does that the small efforts I had made for my friends' comfort were appreciated more fully than I had reason to expect.

A. EUGENE BOLLES.

WONDER CHURN PROCESS FOR MAKING BUTTER.

In the age of progress and invention when science is making such rapid strides, it is interesting to note that an inventor has given some attention to the production of an invention which serves to increase the income of the farmer and at the same time makes the work of this class of toilers less laborious. In Hartford at the present time there is offered for sale a machine called the Wonder Churn Process, and its operation is a revelation to butter makers or users. The churn produces not a substitute, but genuine butter from pure milk, and twenty times the amount from the same material used by the old process. It is cheap and makes butter without affecting or separating the cream.

The Wonder Churn Company filed articles of incorporation at the office of the Secretary of State recently. The incorporators are: J. R. Phillips, John T. Collins and Stanley J. Riley, of this city, and W. F. Briggs, of Providence. Those in charge of the demonstration invite all interested to see the churn work at 86 Pratt Street.

The officers are as follows: President, Morris Tilley, Chicopee, Mass.; vice-president, Stanley J. Riley, Hartford; secretary, W. F. Briggs, Providence, R. I.; treasurer, John P. Phillips, Hartford.

SOUTH CAROLINA RETAIL HARDWARE ASSOCIATION.

At a meeting held at Wright's Hotel in Columbia, S. C., on the 14th and 15th inst. the South Carolina Retail Hardware Association was organized. The meeting was a very successful one, considering the novelty and limitations of the organization movement in the South and the difficulty of persuading competitors that their interests are to be conserved by the same means and that it pays better for fellow merchants to work in harmony than to try to do it all by cutting prices below the line that marks a legitimate profit.

The following merchants were present at the meeting:

T. A. Schumpert, Newberry Hardware Company, Newberry.
Jno. B. Brooks, Brooks & Jones, Laurens.
W. S. Stewart, Columbia.
J. W. Smoak, Orangeburg.
W. H. Jones, Abbeville Hardware Company, Abbeville.
M. O. Dantzler, Orangeburg.
J. H. Burns, Burns & Barrett, Sumter.
E. C. Burch, Hartsville Supply Co., Hartsville.
A. R. Craig, Horry Hardware Co., McColl.
A. W. Welling, Marion Hardware Co., Marion.
T. O. Flowers, Rock Hill Supply Co., Rock Hill.
W. H. Smith, Smith Hardware Company, Gaffney.
Paul W. McLure, Gambrell Hardware Company, Greenwood.
N. A. Craig, Greenwood Hardware Company, Greenwood.
E. O. Rodgers, Florence Hardware Company, Florence.
J. L. Williams, Timmonsville Hardware Company, Timmonsville.
M. Bonnoitt, Welling & Bonnoitt, Darlington.
H. P. Duvall, Cheraw Hardware & Supply Company, Cheraw.
P. M. Parrott, Durant Hardware Company, Sumter.
G. A. Baxter, Arthur Hardware Company, St. Matthews.

At the request of the assembled merchants Paul W. McLure of the Gambrell Hardware Company, Greenwood, announced the purpose of the meeting as the formation of an association for the protection and advancement of retail Hardware interests in every legitimate way, the classitying of those who sold Hardware as a side line only as "leaders," opposition to catalogue houses and their parcels post agitation, and the adoption of the mutual fire insurance feature.

M. L. Corey, secretary of the National Retail Hardware Association, was then introduced and asked to give his views on the benefits and advantages to be derived from organization, which he did in a clear and concise manner.

H. P. Duvall of Cheraw was elected temporary chairman of the meeting and Mr. McLure was chosen temporary secretary.

The following committees were then appointed:

CONSTITUTION AND BY-LAWS: M. Bonnoitt, W. H. Smith, A. R. Craig.

FINANCE: J. H. Burns, T. O. Flowers, E. O. Rodgers, G. A. Baxter.

NOMINATIONS: T. A. Schumpert, A. W. Welling, P. M. Parrott.

ORGANIZATION: Jno. B. Brooks, J. W. Smoak, E. C. Burch, N. A. Craig.

Mr. Duvall was subsequently elected president and Mr. McLure secretary and treasurer. A motion to make application for membership in the National Association was carried. After a resolution of thanks to the management of the hotel for courteous treatment the newly formed association adjourned to meet again in Columbia on the second Tuesday in June next year.

A HELP FOR THE HARDWAREMAN.

A short time ago we described in this paper the two display boxes recently placed on the market by the Pike Manufacturing Company, Pike, N. H. Since then these boxes have been much improved by the addition of trays in the upper part where are displayed samples of the goods contained in the box. The advantage is obvious in that it permits of the easier selection of the articles desired by the customer and of course makes a better appearance when the boxes are used for display purposes. We illustrate herewith the two boxes as improved. The Oilstone box contains a complete assortment, seventy-nine stones in all. The Scythe Stone box contains eighty stones of assorted grits. The Oilstone box is made in two other sizes; number 2, containing forty-six stones and No. 3 with 52. These boxes are being sold to the trade at a price below what it would cost to order the contents in the usual way, so that the box can be thrown away, if desired, when empty without loss to the dealer. The prices have been adjusted in this manner to encourage the buying of these boxes by Hardware dealers, it being the belief of the manufacturer that they will materially increase the sale of these goods in the Hardware store.

THE LIFE OF A BARREL.

A writer in the *Scientific American* points out that the introduction of improved machinery in its manufacture has made the American cooperage business the largest in the world. There are upward of 300,000,000 barrels and circular packages manufactured in this country annually, and the demand increases so that this output must be steadily broadened in order to keep pace with the growth of the business. The largest consumption of barrels is in the cement business, which approximately demands 35,000,000 a year for the trade, while flour comes next, with a demand for 22,500,000; fence staples, bolts, nuts and nails require 18,000,000 and sugar 15,000,000. Roasted coffee, spices, crockery and fruits and vegetables use up about 5,000,000 barrels a year each, while the glassware trade, baking powder companies, distilled liquor manufacturers and candy, tobacco and cheese packers are big users of barrels, averaging in each trade from 2,000,000 to 3,000,000 barrels. The consumption of barrels for molasses, oil, lard and pork is also enormous, while dry paint, glue, snuff, oatmeal, screws, castings and general Hardware articles annually increase the demand on the cooperage supply.

While the amount of expenditures for barrels can be closely estimated for a given year, it is not possible to say how many barrels are in actual use. The life of a barrel is put down at one year by the trade; but that is far from true. The great majority of barrels have as many lives as a cat. They begin as sugar or flour barrels, and are then sold to the farmer for shipping his produce to market. It may be they are returned to him several times, carrying potatoes or pickles to market in the first trip, and then cabbages or lettuce in the next, each cargo being lighter in weight than the previous one, owing to the weakened condition of the barrel. Finally, the barrel may serve out its life work as a garbage receptacle, and be burned in the end in some tenement home to keep out the winter's chill. Thus it may be said that a barrel serves a more useful career than almost any other manufactured article, and its life is much longer than a season.

The demand for barrels is steadily increasing because modern machinery has made it possible to make them for the trade cheaper than almost any other form of package. That it is the most convenient form of package has long been acknowledged. The ancient cooper's art was a skilled one, and the work of cutting out the staves and then assembling them required long practice and apprenticeship. To-day machinery performs in a fraction of the time what hand labor did so slowly and clumsily.

The modern veneer machines have been instrumental in reducing the cost of barrels. Hand labor is eliminated here to such an extent that the work of feeding the machines constitutes most of the requirements of the operators. The staves are cut to the required thickness by the machines and then pressed into shape by hydraulic pressure until they are ready for the assembling machine.

A feature of barrel-making in this country is the grading of the circular packages so that all the lumber brought to the factories can be utilized. One class of barrels must be absolutely water-tight, without a flaw of any kind in their staves. Barrels made for the oil, whiskey and paint trade must not only be flawless, but they must have a resistance power equal to a lateral pressure of 500 pounds. In order to secure this the staves must be put to a rigid test before hand, and they must be cured so there will be no danger of shrinkage and damage when put into use. Lumber used for this work must be carefully selected, and it must be cured by nature's slow but sure process. Kiln-dried lumber would never do. The condition of kiln-dried wood is such that it would prove too brittle.

The second grade of barrels comprises those which have to endure a great lateral strain, but which do not have to be water-tight. To this class belong the sugar barrels and all those used for packing Hardware. The staves must be made of hard wood, but they only require strength and a power to resist 300 or 400 pounds lateral pressure. It is possible to use for these barrels most of the lumber rejected for the first class of barrels. There must not be knot holes in the barrels, however, for tightness to some extent is essential. While the sugar and flour barrels have paper lining inside of them, they will spill more or less of the contents if holes and cracks of an unusual size are left in them.

The third grade of barrels includes those used in the Hardware trade and for packing tobacco, spices and coffees. The weight of these articles is no less than sugar or flour, but their sides need not be so tight. The barrels and kegs for the Hardware trade must be stout, but lumber can be used that is somewhat defective. Knots are not necessarily a bar to the use of staves. Some of the rough lumber used up in this way is practically of little or no use for the manufacture of any other kinds of circular packages. The cost of the raw material being smaller, the barrels can be sold to the trade from 50 to 60 per cent. less than those made for sugar, molasses, oil, whiskey and paints.

The question of hoops for these commercial barrels is fully as important as the staves. The use of wire and flat iron hoops has become quite universal, but where wooden hoops can be used as well, they always receive the preference. The most satisfactory method is to use wooden hoops, reinforced by iron or wire ones. A great many of the barrels used in the trade are thus held together. There is a uniformity of strength existing between staves and hoops which must be carefully computed in the manufacture of barrels for the different trades. To make hoops that would break at a straining point of 200 pounds for barrels that were built of staves guaranteed to withstand a pressure of 500 pounds would be a waste of good material. If anything, the hoops must have a resistance more than equal to that of the staves. The hoops are consequently the most important part of the barrel. Stout hoops will hold a barrel together even when the staves are weak, and it is possible to hoop a barrel of 200 pounds resistance so that it will resist a pressure for a time of 500 pounds. The breaking power of either the wooden or wire hoops is carefully computed for each class of barrels, and when properly made and applied they will insure a long life to the circular packages. The life of the barrel is estimated by the life of the hoops, and to prolong it beyond that period new hoops must be supplied.

CHAMOIS SKINS.

In a paper in the *American Journal of Pharmacy* Mr. C. C. Drueding points out that "chamois skin" is somewhat of a misnomer; only a small fraction of the skins sold as chamois have ever graced the back of the Rupicapra tragus. What is known generally as chamois skin is really an oil-tanned sheep or lamb skin lining. The supply of skins from the genuine chamois average only about 5,000 to 6,000 skins yearly. The genuine skins are heavier and much coarser than those of the sheep and lamb. For strength and durability the former are preferable, but for ordinary use and appearance the oil-tanned sheep skin lining would in most instances be chosen. Sheep or lamb skins are manufactured into chamois leather by first removing the wool, which is done either by painting the skin on the inside with a solution of sodium sulphite, or by immersion in milk of lime. The former method is the quicker, and when the wool is loose it is pulled off by hand or scraped off with a blunt instrument. A second immersion of the skin is made in milk of lime to swell it, after which it is "beamed" to remove any fleshy particles adhering. The skin is then split; the part next the wool (known as the grain side) is not suitable for chamois leather, but is used for hat linings, book covers and so forth. Splitting is accomplished by a machine specially constructed for the purpose. It is practically an endless knife, the edge of which is constantly ground to keep it sharp, the skin being passed through rollers against the sharp edge of the knife. These machines require very delicate adjustment to produce good results. The inside lining, or flesher, is then tanned by sprinkling with codfish oil of good quality. As it is important that the skins should be thoroughly saturated with the oil, a number of them are placed into what are known as "fulling stocks," which twist and turn the skins in every direction, and distribute the oil evenly. After sufficient milling, the skins are partly dried, and the process of sprinkling, milling and drying are repeated again and again until the oil is thoroughly incorporated, and all the moisture is dried out. They are then allowed to hang sufficiently long at a temperature of about 100 degrees F. to thoroughly tan them. After this the oil is removed by pressure, and the balance washed out by saponification, and they are again dried, and ready for finishing. The oil, which is recovered by decomposing the soap solution with an acid and separating, is sold to leather manufacturers, who use it for currying other kinds of leather. The skins are finished by pressing against revolving wheels covered with emery or flint to remove adhering substances, and to produce a fine surface. The finished chamois leather is then cut into suitable sizes and packed for the market. The American manufacturers prefer skins cut into uniform sizes, the waste pieces being utilized for watch pockets, purses, and similar articles.

Chamois skins are used principally for cleaning purposes. Good quality chamois skin is yellow or light yellow in color, and when freshly cut should show a dark yellow color, indicative of oil tannage. The principal brands of chamois in the market are the American, English and French.

DIDN'T KEEP THEM ALL.

CARNEGIE TECHNICAL SCHOOLS.

Architects employed by Andrew Carnegie to plan the buildings which will constitute the Carnegie Technical Schools of Pittsburgh have finished the task after a year's work. These buildings will cover 32 acres.

Mr. Carnegie expects to expend at least $25,000,000 in erecting the buildings, equipping them with the most modern machinery and appliances and endowing them with a sum sufficient to insure their maintenance for all time.

Work will be commenced on the first group of buildings early in the Spring. Mr. Carnegie hopes to live long enough to see the whole vast system of schools in operation. It is his purpose to make this technical institute the great monument of his busy life.

Every branch of scientific and industrial pursuit for both men and women will have its special department in the institute.

The buildings to be first erected are for the schools of journeymen and apprentices. These constitute about one-seventh of the total scheme.

ANXIOUS TO GET STARTED.

It is Mr. Carnegie's plan to furnish one group of buildings at a time, so that they can be thrown open to the students at the earliest possible date.

One group will be devoted to the school of applied science. It will be devoted to the training of young men for draughtsmen, engineers' assistants and other positions of a grade above that of the skilled mechanic, and where intelligence and technical information are more essential than dexterity.

The school for apprentices will offer a system of instruction for the further education of apprentices already at work, and the training will be conducted on lines that will give them both technical and theoretical information necessary to their advancement into the ranks of skilled mechanics.

OPPORTUNITIES FOR WOMEN.

The technical school for women will give instruction to both day and night students, it being one of the fundamentals of Mr. Carnegie's policy to make the benefits of the institute accessible to bread-winners employed in the day-time, as well as those who can give all of their time to study.

This school will have for its principal aim the training of women to earn their livelihood. Its purpose will be to give them a technical training in various industries which will increase their earning power. Millinery, dressmaking and other trades most suitable for women will be taught.

The school of applied design will be devoted to the instruction of those who aspire to become skilled workers as well as designers, and who have had a reasonable amount of experience and are familiar with the technical requirements of the various art industries. Instruction will be given in the design, technique and mechanical processes of the various industries.

THE MARCH OF CIVILIZATION.

It is almost three hundred years ago when the world received its first account of the wonders of the Niagara Falls. It is only fifty years ago when Livingstone carved his name on a tree standing in view of the marvels of the Victoria Falls, in what was then "Darkest Africa." After Livingstone came Stanley, and it was only thirty years ago that this great explorer explored the boundaries of Lake Victoria Nyanza, and it is less than twenty years ago when he made his last and in many respects most memorable trip through the then unknown regions of Central Africa. "Yet we have before us now," says the *Wall Street Journal*, "a two-page advertisement of a fast railway train running through the very region explored by Livingstone and Stanley. A train de luxe leaves Cape Town every Wednesday for Kimberly, Mafeking and Bulawayo, connecting with a fast saloon service and sleeping accommodations to Gwelo, Salisbury and Victoria Falls. These trains are lighted by electricity and provided with saloon, dining and buffet accommodations. The Cape to Cairo Railroad indeed reaches nearly every important point, which only a few years ago we were reading about in the wonderful narratives of Livingstone's and Stanley's explorations. Nothing could illustrate more vividly the rapidity with which modern civilization is moving and the speed with which Darkest Africa is being opened, not only to the commerce, but to the tourists of the world. Not only have the Victoria Falls thus been brought within the easy reach of travelers, but this stupendous wonder of the world, like Niagara, is about to be utilized to provide power to conduct electric energy for use in transportation and industry."

BISSELL'S ANNUAL FAN OFFER.

The Bissell Carpet Sweeper Company, Grand Rapids, Mich., and 25 Warren Street, New York, are making their popular Fan offer to the trade for the current season, reference to which is made in their advertisement in this issue of HARDWARE. This proposition will expire on July 25th, so that it behooves our readers who have been waiting for its recurrence to be prompt in signifying their desire to participate. They state in their announcement that having "just received direct from Japan 250,000 good quality folding Japanese Fans, and these together with 50,000 palm leaf fans, will be given out to our customers during the next six weeks. Each year our Fan offer becomes more popular, and the trade's appreciation of it is shown by the fact that we usually receive sufficient orders within four weeks from the time our offer goes out, to completely exhaust our stock of fans.

"With each dozen Bissell's "Cyco" Bearing ordered in response to this letter, to be shipped before July 25, we will include free seventy-five fans. Of course, in all cases where we have unfilled orders on our books at the time this offer is made, and if such orders are to be shipped before July 25th, the fans will be included just the same as if you ordered in response to this letter. Place your order at once, and insure getting the fans. Remember we furnish seventy-five fans free with each dozen "Cyco" Bearing Sweepers ordered now to be shipped on or before July 25th.

"As this offer is made to stimulate business for us mutually during a dull period of the year, you will understand why we cannot furnish the fans free on account of orders placed and executed prior to the date of this letter."

HIGH GRADE MARKSMANSHIP.

At Chicago, Ill., June 3, first professional average was won by Mr. W. Stannard, and first amateur average by Mr. A. Molle, both shooting Peters factory loaded shells.

Quite a remarkable score was made on the grounds of the Indianapolis Gun Club, June 3, by Mr. G. M. Kanouse of St. Paul, Ind. He was high man for the day, breaking 96 per cent., and attributed his excellent score to the use of Peters factory loaded High Gun shells.

At Ardmore, Ind. Ter., June 5, 6 and 7, Peters shells were decidedly in evidence. Mr. C. F. Renst was high amateur and Mr. J. S. Day high professional.

At Dublin, Ind., June 8, Mr. C. A. Young was high gun, Mr. L. H. Reid second, and Messrs. Kirby, Peters and Clark tie for third. The entire bunch using Peters shells, of course.

On June 9 at Ruffsdale, Pa., Mr. H. S. Denniker won high average, Mr. Ed Hickey second, and Mr. Robert West, third, all using Peters factory loaded shells.

At the Ohio State Shoot, at Canton, Ohio, June 13, 14 and 15, the high average for the first day was won by Mr. Tryon, breaking 172 out of 180, and high amateur average on the second day by Mr. R. S. Rhoads, scoring 155 out of 160. Mr. C. A. Young averaged 96.2 per cent. during the entire tournament, and Mr. E. F. Haak of Canton, broke 102 straight, the longest run made by any amateur during the tournament. All these gentlemen used Peters factory loaded shells.

At the Utica, N. Y., tournament, June 13-16, the New York City cup emblematic of the State Championship, was won by Mr. F. D. Kelsey, using Peters factory loaded shells. Mr. Kelsey also won the Fulford Memorial Cup. Mr. Harvey McMurchy the popular representative of the Hunter Arms Co., won second professional average, shooting Peters Ideal shells.

At Indianapolis, Ind., June 16, C. A. Young won high average, losing only five targets out of 200. Dr. Britton was high amateur with 91½ per cent. Both these gentlemen, as well as the winner of the second general average used Peters factory loaded shells. The Grand Hotel cup was won by Joe Michaelis with the score of 46 out of 50. This cup carries with it the Interstate Championship of Ohio, Kentucky, Illinois, Michigan and Indiana. Mr. Michaelis shot Peters shells.

DEATH OF DE WITT C. BRADLEY.

De Witt C. Bradley, senior member of the firm of G. W. Bradley's Sons, Westport and Weston, Conn., manufacturers of Cutlery and Axes, died June 17, aged 59 years. He was born in Weston, and learned a trade in the Axe and Cutlery factory of his father. After a period of service in the United States Cavalry in the West he returned to Weston, and had since maintained his connection with the firm, for twenty years being the senior partner. He was prominent in Connecticut, having represented his town in the Legislature for four years, and in 1901 being elected to the State Senate. He held various town offices during his life.

POPULAR TALKS ON LAW.

Copyrighted 1905, by William C. Sprague, President. The Sprague Correspondence School of Law.

Landlord and Tenant.

NO. 3. THE TENANT'S RIGHT TO REMOVE FIXTURES.

Under what circumstances may a tenant, who has attached or affixed something to the real estate during the term of his tenancy, the right to detach it and take it away with him?

In the first place it is an invariable rule, we believe, that where the right exists at all it cannot be exercised after the tenant's term has expired. If exercised, it must be during his term or immediately at its close. Once the tenant's estate is ended he is in the position of a stranger and can not claim a right to enter for the purpose of removing fixtures. This, of course, aside from any agreement with the landlord permitting him so to do. The time for removal may be extended. Merely being in possession does not give the tenant the right to remove the articles. If the tenant holds over the term of his lease without the consent of his landlord he cannot, after his term expires, remove the articles. "During his term" means during the time when he is rightfully in possession.

The main difficulty arising out of the subject is that of determining what is removable and what is not. Formerly anything substantially affixed to the real estate by the tenant could not be taken away by him, the law presuming that the tenant intended the fixture to be a permanent improvement to the property. The old law has been superseded by statutes and decisions more favorable to the tenant, as we shall see.

There are several tests applied by the courts in settling questions of this kind between landlords and tenants. They are as follows:

First, Can the thing be removed without injury to the property? If it cannot, this goes far in determining the question in favor of the landlord.

Second, Was it intended by the tenant, when affixed, to be a permanent addition to the property? If it was so intended, the courts will incline to prevent its removal.

Third, Was it annexed for temporary use of the business of the tenant, to make the property more convenient for his own purposes, or for temporary ornament? If so, it may in general be taken away.

Aside from any agreement between the landlord and the tenant (which, by the way, should be had if possible and this may be written or verbal), the foregoing tests will usually settle the matter.

As to what is a permanent annexing as intended in the second test, aside from the matter of the intention of the tenant, it has been said that the mere fact that a thing is nailed, or bolted, or screwed to the floor, walls or ceiling, does not of itself make the addition permanent. The intention to make a permanent or temporary improvement must often depend upon and be inferred from the nature of the article, the mode of annexing, and the purpose or use of the article.

An important variation in the general rule is this: Where the premises are leased for a particular purpose known to the landlord, it is presumed that the landlord assents to the tenant putting in any fixtures which are needed to make the premises suitable for the purpose and removing them on his going out; but where the premises are used for a purpose other than that for which they were rented, or for a purpose not known to the landlord, such presumption does not exist. The rule applies not only to shelving, counters, gas fixtures, etc., but also to engines, boilers, machinery and even frame buildings.

Again, nurserymen and florists may remove their hothouses, trees, plants, because these are a part of their stock in trade, and presumably the landlord so understood when he rented, while, on the other hand, a tenant generally cannot remove trees, bushes, flowers, greenhouses, etc., though put in by him. In general, where the article or articles annexed are personal in their nature and are merely accessory to the business, and have been put in for that purpose, and not as accessories to the real estate, they belong to and may be removed by the tenant. Hence the stone piers of a railroad bridge were held in an Ohio case to be the property of the railroad company and removable as against the owners of the land. A tenant has been allowed to take away kettles fixed in mortar, steam engines, mills and even buildings constructed for the particular purpose of his business. But where the articles annexed were not peculiarly for the benefit of the present business, but were for any business that might be carried on in the building, they will be taken as belonging to the realty, as slate in roof, doors, gas pipes, iron sink. etc.

Householders may remove gas fixtures, grates, shelving, etc., unless so affixed as that when removed they materially damage the property.

In conclusion, it may be said that if the articles in question are annexed for the special purpose of immediate profit, and make no necessary or customary appendage to the realty, and if they can be removed without injury to the value of that which remains, they belong to the tenant, otherwise to the owner. This, of course, all aside from any agreement between the parties.

In our next installment we shall study the tenant's obligations and that of the landlord to make repairs.

(To be continued.)

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Insurance—Right to Change Beneficiary.

QUESTION: "A" obtains insurance on his life for the benefit of his children. In the policy there is a clause giving him the right to change the beneficiary "with the consent of the company by written notice to said company." He then signs papers requesting the company to make "C" the beneficiary, because one of "A's" children has died. The policy is then delivered to "C" who keeps it until "A's" death. The insurance company refuses to pay the insurance. Can "C" compel its payment?

REPLY: There was no assignment of the policy. Upon the facts stated "C" cannot maintain an action against the company because as a condition precedent he was bound to obtain the consent of the company to a substitution as beneficiary and this he has not done. Under this policy the consent of the corporation is made indespensable to a change in the payee or beneficiary. Consequently "C" is not entitled to recover anything against the company.

Divorce—Right of Guilty Party to Remarry.

QUESTION: If a woman obtains a divorce against her husband and the decree forbids him to marry again during her life time and he goes into another State and marries while his first wife is still living, is the marriage valid? Can he be punished for disobedience to the decree?

REPLY: It is well settled, that the provisions of a decree of divorce forbidding the guilty party from remarrying during the life of the innocent party, are ineffectual to affect the validity of his marriage to such other, contracted in another State. This is because of the Constitutional requirement that full faith and credit shall be given to the acts, records and judicial proceedings of every State by its sister States. The marriage is therefore valid. If the second marriage had been contracted in the same State in which the decree was rendered, the guilty party would be criminally liable.

Plumbing Fixtures—Right to Remove.

QUESTION: Please advise us on these facts: A plumber installs pipes, faucets, basins and tubs in a building under a written agreement that all materials used are to remain the property of the contractor until paid for. There is a mortgage on the building which was put there after the plumbing was installed, and the mortgagee is about to foreclose. The plumbing has not been paid for and the plumber has notified the owner demanding the return of the materials furnished. Who owns the plumbing?

REPLY: We think the plumbing equipment is a part of the realty and is subject to the lien of the mortgage. It was physically annexed to the realty, adopted to the use of the premises and clearly intended to be a permanent access to the building. The plumber and the owner could, as between themselves, of course agree to preserve the character of the plumbing materials as personal property. But this they could not do as against a bona fide mortgagee who had never assented to, nor had notice of, their agreement. Some of the States take a different view, but this is undoubtedly the law in New York, Maine, Wisconsin and other jurisdictions.

TOBIN ARMS COMPANY, Norwich, Conn., have sent to their patrons a unique folder in the form of a private mailing card. It opens out to twenty-five inches, and presents an illustration of a Simplex Gun, a modern improvement in Hammerless Guns. They claim it will bear a better profit, and show more value to a customer for it, than any other gun on the market. Send today for a catalogue and special proposition to dealers only.

RECENT TRADE PUBLICATIONS.

Geader & Paeschke Manufacturing Company, Milwaukee, Wis., have sent us a couple of their recently published pamphlet catalogues, one of which in an attractive manner suggests "Fishing for 1905," which includes fishing tackle boxes, bait boxes and minnow buckets. The strongest and most substantial fishing tackle box they make is their No. 100, extra large and heavy, made entirely of IXXXX tinplate, with nickelplated Yale lock and heavy leather strap for handle; has three reel compartments suitable for loose hooks, swivels, sinkers, etc., etc. The other pamphlet sent us exploits their line of coal hods and fire shovels. The variety of coal hods include corrugated, either galvanized or japanned, either gold band or decorated with a choice of three bails—half oval, wood handled or plain wire. Their fire shovels are made either galvanized or japanned, with either round or flat handles, and in a large number of sizes. Write for their printed matter.

H. Wagner & Adler Company, New York, N. Y., are distributing their 1905-1906 catalogue, 14 by 11 inches, containing 24 pages. They are manufacturers of highest grade billiard and pool tables; entirely hand made—"built to last" (which is their trade mark) perfected champion, star and the fastest cushions; highest grade bowling alleys, billiard and bowling supplies; also for many years they have been furnishing extra select bowling balls, pins and other bowling supplies. Recently they have organized a complete alley building department, and are now prepared to contract for any amount of alley construction and alleys. Prices and full specifications will be promptly sent upon request. If you are interested in the above lines, write for their catalogue.

The Joyce, Cridland Company, Dayton, Ohio, have issued the 28th annual illustrated catalogue, containing 94 pages, of patent lever jacks, geared lever jacks, screw jacks and hydraulic jacks for which they make the following claims: "The safest operating jacks made; they possess superior mechanical construction and strength; they are the most simple, durable and powerful in the world; heavy weights can be raised or lowered with safety." They have recently overhauled the manufacture of their hydraulic jacks and perfected them. They have improved them by adding (for those who wish) an auxiliary pump, which, on light loads, and in working up to loads, causes the jack to work rapidly. The auxiliary pump is thrown into and out of gear by simple, substantial and positive mechanism which is entirely protected from dust and knocks. Their book will show many new features on other jacks, and will repay a careful perusal.

The Yale & Towne Manufacturing Co., 9-15 Murray Street, New York City, have sent us copies of their two latest publications, "Locks and Hardware for Railroad Use" and "Chain Blocks and Electric Hoists," each of which is nicely gotten up in the usual good taste characteristic of the Yale and Towne people, and presents in an attractive form condensed information which will be of interest to railroad men. These pamphlets were distributed at the International Railway Convention in Washington, and will also be given out at the Manhattan Beach Convention, at which place they are to have an exhibit of Locks, Hardware and the Blount Checks. The booklet "Chain Blocks and Electric Hoists" contains a map of New York City, showing the new underground railway route. They claim their line of Chain Blocks is the most extensive in the world, and embraces about fifty per cent. of all hand hoisting appliances now in use. Special catalogues and brochures regarding their products will be sent railway officials on request.

The New Departure Manufacturing Co., Bristol, Conn., in their catalogue "D," present an artistic booklet of door, tea, office and automobile bells. The book is beautifully illustrated and includes an extensive line of each of the above kinds of bells. The company will be pleased to furnish you with either electrotypes or half tones of any or all of the different styles of rotary or push button door bells, turn plates, button, cases or call bells as shown in their catalogue. They would also like to furnish wood display stands, with such bells as you wish to carry, mounted thereon, for display purposes; also circulars, envelopes, hangers or any other printed matter which would aid in making their lines popular. For any of the above, address Advertising Department, The New Departure Manufacturing Co., Bristol, Conn.

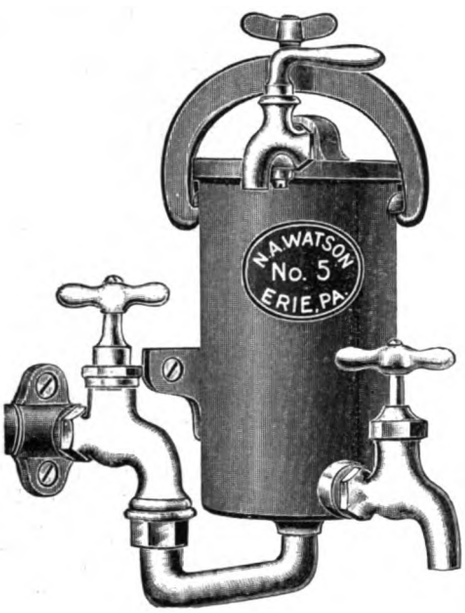
The Bristol Company, Waterbury, Conn.; New York office, 114 Liberty Street, have recently issued catalogue No. 28 on "Recording Thermometers," which, being revised to April 1st, cancels all previous catalogues and lists. The thermometers in the catalogue are divided into three distinct classes, and the description and lists of the different instruments in each class have been arranged with a view of making them convenient for reference in the selection of recording thermometers for any desired range or adapted to any special conditions. The three classes of thermometers are as follows: First, Those in which the operation depends upon the pressure due to the direct expansion of a liquid when exposed to changes of temperature. Second, Those in which the operation depends upon the pressure due to the vapor of liquid which is exposed to changes of temperature. Third, Those in which the operation depends upon the pressure due to the expansion of a gas when exposed to changes of temperature. To those interested in the above line of goods the catalogue will be gladly sent.

The Michigan Stove Company, Detroit, Mich., and Chicago, Ill., claim the distinction of being the largest makers of stoves and ranges in the world, in support of which statement they present some new insert sheets to be placed in their already extensive catalogue. These inserts have reference to the following: "Eureka-Garland" and entirely new six-hole cast iron range without hearth for soft coal or wood; "Economy-Garland" being the same range as the Eureka-Garland, but for hard coal or wood; "Staple-Garland" with the new drop fire-door—former cuts of this range which appear in catalogue do not show this change; "Success" steel range and "Surprise" which can now be supplied with blue steel outside finish as well as aluminum; the "New Series Art-Garland" which they state is by far the best stove of its class; the whole of the operating portion is a new construction, and they state has the most attractive nickeled parts of any stove yet made. Send for their new insert pages, if you have not already received them.

Boston Bolt Company, 284 Franklin Street, Boston, Mass., have issued a four page document, on the first page of which is the picture of a large bolt to which is attached a tag, which explains the mission of the document. The tag says: "Whenever you want anything in the Bolt, Screw or Nut line, or for that matter want almost any sort of an odd job in metal where skill, experience and a desire to please should cut some ice, it will pay you to write to us."

A. Wyckoff & Son Company, Elmira, N. Y., manufacturers of chain pump materials, steam pipe covering, wood, water and tan liquor pipe, have recently issued an envelope size pamphlet catalogue exploiting the same. The Wyckoff wood pipe is all made of white pine, selected, free of all sap and other imperfections, in lengths of from four to eight feet, connected by tenon and socket joints. The pipe is carefully manufactured throughout, and each piece is tested before being shipped. They make wood pipe for all purposes and would be glad to send their catalogue to all who are interested in this class of goods.

The Kilborn & Bishop Co., Lloyd and River Streets, New Haven, Conn., manufacturers of Drop Forgings and Forged Hardware, have sent us a copy of their catalogue exploiting the same. They have excellent facilities for making up-to-date special drop forgings from steel, iron, copper, etc., and for annealing and case hardening. On receipt of model or drawing, showing exactly what the article is to be when forged, they will be pleased to submit their estimate for the cost of the work. Included in their catalogue are such goods as expansive bits, countersinks, pliers, saw sets, box openers, brick and cold chisels, magnet hammers, etc. Write for catalogue.



N. & G. Taylor, Philadelphia, Pa., continuing to exploit their "Old Style" roofing tin, have sent us "Ye Sixth Arrow of Ye Third Quiver." Rufus has got his roof laid and is now giving his son the benefit of his experience in regard to painting it, which is to use the paint Taylor makes for his tin which naturally would be the "best ever" as they could not afford to spoil a Taylor Old Style roofing with a poor paint.

NEW GOODS AND SPECIALTIES.

GERM PROOF NATURAL STONE FILTER NO. 5.

N. A. Watson, Erie, Pa., is the manufacturer of the Germ Proof Natural Stone Filter No. 5, which is shown in the accompanying illustration. This is a medium, the filtering part of

GERM PROOF NATURAL STONE FILTER NO. 5.

which is constructed with a natural stone filter, capable of separating the mud, decomposed animal and vegetable matter, and all impurities from the water, which to state the plain truth, are not absorbed into the stone, which they never penetrate, but arrest on the surface; and can be readily removed with a brush, leaving the filtering material perfectly clean, without the use of alum, sand or charcoal. For further particulars regarding this important specialty, address the manufacturers as above.

THE NEW UNIVERSAL SQUARE.

Duby & Shinn Manufacturing Co., 19 Park Place, and 16 Murray Street, New York, are placing upon the market the combination square shown in the following illustrations. The device

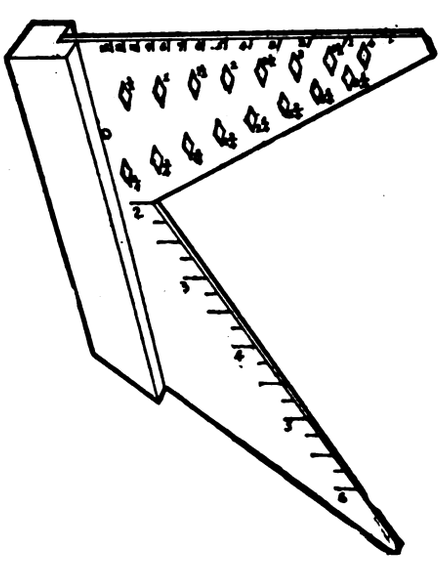

FIG. 1.—THE NEW UNIVERSAL SQUARE.

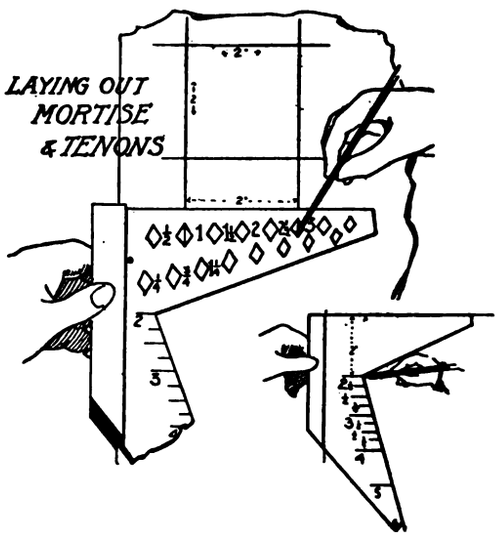
comprises a true square, a true miter and a true various pitch-cut scale. The square is used as a lumber gauge; for marking mortises and tenons, octagons and hexagons; for drawing circles; as a try square and straight edge—all these without any adjustment. The larger sizes have the complete rule scale in addition to the markings shown in Fig. 1. The operations with the square are accomplished by a reversal of the tool from one side to the other, as, for instance, in ruling pitch cuts, then reversing



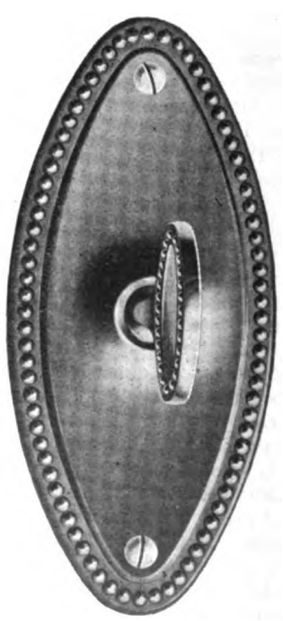


FIG. 2.—USES OF DIFFERENT EDGES.

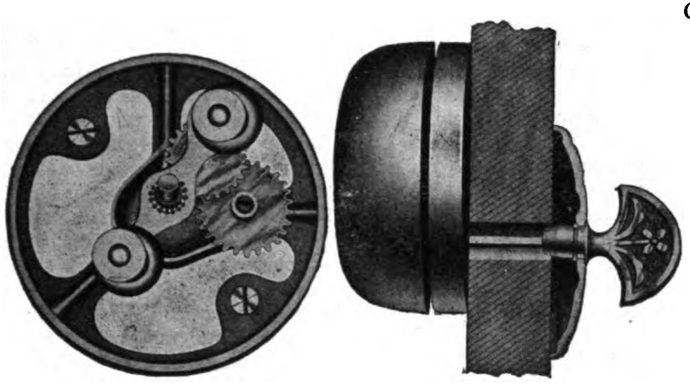
it to mark hip and valley cuts. The markings on the tool are ⅛ inch on one side and ¼ inch on the other side. It is made in 6, 10 and 13 inch sizes, of the best grade of steel, oxidized or nickel finish. The square is designed for use by carpenters, cabinet makers, etc.

NEW DEPARTURE ROTARY DOOR BELL.

The New Departure Manufacturing Company, Bristol, Conn., are the manufacturers of the Rotary Door Bell shown in the accompanying illustrations. It is operated by turning the Thumb



TURN KNOB OF BELL.

piece in either direction, being exceedingly simple in construction, but producing a loud alarm and can be fitted to any size door or casing, by boring a half inch hole and fitting it with the connecting rod. It requires no batteries. The gong is made of

Digitized by Google

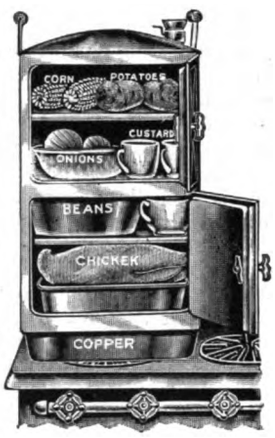
special Bell Metal which produces a perfect alarm, and the turn plate being made of bronze metal only is susceptible of being

INTERIOR VIEW. ROTARY DOOR BELL.

finished in any of the numerous popular finishes to suit the wants of the trade.

THE IMPERIAL ROTARY WASHER.

The Blackstone Mfg. Co., Jamestown, N. Y., are the manufacturers of the Imperial Rotary Washer, which is claimed to be perfect in all its parts. It is built with sliding cylinder on square post, which insures the greatest strength of any Rotary gearing now on the market. It is also provided with roller bearings, which has a tendency to make it when loaded with clothes, prac-



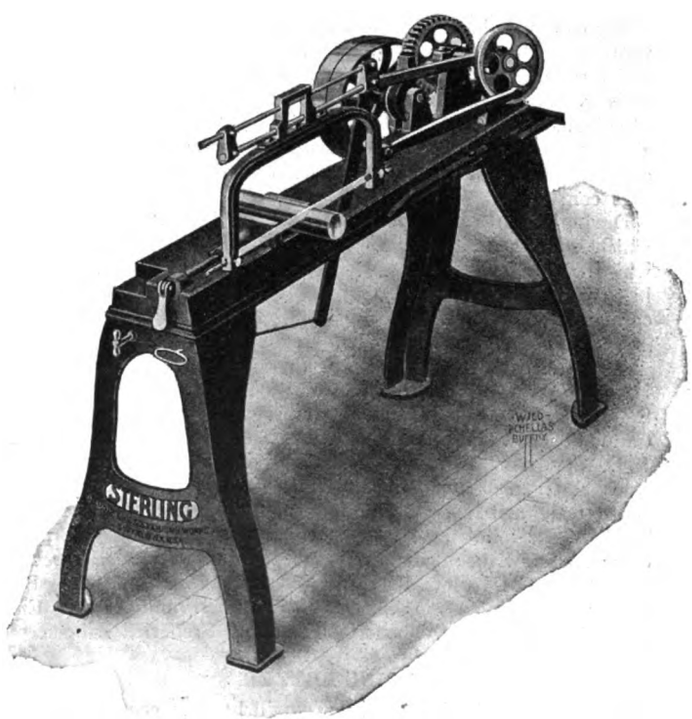
THE IMPERIAL ROTARY WASHER.

tically noiseless. The legs are all bolted in place, as shown in the engraving presented herewith, and can be removed when necessary. It leaves plenty of room for large size wringer. It closes tight, retaining heat in the water used. The dasher post is made of cast iron, heavily galvanized, while the dasher is made of hard wood. The two working together obviates the customary friction and will not wear the galvanizing, as is possible in some machines. It is handsomely finished, grained in light oak and varnished, the tub having a good foundation by having two coats of paint underlying it. The castings are all finished in gold and aluminum bronze, making it extremely attractive in appearance.

THE IDEAL STEAM COOKER.

The Toledo Cooker Co., Toledo, Ohio, has certainly revolutionized the cooking by steam, which is the modern hygenic system of preparing food. The idea of cooking by steam has claimed the attention of inventors for a good many years. All seemed, however, to lack some vital principal till the Toledo Cooker Company took the matter up, to develop the idea into a successful concrete form. The Ideal Steam Cooker was the result of which we present an illustration. These cookers are made in various sizes. The most popular are the Numbers 6 and 7, holding 6 and 9¼ gallons respectively. They can be used with and without extension, and have four compartments; they will cook for a family of from five to twelve persons. When the season for canning comes around, its usefulness and economy are multiplied immensely. There is room enough for a dozen jars at a time and the fruit needs but one handling. A single burner supplies heat enough for the whole work in a gas or gasoline stove, and one opening is sufficient in any ordinary wood or coal stove. Among the positive advantages obtained in using the Ideal Steam Cooker in its present perfect form are the following:

It has a self-regulating valve that holds steam under pressure,



THE IDEAL STEAM COOKER.

causing the food to cook quicker, and condensing the steam so that the water is replenished and will last more than twice as long as in a common kettle. The valve needs no attention. The valve and the steam escape are so arranged as not to be obstructed by food or any other substance. The cover and extension of Nos. 6 and 7 size cookers, have seamless rims. They are drawn by powerful machinery from one piece of tin, and having no joints they are perfectly smooth and prevent the escape of steam. It has a patent steam whistle which is entirely new and has many advantages over all other cooker whistles. It can be heard over a large house when more water is needed. It is very difficult to remove the whistle to replenish the water in other cookers, as they become hot. In this you simply press the whistle back and pour the water through the whistle tube—this is an invaluable feature in a steam cooker. It is especially adapted for use on a gasoline, oil or gas stove, as the escaping steam passes under the cooker and across the flame and is burned up without affecting the fire in any way. The tubes on the outside of the cooker are pressed out of the body and not soldered on as in other cookers. Hence no danger of them melting off as they often do in other cookers, when used on oil or gasoline stoves.

THE "STERLING" POWER HACK SAW.

"Sterling" machines combine several new features not used in any other machine now on the market. They are "gear driven." The "Sterling" Power Hack Saw thus securing more power by

THE "STERLING" POWER HACK SAW.

this feature. A narrow belt can be used and have ample amount of belt surface on driving pulley, which cannot be obtained on

Digitized by Google

a direct driven machine. They have "tight and loose pulley," which never gets out of order, avoiding the trouble which a clutch frequently gives. Every practical machinist will appreciate this improved feature in the "Sterling" Power Hack Saw Machine. They have "automatic shut off." Saw is stopped on backward stroke which throws belt from tight to loose pulley. The liability of breaking saw blade is thus reduced to a minimum. They have also "gravity feed." Buckling or breaking of blade is avoided by this important feature. Weight can be adjusted to get the best results on machinery or tool steel. It is well to avoid overweighting saw when cutting tool steel. Duplicate parts will be furnished in case any part of machine gets broken, and in case of excessive wear, by furnishing duplicate parts at a minimum cost, the machine is virtually as good as new. Every part of the "Sterling" Power Hack Saw is machined from jigs and fixtures, and are interchangeable as any standard bicycle or sewing machine. Material is distributed in such a way as to get the maximum of strength with a minimum of weight. The pinion gear and driving shaft bearings are cast on bed, which avoids the danger of becoming loose and getting out of alignment. While the design is compact and symmetrical, occupying only small floor space. Write to the manufacturers, The Diamond Saw & Stamping Works, Buffalo, N. Y., for further particulars.

ELECTRICIAN TOOL CHEST.

C. E. Jennings & Co., 42 Murray street, New York, are placing upon the market through the Hardware trade a new Electrician's Tool Chest shown in the accompanying illustration. This is a portable tool chest and can be conveniently carried in the hand. It is made of chestnut, with locked corners, filled and

ELECTRICIAN TOOL CHEST.

varnished; has lock, box hinges, brass plated elbow to support lid when open, brass plated lifting handles and two trunk clasps to hold lid in place when carried by hand. The inside measurements are 17 inches long, 5¼ inches wide and 5 inches deep. This chest has been found to be a popular one for a carpenter or a householder in which to find a location for a limited supply of tools, or for general utility in the house.

MICHIGAN RETAIL HARDWARE DEALERS' ASSOCIATION.

Saginaw will have the pleasure of entertaining the 1905 convention of the Michigan Retail Hardware Dealers' Association, which meets August 9, 10 and 11, at the German Temple of Music. This is one of the largest and most influential associations in Michigan, and it is expected that the convention will bring out about nine-tenths of all the Hardware dealers in the State, so general is the interest and so important to the trade are the meetings considered.

During the three days' convention the business meetings at which matters of interest to the trade will be discussed, and at which papers and addresses will be given by authorities, will be in charge of a committee composed of the officers and executive committee as follows:

J. B. Sperry, president, Port Huron; George B. M. Towner, vice-president, Muskegon; A. J. Scott, secretary, Marine City; Henry C. Weber, treasurer, Detroit; W. P. Culver, Portland; K. S. Judson, Grand Rapids; J. H. Whitney, Merrill; E. J. Morgan, Cadillac; T. Frank Ireland, Belding; S. W. Winchester, Jackson; J. G. Patterson, Detroit; E. B. Standart, Holland; E. S. Roe, Buchanan; John Popp, Saginaw.

Entertainment features and all local arrangements will be in the hands of the following strong local committee: John Popp, president; Arthur Schoenenberg, treasurer; Ernest Reichle, secretary, and Ralph C. Morley, V. E. Weidemann, Charles Moore, Bert Saylor, Ed. Winterstein, Charles Edelmann, Frank Achard, Emil Achard, Emil Jochen, Theodore Huss and Frederick Zahner.

DOING BETTER.

"Doesn't your husband tell you you'll have to economize, since he quit playing the races?"

"Yes," answered young Mrs. Torkins. "The difference is that I now have something to economize with."—*Washington Star.*

DAYTON GREETS JOHN H. PATTERSON.

Such Splendid Tribute Never Before Paid to Captain of Industry.

Dayton, Ohio, on the afternoon of July 3, was the scene of a public celebration unique in the industrial history of the United States, when the entire city gave a public welcome to John H. Patterson, its leading manufacturer, on his return from a year's trip around the world.

The afternoon has been a half holiday, stores and shops closing early that their employes might join in the remarkable civic demonstration. Crowds of people from neighboring towns have thronged the streets, brought to Dayton by the special rates made by the railroads and traction lines. The business district of the city is elaborately decorated with American flags and with crimson and gold bunting, the Patterson Day colors.

Mr. Patterson, who landed in San Francisco Tuesday, June 27, and started almost immediately for home, was met at Richmond, Ind., by a delegation of fifty leading citizens, headed by Mayor Snyder. This party went from Dayton to Richmond on the afternoon of July 3, on a special train over the Pennsylvania railroad. At Richmond, Mr. Patterson, who left Chicago that morning accompanied by his traveling companions and Hugh Chalmers, General Manager of the NCR Company, left the Pennsylvania train and was received with the greatest enthusiasm by the business men on the special. A quick run was then made to Dayton, the party reaching here shortly before five o'clock.

Stationed at intervals along the way were a number of bands which furnished the music for the occasion. As the thirty carriages bearing the receiving party passed, the waving of flags, the music of the bands and the shouting of the people made the welcome of Mr. Patterson a demonstration of remarkable enthusiasm.

At the Steele High School a chorus of two hundred school children was assembled when Mr. Patterson and his escort took their places upon the platform. After a number of speeches of welcome a massive silver loving cup of beautiful design was presented to Mr. Patterson "on behalf of the citizens of Dayton" in appreciation of his unusual achievements as the pioneer in welfare work.

The women of Dayton were represented in the celebration by the presentation to Mr. Patterson of a memorial beautifully engrossed on parchment and bound in hand-tooled leather. This document recited what Mr. Patterson has done in improving the working conditions for women in his own factory and by force of example in many manufacturing establishments, both in America and abroad.

Mr. Patterson replied briefly to the addresses of welcome and the presentation speeches. Speaking with difficulty because of his emotion, he declared that this was the greatest day in his life. He said that the welcome which the citizens of Dayton had given him was the greatest encouragement which a man could receive to carry out a policy which he believed right and which he hoped might have some influence in bettering the relations of employer and employe the world over.

The exercises of the day completed, Mr. Patterson was driven to his city residence, the crowds marching in an enthusiastic impromptu procession behind his carriage.

The unique welcome accorded Mr. Patterson—a token of the appreciation of the whole city for a private citizen—was originally suggested by the Dayton Commercial Club, a leading business organization.

ALL DAYTON JOINS IN GREETING.

The idea grew rapidly, however, until it involved a public reception by the entire population. The people fell in with the plan readily and the Patterson Day celebration, to an unusual extent, has been the expression of a general popular feeling.

Committees of merchants had charge of the decorating, the purchase of the loving cup and other features of the occasion, while the principals of the public schools looked after the training of the children for the Patterson Day chorus. The school teachers have felt the influence of Mr. Patterson's work to an unusual degree, for it was largely through his efforts and the efforts of the Men's Welfare Work League, an organization of his employes, that manual training, cooking and gardening were introduced in the Dayton schools.

Mr. Patterson has had a wide influence in the beautifying of Dayton, which led a noted French scholar, M. Benoit-Levy, to call it the "garden city of America." First making his own factory grounds a model in landscape gardening, he has, by means of illustrated lectures, taught the people of his home city the principles of landscape gardening and home decoration.

THE AMERICAN CANNING INDUSTRY.

Without a personal visit to one of the great canning establishments of the United States, says the *American Exporter*, it is not easy to conceive of the results accomplished within the past few years in the expansion of this branch of industry by the aid of improved methods of procedure and of newly invented machinery. In the modern factory every operation, even to boxing, labeling and trimming of labels, is done by mechanical devices, run by steam or electric power.

Even as late as 1890 there were only 1,000 canning factories in America, with an output valued at less than $45,000,000. With the increase of export trade the number of establishments has increased to 2,500, while the value of the product has increased to over $100,000,000.

A catsup bottling machine is a more or less intricate piece of mechanism. A silver-lined pipe leads the prepared mixture from a large reservoir above and allows it to run into bottles in a continuous stream as they pass beneath its mouth. From fifteen to twenty-one are filled at a time. As the bottles are filled they are corked by machinery and then placed by an operator in a conveyer, which passes them along to a capper, who dips them in melted wax and places a tinfoil cap on each. The conveyer then carries them through a sheet-iron tunnel, where they are washed by jets of water, which shower them on every side. They are then ready for labels.

Glass jars were gradually abandoned in favor of tin cans for various reasons. Glass was expensive, it was costly in transportation, it was less able to withstand the necessary extremes of temperature, whereas the only objection, though this was a most serious one, urged against tin was that the natural acids of fish, fruits and vegetables act upon it in such a way as to form metallic salts, or metallic compounds injurious to health. Upon careful investigation this objection was proved to be groundless when the best tin was used. But as the best tin is not always used some means had to be found of offsetting any danger of injury to health. An ingenious contrivance now in use provides against any chance of ptomaine poisoning. By this invention a lining of parchment, or some similar material impervious to any of the liquid exuding from the preserved comestible, is fashioned, in which the article of food is placed and which prevents it from coming into contact with the tin at any part. Until recently this method was generally employed, but it was expensive, as the labor of it must be done by hand, and it is still employed, but a new invention has been introduced by which both time and labor are saved.

By means of the new method a single operator can fashion ten linings a minute, or 5,000 in an eight-hour day. In a practical test it was recently established that one operator with this machine—which consists virtually of a plunger, plates between which the paper is placed and a cylindrical folder—can manufacture as many linings as sixty operators working by hand.

The cooking of fruits and vegetables for canning is now done in large copper kettles, having a steam jacket surrounding the lower half, which insures an even degree of heat. Any desired temperature can be obtained and the heat regulated to meet requirements. Formerly the method of cooking was in open kettles, and the highest temperature obtainable was that of boiling water. A little later a higher degree of temperature was secured by the addition of common salt to the water, and this was followed by the use of chloride of calcium, whereby a tamperature of 240 degrees Fahrenheit could be obtained. Under this process, however, the cans became discolored, involving considerable expense in cleaning them; hence the copper kettles and steam jackets.

The tests to which the cans are put to assure their being hermetically sealed are numerous. Besides immersion in water and others, there is one curious enough to be worthy of mention. A workman beats a rapid tattoo on the ends of the can with a small piece of metal. The experienced ear of the workman detects by the variation in sound of a single blow when all is not right within. The work is done so rapidly that to a novice the occasional tossing aside of a defective tin is quite inexplicable.

The modern fish cannery is a huge structure, topping rows of piles driven deep into the river or ocean bottom. The fish are unloaded into it from boats by a sort of single-tined pitchfork and carried in automatic conveyers to different parts of the establishment. Oysters have recently developed an importance of their own in the canning industry, and of late years many improvements in machinery have been made, especially for oysters. Formerly oysters were opened by hands, with the oyster either in its natural state or scalded to make the "shucking" easier. Now great piles of oysters are shoveled into cars with iron framework, twenty bushels or more to the car, and run into a steam-tight box, fitted with appliances for admitting the steam at any desired pressure. The steam is turned on for about fifteen minutes, when the chest is opened and the cars are run into the shucking shed. There a deft turn of a knife in the hand of an experienced operator will open an oyster with remarkable dispatch.

After being "shucked" the oysters are washed in cold water and sent to the filler's table, where they are placed in cans, weighed and sealed. Next the cans are lowered in a cylindrical basket into the "process kettle," in which they are steamed, in order to kill all germs or fermentation. Cooling in a large vat of cold water follows, and the oysters are then transferred to the labeling and packing department.

Twenty-five million dollars' worth of preserved fish was the output of the fish canneries during the last year, of which the New England States contributed over ten, the Pacific States less than nine and Alaska about five million.

FIRECRACKERS.

How the Chinese Manufacture Them—All Work Done by Hand.

The most interesting sights of Canton are the tea factories and the firecracker factories, and the more interesting of the two are the firecracker factories. These establishments can hardly be called factories, if we use the word in the sense of making by machinery, for all the work is accomplished by hand, and they are, therefore, called by the English residents of the country "firecracker go-downs."

On approaching the building one is not greeted by the usual roar of furnaces and the many and one noises that go to make up the din of a factory, but it is anything but a quiet place. At a distance it sounded like the riot of a furious mob, compared with the quiet about Canton, though Canton seemed noisy enough.

For a mile around the factory the thousands of inhabitants are all employed in making firecrackers. As soon as the children are old enough to be anything but babies they begin to work, and as soon as their mothers have finished their housework they turn their hands to making firecrackers, but there is no confusion, for no one knows how to do but a very small part of the immense amount of work required of turning out millions of these little explosives. One man, for instance, makes fuses, another cuts them in lengths and another sorts them in sizes; one man makes the paper, another rolls the crackers, while his neighbor fills the ends with clay.

The paper man would not do the clay man's work, any more than the fuse-maker would do the sorter's work, and every little firecracker before it reaches America has, in its construction, passed through over sixty different pairs of hands. The go-down is divided into a dozen long sheds, with blue-tiled roofs; the laborers sit on little stools at long, bench-like tables. As soon as one man finishes his part of the work he passes it on to his neighbor, the latter following his example when he has done his share, and thus it starts at one end of the table as a little paper and a fuse, and comes out at the other end a finished firecracker.

The next room I visited was devoted to braiding and wrapping the crackers, and the next to packing them for shipment. They are packed in boxes much resembling the common tea box and contain thirty packages. A box in this country brings so little that after duty and shipment have been paid it is a wonder any profit is made at all.

The two proprietors of this establishment, which, by the way, is called the "yat shing," showed me into the room where the designer of the labels sat at work. He was an old man, with bamboo-bound spectacles, and sat at a desk drawing flowers, gnomes and dragons in all the grotesqueness of Chinese art. I had some of the characters on one of the labels translated.

There were three large characters in the center and they conveyed the useful information of "thousand, blazing, hall." What does it mean? It is a word picture and endeavors to convey the idea that their goods are of such a superior quality that they are likened unto a large hall or palace blazing with splendor. This is as good an explanation as can be given. If you can catch the idea you have the principle of the Chinese language, but until you do you will never be able to learn the language of the Celestial Empire.

After the designers and engraver have done their work the blocks go to the printing room, where they are printed with hand presses, but such presses. If you would take old Ben Franklin's press, break it to pieces and prop it up with rope and bamboo, you would have a fair sample of the Chinese press. They are clumsy, rickety-looking things, and look as if a breath of air would blow them over, yet it is wonderful what an amount of work can be done with them in a day; besides, the Chinese do not want machinery.

Human labor is cheap, for there is so much of it; therefore, anything that will lessen labor is a curse to the country. A mandarin who introduced a silk machine in Amoy by doing so starved to death 400 families. We can better understand the large population of this country when we learn that Ngarhwui, in China, contains 34,168,200, while Kiang Su contains 37,843,500, altogether making 72,011,700. Just think of it! two States in China contain nearly as many people as the whole United States.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

The time for selling JAP-A-LAC is all the time. There is no season of the year when JAP-A-LAC will not sell nor when it cannot be used to advantage in every home.

Because of the many special uses found for JAP-A-LAC during the Spring and Fall house cleaning seasons, the volume of sales is naturally greater.

The real JAP-A-LAC dealer can sell JAP-A-LAC every day in the year. Realizing this, we have decided to continue our advertising the year round.

Our advertising during the balance of the year will embrace a larger number of magazines than we have been using, and will carry liberal spaces. We shall be telling the women of the country of the uses to which JAP-A-LAC can be put.

We are sure to stimulate the demand for JAP-A-LAC and make it an every-day seller for the dealers. A little attention to this well-advertised commodity will bring *new customers and increased profits* to the dealers—who are handling it.

Don't let your stock get depleted. If you have never sold JAP-A-LAC, give it a trial. You will find it the quickest and easiest selling article of its kind on the market.

The Spring advertising has more than doubled our sales up to date. The Fall advertising will do the same. The reason for this is that we tell the women what JAP-A-LAC is and how to use it.

Let the women of your community know that you keep JAP-A-LAC, and you will secure their patronage.

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

ADDRESS: 641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED JUNE 26, 1905.

385,030. PINCHERS. W. E. White, Lynn, Mass.
385,065. WEATHER STRIP. T. K. Milboy, Parsons, Kan.
385,079. SAW. A. Weymar, Brooklyn, N. Y.
385,108. FAUCET. E. P. J. Freeman, Roslyn, N. Y.
385,135. COOK STOVE. C. Rathbone, Albany, N. Y.
385,170. MOP WRINGER. J. A. Grandall, Brooklyn, N. Y.

MANUFACTURE OF WINDOW GLASS.

Under date of April 28, 1905, United States Consul Roosevelt, Brussells, Belgium, transmits the following copy of an article from the *London Daily Mail* of April 26, relative to the manufacture of window glass in Belgium by machinery invented by Emile Fourcault, honorary engineer of the mines at Lodelinsart, near Charleroi:

The Fourcault machine turns out continuously sheets of glass 39½ inches wide, of any desired length and of a uniform thickness, varying from one-fifteenth to five-sixteenths of an inch. This glass can be obtained as rough glass for making extra thin glass, as horticultural glass, and as window glass for certain export markets.

The machine is described as a box of fire-brick material floating on a "springing fountain" of glass. In the bottom of this box is a slit called the stretcher, and through this stretcher a sheet of plate glass is introduced into the molten mass. The molten glass adheres to this plate. When the plate is pulled up vertically it is followed by a mass of melted material that wells up without effort. Once started, the molten glass continues to flow out in a sheet without the plate being dipped in the stretcher again.

The "springing fountain" in which the stretcher floats is a kind of pit, the walls of which are heated by the heat of the glass, and on the top of the pit is an apparatus for dragging the glass up and for annealing. This apparatus is simply a chimney to draw off the heat, in which there are about 17 pairs of rollers. The glass is lifted through these rollers by adhesion and by the time it reaches the top of the chimney it is sufficiently cool to be cut with a diamond into desired lengths while still attached to the machine.

The operation of annealing—depriving glass of brittleness by allowing it to cool slowly—is at once difficult and capricious. The greatest importance of annealing in all branches of window-glass making lay in the fact that the plastic glass had to be manipulated by tools which were colder than the glass. It was, and is by the older method, a very delicate operation. The Fourcault machine does away with all this. Annealing is no more a necessity. The glass coming out from the "delivery box" cools and congeals gradually, and at a certain point has lost its heat. It is then that it comes in contact with the first lifting rollers, which are at the same temperature as the glass itself. Hence the glass appears at the top of the chimney perfectly flat and possesses unequaled brightness on both sides.

As the Fourcault machine is particularly recommended for its simplicity and for the saving of time and material which it effects, it will no doubt become of great importance to glass manufacturers.

REVIEW OF THE MARKETS.

WIRE NAILS: A meeting was held last month by a number of the manufacturers of Wire and Wire Products, at which time the principal thing to be settled was the reduction of production during the Summer months, while at the same time the present official schedule of prices was to be maintained. The meeting so decided, and this action will tend to prevent any great accumulation of Nails, and insure a more even market. Under the circumstances there is a much firmer market for Wire Nails, as lower prices are not expected and the mills are booking an increased volume of business. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in ten days:

Carload lots to jobbers	$1.80
Carload lots to retailers	1.85

New York.—The wants of the local market have been fairly good for July, and the quotations are unchanged, as follows: Single carload, $1.99. Small lots from store, $2.05.

CUT NAILS: The moderate demand which has been the feature of the market for Cut Nails, has resulted in a concession of 5 cents per keg being made below the official quotations. The new business is not very large even at the concession. Quotations are as follows: Carload lots, $1.75. Less than carload lots to Jobbers, $1.80, and to Retailers, $1.85, f.o.b. Pittsburgh. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities 10 cents advance per keg on Steel Cut Nails.

New York.—The local market is made agreeable to the prices at which business at mill is obtained. Light demand for immediate requirements being the character of the trade, New York quotations are as follows: Carloads on dock, $1.89. Less than carloads on dock, $1.95. Small lots from store, $1.95 to $2.00.

BARB WIRE: This is the time of the year, when the demand is decidedly inactive. Few orders on the mills are the rule. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: The mills are receiving but little of new business, and yet the market is fairly strong, though the demand is only moderate. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.65
Retailers, carload lots	1.70

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

RIVETS: The manufacturers of small Iron and Steel Rivets held a meeting June 30, at which the present discount to the trade in general of 75 and 10 and 5 per cent. was unchanged. Business in this line was reported very good, as sales have held up well and the market continues firm.

PUTTY: At a meeting of Putty Manufacturers, who claim to make 90 per cent. of the total production in the United States, an agreement was reached to maintain the following advanced quotations, which represent an advance of 5 cents per 100 pounds.

	Per 100 Pounds.
In barrels and tubs	$1.10 to $1.15
In bladders	1.75 to 1.80
In 12½, 25 and 50 pound tins	1.45 to 1.60
In 1, 2, 3 and 5 pound tins	2.05 to 2.95

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	12 to 12¼
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8 to 8¼

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....51 cents per gallon.
In lots of 5 barrels or more.....50 cents per gallon.

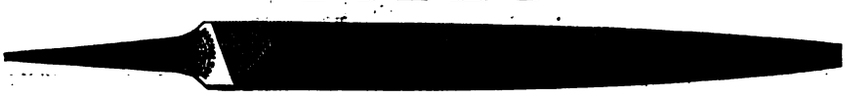
The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE CLEVELAND TRADE.

The value of the Supreme Court, as one of the departments of the Government, is being more and more appreciated. The recent decision on the right tax franchises, modifies the evil of their early under valuation. The immense gain in value of these franchises gives great importance to that decision. The precedents of courts have been of great value in the past, and can be depended upon in the future. In our impatience to accomplisn special ends, there is at times a demand, to limit the power of one, or another of the three departments of Government, but it behooves us to preserve the balance they give. In a world governed by law care not to make exceptions authority, is a part of wisdom. The flaming success that sometimes comes through flagrant violations of business rules tends to destroy confidence that there is a law or causes confusion as to what it commands. Betimes, however, it re-asserts itself and the moral and ethical sense is restored, but the lesson needs repeating, as we learn very slowly that the law befriends only those that work with it, and in the end crushes those who disobey it. We need to be constantly reminded that the moral law works as surely as the law of gravitation. Business organizations have helped in finding a concensus of opinion regarding business methods, but there is great need yet for improvement among the captains of industry and finance. Official integrity is a valid test of civilization and until Republican Government shall become an example, boasting is premature. That our faults are known is no cause for pessimism. Conscious virtue and unconscious villany, are alike dangerous. Business remains good. The falling off in the price of pig iron and steel creates no stampede, as it did when the mills were eager to slaughter their competitors. The small mills know they cannot destroy the larger ones, and the large ones are conservative because they are large. Many of the manufacturers would be glad to renew old contracts, but unless the decline is more radical, they must pay more for the raw material for the last half of the year, so there is no probability of lower prices for manufactured goods.



THE LOCKWOOD-TAYLOR HARDWARE CO.
C. B. Lockwood, President.

THE PITTSBURGH TRADE.

Business for June shows quite a satisfactory volume, sales being larger than during the corresponding month last year. Extremely hot weather about the middle of the month brought an avalanche of orders for Screen Doors, Refrigerators and similar goods. Jobbers' stocks of these items were rapidly depleted and difficulty was experienced in some lines in filling orders promptly. Mail orders were frequent during the month showing an active demand and a reduction of stocks of seasonable goods in the hands of the retailers. Indications are that this demand will continue through the Summer and we look forward with confidence to a good volume of business this Fall. The question of Special Brands, which is now being discussed by the trade, is a very interesting topic but it seems to us that the manufacturers themselves, who are now complaining that their goods do not receive proper recognition, are the very ones who are chiefly responsible for present conditions. Special Brands were adopted by the jobbers because they could not make a living profit on many goods sold under manufacturers' brands. If a satisfactory profit can be made on manufacturers' brands, is it not natural to suppose that the jobber would prefer to sell such goods which are often widely advertised by the maker and well known to the trade, rather than a similar article under his own brand for which he must create a market? This is undoubtedly the case, but when manufacturers are unable or unwilling to see that the jobber is entitled to a profit for distributing their goods which will cover the cost of doing business, or, as has sometimes been the case, the maker fixes a price at which his goods shall be sold to the retail trade which forces the jobber to sell them for less than it costs to handle them, no recourse is left but for the jobber to adopt a private brand which he can control and the price of which

he can regulate. This is what has been done and many jobbers have now a well-established reputation for their Special Brands, which the manufacturers will find it hard to combat. If manufacturers had been content to allow the jobbers a fair margin of profit for the service performed in distributing their products, and willing to regulate their prices to the different classes of trade so as to eliminate competition outside of the regular channels, they would not now be facing the condition which confronts them. LOGAN-GREGG HARDWARE CO.

THE COLUMBUS TRADE.

June was certainly a wet one. Rain and then more rain. While there are some good fields of corn, there are more poor ones and we must have a very late Fall to make an average crop. The wheat is not going to be as good as was expected. Some weavel and rust, and the cold, wet weather has interfered with filling. Clover is heavy, but timothy and oats have had too much rain, still both will be fair crops. With all the discouraging weather, trade is good but not what it would have been had the weather been more favorable. This has been a great season for lawn mowers, scythes, snaths and screen goods, and the demand still continues. One of our local papers had a cartoon representing the world as a head; with an awful ache, and it certainly portrayed conditions admirably; wars, strikes, grafts, railroad accidents and what not. It certainly has been a strenuous year thus far. The investigation in Chicago with reference to strikes should open the eyes of honest laboring men. It has been suspected for a long time that such rottenness existed, but now it is proven. Philadelphia is certainly to be congratulated on the prospect of more honest government. It is strange that the masses will allow such conditions to exist when they have good reasons for believing they do exist. Still they fold their hands year after year and submit to being robbed until some official tries to steal the whole town at one haul. Then they arouse themselves and show to the world that all that is needed is concerted and determined action to clean any city of corrupt officials. Graft from a township trustee to United States Senators seems to be fashionable these times. We believe there is room for investigation as to salaries of Fire Insurance officials. Rates have advanced full double during the past 10 years. The amount of insurance has increased wonderfully and very much more than the percentage of losses. Head officials draw larger salaries than the President of the United States. General agents in all cities as a rule have large incomes and the insured are forced to pay high rates to pay extravagant expenses. It is possible they have a lot of pensioners and dummy officials that should be cut off the pay roll. We may be wrong as to our surmises, but we do know insurance rates are too high. Why should a wholesale stock of Hardware take a higher rate than a retail stock? There is no logical reason for it, still such is the case The local board will meet and say, well we lost 100 thousand dollars the last six months in such a city, and of course we do not want to pay out of our reserve fund, so we will just "soak" the insured another 10 or 15 per cent. to pay it. At any rate, that has been the case in Columbus, and no doubt is true of other cities. Columbus is having a record breaking building boom, and the steadily increasing population explains it. The 1905 directory is over 180 thousand and five thickly settled sections just out of the corporation not included. We have an air ship too, but the durned thing hasn't got the right flop yet. Toledo has us beat on that one point "only," and that isn't much, as walking is good. THE SMITH BROS. HARDWARE CO.

THE ST. PAUL TRADE.

We are enjoying a very good trade with, up to this writing, very good prospects for a crop, though we now wish to call a halt on so much rain and cool weather. This is prolonged rather long. We will soon need some sunshine and warm weather to make the good prospects materialize. Business conditions in general could not be better. Prices are firm. The goods are used up as soon as manufactured, so what more can we ask for? The philosophical way to look at the troubles in business is to remember that the trials, irritations and troubles in trying to do business have always existed and always will exist. We read that Adam and Eve had their troubles and believe that all of their descendants have had theirs. Don't worry, but work. Do right and trust in the Lord, never forgetting that you must do your part, if you are to achieve success. The Hardware business is a good trade, if one studies it and keeps himself posted on all its details. HACKETT, WALTHER, GATES HARDWARE CO.

THE NEW ORLEANS TRADE.

NEW ORLEANS, July 4, 1905.

(Special Correspondence.)

Further development of transportation facilities, an increased demand for mill supplies, particularly for sawmills, etc., and continued activity in builders' and building Hardware, characterizes the domestic Hardware situation for the past half month, while a new element of hopefulness marks the relation of the local jobbers with the Panama Canal proposition, and influences the entire export outlook.

In the domestic trade the sudden increase in the price of cotton, more than making up for the shortness in the crop, has brightened the outlook immeasurably, while the continued favorable prospects for the cane crop adds to the pleasant features that lighten the future. The increase in the price of cotton is due to the cotton crop report issued by the government, this coming out Monday, July 3, and sending the price up over $5 per bale.

Digitized by Google

Generally speaking, the markets are running evenly, with a slight falling off in activity during the past two weeks or twenty days, but not behind the same period one year ago. Farming implements have come at the foot of the list, this being governed at this time of the year by the actual size of the crop and acreage, irrespective of the prospective prices for the products. Building activity, save in New Orleans, has fallen off to some extent, but in the city is maintained, and increases from week to week, with no diminution of the volume of demand for the Hardware involved in sight for another eighteen months.

There has been a perceptible increase in the demand for mill supplies. The chiefest demand is coming from the timber section of Louisiana and Mississippi, where the sawmills are increasing their activity, and where new lands and new plants are being exploited continually. The Lucas E. Moore Safe Company, recently organized, is to establish large plants out along the line of the proposed Colorado Southern Railroad, and the present company from which this corporation is to be formed, has already begun its activities. There is every prospect that during the Autumn there will be the largest demand on record for Hardware supplies of all kinds for the sawmills.

So far as is discernible, the market fluctuations have had no effect on the demand for any particular line of Hardware.

EXPORT TRADE.

Stauffer-Eshleman & Company received last week word that they had obtained the first really commensurate contract for supplies to the Panama Canal Commission, the total being $20,000, with perhaps the addition of several thousands more when the final lists come to hand. The largest single items in the contract thus far ascertained were copper and other wire, door hinges, and interior house fixtures, with a considerable proportion of miscellaneous Hardware. A number of other firms have within ten days received word that they had been successful in bidding on smaller offerings.

One business house suffered a loss of nearly two thousand dollars on one contract because of a clerical error in the submitted bid, which placed its price really lower than the market quotations at the factories; the commission refused to consider the matter and insisted on the contract being fulfilled. A very rigid inspection is going on, and several lots of goods have been turned down, among them being a very heavy shipment of brick from Texas, refused in New Orleans.

The Public Belt Commission is in the field for a heavy purchase of Hardware supplies incidental to the construction of its twenty-mile belt road about the city. One set of bids were all refused three days ago because the bidders had not in any case adhered to the specifications.

Saturday, July 1, the Board of Trade, the allied business organizations of the city, the Governor, the Mayor and a number of other city and State officials, participated in the celebration of the driving of the first spike in the public belt road. The wholesale merchants and jobbers of the city have taken a deep interest in this enterprise, feeling that it will emancipate them from the system hitherto existent whereby a man bringing goods into New Orleans for export or transshipment was compelled to use the terminal facilities of the trunk line bringing in the goods.

Fairbanks Company, which recently purchased a half-square of ground on the Illinois central belt road through the heart of the city, was refused switch track privileges by the city council, because some nearby property holders said it would make too much noise and would mar the beauty of the Lee Statue two squares away. The Fairbanks people are understood to have purchased another square of ground on the river front, where they will be enabled to get switch track privileges from the Louisville and Nashville, the Texas and Pacific, and the Illinois Central, and also from the proposed belt road.

There has been established an Interchange Committee to promote the location of factories and jobbing houses in New Orleans. A list of industries that it would benefit the city to have locate here has been made, and systematic efforts will be pushed to have success crown the efforts of the committee.

On the list are the following items of interest to the Hardware and allied interests:

Factory for implement handles.

Factory for oars.

Factory for plows and simpler agricultural implements.

Factory for brass castings and fixtures.

Iron rolling mill to handle 1,500 tons of scrap iron shipped out of New Orleans every month.

Stove foundry.

Motor boat and automobile factory.

Pottery plant.

On this committee are: J. C. W. Wright, chairman; J. D. Connel, J. Albion Saxton, William T. Arny, Max A. Kory, John H. Murphy, E. Miller, Lawrence Eabacher and Lynn H. Dinkins, from the Board of Trade. Others are to be interested and appointed from the other exchanges.

Planters in all the sugar section are deeply interested in the trials of various sorts of cane loaders that are to take place during the month at the Sugar Experiment Station in Audibon Park. There are six machines in the market. Four of these are on hand, the Bodley, the Trouard, the Mire, and the Goetz.

ANOTHER GINGER TALK OF A SALES MANAGER TO HIS MEN.

I inspected one of our sales-offices in a neighboring State last week.

That's why we have a new manager there this week.

I dropped in at the office quite informally, without notifying the manager that I was coming. Seated in a broad, comfortably-cushioned chair, he looked as peaceful and placid—and inert—as a blinking frog on a lily pad. I wondered how long he had been sitting in that chair without moving.

"How's business?" I inquired.

"O, very fair," he said cheerfully. "Nothing rushing, but as good as we can expect at this time of year."

Nothing rushing, but good as we could expect! I choked a snort before it escaped me.

"How many orders yesterday?" I asked.

The placid manager turned over a lot of papers on his desk. "Where are those salesman's reports?" he inquired of his stenographer.

"I put them on your desk as requested," the girl replied.

"Then they must be here somewhere," he said. He pawed over the mass of disordered papers.

I waited.

"I must have mislaid them," he announced at length, with a cheerful smile. "I've been intending to sort these papers out for the last four days, but I haven't had time to get around to them yet."

He settled back in his comfortable chair, sighed contentedly and glanced at the clock. "Quarter before twelve," he exclaimed. "Suppose we go out to lunch."

"Wait a bit," I remarked. "Did you receive a big batch of advertising matter from the company last week?"

"I did."

"Have you sent it out into the territories of your men?"

The manager fished his pockets—peacefully, placidly—one after the other.

Digitized by Google

I waited.

And waited. And waited.

At length he drew forth a ragged envelope. On the back was scrawled a tangle of figures.

He pondered these for a moment, then remarked: "I have made a note of all I have sent out, but these entries are not up to date. I had a later statement, but I can't seem to find it. Guess I must have left it at home." He began to fish his pockets anew.

"What are these papers on your desk?"

"Correspondence. I haven't had an opportunity to answer it all yet. But I'll get caught up in a day or two."

I picked up a letter. It read: "Send your salesman down to-day—before three o'clock, if possible."

I looked at the heading.

The letter was dated two days back.

"Have you had a salesman make that call?" I inquired.

The manager took the letter from my hand. "Oh, that call!" he exclaimed. "No—not yet. I didn't have a man free the day that letter came in, and since then I've had so much to do that I overlooked it. I'll send a man around in the morning."

I made no comment. I had seen and heard enough.

I didn't stay to lunch.

I left for home.

Three hours later I was interviewing the president of our company.

"I hate to let him go," said the president. "He is a first cousin of my wife's, and she will make a tremendous fuss. But business is business. It takes live men to get orders—we can't carry dead weight and get ahead. You have my permission to make a change in the management of that office."

I made the change.

I appointed as the new manager a salesman who had a record as a business-getter—an aspiring young chap, nervous as a thoroughbred horse, and overflowing with spirit and energy. He went into that office as a full head of steam pounds into an engine cylinder—and forthwith every wheel in the organization began to move with the whiz and whirl of power.

In four days' time the sales of the office jumped up fifteen per cent.

The place has awakened from its long slumber.

The manager we let go was a fair type of the common or garden variety of business man—the easy-going, neutral-tinted, second-rate dawdler.

Every selling force has a number of these incapables—men who do business as a beggar lives upon the street—from hand to mouth. They drift along on the current of the day as a water-soaked log drifts down a sluggish stream. The atmosphere about them is loaded with delay. Their work drags interminably—their mail goes unanswered—their appointments are postponed—documents pile up before them—orders get cold before they are filled—they carry about important data on scraps of paper in Heaven-knows-what pocket of the Lord-knows-which suit of clothes.

When a paper demanding action falls into the hands of one of these men, it becomes forthwith a dead document—entombed for weeks, months or all time in a convenient pigeon hole.

Such a man's desk is a cemetery; his office is a place of stagnation more choked with dead matter than a standing pond.

A man of this sort has no more initiative than a load of sand. He attends from day to day to the casual details—or some of them—that turn up of themselves at his elbow and force themselves upon his attention. *But he has no perspective—no view of his work as a whole, no clear conception of the main objects that he should accomplish—no systematic method of covering all the points that offer opportunities for profitable action—no scheme of unearthing fresh possibilities and continually throwing out new lines of attack.*

He has no mind to plan, and no steam to push a plan through to completion. He lacks every quality of an executive.

Yet how numerous he is in business.

How many men are attempting to fill the positions of business generals who ought to be carrying water in the army's rear—and will be before the war is over.

How many leaders are conducting on to failure business enterprises which under proper management would march straight forward over every obstacle to success.

Men of this type do not necessarily neglect business for other pursuits. Their trouble lies deeper than that.

They get down to the office at the regulation time, they remain at work the regulation time, they knock off work—or their semblance of work—at the regulation time. They put in the regulation number of hours all right—but they might as well be a thousand miles away asleep under a shady tree so far as actual accomplishment of anything valuable is concerned.

They are all the time doing things, but they never get anything done.

The business world demand results—and these men cannot get results.

It calls in thunderous tones for productive action—and they can only imitate productive action, as a stage soldier imitates marching by marking time.

They start out, but they never arrive anywhere—they set sail, but they never make port.

Every stay is slacked on board their business craft—every bolt is loosened—their working equipment is slipping and sliding all over the deck—the compass is out of whack—the sails are unbent—the engine is choked with rust—nothing is shipshape or in working order. Like abandoned derelicts they go drifting and dodging across the business sea, doubling and redoubling on their track, headed everywhere in general and bringing up nowhere in particular.

They are tranced in inertia—steeped in postponement—paralyzed with procrastination. They are Rip Van Winkle sleepers—in a world that sets its highest premium on being wide awake.

And because these men are asleep, they do not realize their own condition. There is nothing in this earthly frame of things more marvelous than the infinite self-complacency with which a slow-going, jog-trot man moves on his sluggish jog-trot way.

Uncle Obadiah's old mare upon a country road is a skittish thoroughbred in comparison.

Such a man is conscious of no fault in his methods. He believes that he is moving as fast as anybody.

And if he isn't, what difference does it make? He is sure that he will arrive all right in the end.

A jog is a fast enough pace for him. "Fairly good is good enough," is the basic principle of his easy-going philosophy. "O, that will do well enough," is the expression most frequently on his lips.

He is content to be just holding his own—just getting along. So on he goes—jog, jog, jog—his mind full of peace—even though his pocket be empty of coin.

The jog-trot traveler esteems himself a business man because he is in business.

One may as well say a mud turtle is a pickerel because he happens to crawl into a pond frequented by pickerel.

A business man is a man who *does* business—who gets *results.*

Lukewarm water won't take a locomotive anywhere, and lukewarm purposes won't lift a man to any height of achievement in the business world.

The great things of history were never done by jog-trot men, take-your-time men—self-complacent plodders—placid, peaceful, rut-travelers—easy-going followers of routine.

All of these are men in different stages of slumber.

It takes a live man to get things done in this world—a man intensely wide awake—a man palpitating with eager energy, his head full of the fire of ambition, his heart full of the hunger of achievement, his veins full of red blood.

Business is a battle, but many men in business have no more fight in them than has a feather bed. They are constitutional Quakers—they keep peace with all the world and with every obstacle, attacking nobody and nothing—not even their difficulties. They are drab-colored, half-hearted, inoffensive non-combatants—camp-followers hanging around the edge of the business scrimmage and never plunging straight into the thick of the fray, where the hard knocks are going and all the glory and prizes are to be won.

Genius is intensity. The man who gets anything worth having is the man who goes after his object as a bulldog goes after a cat—with every fiber in him tense with eagerness and determination.

It takes force and fierceness, gimp, grit and gumption to run down success.

Life is no dressing-gown-and-slippers game. It is a fight fiercer than a street riot. Destiny is trying to down you. Square off and hit out at her as hard as you are able.

You alone can save yourself from failure. Be on your guard against your weakness. Get a grip on yourself. Take your habit of puttering and dawdling by the throat and choke the life out of it.

Stop loitering. Quit lagging at the tail of the procession, where you have to take every one else's dust. Hit up the pace—break out of the rear ranks—make a dash for the front of the parade, where you can get a view of the prospect ahead and hear the music of the band wagon. Bring all your powers into play—go in for all you are worth. *Do something—if it be only for a single occasion, with all your earthly might.*

Key yourself up to concert pitch.

Don't be a lump of dough. Set a little yeast at work in yourself and see if you can't rise.

W. C. HOLMAN, in *Salesmanship.*

IT MAY SURPRISE YOU TO KNOW THE TRUTH

Some of our customers who were most conservative at first now buy

Star Safety Razors And Supplies

at what they would have formerly considered "terribly reckless purchasing." They have learned the value of the "STAR" PROPOSITION.

THINK IT OVER

Our first year in business we manufactured and sold 1,600 STAR SAFETY RAZORS. We were the pioneers. It is always hard to convince the "other fellow." When Columbus said the world was round, people called him crazy. To introduce the STAR SAFETY RAZOR, we had to convince each purchaser of its merits and that it was not a novelty of no practical value. Each purchaser became a whirlwind of enthusiasm and an advertising medium for STAR SAFETY RAZORS. To-day over 7,000,000 STAR SAFETY RAZORS are in daily use. Our sales are larger than all other makes of safety razors combined, and we fully expect to sell 1,000,000 in 1905; that means an output each day of over double of what we sold in one year at the start.

Quality and Practicability have brought about this result.

Since the advent of the "STAR" over forty safety razors of various designs and patterns have been offered to the trade as a substitute for the ORIGINAL and MECHANICALLY PERFECT "STAR."

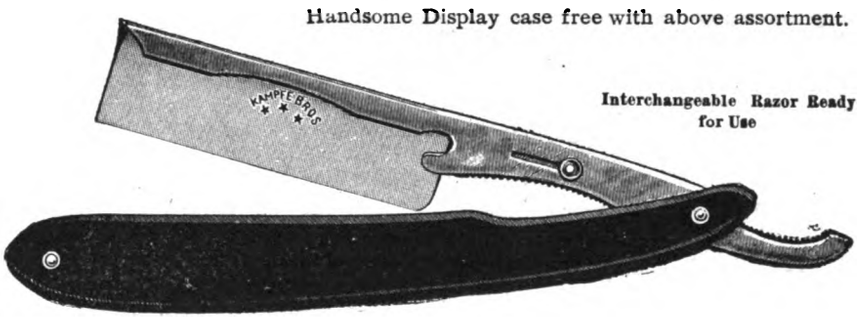
Did you purchase any of these various makes? Were they satisfactory?

Did they meet with the endorsement of the public? Can you conscientiously recommend them?

Have you any dead stock of safety razors on hand to-day and would you be glad to close them out at less than cost?

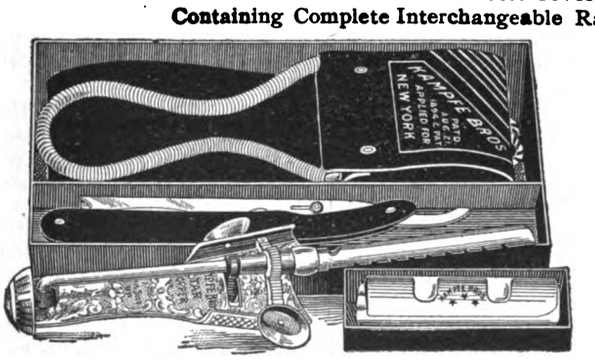
Do you think it is good business policy to carry in stock an inferior article because it is offered to you at a lower price?

WE WANT EVERY DEALER to have one of our "STAR" Assortments "A"; it will swell your profits.



Assortment "A"

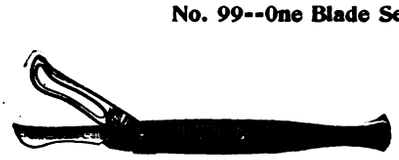
6 only—No. 1 Star Safety Razors, complete.
3 " —No. 2 Star Safety Razor Blades.
2 " —No. 3 Stropping Machines.
2 " —No. 25 Star Strappers.
2 " —No. 26 Diagonal Strops.
1 " —No. 4 Jewel Case, one blade.
1 " —No. 5 Star Case, two blades.
1 " —No. 6 Star Case, three blades.
1 " —No. 7 Star Case, four blades.
1 " —No. 9 Traveling Case, two blades.
1 " —No. 24 Combination Outfit.
2 in Signs, 1 Counter Mat and Catalogues.



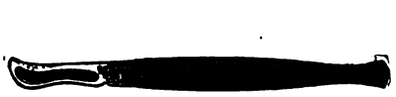
Handsome Display case free with above assortment.

Kampfe's Star Interchangeable Razor

Interchangeable Razor Ready for Use



Handsome Leatherette Covered Paste-Board Box.
Containing Complete Interchangeable Razor, one Blade, Star Stropper and Strop.



No. 99--One Blade Set.

Experience teaches us that about one man in twenty-five knows now to strop a razor properly. Many can and would prefer to use an old-style razor, but have found the proposition unsatisfactory for the reason that they are unable to keep their razor in condition for use. On account of such conditions existing many advertisements appear in the various publications: "*Razors requiring no honing or stropping; always ready for use; guaranteed to give satisfaction.*" THIS IS FALLACY. No razor can shave properly unless properly stropped, giving it the keen edge that cuts the beard and does not pull or scrape. Any practical cutler will bear us out in this statement. Our Interchangeable Razor overcomes all these difficulties. It is an improved old-style razor with interchangeable blades to be inserted in our new device (blade holder and handle). These blades can b. stropped with our SPECIAL Star stropper (size larger than the stropper used to strop a safety blade). We offer them for sale in sets only, the razor and handle complete, including Star Stropper and Diagonal Strop. Also in sets containing two, three, four and seven blades.

We are catering to the thousands who wish to overcome the difficulty that they have had in properly stropping their razor, and for this reason we have decided to offer the New Interchangeable Razor in sets only, including the Star Stropper and Diagonal Strop.

"Star" Safety Corn Razor

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ashdown, Ark.—The Ashdown Hardware Company was incorporated with an authorized capital of $50,000. The stockholders are: C. L. and George H. Briant, H. P. Haisliu, A. R. Boarman, W. O. Sims, H. L. Toland & Co., of this place; N. C. McCrary, of Richmond, and W. F. Bridewell, of Hope.

Aurora, Ill.—Fred. Grometer to-day effected the purchase of the George Schlitz Hardware store at No. 20 North Broadway and will take possession at once. Mr. Grometer was for many years with the firm of Erlenborn & Grometer in River Street, but has been out of business for some time. He proposes to add considerably to the general Hardware stock carried by Mr. Schlitz and to increase the business along other lines.

Burlington, N. C.—The Burlington Hardware Company has been incorporated to do a general wholesale and retail Hardware business. The capital is $5,000, and the principal incorporators are: R. E. L. Holt, C. T. Holt and W. W. King.

Circle City, Cal.—The Corona Hardware and Implement Company, which recently incorporated with a stock of $25,000, has organized by electing W. C. Barth, president; William Riddell, vice-president and manager; E. A. MacGillivray, treasurer; R. M. Wollitz, secretary.

El Paso, Texas.—T. F. Doyle, formerly employed by J. D. Milne, the sign painter, and also as accountant under R. E. Comfort, while superintendent of the Mexican Central, has just inherited a fortune amounting to $50,000. He has concluded to return to El Paso, and will start a Hardware store, with which business he is thoroughly familiar. Mr. Doyle came to El Paso from the East.

Fremont, N. C.—The Nahunta Hardware Company, with authorized capital stock, was chartered recently. The incorporators are: C. C. Aycock, J. T. Hooks, Cutlar Lee, T. C. Hill, H. F. Yelverton, Alex. Aycock and J. D. Best, all of Fremont.

Jackson, Miss.—Lumkin Hardware and Furniture Co. has been formed at Tupels, Lee Co., with a capital stock of $20,000. H. T. Lumkin, T. J. Kennedy.

Knoxville, Tenn.—Walter M. and Charles F. Simpson, George M. Miller, R. G. Wright and James T. Moore have opened up a new Hardware and harness store at 25 Market Square. Walter M. and Charles F. Simpson are already well known in the harness world. George M. Miller, formerly with the Southern Saddlery Co., of Chattanooga, and Howard Karns, of Knoxville, is conceded one of the foremost harness men of the South. He is not only a member of this firm, but also fills the office of foreman.

New York, N. Y.—R. Christensen & Co. has been incorporated; manufacture Hardware and Hardware supplies; capital, $10,000. Incorporators: Rudolph Christensen, Curtis L. Wilcox, both of Brooklyn; Franklin Wagner, New York.

Oklahoma City, Okla.—The Storm & Erickson Bros. Hardware Co. has been incorporated with a capital of $6,000.

Oklahoma City, Okla.—W. W. Storms and Erickson brothers have established as an incorporated firm to engage in the retail Hardware business, and have leased the south ground floor room in the new Bassett Block on Broadway. They will open up for business next Monday.

Windsor, Miss.—Windsor Hardware and Furniture Company was recently incorporated; $600; all paid. Incorporators: C. P. Lewis, W. W. Moffett, W. J. Colbow and R. F. Williams.

Winnipeg, Man.—Ethelbert (Bert) Lennox and W. J. Butt have opened an up-to-date retail Hardware store at the corner of Portage and Sherbrooke. Mr. Lennox was formerly traveler for Merrick, Anderson & Co., Mr. Butt being warehouse manager for the same firm.

Changes.

Altus, Ark.—S. I. Rossen has been succeeded in the Hardware and furniture business by S. I. Rossen & Co.

Anniston, Ala. —The stockholders of the City Hardware Company held their annual meeting recently and elected the following officers for the ensuing year: President, J. R. Landham; vice-president, E. A. Donahoo; secretary, treasurer and general manager, Ross Blackmon.

Auburn, Neb.—C. Ruckman, who recently purchased the Scammon and Redfern Hardware and furniture store, has sold the same to C. J. Lynch and Edward G. Smith. Mr. Smith has been in the employ of the Gilmore Armstrong Company for the past ten years and Mr. Lynch has been in the clothing business here for the past five years and both are well known business men of South Auburn.

Auburn, Neb.—Lynch & Smith have purchased the Hardware business of C. Ruckman.

Beatrice, Neb.—J. T. Baughan, of David City, has purchased the Hardware store of W. N. Farlow, on North Fifth Street.

Belvidere, Ill.—Cox Brothers, Hardware dealers on North State Street, have sold their business to Gingles & Clark, of South Dakota. A part of the consideration is a tract of Dakota land near Alexandria, said to be first-class property. H. J. Coxe may move there. The Hardware business is the old established Greenlee Company.

Bowling Green, Ohio.—With the closing of the present week the firm of G. W. Loomis & Co., whose name is so familiar to the people of Wood County, passes into history. This by reason of J. W. Knight, who acquired an interest in the business a year or so ago, having bought the entire business of the firm. The immense stocks of the firm in their two stores in this city and their store at Luckey are being invoiced this week preparatory to the final closing of the details of the transaction. The firm of G. W. Loomis & Co. has been one of the fixed business institutions, one of the largest Hardware, farm implement and vehicle concerns of the county for nearly a score of years, and has enjoyed a very extensive business. In the future the ownership will be vested in the name of J. W. Knight.

Burwell, Neb.—T. H. Doran has purchased the Hardware business of A. A. Garber.

Cedar Rapids, Iowa.—The Norris and Loring Wholesale Hardware Company, of this city, has sold its business to the Cutler Hardware Company, of Waterloo, and the stock will be removed at once to the latter city. The negotiations for the transfer have been going on for some weeks. Mr. G. H. Norris, president of the Norris and Loring Company, desired more time to devote to some valuable patents which he owns.

Central City, Neb.—G. A. Clark has sold his Hardware business to J. Stevens.

Central City, Neb.—Ross Bros. have been succeeded in the Hardware business by Ross, Dye & Cougile.

Charleston, S. C.—Mr. Walter Pringle announced that he had purchased the business and stock of the firm of Marshall, Wescoat & Co., Meeting Street, and would organize a stock company for the purpose of continuing the business under the name of the Marshall-Wescoat Company. Mr. Pringle said that the details of the sale of the stock, which had been made after inventory, were not of general interest. The fact that the place is to remain open and actively in the trade, however, is most interesting and satisfactory. The house has done an immense business in shelf and heavy Hardware, cutlery and agricultural implements, and these lines will be handled as heretofore. Mr. Pringle could not tell just when the new company would be organized, but indicated that it would be done as soon as the legal formalities connected with the purchase could be accomplished.

Clearwater, Kan.—Hammers Bros. have sold their Hardware and implement business to Smith & McLaughlin.

Columbia, Tenn.—George W. Everett, who for the past fourteen years has been traveling for the Gray & Dudley Hardware Co., of Nashville, has bought out the Biles Hardware Co., at Sparta, Tenn., and will continue the business for himself.

Davenport, Iowa.—S. H. Reynolds & Co. have sold out their Hardware business.

Enid, Okla.—E. F. Peters has succeeded to the Hardware business of Peters & Gibbs.

Fort Smith, Ark.—The Speer Hardware Company filed notice of an increase of capital stock from $60,000 to $300,000, the increase to be effected by issuing 9,600 additional shares of common stock valued at $25 each. Every person now holding stock in the corporation is to receive four shares of the new stock for each share now held.

Franklinville, N. Y.—John E. Robeson, who for thirty-four years has conducted a Hardware store here, concluded a sale yesterday to E. A. Parsons, of Arcade, for something over $5,000. Mr. Parsons took possession to-day and will move his family here from Arcade at once.

Grand Rapids, Mich.—W. L. DeGraff and J. K. Quantrell have purchased the Hardware business of W. & J. Stadt, at 616 North Ottawa Street, which they will conduct under the name of De Graff & Quantrell. This firm had been engaged in the Hardware business at New Buffalo, coming to this city and opening a jewelry store and bazaar at 457 South Division Street, which it will continue to conduct.

There Are Lots of Men

who think a Razor Strop is of little importance. This is certainly a mistaken idea; a good razor strop, when made PROPERLY is the WHOLE THING, makes shaving easy.

The Gibford RED-E-FOR-USE Razor Strop is a joy to the user.

If you have not sold the Gibford strop, write for catalog and allow us to send you a sample half dozen, express prepaid.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Camden, N. J.—National Nailless Horseshoe Co., No. 317 Market Street, Camden, N. J.; manufacture nailless horseshoes; capital, $250,000. Incorporators: William P. Maxfield, T. F. Clabby, Joseph E. Walton, E. E. Comber, Thomas W. Jones, all of No. 317 Market Street.

Cazenovia, N. Y.—Safety Lock & Knob Co.; manufacture locks, door knobs and Hardware; capital, $100,000. Incorporators: Battese Revoir, Bartis M. Revoir, Eugene B. Goodrich, all of Syracuse, N. Y.; Myrta E. Howell, Onondaga, N. Y.; Emmet H. House, Fulton, N. Y.

Cincinnati, Ohio.—The Champion Tool Works Co. has been incorporated; Thomas Bentham, Harvie Kruizburg, W. Donaldson, Edward Mcgoldrick, Olive B. Kruizburg and others. Capital, $15,000.

Cleveland, Ohio.—The American Fender and Manufacturing Co. has been incorporated; Thomas E. Greene, Albert H. Miller, John Kundt, R. G. Burkhardt, John Gabel and others. Capital, $50,000.

Cleveland, Ohio.—The Smokeless Powder and Cartridge Co. has been incorporated; Alonzo M. Snyder, A. E. Clevenger, G. D. McGwinn, N. I. Young, Elmer G. Derr. Capital, $5,000.

Des Moines, Iowa.—Alline Electrical Company, of Fort Dodge, has been incorporated with a capital of $25,000; Cedar Rapids Implement Works, with a capital of $100,000.

Detroit, Mich.—The Walsh Safety Lock Snap Co., capitalized for $10,000, filed articles of association with the county clerk yesterday. Of the capital stock $2,000 has been paid in cash and $8,000 in patents. Stockholders are Joseph A. Walsh, trustee; William F. Fishback and Harry M. Donahue.

Hamilton, Ont.—The first annual meeting of the Canadian Shovel and Tool Company, of Hamilton, was held this morning, when the following directors were named for the year: C. H. Holton, president; E. McCarty, vice-president; W. A. Holton, secretary-treasurer; F. Skelton and J. C. McCarty. The stock of the company has now been fully subscribed and the new plant is rapidly nearing completion in the east end. Some of the machinery has already arrived and the balance is ready for shipment. In a very short time the company will be ready to do business.

Minneapolis, Minn.—Lever Cream Separator Company, Minneapolis; capital, $800,000; incorporators, Frank C. McMullen; Robert M. Works and M. J. Mulcahy, Minneapolis.

New York, N. Y.—The Davies Automatic Shear Co., recently incorporated, is fully equipped to manufacture its shears, on which it owns several patents covering shear connections. The company will buy the blades from standard makers and manufacture the connecting devices. Peveril Meigs, Jr., of No. 18 Exchange Place, is treasurer.

New York, N. Y.—Villard Advertising Jar Co. has been incorporated; manufacture glass jars, etc., for advertising; capital, $60,000. Incorporators: Richard H. and K. Villard, Thornwell Mullally and James O. Tryan, all of New York.

New York, N. Y.—Webb Self-Lighting Co., manufacture lamps, stoves, furnaces, etc.; capital, $250,000. Incorporators: Washington I. Marble, No. 345 Broadway, New York; Nicholas A. Donnelly and James G. Gregg, both of No. 141 Broadway, New York.

Oklahoma City, Okla.—The Barber Tool Company, of Oklahoma City, with $5,000 capital stock. Incorporators, Newton Avey, Melvin Barber, L. Overholser and D. O. Larimer, all of Oklahoma City.

Toledo, Ohio.—The Home & Farm Supply Co., of Toledo, capital, $100,000, was incorporated to-day by John M. Ormond, Frank T. Oakley, B. L. Paine, N. O. Winter and Cyrus Husey. Half of the stock is to be 7 per cent. preferred. Mr. Ormond said to-day that the company will do a farm supply business, selling seeds, farm implements, etc., by mail order, and will establish a number of branches in other cities. Toledo will be the headquarters of the company, which will shortly open a store in the downtown district.

Toledo, Ohio.—The Keasey Wood Split Pulley Co., which early in the Spring suffered a complete loss of its factory by fire, has now become installed in its new plant.

Toledo, Ohio.—The Superior Agu Stove Company, $5,000 capital stock, was incorporated by A. H. Snodgrass, C. J. Schumacher, William H. Holmes, D. M. Kable and H. Swift.

Warren, Pa.—A certificate of incorporation was filed for the Rogers Shear Company, of Warren, Pa., to deal in general merchandise, both wholesale and retail. The incorporators are: James P. Rogers, William B. Rogers and David Shear, all of Warren, Pa.; capital stock, $25,000.

Worcester, Mass.—The Parker Wire Goods Co. has increased its capital stock from $15,000 to $20,000, which has been made necessary by the growth of the business.

Changes.

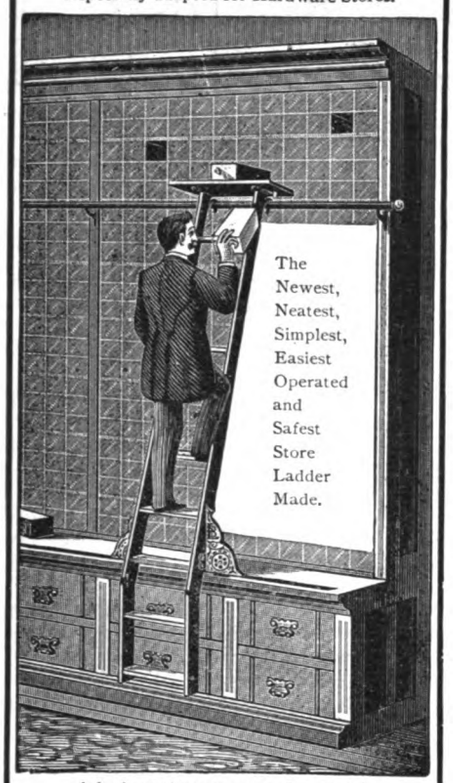
Anderson, Ind.—The Dunn-Louisio Manufacturing Company yesterday disposed of their rapidly growing business to the Anderson Tool Company. The company manufactured a computing oil tank which proved a winner, and the tool company was anxious to manufacture the article. The tool company is erecting a large addition to its building on Jackson Street, and will install the new department in the addition.

Binghamton, N. Y.—Work of excavating the cellar for the addition 40 by 134 feet for the 1900 Washer Company will be completed, and the work on the foundation will be started soon. The new addition will be three stories high and have a basement which will be used largely as a storeroom for stock. The addition has long been necessary to the business because the company had no place to store its stock and was working in a sort of hand-to-mouth manner turning the stock into machines just as fast as it arrived. At present the company is about 10,000 machines behind its orders. During the last five years the business of the company has had a marvelous increase. About 1900, the old Griswold soap factory was purchased by the company and an addition 40 by 60 feet was added. In the following year another addition 40 by 90 feet was added facing the railroad tracks, and the year following 40 by 69 feet was built. With the new addition the company will have a frontage on the railroad tracks of 361 feet, besides a wing extending north of about 90 feet. The addition which is now in course of construction is being erected on the west end of the old building.

Cincinnati, Ohio.—The Cincinnati Tin & Japan Co. has sold the property on which it is now located for $85,000. Mr. Bell, secretary of the company, owns property in other parts of the city, from which a selection will doubtless be made for a new factory site, though nothing is to be done in that direction for a year or more, as the terms of the contract require that the company shall continue to occupy the property just sold for that length of time.

Columbus, Ind.—C. S. Baker and C. M. Keller, the committee representing the new Jenney Manufacturing Company, just organized here, with a capital stock of $300,000, returned from Ottumwa, Ia., where they have been to pass deeds and conveyances. This large manufactory of agricultural implements will now be moved here as soon as the necessary buildings can be erected. There will be fourteen buildings, covering five acres of ground. Fifty families, or 250 souls, will be brought here with the plant. It will be in operation here by September and will work 300 hands.

Detriot, Mich.—The Smiley Tool Works have been purchased by Charles H. Muckenhirn and the machinery moved to Salem.



Jamestown, N. Y.—William Hjorth & Co. have purchased the Josephus H. Clark property on Harrison Street, and in the near future will erect a factory for the manufacture of wrenches, pliers and Hardware specialties, the present quarters in the building on Taylor Street formerly occupied by the Anchor Fence Company, being inadequate on account of the rapid growth of the business. The property has a frontage of 120 feet on Harrison Street, and 120 feet on Taylor Street, and is 200 feet deep. The firm of William Hjorth & Co. consists of William Hjorth, his son, Arthur W. Hjorth, and his son-in-law, Roland M. Taylor.

Kent, Ohio.—The Seneca Chain Co., of Kent, Ohio, will increase its plant for the manufacture of hand-made straight link chain and will add a testing machine of 3,000 pounds capacity. When these improvements have been made the concern will give employment to a number of additional men.

Old Putty Face has lost his place,
As a filler, his days are numbered,
"ORIENTAL'S" the name that's laid claim to fame
Put your faith in it, you wont have blundered

ORIENTAL FLOOR AND CRACK FILLER

(The Perfect Filler)

HAS REPLACED PUTTY

wherever there is a demand for an economical, durable and hygenic beautifier of crack and nail-scarred floors and woodwork.

WHY? Because it is absolutely non-shrinkable, dries hard as steel in twenty-four hours, and never falls out or away from the crevice.

WHY? Because it settles in the cracks, solidly and evenly, and can be stained any desired shade or color to match the woodwork, blending so perfectly that a floor appears as one solid piece.

WHY? Because it is sanitary, rendering the floors and woodwork germ and vermin proof and saves the carpets and clothes by making mothproof the apartment where it is used.

WHY? Because it is as cheap as putty, but better; because it makes floors easy to clean, and because it dries hard over night so floors can be used uninterruptedly.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Baltimore, Md.—Robert L. French, who is the "Co." in Howard A. French & Co., has purchased the business of G. W. Thompson & Co., 251 Broadway, that city. The same lines, bicycles, motors and sporting goods, will be handled.

Birmingham, England.—The practice of bicycle stealing has become so very prevalent that the local insurance companies have taken warning and will no longer assume bicycles as risks. One company, more hardy than the others still insures machines under the express condition that they are to be used only for pleasure purposes, not at all in the way of business, since the majority of the thefts have been of machines which have been left standing at the curb by tradesmen and others who were in the way of business.

The bicycle still holds its own abroad, as is shown by the fact that the exports of bicycles and parts of bicycles from Germany during the years 1902, 1903 and 1904 were valued at $3,427,200, $4,416,600 and $4,795,700, respectively.

Brooklyn, N. Y.—Since the Alpha Motorcycle Club, the first in America—went out of its rather listless existence when the Kings County Wheelmen sold their clubhouse last year—the club had shared the building— the City of Churches has been without a motorcycle organization. The void, however, is in a fair way of being filled, a meeting for the purpose having been held on Thursday night, when a temporarary organization was effected, with E. W. Carritt as chairman and Charles L. Simms as secretary. Another meeting will be held at No. 33 Grant Square next Thursday, when the organization will be completed.

Chicago, Ill.—London Auto Supply Company has been incorporated; capital $10,000. Manufacturing. Incorporators, W. B. Junes, F. C. Smith, Max Weiss.

Dallas, Texas.—The Mosely Sporting Goods Company, capital stock $30,000, has been incorporated. Purpose, to buy and sell goods, wares and merchandise. Incorporators, E. A. Mosely, J. H. Miller, E. W. Rose, E. P. Webster and E. A. Worden.

Glenville, O.—Jay Lewis, lately of Shelby, L., has opened up a completely equipped bicycle and automobile repair shop in the Keiper block, 2848 St. Clair street. Lathes, drills, etc., driven by a powerful engine make the workshop a good one.

Changes.

Hookeston, Ill.—The firm of Walter & Arndt has been dissolved by mutual consent, Mr. Arndt retiring and taking with him the electrical and bicycle repairing departments, and Mr. Walter retaining the balance of the business.

Monmouth, Ill.—Morton Humphrey has become a partner in the Wallace Auto and Cycle Co. of South Main street. He is an experienced machinist and has been employed for a number of years at the McIntosh foundry.

Onaway, Mich.—Henceforth, or at any rate until further notice, the American Wood Rim Co. will operate but one plant, that at this place. Its factory at Marietta, Ohio, has been idle for some little time, and at a special meeting of the directors held last week in Bradford, Pa.—once the chief source of production—it was decided also to shut down and discontinue manufacture at that point.

Suffern, N. Y.—W. S. Sloan, the bicycle dealer, is building a garage adjoining his bicycle store on Orange Avenue for the storing of automobiles.

Toledo, O.—The capital stock of the Consolidated Manufacturing Company was increased from $600,000 to $1,000,000 and the old Arizona charter of the company surrendered, the reincorporation being under the Ohio laws. Half of the capital stock is to be 6 per cent. preferred. The Consolidated Manufacturing Company is the successor of the Snell Cycle Fittings Co. and the Kirk Manufacturing Co., which industries were merged some time ago. The company's plant is on Fernwood avenue and the Lake Shore tracks, and the new concern will manufacture vehicles of all kinds and their parts, engines, motors, compressors motors and motor machines, bicycles and autos, batteries, pumps and stamped metal goods and forgings. The reincorporation and increase in capital is to extend the scope of the business, which will now become one of the largest in Toledo. A number of prominent local capitalists are identified with the company, which will enter extensively into the manufacture of automobiles.

Home, Kan.—G. W. Reinhardt has engaged in the Hardware and implement business.

Lafayette, Ind.—A notice showing that the Westfall-Moore Hardware Company had changed its name to the Moore & Kemple Hardware Company, has been filed by Thomas J. Kemple, president of the company.

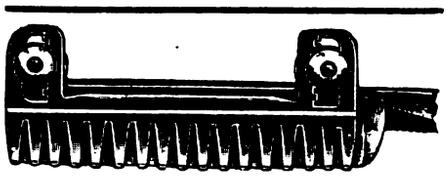
Lennox, S. D.—W. Heibult has succeeded to the Hardware business of Miller & Heibult.

Longton, Kan.—Crumrine & Croner have succeeded to the Hardware and implement business of Crumrine & Nichols.

Marion, Ia.—S. X. Way has sold his Hardware business to J. M. Croner & Co.

Marysville (Yuba Co.), Cal.—After sixteen years of continuous service as cashier, accountant and bookkeeper with the W. T. Ellis Company, David Canning will resign next week to enter into business for himself. The Hardware firm of Lydon & Follansbee .s about to dissolve by mutual consent, and Canning will purchase the interest of Follansbee in the business.

Ottawa, Kan.—W. E. Harris has engaged in the Hardware business.



Miscellaneous.

Grand Island, Neb.—The gun and bicycle shop of William Gunther was robbed recently and about $200 worth of goods taken, including twenty-four revolvers, one silver watch, one gold watch, the name of Mr. Gunther being inscribed; several rings, ten flash-lights and a few other smaller articles. The burglars gained entrance by forcing the door of an adjoining carpenter shop and then boring through two wooden walls, that of the carpenter shop and that of the gunsmith's.

Hartford, Conn.—Although the Pope Mfg. Co. has discontinued its Chicago sundry department, Hartford headquarters reports that it merely implies a corresponding enlargement of the Eastern department; in fact, a special staff of travelers will be organized which will be devoted exclusively to the sale of sundries.

New York, N. Y.—The announcement is made by Frank A. Burrelle that he offers a valuable cup to be competed for by all tire manufacturers. Within the next few days a meeting of tire experts and prominent automobilists will be held. At this meeting a committee will be appointed to arrange all necessary details for the competition and make the rules under which the necessary runs will be made for the Burrelle cup.

San Francisco, Cal.—So satisfactory was the administration of the old officers of the New Century Wheelmen, that most of them were unanimously re-elected at the annual meeting last week. Following is the new board: President, Gus L. Baraty, re-elected; first vice-president, J. T. Tennant; second vice-president, C. Schiller; recording secretary, H. Stranahan, financial secretary, J. Herzog; treasurer, W. E. Lee, re-elected; captain, A. Greeninger, re-elected; first lieutenant, D. Mainland, re-elected; second lieutenant, H. Wilkes, re-elected; sergeant at arms, William Janssen; racing board, H. M. Strohlein and L. G. Shaw.

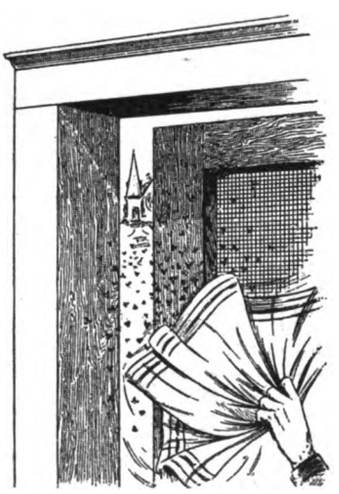
FOR

Fly Season

Goes on the inside of door and can be locked.



Retails 15c.

THE BEST CATCH ON EARTH, AND AT THE RIGHT PRICE.

Sold by all Leading Jobbers.

Drop a postal for sample catch, mailed free. Attach it to a door and note result.

A mounted wood model free with first order of 3 dozen.

Holds any door, right or left, flush or lapping; inside or outside; on cupboard doors, right or left side, on top or underneath shelf.

It keeps the dust out, keeps the flies away, stops rattling, prevents warping, and keeps the door closed.

Each catch packed complete with cardboard templet, screws, staple and hook for locking is sealed in a strong envelope; no extra parts needed on the American. When you buy an envelope you get it all.

One dozen envelopes in a neat, strong carton, swing back cover, and two-color display cards.

At the same time this firm recommends itself as buyer of European products of industry. Banking references given and wanted. Please apply sub. H. L. 1657-g to Advertising Agency, Rudolf Mosse, Hamburg, Germany.

Every Housewife

Knows the superiority of grated corn for fritters and other dishes. Makes the cooking so much more tasty than corn cut from the cob. With the

Favorite Corn Grater

the inside of the kernel is extracted, leaving the hull on the cob. Pass the corn forward over the teeth, which will puncture the grain and the smooth edge will scrape out all the nutritious elements and leave the shell of the grain on the cob.

The grater is made of hardwood, fine steel and handsomely finished.

Size 12x3 inches. Dozen packed in paper box. Gross lots in cases. Weight, 70 pounds per gross.

Dealers have always found it a good summer seller.

NICE

BARN AND ROOF PAINT

has made more friends among consumers for Dealers and more friends among Dealers than any other Barn or Roof Paint ever made.

While price is low, quality has not been sacrificed.

Dealers find it a pleasure to sell goods of this class, because while realizing a good profit they can feel sure they are making a permanent customer who will be satisfied — yes, pleased, with results and tell others about it.

What better advertisement for any Dealer?

Our No. 80 Lineman's Plier

The Cronk & Carrier Mfg. Co.
Elmira, N. Y.

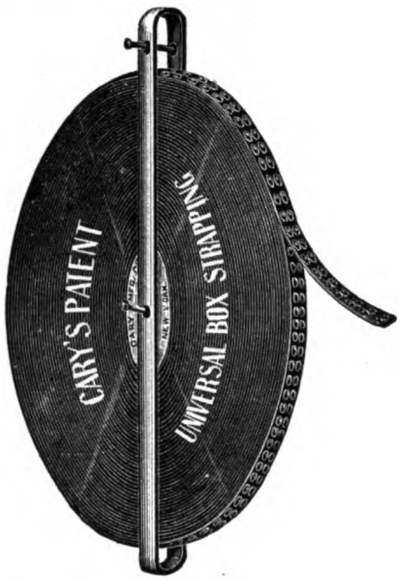
Convenient
Durable
Powerful

Is a distinct step in advance of any other Lineman's Pliers on the market to-day.

Fit for the hardest kind of service.

Throat is round and will cut larger insulated wire than other Lineman's Pliers.

It will cut anything from music wire to 16 d Nails. None better for general use.



Five sizes: 5 in., 6 in., 7 in., 8 in., and 9½ in. lengths.
Forged from best Tool Steel --fully warranted.
We make the largest line of Pliers for Farmers' use.

Our Special Quotations will interest the dealer. Ask us about them when you write for catalogue.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

WHITE'S EDGE TOOLS

The feature that commends itself about White's Edge Tools is that they are easy going—they never cumber the shelves of a hardwareman.

Nearly Three-quarters of a Century on the Market

is the reason for this. They sell well because they are well made and because in all that time they have improved with age.

If you are looking for perfection in Edge Tools, look at White's. A single sample order will furnish conclusive proof.

Send for it to-day and be convinced.

PETERS

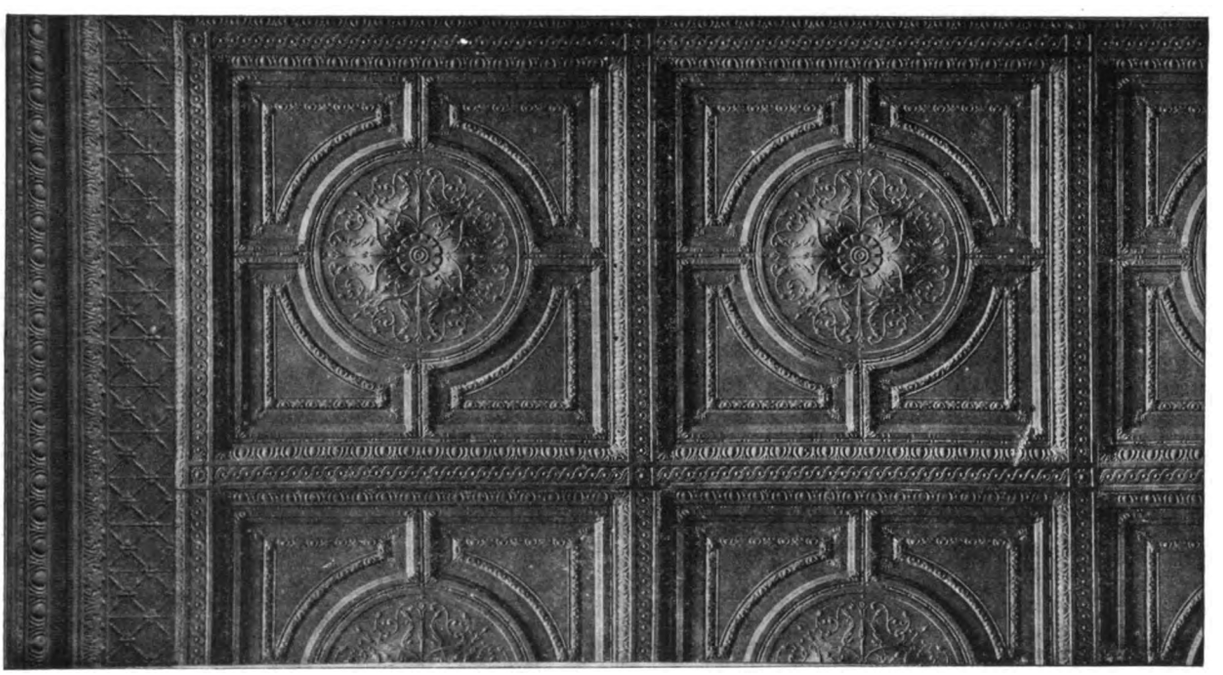
CARTRIDGES AND LOADED SHELLS

Bring Down the Dollars for the Hardware Dealer!

THE *unequaled quality* of Peters Ammunition, together with persistent advertising and wonderful records made with shot-gun, rifle and revolver, have created a greater demand for it this year than ever before.

We have the most complete line and the best goods in the country.

Are YOU Taking Advantage



of the business we are creating for you? If not, ask your jobber or write us direct.

THE PETERS CARTRIDGE CO.

CINCINNATI, O.

New York: T. H. Keller, Mgr., 98 Chambers St.

HARDWARE

Northrop's Metal Ceilings

The latest and the best designs in Metal Ceilings are finely illustrated in our new catalog. You ought to have a copy.
Name anything you wish in the way of metal ceilings or walls for rooms of any size, shape, kind or purpose, and you'll find that the original

NORTHROP METAL CEILINGS

are still unequalled in sharpness of stamping, simplicity of construction and architectural fineness.
Every Hardwareman ought to handle Northrop's Metal Ceilings. Any mechanic can put them up.
Remember: If you'll send us the particulars about any room, we'll submit drawings and prices.

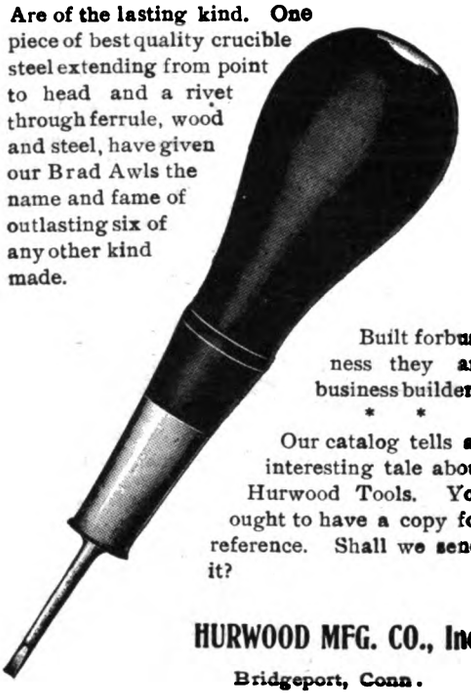
Columbia
Can Opener

It never slips nor tears. A high grade can opener at a low price—10 cts. retail. Discount most liberal to the trade. Send for it.

A. F. Meisselbach & Bro
30 PROSPECT STREET
NEWARK, N. J.

The "Leader" Lemon Squeezer

Has no loose parts. Is unbreakable. Works rapidly and thoroughly. Most compactly put together.



Two styles — nickel plated and Japanned.

Mention HARDWARE.

The LEADER MFG. CO.
Hartford, Conn.

HURWOOD BRAD AWLS

Are of the lasting kind. One piece of best quality crucible steel extending from point to head and a rivet through ferrule, wood and steel, have given our Brad Awls the name and fame of outlasting six of any other kind made.

Built for **business** they **are** business **builders.**

* *

Our catalog tells **an** interesting tale **about** Hurwood Tools. **You** ought to have **a** copy **for** reference. Shall **we send** it?

HURWOOD MFG. CO., Inc.
Bridgeport, Conn.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL

with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL

with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

The Gem Mop Head.

THE EIGHT SPACE SPICE CABINET

is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

Eight Space Spice Cabinet

A Better Location Than Yours

would be in Virginia, the Carolinas, Georgia, Florida or Alabama, and the special Southern edition of the Seaboard Air Line Magazine will convince you. It contains specific opportunities, and lists of orange groves, pine apple plantations, farm, fruit and truck lands.

"Picturesque Florida" containing over a hundred full page photogravures illustrating typical scenes, but containing no reading matter or advertising, together with other literature sent on receipt of ten cents to pay postage.

J. W. WHITE,
General Industrial Agent,
Seaboard Air Line Railway,
Portsmouth, Virginia.

We have a good location for your plant.

DEALERS

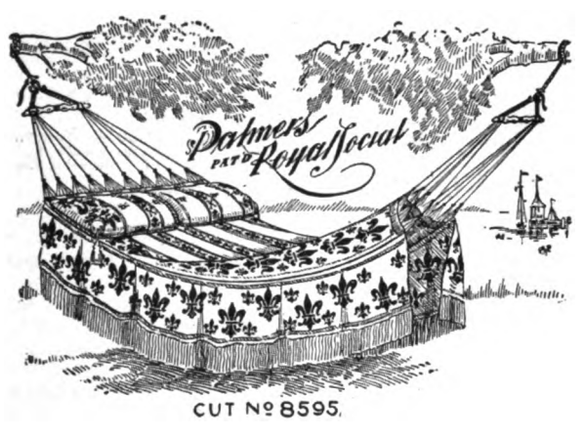
Throw your line among fishermen and you'll get a **strike**—with a rush for the goods—if it's the general line of

Pflueger's Fine Fishing Tackle

made only by the

ENTERPRISE MFG. CO.

Twenty-five years' experience, combined with the largest manufacturing facilities in this country, enable us to produce a superior line of fishing tackle that fishermen insist on having.



Hooks, Flies, Trolls, Spinners, Phantoms, Reels, Furnished Lines, everything in fishing tackle, packed for effective display—best selling line you can carry.

PFLUEGER'S PATENTED "REVERSIBLE HINGE" INSURES FREE SPINNING AND PREVENTS BENDING OR BREAKING

NOTICE

Free to any dealer in SPORTING GOODS, sent express prepaid, 155 page illustrated catalogue No. F23, Metal Fish Sign and Window Transparency in eight color lithograph.

RICHARDS' ROYAL

"The Noiseless, Smooth Running" Ball Bearing Trolley House Door Hanger has been designed with special thought for the Dealer catering to the trade of the man who demands perfection in the appointments of his home.

These hangers are *noiseless*—the wheels running on *hard maple*, a wood especially adapted for this use, as it retains an even, level surface under years of constant usage. There is a surplus of material for every strain, but no excess of metal where it is not needed, insuring a tight *non-rattling* hanger of great durability. The track may be removed or adjusted at any time without injuring the walls or plaster.

There's a Richards Door Hanger for every requirement of your customers. Write for our book of Facts and Figures.

Contrasts

between the Candle flame and "Au*omatic" light are of course pronounced, but there are differences just as radical between the

AMERICAN AUTOMATIC LIGHTING SYSTEM

and other kinds, The American Gas Machine gives a light that costs less per candle power than any other machine made. It requires no hand regulation, the machine doing this automatically. The light is steady, brilliant and powerful, but not tiring to the eyes. It is safe, durable and simple and with reasonable care will last for years.

Catalogs and estimates free on request.

American Gas Machine Co.
Albert Lea, Minn.

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality.

Take Axle Grease for instance: if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

Its the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs, barrels. The question is: how much do you need?

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

For Every Reason that Broadly Recommends a Commodity to the Dealer

BISSELL'S

"CYCO" Bearing Carpet Sweeper is pre-eminently the acknowledged leader on the market.

1st—It is the product of twenty-eight years of development by the most skilled mechanics ever engaged in this business;

2nd—It contains exclusive mechanical features that have given the Bissell a world wide reputation;

3rd—It has superior salability so thoroughly recognized by the trade as to make it unnecessary to present this claim;

4th—It is the only carpet sweeper ever sold on the market under a sound policy of fixed retail prices that guarantee to the dealer a good profit;

5th—Our line is the largest and most complete of any on the market, comprising every size of sweeper from the tiny toy to the mammoth hotel machine;

6th—We meet every demand of the trade and the public as to styles and prices, furnishing domestic size sweepers ranging in price from $12.00 to $36.00 per dozen;

7th—The Bissell is the only carpet sweeper that has ever been extensively advertised, and for which there is a general demand;

Remember, the best is always the cheapest, and that the demand today is for the article of recognized merit that is thoroughly advertised.

NEW YORK, JULY 25, 1905

PROFIT MAKING LINES

SELLING WASHING MACHINES.

By H. G. Bramlich.

It appears to the writer that the Hardware merchant is the proper one to handle Washing Machines. In fact, the many articles handled by him that are used in the household, and in fact in connection with doing the family washing, necessitates him handling washing machines.

Any wide awake dealer will readily see that by handling Wash-Machines, it gives him an opening to approach the customer on a great many other articles that are absolutely necessary when doing a family washing. For instance, Wash Boilers, which are frequently handled by Hardware Dealers, Wringers and Clothes Lines, Pails, Wash Tubs, Clothes Pins, Mangles and probably others that do not at present come to the mind of the writer.

Our firm is one of the oldest firms in the country manufacturing Washing Machines. When we first commenced putting them on the market, nearly everybody seemed to think that they would not do the work, but in order to introduce our machines, we had to make enormous demonstrations, and it was not a hard matter to convince the people that a Washing Machine was a household necessity. After the first few years we gave up making practical demonstrations, but we have spent enormous sums, and are still doing so today, in advertising, not alone to the dealers, but to the consumer. We create a demand for the dealer, and all he has to do is to show our goods, and it is no trouble at all to affect a sale. Today our Washing Machines are being advertised in nearly all of the farm journals, and in every one of our advertisements we refer to the dealer. We are also at all times more than pleased to furnish dealers with electrotypes for newspaper and circular advertising, and also booklets and other printed matter. We are sending out booklets advertising our "O. K." alone, and also one advertising the three machines that we are today manufacturing.

SELLING SEWING MACHINES.

(Contributed.)

The great development of the sale of sewing machines by Hardware dealers in the past few years is indeed most remarkable. Formerly the Hardwareman looked upon sewing machines as an impossible line—he shunned it and said, "That is canvassers' work—peddlers who go from house to house, but not for us—thank you."

There came an awakening—the primary cause of this reversal of opinion was competition—competition caused the house to house agents to fight among themselves, resulting ultimately in the disclosure that, at their prices, sewing machines often netted an actual profit of 100 per cent. People began to sit up and take notice, particularly Hardware jobbers and Hardware dealers, of which there is not a better, more business-like up-to-date class of men on earth. Their investigation showed that sewing machines like all necessary articles of a mechanical nature were built on simple, sound mechanical principles. They found that on account of this simplicity of construction and the universal knowledge of sewing machines possessed by all women, the necessity of the old time sewing machine expert had vanished.

It was obvious that sewing machines could, by the aid of the moderate intelligent Hardware salesman, be sold and sold successfully, economically and profitably from their store—the same as stoves, nails, tin pans, cutlery and staple Hardware stock. It was clearly shown that the method of selling sewing machines by canvassers from wagons was necessarily expensive, and as before stated that the profits were immense. An obvious conclusion was, that by buying machines outright at spot cash, bed-rock prices, the Hardwareman could offer them to the consumer at one-half, and even less than one-half the exorbitant prices then prevailing, and still a fair margin of profit would inevitably result. Surely it was a crime to let pass this opportunity to add a prontable side line that was actually knocking for admittance at the door of the live Hardwareman.

These facts once demonstrated, the rest was easy. Sewing machine makers—makers of reliable sewing machines, let it be understood—were tickled to death with this new source of distribution. They fully realized the tremendous selling power of the Hardware trade of these United States. It appealed to them; why shouldn't it? No mortal man would or could consistently hesitate to take advantage of this opportunity to sell his wares outright to responsible jobbers and merchants, when before his business was with agents on commission or long time agents, who, however, honorable personally, were in the main, financially irresponsible.

The introduction of sewing machines to the Hardware trade was at the outset gradual, but the practicability, fitness, effect and profit in the new line was soon most apparent, and to-day it can be safely said that fully 80 per cent. of the Hardware jobbers and dealers are yearly distributing more than fifty per cent. of the entire sewing machine output of the United States.

Of late, catalogue house competition has made itself felt, but as in other lines, the wide-awake Hardwareman fights it and fights it successfully. This is done by keeping in stock as stool pigeons, a few cheap sewing machines of the shoddy type sold by catalogue houses and offering them at cost or below, this having an object lesson to present to intending catalogue house buyers. This invariably results in the sale of a good machine by the dealer and at a price that is eminently fair to him and the "would-be if he hadn't been put next" patronizer of the pernicious catalogue house.

The following expressions of opinion from representative Hardwaremen throw light on the methods of handling sewing machines and the estimation in which they are held.

Miller & Wentworth, Unionville, Mo.:—

We handle sewing machines in connection with our Hardware business because we find profit in them. Handle them from the store and never send out a canvasser. We find it as profitable as any other part of our business. It requires no extra space or help to handle them.

A. H. Sheldon & Co., Janesville, Wis.:—

We have sold machines for the past six or seven years, entirely from the store, that is we have done no canvassing in connection with the sale, and have always found them to be a profitable addition to our line of staple Hardware. They take up very little room on the floor, and usually fill in, in a time when the space is not needed for stoves or other staple lines. They are more easily sold than stoves, and there is usually a greater profit in them. We would advise any Hardware merchant to add sewing machines to his line.

York, McCracken & Co., Okmulgee, I. T.:—

The sewing machine business belongs to the Hardware dealers. We have sold them for some years. It pays a larger profit than any other line we carry. A good machine sells itself. No extra room nor help required.

Brady Bros., Hardware Co., Jacksonville, Ill.:—

"First, we took up sewing machines because, properly speaking, they belong to the Hardware line. Second, we sell both from store and wagon. Third, there is no question in our minds, but what the line can be readily carried and sold by up-to-date Hardware concerns. Of course, like everything else of this nature, it requires special effort to sell them, and unless a dealer is willing to give them the attention they deserve, the proper results cannot be expected. Fourth, sewing machines bear a better profit than any staple goods in the Hardware line, and compare favorably with most goods in the Hardware line."

Digitized by Google

MARVIN HARDWARE CO., Oregon, Wis.:—

"Some fifteen years ago we were prompted to take up the sewing machine business by the vigorous advertising done by catalogue houses. At that time we tried selling both locally and by mail, but were only successful in a local way. Since then we have continually had machines on the floor. We have tried selling by wagon and from the store and prefer the latter method. Our line embraces the following goods: We start with the cheapest five drawer drophead machine we can buy, merely for price, we have next in value two machines of respectable quality that we put up against catalogue house competition, and besides these carry an assortment of high-grade machines. We make a good profit on all but our cheapest machine, and that we never sell. We are pleased with the department as the goods occupy but small space, sell readily when properly pushed and yield a reasonable profit."

N. JOHANNES & SONS IMPLEMENT CO., Rich Hill, Mo.:—

"We have handled sewing machines in connection with our Hardware and implement business for forty years; in fact, the commencement is so remote we cannot recall the starting of this business. We have tried all the various ways of peddling, etc., machines, but find the most profitable and satisfactory way is direct from sample floor, thus saving quite an item in the way of expenses. While the mail order houses have 'butchered' the price considerable, yet we enjoy quite an extensive trade, and think the business very profitable if properly handled."

It is understood the pioneer jobbers in this line are the Simmons Hardware Co., which concern annually distribute tens of

A GOOD SPECIALTY WINDOW.

thousands of sewing machines. At any rate, they and the following prominent Hardware jobbers make a decided specialty of the line with resulting profit and complacency to themselves. (N. B. It is but fair to them to say that with them it is not a question of large individual profit on each machine, but rather of immense sales and small individual profit.) Hibbard, Spencer, Bartlett & Co., job several grades, all good and bearing their special brands. Belknap Hardware & Manufacturing Co. control a well and favorably known machine under the manufacturers' mark, and in addition job several brands of their own. Van Camp Hardware & Iron Co. entered the field three years past, and by vigorous methods have become one of the leaders. Marshall Wells Hardware Co., the Simmons of the Northwest, exploit sewing machines under their well-known "Zenith" mark, and as in all other undertakings this enterprising house is most successful. Even in Canada the land of conservatism the inoculation "has took" and the leading Hardware jobbers, Merrick, Anderson & Co., and Caverhill, Learmont & Co., alone distribute thousands of sewing machines annually.

IMPROVED SEWING MACHINE.

It is announced that a Lancashire mechanic, Dennis Flanagan, has invented what has long been needed but successfully attempted, a machine which will sew direct from two reels of thread, thus obviating the winding of spools and threading of shuttles. Experts are quoted to the effect that if the invention is put on the market in a thorough manner it will revolutionize the sewing machine trade of the world. It is said that Mr. Flanagan has been experimenting since 1889, and that owing to the machine sewing direct from two reels of thread there is an absence of complicated mechanism, in consequence of which there is little chance of its getting out of order. A remarkable feature is the very small number of parts required in its construction, and as the cost of production will, comparatively speaking, be small, it is expected that the contrivance will be put on the market at a price far below that charged for most sewing machines.—*Frank W. Mahin, Consul, Nottingham, England.*

AMERICAN SEWING MACHINES IN CHINA.

There are a large number of American-made sewing machines in use in this consular district, but for some unknown reason none appear in the list of goods passing through the imperial maritime customs. Most of the sewing appliances used are small hand machines, the cost of the foot-power kind precluding them from general use. Practically all of the machines owned here have been purchased of agents from Hongkong, where an American company has local representation. It is probable that if the sale of the cheap but high-grade machines now on the market in the United States was pushed out here there would be a large demand, especially if the American method of selling on installments were followed. The Chinese have urgent need of such machines, and the only question as to their introduction everywhere in the Empire is that of cost.—*George E. Anderson, Consul, Amoy, China.*

SELLING HOUSEHOLD SPECIALTIES.

BY SAM S. WHITE.

Is it not an acknowledged fact that all live Hardware merchants of today are making their most money out of specialties, while on the other hand, will the advice that anyone can give through the trade papers wake up the dead ones. But there are reasons why a Hardware merchant should handle specialties. In the first place, there is hardly a Hardware merchant in the United States but what has help enough to sell at least 25 per cent. more goods than he does, and we will say, for instance, that he is doing a business of $10,000 a year and barely ekeing out a living. This same merchant, by handling a good line of specialties, could easily increase his business to $12,500 a year with no additional expense whatever. He has done an additional business of $2,500 at a profit of not less than 25 per cent. (for there is a good profit in specialties, if properly handled), and we find that the net results is the dealer has made $625.00 clear money at the same expense.

What are Specialties? I call a Washing Machine a specialty, and am probably better able to talk on the Washing Machine question than any other. I find Hardware Dealers who say they can't sell Washing Machines, and that there are none sold in that locality—he has none on the floor. I leave him. I don't want him to sell our machines, because he can't sell anything. Everything that goes out of his store his customers sell themselves—they come in and ask for five pounds of nails and get them. He don't sell them anything else. I go up the street, I find a dealer with a couple of Washing Machines in front of the door, I walk in, I find the dealer busy, his clerks are busy, a customer comes in and asks for five pounds of nails, and by the time the clerk has the nails ready he has got the customer interested in a Washing Machine, and in ten minutes time he has sold him one. He made five cents profit on the nails and two dollars profit on the Washing Machine. I finally get the dealer's attention for a few minutes, and I find that this dealer sells from 50 to 150 Washing Machines a year, which is the average sale of an ordinary dealer. This is a contrast you will find in 99 out of every 100 towns in the country. It is the difference between the dead and live dealer. I was amused very much last February while attending the Hardware Dealers' Convention at Milwaukee, a dealer came up and was looking at the White Lily Washing Machine, and his first query was, "Another new Washing Machine, eh?" I naturally supposed he must be from some town where we did not have an agency if he did not know our machine, so I immediately proceeded to inform him that it was not exactly a new machine, and at the same time explained its merits. He informed me that it was hard to sell a new article, and there wasn't much trade around his town for Washing Machines, anyway, so I asked him where he was from, and when he informed me I looked it up and found that we had a dealer there handling our machine and that he had sold 132 of them.

This not only refers to Washing Machines, but to every other specialty as well, and by specialities I mean such things as Refrigerators, Ice Cream Freezers, Churns, Gasoline Engines, Gasoline Gas Machines and a hundred and one other things too numerous to mention.

There is no question but what there is money in specialties. How to advertise them, however, is an important point, and one that even the best is not too well posted on. There is entirely too much money wasted on advertising. I do not mean by this too much money spent, I mean just what I say, "wasted."

Digitized by Google

Take up the average country newspaper in a town of 2,000 people and you will find an advertisement just like this:

"John Smith,
GENERAL HARDWARE.
726 Main St."

This will probably occupy from 2 to 5 inches of space, and this same advertisement is run from one end of the year to the other. This is money wasted, because every man, woman and child in that town knows John Smith and knows that he is in the Hardware business. Then again there is the man who advertises everything. His advertisement will run something like this: "John Smith, Dealer in General Hardware, Paints, Oils, Stoves, Tinware, Refrigerators, Ice Cream Freezers, Washing Machines, Churns, Wire Fencing, Gasoline Engines, etc., etc."

This man probably crowds this into the same amount of space, and it is also wasted. The successful advertiser in a retail Hardware business must advertise one speciality at a time, takng each article in season and change the advertisement at least once a week.

Every manufacturer is glad to supply cuts for advertising purposes, and if the dealer will change every week from one specialty to another, using the entire space on one article, he will find his advertising will pay him far better.

Too many dealers make the mistake of displaying too many different kinds of articles in their windows the same as they do of naming too many articles in their advertisements. I saw a window dressed here today that attracted my attention. There was nothing in the window but smoked eye glasses, and in big letters the initials of the firm who made them. It was an attractive window. I saw another large window in a big store with nothing but five cent collar buttons. It was an attraction, and the main point in either advertising or window displays is to attract customers to your store, and after you get them there to sell them and not merely to sell them what they came to buy, but to get them interested and sell them some other article.

CONCERTED ACTION NEEDED.

The Merchants' Association, of New York City, are sending out to the principal merchants and manufacturers throughout the country a communication calling attention to the necessity of reciprocity treaties with foreign nations. They call attention particularly to the action being taken by a number of foreign nations in revising their tariff laws and increasing the rate of duty, and to the consequent necessity for immediate action on the part of this government to save our foreign trade, which will naturally be seriously affected if a tariff wall is raised against us. In their communication they urge all business men to place themselves at once in communication with members of Congress urging action at the coming session on this matter. The following resolutions are included in the letter:

"*Whereas*, The principal nations of Continental Europe, following the example of the United States, have adopted or are about to adopt high tariff rates of duty on many products of the soil and of manufacture, the imposition of which on the products of the United States cannot fail to most injuriously affect the welfare of the varied interests of this country; and

"*Whereas*, These European countries have also adopted or have in contemplation a system of preferential tariff rates of duty to be accorded to those nations that are willing to offer similar reciprocal reductions in their rates of duty which would enable countries so favored to underbid our products in European markets; now, therefore, be it

"RESOLVED, That the Merchants' Association of New York heartily favors the conclusion of reciprocal treaties of commerce between the United States and these European countries by which an enlarged trade and extended markets for our products may be secured; and be it further

"RESOLVED, That a Committee of Five be appointed by the President, which committee shall urge upon the Government of the United States, and upon the Congress of the United States, the importance of the adoption of such reciprocity treaties, and shall place itself in communication with all commercial and agricultural associations or bodies throughout the United States for the purpose of soliciting their co-operation in securing the conclusion and ratification of such commercial treaties of reciprocity."

PROGRESSIVE MANUFACTURERS.

Every Hardwareman should have in a convenient place on his desk catalogue No. 12 of the Columbian Hardware Company, Cleveland, Ohio. This is a beautifully printed booklet containing the particulars concerning the excellent life of hinges and other specialties manufactured by this firm. It will be sent to any Hardware dealer who will take the trouble to write a postal card for it.

* *

A new building, to be ready for occupancy about October 1st, is being erected by the Cleveland Hardware Company, Cleveland, Ohio. This will very materially increase their present capacity.

* *

The Adams Company, of Dubuque, Iowa, have purchased the Hotel Paris, in that city, and will very shortly remodel the building, to be occupied by this company's foundry department.

* *

The Ebbing Mfg. Company have succeeded to the firm of G. A. Milbradt & Company, St. Louis, Mo. They have secured a new plant on N. Eighth Street, with a much larger capacity, thus greatly increasing their ability to turn out the rolling step ladders made by this concern.

* *

The Sample and Sales Room of Silver & Company, Brooklyn, N. Y., manufacturers of Household Specialties, has been moved to 99 Chambers Street, New York City, where a full line of samples of the goods made by this concern are shown.

* *

The Enterprise Manufacturing Company, Akron, Ohio, write us that they have enjoyed a most excellent trade during the present season on their well-known line of Fishing Tackle.

DESIGN USED ON BLACKLOCK FOUNDRY BLOTTER.

The Blacklock Foundry, South Pittsburg, Tenn., are sending out to the trade a very attractive line of auxiliary advertising matter covering their line of Sad Irons, Grates and Kitchen Utensils, etc. A monthly calendar blotter, very attractively printed in three colors, is one of the items worthy of mention.

* *

The Muskingum Valley Steel Co., of Zanesville, Ohio, has been purchased by the American Rolling Mill Company, of Middletown, Ohio. The acquisition of this plant will give the American Company an output of 25,000 tons of sheets annually. In their mill at Middletown they have sufficient sheet bar capacity to take care of this tonnage.

* *

The factory of Brown Spring Ice Skate Company, Webster City, Iowa, has been enlarged and the firm is now installing new and modern machinery.

* *

The Illinois Cream Separator is described in the new catalogue recently issued by the American Hardware Manufacturing Co., Ottawa, Ill. A large addition to this firm's factory will be erected in the near future.

* *

The present capacity of the Standard Stamping Company, Marysville, Ohio, will be doubled within the next few months by the addition of buildings and machinery.

* *

A five-story brick factory has just been completed by W. R. Case & Son, of Bradford, Pa., manufacturers of pocket cutlery and razors. They have recently absorbed the business of C. Platt's Sons, of Eldred, Pa.

JULY 25, 1905.

Editorial Trade Review

As usual at this time of the year, business is quiet, but reports of good crops throughout the whole country indicate that trade in general throughout the remainder of the year will be good.

The vacation period naturally interferes to some extens with business at present. but it can hardly be counted a loss in view of the resulting accumulation of energy for the hard work of the Fall and Winter season.

A number of interesting communications on the subject of Special Brands are printed in this issue. The recent resolutions on the subject are bringing out more frank and open expressions of opinion, and it is safe to say that this subject will be one of the principal items of discussion at the November Convention and the Retail Association meetings during the Winter.

In our British Letter today Senator Best of Australia is quoted as having recently made an address in which he speaks in the highest terms of the quality of American Hardware and Tools and the enterprise of American Manufacturers. Another paragraph of this communication indicates that British Hardwaremen as well as their American Brothers have their troubles from outside competition.

The movement on the part of several Associations toward the adoption of a uniform size of catalogues will be welcomed by every one in the trade, and it is hoped that the work on this matter will be continued until the size agreed upon is adopted by every manufacturer and jobber in the Hardware business.

The communication on one of the following pages from W. W. Webber on the subject of Price Maintain- is full of sound logic. This policy may not be the "cure-all" for Hardware troubles in general, but it is certainly one of the most important subjects now under discussion.

The raw material market shows a decided improvement, particularly in pig iron. The recent heavy orders placed have brought about a tendency in some quarters to advance quotations. It is alleged, however, that on some of the recent heavy transactions rather low prices were quoted. In nearly all kinds of finished material the demand is also very heavy.

MORE POSTAL REFORM (?)

Another alleged postal reform organization has put in an appearance with the title of "The Manufacturers' Association of New York." Within the last few days they have been sending out a cheaply printed circular, minus the address of the association, in which it is alleged that all industries using the mails in the country are being seriously damaged by the present postal laws, particularly the provision for second-class matter. They ask support for a new law, under the terms of which there would be but two classes of mail matter:

First—Letters and sealed packages at one cent per ounce or fraction.

Second—All other mailable matter at a rate low enough to serve the useful purpose of a parcels post.

The sentiments of the editor of this publication are quite fully expressed in the following communication being sent out by the secretary-treasurer of the American Hardware Manufacturers' Association. This letter is being sent to all members of the Manufacturers' and Jobbers' Associations and will no doubt have the effect of checking the attempt to turn over the Postal Department of this country to the Catalogue Houses. As stated above, no particulars concerning the so-called "Manufacturers' Association," who are sending out this postal reform circular, are obtainable, and from the wording of their scheme they might properly be the paid representatives of a syndicate of mail order houses.

The communication being sent out by the American Hardware Manufacturers' Association is as follows:

To the Members of the American Hardware Manufacturers' Association:

DEAR SIRS—You may have received a circular letter purporting to come from an association in Brooklyn, N. Y., advocating a one-cent letter postage on the theory that it will save you one-half your postal expenses. A blue folder is enclosed, on which you are asked to follow out what is known as the endless chain system, by which for ten cents sent to the Brooklyn office you will obtain similar folders to send ten other firms, "avoiding publishers."

Attention has been called to this scheme by Simmons Hardware Co., of St. Louis, and by Russell & Erwin Mfg. Co., of New York. It has, of course, come to the notice of our own members. The scheme which is advocated is nothing more or less than an adroit plan to serve the purpose of a Parcels Post, at the expense of publishers.

You will remember that our association has taken formal action expressing itself with unanimity in opposition to the Parcels Post, and this was 20 months ago, when the representative of that system, Mr. James L. Cowles, was present, and was assigned an hour to explain that view of the subject, and to whom was given a patient hearing.

While it may not directly interest all manufacturers, it is a matter of vital importance to the jobbers and retailers with whom you deal.

If catalogue houses and similar institutions are enabled, as they would be under this proposed plan, to ship merchandise from New York or Chicago to the remotest parts of our country, or to our distant colonies at a rate (as stated in this circular) "low enough to serve the useful purpose of a Parcels Post," it is evident that the retailers would be seriously handicapped, and the regular jobbers would suffer proportionately.

The worst insidious feature of this circular is the endless chain system. We have learned that "to oblige a friend," some have sent out the ten new circulars without having fully considered the scope of the plan, and later expressed regrets at their action.

This subject of postage was set as an order of business at our last meeting, but was crowded out by freight matters. It is hoped that further consideration may be given to it at the coming Fall meeting.

Very respectfully,

F. D. MITCHELL,
Secretary-Treasurer.

SPECIAL BRAND COMMENT

PRICE MAINTENANCE NECESSARY.

BY W. W. WEBBER, FT. SMITH, ARK.

Your issue of June 25th, marked copy of which was sent me, is at hand, and I note with peculiar interest your comments on the three questions at issue between the Manufacturers and Jobbers, to wit: Special Brands, Catalogue Houses and Price Maintenance. I confess to not being a stickler for Special Brands, not having used them to any considerable extent in our business. The Catalogue House question has been handled well by the Joint Committee detailed for that purpose, and I presume will have further attention from that or some other committee, hence I shall not attempt anything touching that question, but I do want to insist on the Price Maintenance or the Restricted Selling plan.

I had the honor to address the Southern Hardware Jobbers at Hot Springs on this question, and in their behalf appeared before the Manufacturers' Association, asking consideration of same. I was a member of the Jobbers' Committee, to which was referred the Manufacturers' Resolutions from their Committee of Nineteen. I wrote the report of our committee, hence feel that I am fairly well advised concerning the position of both sides, and, in my opinion, the Restricted Price plan will go far toward a solution of the entire question of Special Brands and Catalogue House Competition. I find that the jobbers throughout the smaller cities, those doing a business of four or five hundred thousand dollars, are handicapped in many instances by the mistaken policy of some manufacturers who do not put them on the most favorable lists, that is to say, they are required to pay 5 to 10 per cent. more for an article than the jobber of greater pretension is required to pay. Thus handicapped and hampered, he is turned loose to paddle his own canoe and forced to take business at a margin that does not pay him. It were like tying a man's hands and feet and telling him to swim for his life. Now I would not have you to understand that I am making a plea for the small or medium jobber to be put on the most favorable list, because I hold that it is no concern of mine how much a manufacturer may give of his profits to others, but I do hold that the final selling price should be such as to enable me to market the goods I buy from him, keep my customer satisfied and make a reasonable margin. That strikes me as being the very essence of common sense and good business, leaving out entirely the question of even and exact justice.

We will assume that a manufacturer has three lists, A. B and C. Those on the A list get the best he has to offer. Those on B's list pay 5 per cent. higher price, and those on C list pay 5 per cent. higher than B and 10 per cent higher than A . They get their goods in and send men out to get business. A's man finds no trouble in getting business, where freights are at all in line. B's man writes his house that he is unable to get the price given him at which to sell, but had to concede a better price because he was in competition with A's man. C's man writes that there is something radically wrong with his price, that he is absolutely unable to secure business at anything above cost, unless, forsooth, he finds a man who is not posted and whom the other fellows have not seen.

This state of affairs exists to-day beyond question or cavil, the manufacturers are as well aware of it as are those who suffer under it. This practice on the part of the manufacturers has built up mammoth Catalogue Houses that go direct to consumers with a cost and selling price based on the inside price they get from factories, and we find, too, that at several given points there are in existence to-day some very extensive Wholesale Hardware Houses whose very existence depends on this matter of inside cost price, which is responsible for the inside selling price, whereas, if the manufacturers limited or named the selling price for all, and at a margin that would pay C a reasonable profit, he might give A and B whatever he chose in the way of extra discounts and not disturb the equilibrium. I may have the amount of differentials too great, but whatever it may be, it is just that much of an onus on the man who pays the long price. In conclusion, I desire to reiterate that I am not insisting that all pay the same price, but that all sell at same price, which price shall be profitable to all concerned.

RETAILERS' BRANDS.

BY GEO. J. BASSETT, VICE-PRESIDENT CONNECTICUT ASSOCIATION OF HARDWARE DEALERS.

Referring to the discussion of "Special Brands" in your issue of July 10th, would say that I have already defined my ideas in regard to "Special Brands" from a retail dealers' standpoint, which in substance are these:

That on certain lines of goods every large retail dealer should have his own brands which he should push as far as possible to the exclusion of others, since in doing so he advertises his own business and his own business alone.

Where he finds it necessary he should carry such manufacturers' brands as are well known and for which, by force of advertising, a demand has been created.

I cannot see, however, where it is of any advantage to the Hardware dealer to push the "Special Brands" of any Hardware jobber, inasmuch as the dealer in doing so is not dealing at first hand with the manufacturer whose goods he is selling.

SPECIAL BRANDS.

James Law Steuart, in a recent address before the Butterick Trio Staff on the subject of Trade-Marks and Unfair Competition, said among other things:

> From a commercial standpoint you all know what a trade-mark is. It forms a link between the manufacturer and the consumer, guaranteeing to the consumer that the goods bearing such mark are made by the same manufacturer as the goods which he previously purchased under the same mark. * * *
>
> The fundamental principle underlying the subject of trade-marks is the preservation of what is known as the good-will of a business. In its simplest form, the good-will of a business is that probability that a customer who has once purchased goods at a store will return again to the same store for the purchase of the same goods, should they commend themselves to him. This principle was recognized in the early English law, and it is this principle which has extended into the present trade-mark law and the law relating to unfair competition in trade. In early days merchandise was sold almost exclusively from the hands of the storekeeper to the consumer. Now, the hand of the storekeeper has extended out to the ends of the earth, and it is the boast of some merchants that the sun never sets on the consumers of their products. The trade-mark has become the link between the manufacturer and the consumer. The consumer may not, in the economy of modern commerce, go back to the place of manufacture to repurchase the goods purchased before, but must rely upon that trade-mark and form of package which he finds upon the market which identifies to him the origin of the goods, and is a guaranty to him that the goods which he now purchases are the same goods as those purchased by him before under the same marks or in the same packages.

It is obvious that the above is hardly true if applied to Jobbers' Special Brands. John Jones may be the maker of a Jobber's Special Brand Goods this year, and Thomas Smith next year (at 2½ per cent. less). During a dozen years as many different manufacturers may be the producer of the same article under this jobber's special brand. Under such circumstances will any one claim that it is possible for the quality to remain uniform except in rare cases In such a case the trade-mark is nothing more than a symbol to indicate the distributor and is a guarantee of nothing. It is true that goods made under a manufacturer's brand may vary in quality, and that some Jobbers' Special Brand goods have been made for years by the same manufacturer—just as it is true that there are exceptions to all rules, but when it comes to a question of continuous uniform quality, the chances are certainly in favor of the goods bearing the maker's brand.

It is not the writer's intention to charge that Jobbers are intentionally responsible for the variation of quality in goods bearing their brands, but in the absence of expert knowledge on the part of the jobber as to the producing of his goods, how is he to control this matter? On the other hand, jobbers cannot expect uniform quality where frequent changes are made in their manufacturers, especially where such changes are made on account of lower prices.

JOBBERS' SPECIAL BRANDS.

A Prominent Manufacturer Replies to the Jobbers' Resolutions.

We have with great interest read the parallel report of the Manufacturers' Association, and the reply by the Southern Jobbers' Association, and we would like to especially call your attention to the impression that one paragraph of that reply has made on us.

The matter we feel deeply on and which we consider of the most vital importance we find in sections 8 and 9 of the Manufacturers' report, and in the reply by the Jobbers.

Starting with a statement that we know is correct beyond any possible dispute, the Manufacturers make these findings:

"The best articles should not only be free from defects, but should be made of the best quality of materials and workmanship, and worthy not only of the recommendation of the merchant, but also worthy of the name and indorsement of the manufacturer."

"We believe that knowledge as to who really produces any article may be of value not only to the person who will use such article, but also to the retailer who sells it."

You will note here that the Manufacturers have especially laid before the trade the fact that to be of any advantage to the reputation of a manufacturer, goods *must* be of good quality, and in our opinion those, and *only* those are "worthy of the name and indorsement of the manufacturer." In practice we do not find reputable manufacturers either advertising or showing poor goods with their firm name on them.

There is more to it than this, it means at the finish that goods sold without the name of an *actual* maker of such tools are to be distrusted because they do not bear on their face the information as to who, when and where, which the makers name should prove. Everybody, even the jobbers, is aware that to obtain notice a new line must bear every test a critical public can devise, and so they in common with us all begin with quality. But, a manufacturer cannot abandon a brand for another simply because the first is not going as well as it should. He has placed his mark on every article and must keep up his quality or accept returned goods and lose the confidence of his clients. We know that it is a hard and tiresome job to build a reputation for making "good" goods. It is harder to be told flatly that the reputation that we have worked for, saved for, and built by unceasing carefulness in detail, is worthless. That it matters not to the slightest what our goods were or are. That we are simply a vat of supply and that all tools like ours are each and every one as good, *and as saleable*. No matter whether they are a product of a hand smith in the wilderness, or a prison workshop in the Middle West.

See how these gentlemen put it.

"We desire to controvert the declaration in paragraph 9 and *insist* that the knowledge of who produces a certain article *can in no wise* concern a person who will use it, because in any case the retailer looks to his jobber to correct any evils, and the consuming customer looks to his retailer, hence it is not necessary to hand out a pedigree with every article sold."

We might lapse into slang here, but it seems evident that it is not needful. Our friends would have us believe that what they say is a tool, ends the matter. What they say about anything is all the reputation it needs. A hammer is just a hammer, no matter whether Maydole made it or the local foundry. A saw is just a saw, no matter whether Disston made it, or it was made in a job lot by a wild cat saw house out of hoop iron. True the word is the same, but no one except a party as conceited as these gentlemen must have been when they wrote it, will believe it true.

Of course if we accept the letter of the controverting (?) paragraph the consumer does look to his retailer and so back to the maker for his replacements, supposing the maker's name does not appear, but it is a long way round for a reason, and in fact, and our practice, we get more requests for repairs direct from the consumer. (Our name is on our goods.) And each time we hit the consumer we are able to make repairs in such a way as to satisfy him with the goods, and assure his feeling that he is being taken care of, and that *we want* the goods *to suit him*, as they should.

Take it on the other hand. Follow an "unpedigreed" line to the consumer. He gets a poor part and kicks. The retailer goes to the jobber, and the jobber to the maker, and in turn each of these (excepting the losing originator of the goods) *makes a profit on the repair part*, which they take out of the manufacturer as "mail," or "express," or "cartage."

Has the consumer any rights anyway? Would he, or the retailer, buy a substitute if they knew they could buy the original, unless there was somewhere a starter who feathered his nest with the down that belongs by right to the man who has made and worked for the reputation of his output?

The jobber cannot substitute without actually lying, if the maker's name is on the goods. To us who know where our output goes, it looks on its face as if these gentlemen wanted a chance to substitute on everything. And that it is possible (and it seems to be) to market any old thing as the best, simply by putting a jobber's brand on it.

We have never made "Jobber's" brands. We have refused many offers. Why? Because we knew that at the end of the contract there would be a general shopping round to every maker of similar goods, or goods that would not be too apparently different to the casual buyer, and that the lowest bidder would get the next season's order. We have been offered a chance to bid so many times in another plant on such specifications that we won't believe it otherwise even if jobbers say it is. We have the evidence of our own correspondence. The more we read that paragraph, the more we believe that these people deal only in material that has neither talking points nor variations in price from the market.

If, as these gentlemen state, there is no margin of profit for them in factory brands, can they state how it is that they have been the ones in every instance that have done most of the price trimming? Why should one jobber sell for a half per cent. profit because his neighbor does? Why should they both endeavor to shoulder off on the manufacturer the blame for this and a lot more cussedness? Can't we get a discussion of this that will be more to the purpose and do more good than the catalog house question did? It is just this cutting for their own private ends that is responsible, not only for unsettled prices, jobbers' brands and protective associations, and other troubles, but it is a large part of the catalog house question, and for the whole of that question the jobbers have themselves to thank. Let us put the blame where it belongs for once.

Who commenced selling big miscellaneous bills to the consumers' distributor? Mr. Jobber. Who helped the distributor build himself into a catalog house? Mr. Jobber again. Who cut his neighbor's prices to these houses and to the big consumer, forgetting the retailer? Mr. Jobber.

Who sells the catalog house with one hand, and writes with the other that he does not? Mr. Jobber. Who crowds the manufacturer down in price and then gives all the advantage gained to some pet buyer on a railroad or in a trust office? Mr. Jobber. Who takes an order for standard named goods and deftly substitutes an inferior but similar article, and trusts to graft and cheek to keep it from the buying houses? Mr. Jobber. Who lays the blame to a clerk and tries to make one manufacturer repair another's goods, after having forgotten he did the substitution trick? Who makes solemn promises that he will not sell below a specified price and then tells his salesmen to cut enough to get the orders?

You see these things are overlooked sometimes when people want to jolly themselves along. Let's get at the bottom of it and hear from a few more manufacturers.

JOBBERS' STATEMENTS CONTRADICTORY.

By a Manufacturer.

Your editorial under the title "Convention Echoes," in HARDWARE of June 25th, and Mr. Norvell on "Special Brands," in issue of July 10th, are worthy of the careful perusal of every Hardware dealer. You are entitled to thanks for publishing a full report of Mr. Norvell's address. This also should be carefully read. His so-called "Creed" can hardly be referred to as expressing his views concerning the manufacturers. In musical parlance it might be termed an extravaganza. I have in mind no term which would describe it as a business dissertation.

I beg to refer to two points in his more serious general address. You quote him as having stated that

> "On a number of lines the keen competition among manufacturers on their own brands had led to such deterioration in quality that jobbers had found it advisable to bring out goods of superior quality under their own brands, because they believed there was a demand for goods of high grade, and that the retail dealer and consumer were willing to pay the price of the better article."

Too bad, that they could not get goods of superior quality of established brands.

The answer of the Southern Jobbers to the Manufacturers' Hot Springs report gives a very different opinion concerning the quality of manufacturers' brands. The jobbers therein state that

Digitized by Google

"The reputation of private brands will not become impaired if manufacturers are as careful in their manufacture as they are in their own, and we trust that they will at least claim to do honest work."

Hold these two statements up to the light and compare them. In the first it is alleged that manufacturers in quoting prices on their own brands are compelled to lower the quality to get the orders. In the second it is admitted that the manufacturers' brands are the standard, but that on special brands manufacturers should at least claim to be honest and be equally careful on them.

Now, in this "keen competition," which is referred to as the cause of deterioration in quality, is it to be presumed that the process of hammering for lower prices will affect the quality of manufacturers' brands and not cause a corresponding deterioration in qaulity of jobbers' brands of goods? Will manufacturers protect the quality of the goods of almost unknown jobbers' brands, when prices are being cut by this "keen competition," and at the same time put upon and into them more careful work and material than they would put upon and into their own best brands? This proposition is certainly remarkable. Prices are cut and grades lowered because many buyers hammer for something cheap. They cannot get what they want in standard brands; they therefore, if the question of price is involved, ask the manufacturer's salesman to give them the best he can for the money, under other brands, of course urging that the finish and general appearance shall be the best that can be afforded at the price. But does any sane person believe that a manufacturer who has been pressed as above indicated, by the "keen competition," will make a better knife, ax, or chisel, with "Tom Jones" upon them for a brand, than he would under his own factory name?

In the addres already referred to are these words:

"The resolutions of the manufacturers at Hot Springs would leave the impression upon the minds of the retail trade that ALL special brands of ALL kinds are of poor quality, and put upon the market to impose on the retailer and consumer."

The resolutions do not so state, and I suppose it is because such statement would not be true. I have been led to believe that Mr. Norvell himself, and a very few other jobbers, aim to get very good goods. It would be true, however, to state that MANY special brands of MANY kinds are of poor quality; but it is not claimed by the manufacturers that the motive is to impose upon any consumer. The facts, nevertheless, remain. The motives have been clearly stated by the jobbers:

"That we (the jobbers) can make more profit on special brands."

This can only be done by buying goods that are cheaper and by selling them relatively higher. There is no other way to make an extra large profit. The retailer must be kept in ignorance as to quality.

The jobbers, in reply to the manufacturers, say that

"The knowledge of who produces an article can in no wise concern the consumer. It is not necessary to hand out a pedigree with each article sold."

If a horse is of no account, possibly no one cares for its pedigree. If it is first-class stock, then its pedigree is a matter of great interest and value. It is of interest to the consumer and to the manufacturer, that the pedigree of manufactured goods should be known; and that is the issue now under discussion; nor is it a new one.

The manufacturers have laid their case before the Southern Jobbers with great moderation. They gave some strong reasons for their position; and, while I find it stated in one paragraph that "Some jobbers have bought goods of second quality and sold them as first grade," I admit that so far as concerns those jobbers the statement is strong, nevertheless, it is well known to be true, and, moreover, that their poorer goods are sometimes represented as the manufacturer's best grade. How could the fact be stated more moderately and be half understood? Had an array of names been given, it would have incurred an unpleasant work of recrimination.

I believe the manufacturers will, as in the past, with any fair treatment, concede almost everything to the jobbers concerning the trade to which they will sell, provided the jobbers will represent the manufacturers' goods, which is not now done.

There is no good reason why the manufacturer and jobber, whose interests are so much in common, cannot solve these matters on a basis of mutual equity and concession.

If those jobbers who believe they are selling manufacturers' best goods even under private brands, and who are also fairly representing factory brands, will assist in bringing the many who are doing otherwise to a sense of justice, they will do better for their own cause than in the idea of proposing a boycott against manufacturers who sell catalogue houses.

Trade Meetings

THE CONNECTICUT OUTING.

The Connecticut Hardware Association held their annual outing at the Pequot Hotel, Morris Cove, near New Haven, on July 12th.

At the opening meeting fifty delegates were present. The programme of the business session consisted of the regular order of business, Secretary's report and reports of Committees. Secretary James DeF. Phelps, delegate to the National Retail Convention at Minneapolis, gave a very able and interesting report of that meeting. He was followed by A. H. Abbe, who is a member of the Executive Committee of the National Association.

At the suggestion of the Secretary it was voted to change the name of the organization to "Connecticut Hardware Association," and a membership committee was appointed to take action toward increasing the membership. This committee is composed of A. H. Abbe, New Britain; J. C. Treat, Hartford; J. L. Carroll, Winsted; F. W. Jaynes, Greenwich, and C. H. Preston, Norwich.

A large part of the session was devoted to an active discussion on several of the most important questions before the trade, among them the Catalogue House problem and the policy of Price Maintenance. Resolutions were passed expressing the attitude of the Association on several subjects, and pledging the members to give preference in buying goods to those concerns who do not sell either the consumer or Catologue house. Some time was devoted to the discussion of Mutual Fire Insurance, which project was strongly endorsed by several members.

At the close of the business session a Shore Dinner was served in the dining room of the Pequot, after which a steamer conveyed the party to Savin Rock, where they remained until evening.

The following firms were represented:

J. L. Carroll, Winsted; Birdsey & Raven, Meriden; H. W. Morse, Meriden; G. H. Alford, Winsted; L. L. Rosenberg & Co., New Haven; G. M. Williams & Co., New London; John M. Page & Co., Naugatuck; A. H. & E. W. Abbe, New Britain; Preston Bros., Norwich; Dickerman & Pond Company, Winsted; F. Hallock & Co., Derby; J. S. Davenport & Son, Stamford; R. D. Wittee, Hartford; Jaynes Hardware Company, Greenwich; Lightbourn & Pond Company, New Haven; Clapp & Treat, Hartford; N. T. Bushnell Company, New Haven; H. L. Mills, New Britain; Smith & Bishel, Middletown; Chas. M. Beach, New Milford; Dickerman Hardware & Supply Company, Wallingford; F. F. Hitchcock & Son, Woodbury; Hamilton Hardware Corporation, Waterbury; Lyon & Ewald, New London; Agard Hardware Company, Torrington; Tracy, Robinson & Williams Company, Hartford; John E. Bassett Company, New Haven; Ralph E. Page, Hartford; Geo. H. Baker Company, New Haven; F. S. Bidwell & Co., Windsor Locks.

THE OKLAHOMA MEETING.

The Second Annual Convention of the Oklahoma and Indian Territory Hardware, Implement and Vehicle Dealers' Association met at Oklahoma City July 11th and 12th. The meeting was called to order by President A. L. Severance. In his address he dwelt with special force on the fact that real success in business is founded on honesty and integrity in giving value received.

T. C. Ham, of Oklahoma City, in a few well-chosen remarks welcomed the dealers. He was responded to by Fred. Parkinson, of Wagoner, I. T., who spoke in his usual style, full of wit and humor.

The afternoon session came to order at 2.30, with every seat in the meeting room filled and with a number of guests standing. Secretary Johnston read his annual report, in which he spoke of the value of the work of the National Hardware Association in promoting the general good of the Hardware business. He reported an addition of seven members during the past year, making a total membership at this meeting of fifty-five. He called attention to the alleged one-cent postage scheme now being agitated by a so-called "Manufacturers' Association," and warned those present that this scheme was simply a forerunner of the Parcels Post.

S. NORVELL

then addressed the meeting on the subject of "How to Meet Catalogue House Competition." After reviewing the splendid work that has been done by the Joint Committee, he said that there was not a jobber of any consequence in the Hardware

Digitized by Google

trade but had promised not to sell goods to catalogue houses, and he was of the opinion that the jobbers had kept faith with the dealers in this matter, and that the interests of the jobbers and retailers were identical. Mr. Norvell also said that they had found 600 manufacturers who promised not to sell goods to catalogue houses, but that the catalogue houses were getting the goods, and he made the surprising statement that they were buying goods through retail dealers, in many instances.

"The main problem with retail dealers and jobbers is the question of selling goods," said Mr. Norvell. "The jobbers and manufacturers have to sell goods and so do the retailers." He gave it as his opinion that the reason so many merchants, outside of the Hardware dealers, including grocers and dry goods merchants, are selling Hardware is because the Hardware dealers have not kept a full and complete line of goods. As to the cure for the catalogue house problem, Mr. Norvell said, "Sell goods! When you get up against a catalogue house order, take the order at the catalogue house prices and send it to your jobber, and when you remit for it deduct twenty per cent. from the prices quoted in the catalogue house catalogue. Meet the catalogue house competition, even if you lose business. Make it up in the average." He also stated that the salvation of the retail Hardware business is in the clerks, and suggested that every dealer who was trying to run his business by himself should get a clerk and teach him to sell goods, and that the proprietor should get out and do more hustling for business.

F. J. Gould, representing Blish, Mize & Stillman, of Atchison, Kan., made a short talk, in which he stated that he believed that one trouble with the retail trade was that the average retail dealer does not take enough interest in the association work and in the catalogue house competition. He stated that in some places dealers were taking the matter up in a vigorous way, and dealers of all lines are joining together and refusing to give credit to, or buy produce from, the regular customer of catalogue houses. He thought the jobbing houses should instruct their salesmen to talk this subject and to talk association to the dealers.

One dealer stated that he knew of twelve or fifteen dealers in his section of the country who were not represented at the convention who should be there, and asked how these dealers who stayed at home could be reached with this discussion. President Severance very aptly suggested that they could read the trade papers, if it was impossible for them to come to the convention.

The morning session of the second day was well attended. The first speaker was J. H. Johnston, secretary of the Oklahoma City Traffic Association, who spoke on the efforts being made to secure equitable freight rates. He was followed by T. G. Wiles, president of the National Federation, who spoke on the same subject.

Colonel H. C. Staver, of Chicago, delivered an excellent address on the wonderful resources of Oklahoma, and a paper was then read by S. H. Brown, buyer for the Oklahoma City Hardware Co., on

"WHO IS TO BLAME FOR THE UNPROFITABLE PRICES ON STAPLE GOODS?"

Mr. Brown spoke in part as follows:

"Who is to blame for the unprofitable prices on staple goods? The question is not an easy one. It is a subject of great interest to retail dealers, jobbers and manufacturers.

There is trouble all around. There is trouble from the manufacturer when, because of a shortage of capital or a surplus of goods, he slaughters prices on staple articles in order to diminish his stock and increase his capital. There is trouble caused by the manufacturer who adopts the policy of selling to smaller buyers or retailers. He does not, as a rule, obtain the proper differential as between the jobber and the retailer, and this tends to reduce prices made by his brother manufacturers when selling the legitimate jobbing trade. There is not only trouble, but grief, caused by the manufacturers who sell to catalogue or mail order houses.

The jobber is responsible for unprofitable prices on staple goods, because many of them allow their traveling men to make their prices. Weak salesmen welcome gladly the excuse to cut prices, and traveling men will cut their own prices to get an order. A salesman never will. The jobber is guilty because he has not the backbone to make his own prices and force the traveling salesmen to sell accordingly, regardless of what others may do. Many jobbers are responsible for this deplorable condition because they fail to look squarely in the face of what it really and actually costs to do business, for if the same were added to the invoice and freight cost, on each and every article, it would prove a long-needed eye-opener.

The common practice of using leaders is objectionable because it gets the same article into too many stores, and tends to price-cutting among the retail dealers themselves. The retail dealer is just as well off when he pays a legitimate price as he is when he buys at a cut price, because when he does the latter, the temptation is too great to hold the price where it should be. Price-cutting begets price-cutting, and the only way to hold an established price is to hold it. Jobbers and traveling men are responsible for the unprofitable prices—note that I use the term 'traveling men;' vast difference between a traveling man and a salesman.

The fact that credit is too cheap is a cause for unprofitable prices, to an alarming extent. In this great commercial age credit is an important factor. Credit has its moral side as well as its material side, and the very best basis of commerce is credit. Credit is founded upon commercial honor. Just as long as credit risks are endangered by incompetence or inexperience, by indiscretion or by extravagance, by neglect or by ignorance, by weak morals or downright dishonesty, either within or without our ranks, either among creditors or debtors, or both, just so long will unprofitable prices exist.

Now for the remedy. The blame cannot be laid at the door of either the manufacturer, the jobber or the retailer as a class, but members of each class, as individuals, have been guilty. Neither of the classes can justly be held strictly accountable for the unfortunate conditions, and only by the concerted action of all three will it be possible to eliminate an abuse which affects, unfortunately and disastrously, not only the lines upon which prices are slaughtered, but other lines as well; for the manufacturer, the jobber and the retailer must all make a margin of profit if they are to continue in trade. No whittling, drinking, card-playing dealer, big or little, can hope to compete in these strenuous days with the army of faithful, industrious and tireless competitors. The price of success in this age of the retail world is eternal vigilance and concentrated, intelligent effort. He who is not prepared to pay this price should seek some other calling and thus save himself from inevitable loss and humiliation that comes with failure."

F. E. Muzzy, of the Stevens Arms Co., gave a very interesting talk, urging dealers to join the association, as in that way they could help in the catalogue house competition, in which they were all interested. He also spoke of the benefit of the mutual insurance, and gave some good advice on the subject of salesmanship, showing that it was the treatment of the customers and the attitude of the salesmen, more than the prices, that sold goods, and that it was unnecessary to cut prices in order to make sales. He stated that the manufacturers were doing all they could to help the retail dealer in the catalogue house fight, and that they should reciprocate by standing by the manufacturers.

Harry Mead of Shawnee next addressed the meeting on the subject "Some Ways to Raise the Standard of Efficiency of Our Clerks."

The following officers were elected for the ensuing year:

President, W. J. Pettee, of Oklahoma City; First Vice-President, J. N. McNabb, Weewoka, I. T.; Second Vice-President, O. A. Smith, Watonga, O. T.; Secretary, J. H. Johnston, Oklahoma City; treasurer, T. J. Griffith, Oklahoma City.

EXECUTIVE COMMITTEE—A. D. Acers, Norman, O. T.; V. D. Tinklepaugh, El Reno, O. T.; A. L. Severance, Durant, I. T.; S. R. Frazee, Vinita, I. T.; T. J. Griffith, Oklahoma City.

THE BINDLEY BANQUET.

A dinner was given by the Bindley Hardware Company, Pittsburg, at the Hotel Duquesne on July 7th, to about 25 of that firm's traveling men. John Bindley, president of the company, was toastmaster, and addresses were made by Mr. Bindley, James W. Wardrop, secretary and manager of the Merchants' and Manufacturers' Association; W. H. Cochrane, treasurer of the company: E. J. Lloyd, secretary, John Reitz, Jr., manager of the Anderson Avenue warehouse; William J. Mercer, sales manager, and by a number of department heads and salesmen.

LOCKWOOD-TAYLOR OUTING.

The heads of the departments and salesmen of the Lockwood-Taylor Hardware Company, Cleveland, had their annual outing July 15 at Put-in-Bay. Those present were: J. Q. Riddle, J. C. Henry, C. T. Hird, J. J. Fite, G. A. Smith, C. Hutchisson, H. Hutchisson, G. T. Body, A. E. Arnold, W. B. Biggar, G. W. Corlet, M. A. Grissinger, Brooks Haslett, F. W. Howard, L. G. Hutchinson, George L. Johns, J. W. Knoop, S. Mitchell, H. Monath, F. C. Nichols, H. Smith, M. S. Weber, J. A. Weber, E. C. Weeber, O. H. Falk, F. J. Miller, J. W. Egbert, W. C. Rathjen, J. H. Satterthwaite, H. C. Thomas, M. P. Warner, C. H. Webb, F. D. Whiting, Henry Davidson and A. J. Lawrence.

The World's verdict is easier to over-rule than that of one's own conscience.

Legal Matters

OF INTEREST TO HARDWAREMEN

RECENT LEGAL DECISIONS.

(From *Bradstreets.*)

The Supreme Court of Minnesota held, in the case of Bergraf vs. Byrnes, that an attorney who recovers a judgment may not compromise or discharge the same for a less sum than its value without authority from his client, and that if he does so the client may recover the sum received by the attorney and also maintain his action for such damages as he has sustained by reason of the unlawful settlement.

* *

The United States Circuit Court of Appeals for the Seventh Circuit held, in the Matter of Little, that while the bankrupt law prohibits a discharge of a bankrupt upon a second application within six years of a prior discharge, yet any one may file a petition at any time after a prior discharge, although the six years have not expired, and the court has full jurisdiction to adminster the estate under such subsequent application, and the question of the bankrupt's right to a discharge from his debts under such subsequent application will not arise until the application for a discharge is made.

* *

The Supreme Court of Arkansas held, in the case of The St. Louis, Iron Mountain & Southern Railroad Company vs. Coolidge, that delay by the initial carrier in the transportation of goods at a season when weather conditions would naturally produce deterioration in their quality which might have aided in causing the damaged condition in which they were delivered to the consignee, rendered it liable for the loss, unless it showed that its delay did not produce the injury in whole or in part, although delay by a connecting carrier was also shown which might have caused or contributed to the injury.

* *

The Kentucky Court of Appeals held, in the case of Bank of New Roads vs. Kentucky Refining Company, that a delivery of a bill of lading is a symbolical delivery of the property which it represents, and that whereby the terms of a contract two tanks of oil were sold and the bills of lading were delivered to a bank to be disposed of by it at current market prices and the proceeds applied in a given way, the title to the oil under the laws of Louisiana, where the contract was made, vested in the bank and was not subject to an attachment by the consignee in Kentucky. The court further held that where a creditor has part of his debt secured and part unsecured, the law does not apply a payment by the debtor to the older items of the account, but will apply it to the unsecured debt.

* *

A debtor sent to a creditor a check accompanied by a letter saying that the check was in full of account. The creditor's bookkeeper made out a statement of the account as shown by the creditor's books and credited the check, leaving a balance due. He then took the statement to the debtor, saying that it showed the amount due and that the check had been credited, and requested a check for the balance. The debtor said that he did not owe anything, and he renewed the statement when the bookkeeper said that the check had been merely credited on account. The Supreme Court of Illinois held, in the case of The Canton Union Coal Company vs. Parlin & Orendorff Company, that the facts did not justify an inference that the condition on which the check was sent was waived by the debtor so as to prevent the retention of the check from constituting accord and satisfaction. The court said: "If the plaintiff was not willing to accept the check as sent in full of the account and acknowledge the receipt of it, as requested, it ought to have returned it. The rule that required it to do so is neither harsh nor unjust, but it secured to the defendant the right to have its check received as offered, if received at all, unless there was a subsequent waiver of the condition."

* *

A statute passed by the Massachusetts legislature a few years ago prohibited manufacturers from making it a condition in the sale of merchandise that the purchaser should not deal in the goods of any other maker of the articles sold. In the case of Commonwealth vs. Strauss, decided by the Supreme Judicial Court of the State last week, it appeared that the defendant, a traveling salesman of the American Tobacco Company, offered to Plymouth County jobbers a concession of 6 per cent. below what was charged to the ordinary trade if they would not handle the products of any other manufacturer. The defendant did not dispute the facts alleged and he was convicted in the court of first instance. The Supreme Judicial Court reversed the conviction, holding that it was not unlawful for a manufacturer to give reasonable inducements to his customers for the exclusive handling of his products, and intimating that even if the statute did forbid a rebate as an inducement for exclusive selling it would not be constitutional.

POPULAR TALKS ON LAW.

Landlord and Tenant.

NO. 4.—THE OBLIGATION TO MAKE REPAIRS.

Aside from any agreement by which the tenant has found himself to make repairs he is under no legal obligation to do so, where the damage is ordinary wear and tear or came by inevitable accident or by the wrongful act of a stranger. This means, therefore, that, aside from an agreement to a different effect, the tenant is bound only to take reasonable care of the premises. He must so treat the property that it may revert to the landlord unimpaired by any willful or negligent conduct on his part. Where, however, the tenant has agreed to make repairs, he must make good all loss or damage, and must even rebuild in case of a partial or total destruction of the premises, even though without his fault.

Usually the contract to repair contains the expression, "ordinary wear and tear and damage by the elements excepted." Just what "damage by the elements" is is not definitely settled by the courts. Some incline to hold it is the same as an "act of God" or such a happening as man could not foresee, nor provide against, and such as that human agency in the matter was absent; hence a loss by flood from the breaking of a dam was not a "damage by the elements," and the tenant was held bound to repair. But in most States probably, in Michigan surely, such language excuses the tenant in case of damage by flood or fire where the tenant was not at fault.

Aside from agreement, as stated, the tenant is not bound to repair damage that is ordinary wear and tear, or where caused by an inevitable accident or the wrongful act of others. So a tenant need not replace a plate glass window broken by a stranger, or make good a loss from a falling chimney.

In Georgia, Louisiana, and California, in the absence of agreement, the statutes make it the duty of the landlord to make repairs, and Connecticut, New York and New Jersey have statutes exonerating the tenant from rent in case the premises become untenantable without the fault of the tenant. But in these States the provisions of the lease will govern notwithstanding the statutes.

As a further apparent exception to the general rule that the tenant is bound only to take reasonable care, it is generally held that he must keep up fences, and keep the premises wind and water tight. This obligation of the tenant is rather one of protection than one of repairs. The tenant is generally bound to take reasonable measures to protect the premises, though not called on to repair them. As, if there is a leak in the roof he could not be excusable for resulting damage if, knowing it, he permitted the water to soak through the floor and ruin a ceiling, when by the placing of a receptacle under the hole in the roof the damage could have been easily averted. He should stop up holes in windows, doors, etc., but when the defect was not caused by him, he is not bound to make the windows and doors good.

Also, aside from agreement, the landlord is not bound to make repairs save in the States named above, where statutes so provide. This is so even though the building be destroyed. In that case he may still collect his rent, save in the States of New York, Minnesota, California, Georgia and Louisiana.

The landlord has, in general, a right to enter and make necessary repairs, but must do so at reasonable times and in a reasonable manner.

Where a landlord has agreed in the lease to make repairs, he is entitled to notice before he is in default.

A parole promise to make repairs, given by a landlord, after a lease has been executed, is void.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Question: My neighbor keeps a hundred or more chickens and eight or ten roosters. They awaken me long before daylight every morning with their crowing and demoniac cachinations. Is there any way that I can legally put a stop to this nuisance and to the disturbance of my natural and necessary sleep? I have spoken to my neighbor about it but he is unwilling to do anything. Sufferer.

Reply: While a nuisance, which unreasonably interferes with health, enjoyment of property, or the comfort of the ordinary man, may be enjoined or abated, not all disturbing noises can be classified as nuisances, as that term is defined by the law. The test is, is the noise or annoyance such as unreasonably to interfere with the comfort and well-being of the ordinary or average man. And the standard which the courts endeavor to apply is not that of the person of acute and unusually refined sensibilities, but that of the average normal individual of the community. We do not think that the cackling of hens or crowing of roosters would ordinarily be deemed by the law to unreasonably interfere with health or comfort, or to constitute a legal nuisance. But it might of course be so regarded under very peculiar and exceptional circumstances. We do not think the facts as you state them are sufficient to entitle you to legal relief.

Lease—Bound to Make Repairs—When Rent Ceases.

Question: A man hires a house, the lease provides that he is to "keep the premises generally in good repair." One night during a severe storm the roof was blown off a part of the house, making it untenantable. Must the tenant repair the roof? Must he still continue to pay rent?

Reply: Applying the law of New York where the real estate is situated, it is settled that such a covenant to make repairs as this, refers to ordinary and not to extraordinary repairs and does not render the tenant liable to restore or rebuild a house which has been damaged by fire or by the elements without his fault. The New York statute provides that where any building which is leased is destroyed or injured by the elements so as to be untenantable, the lessee may, unless he has agreed to the contrary, surrender possession of the premises, provided the injury occurred without his fault or neglect; "and he is not liable to pay to the lessor or owner rent for the time subsequent to the surrender."

Wills—Gifts to Charity.

Question: Is there any limit in the State of New York on the amount of property that a man may give by his will to charity?

Reply: Yes. Chapter 360 of the Laws of 1860 provides (Cumming & Gilbert's General Laws, Vol. III., page 4470) "No person having a husband, wife, child or parent, shall, by his or her last will and testament, devise or bequeath to any benevolent, charitable, literary, scientific, religious or missionery society, association or corporation, in trust or otherwise, more than one-half part of his or her estate, after the payment of his or her debts (and such devise or bequest shall be valid to the extent of one-half, and no more.)"

It is also provided that any corporation formed under the laws of 1848 for benevolent or charitable purposes cannot take more than one-quarter of the estate of a testator who leaves a wife, child or parent. We believe that these are the only restrictions on the right to dispose of property for charitable purposes in the State of New York.

GRAY & DUDLEY WIN.

The Commission appointed by Gov. John I. Cox, of Tennessee, to purchase a Silver Service for the cruiser Tennessee, now being constructed, selected designs submitted by the Gray & Dudley Hardware Company, representing the Whiting Manufacturing Company of New York, to whom a contract for furnishing the service was awarded. Ten sets of designs were submitted to the commission by representatives of five manufacturers. The metal composing the service, the designs for which were selected by the commission, will be 925-1,000 fine, and will weigh 2,400 ounces. The entire set, comprising seventy-three pieces, of which the principal and most costly piece will be the punch bowl, will be highly ornate and very artistically designed.

UNIFORM CATALOGUES.

The Southern Supply & Machinery Dealers' Association have started a good work by accepting a uniform size for loose-leaf catalogues and price books, an action that will be most acceptable to those who have to do with the literature of these firms. Their specifications are as follows:

First—Forms must not be larger than 5x8 inches, printed on one side only, allowing 1¾ inches on left side for binding, on a sheet 7x8½. Punched with ⅜ inch slot hole 4½ inches from center to center. Eight pages can be printed at a time on a sheet 17x28, then cut apart and punched.

Second—Paper must be white, 28 pound double cap (17x28) of a good quality bond.

Third—Manufacturers must conform to these rules in order to have their goods shown in loose-leaf catalog adopted by the Southern Supply and Machinery Dealers' Association.

The Southern Hardware Jobbers' Association discussed this matter at the Hot Springs meeting and the following letter was recently sent out by Secretary Carter.

To the Members of the Southern Hardware Jobbers' Association:

Gentlemen:—The question of our association deciding upon and adopting a uniform size sheet both for catalogues and loose-leaf price books or binders' catalogues was very fully discussed at the recent annual convention at Hot Springs, Va. A special committee, consisting of J. D. Moore, Charles H. Ireland and C. B. Carter, was appointed to consider this matter and to report before the convention adjourned. On the last day of the convention this committee made its report, or, rather, asked for further time, inasmuch as they had not been enabled to secure sufficient information on the subject to enable them to make a satisfactory report. Further time was granted and the same committee continued. The remarks of one of our members in this connection will prove of interest:

"I feel that this is one of the most important things we can take hold of. Perhaps not more than 10 or 15 per cent. of our membership publish a catalogue, and while we do not ask the manufacturers to publish our catalogues, yet if they will get up their illustrated sheets so that we can adopt a uniform binder, a great deal of benefit would develop, and certainly a benefit to the manufacturers, and I hope that this committee will take this matter up and push it to a conclusion without delay, and after the size sheet is adopted that they will communicate through the secretary to the American Hardware Manufacturers' Association our position."

In order that we may go to work on this proposition intelligently, we ask that you give us the following information by return mail:

First—Do you have your own catalogues printed? If so, send us a sheet of the catalogue itself, also of the loose leaf used in the loose leaf binder which you use in connection herewith.

Second—If you do not use your own printed catalogue, whose or what style of catalogue do you use for your office and your salesmen? Give size of sheet and size of printing space.

Third—What size sheet would you suggest we recommend shall be adopted by the jobbers and manufacturers? Please remember that it requires a little wider sheet for the loose leaf binders than for the regular printed catalogues.

Address your replies to the undersigned, who will tabulate the information and submit to J. D. Moore, chairman.

Yours very truly,
C. B. Carter, Secretary-Treasurer.

The Avery Stamping Company, Cleveland, Ohio, manufacturers of the famous "Never Break" steel wares, are sending out a series of advertising blotters. One of them, entitled "Frenzied Cookery," represents two pickaninnies taking a hot bath in "Never Break" goods, perhaps with the idea of making themselves white or of toughening themselves for the future. Cooking in "Never Break" seamless steel utensils is one of the best forms of life insurance, as food is not scorched or burnt in them, but is prepared in the best hygienic manner, preventing the terrors of dyspepsia. "Never Break" utensils have been on the market for over twenty years, and are recognized as the standard of excellence as to quality, style and finish.

HER SOLE IDEA.

"He takes her to the theatre and to other amusements quite often."

"Yes. Do you think she permits him to entertain any hope"—

"Gracious! She doesn't think of permitting him to entertain anything but her."—*Philadelphia Press.*

WHICH?

He (philosophizing)—I used to think that I knew a great deal; that I was wise, in fact; but the older I become the more I realize that I know nothing.

She—Agnostic, or plain ignoramus?—*St. Louis Post-Dispatch.*

RECENT TRADE PUBLICATIONS.

H. E. HESSLER COMPANY, Syracuse, N. Y., have recently mailed to the trade their new net price catalogue, edition No. 13, which covers Stove Repairs, Tin Shop Supplies, Hardware and Stoves. The book is in large pamphlet form, containing 60 pages, and is illustrated throughout. The book is a valuable one to those interested in this line, giving as it does "Hints on Ordering Stove Repairs," "A Word About Water Fronts," "A List of Furnace Repairs," and much other useful information. A specialty made by this company is the Hessler R. F. D. Mail Box, fully described and illustrated in their catalogue, giving prices, etc. It has been fully approved by the Postmaster-General and highly recommended by the department for its neat appearance, durability and simplicity. It has been advertised in all of the leading Farm, Livestock and Poultry Journals in the country. It is full Government size, 18 inches long by 6¾ inches in diameter, and is made of 22 gauge galvanized steel and coated with best quality of weatherproof aluminum. Send for their catalogue for further information regarding their products. It will be gladly and promptly sent upon request.

GREEN, TWEED & COMPANY, 17 Murray Street, New York, manufacturers of Brass Specialties, have sent us one of their 1905 catalogues. It is a large book in pamphlet form, covering 142 pages of descriptive and illustrative matter. Among the goods exploited are box, cabinet and flap hinges; refrigerator hinges and levers; window and screen lifts; moulding hooks and coat and hat hooks; door and drawer pulls; chest handles, cleats, pulleys; cupboard turns and catches; barrel, chain, flush, necked and ship bolts, escutcheons, hasps, brackets, box corners, numbers, chain door fasteners, card holders, oar locks, casement window-adjusters and fasteners, bar brackets, etc. This catalogue illustrates only goods which they carry in stock and can ship promptly. They call especial attention to this, for the reason that they lay claim to having the largest assortment of these goods that has ever been in one house in this country. They have catalogues illustrating Mill Supply Specialties that they are headquarters for, such as Blake's Improved Belt Studs, Champion chain wrenches; the Favorite reversible ratchet wrench, Palmetto packing, New Improved Rochester Automatic lubricators, any or all of which will be sent upon application.

A. GEISEL MANUFACTURING COMPANY, St. Louis, Mo., makers of "Mizzoura" steel enameled ware staple kitchen utensils, are the authors of a neat and attractive pamphlet catalogue of twenty-eight pages, devoted to the exploitation of the same. "Mizzoura" double coated steel enameled ware is of a beautiful light blue color, flaked with white both inside and out. It has two coats of tough enamel on a body of best quality of steel. In their catalogue they present an increased line of the staple articles, to which they are adding new ones all the time. The shapes are symetrical and the line is uniformly handsome throughout. All of their product is carefully inspected for defects or imperfections and customers can rely on receiving ware that is first class in every respect. Inquiries and orders are earnestly solicited by the company, who state their confidence in future orders after having a chance to inspect their goods. Send for a catalogue.

THE MARYLAND BELTING & PACKING COMPANY, Baltimore, Md., have sent us a copy of their envelope size booklet, exploiting their Garden Hose. The book is well gotten up and has an attractive cover of green, on the back of which in large red script letters is their monogram. They claim the "Maryland" is the highest grade of hose manufactured. "Ivy" is an extra heavy high pressure hose of fine quality, made only in ¾ inch 4 ply. "Acorn" is a high pressure hose of fine quality, made only in ½ and ¾ inch 3 ply. All of these are the product of the Maryland Company. The book is illustrated throughout, giving description, etc., of each. They also make and illustrate hose nozzles, hose clamps, Caldwell hose straps, hose couplings, hose menders, iron and wood hose reels, hose sprinklers, etc., etc. Copy of their catalogue of these well-known goods will be sent upon request.

THE HAWKEYE PUMP COMPANY, Washington, Iowa, have sent to the trade a circular and price list of their Hawkeye galvanized pump, which they claim to be the latest and best made, and is so made that it cannot burst by freezing. It is made for cased, driven or open wells, and fitted for standard merchant pipe or wood tubing. Made with seamless brass or galvanized cylinders. Send for their printed matter for further information.

WASHINGTON CUTLERY COMPANY, Milwauke, Wis., manufacturers of "Village Blacksmith" hand-made butcher knives and tools, have placed before the trade an artistic catalogue with little illustrations at the bottom of each page, showing, step by step, how Village Blacksmith tools are made from the first rough forging to the hand honing that gives them a ready-to-use edge, and the careful packing in neat cartons with each knife separately enclosed in a rust-proof sheath. Village Blacksmlth butcher knives and tools have not the uniform finish of machine-made goods, but uniformity of finish, they claim, can never replace that subtle quality, "the soul of the steel," which can only be brought out by hand working. Every slight deviation from the standard shape tells of the painstaking hand-shaping and grinding conducted so as to preserve all of that life and temper previously wrought into the steel at the anvil. If you are interested in this class of goods, don't fail to secure a copy of their little catalogue.

THE GOULDS MANUFACTURING COMPANY, Seneca Falls, N. Y., with New York office at 16 Murray Street, have issued a booklet on Automatic Pumping with Gould's New Duplex Water Lifter. It is well gotten up and finely printed and illustrated on heavy coated paper. This New Duplex lifter is constructed upon the same general lines as the well-known Duplex Steam Pump, but city water is used to operate the pump instead of steam. The New Duplex lifter costs but little, if anything, for running expense, and can be arranged to operate entirely automatic, starting and stopping as the demand on the service may require; once properly installed according to their directions, practically no attention is necessary and repairs are extremely infrequent, as there is no undue strain on any part. The lifter is absolutely noiseless in operation; it can be taken apart for inspection and repairs without deranging the plumbing. For further information, illustrations, prices, etc., write for catalogue.

DIAMOND SAW & STAMPING COMPANY, Buffalo, N. Y., are again bringing into prominence their Sterling Hack Saw Blades and Frames by the use of a pamphlet catalogue illustrating and pricing the same. With the catalogue they include a circular on which they give several changes in price. "Sterling" hack saws are made of best tool steel—are made wide and heavy—are economical—and do true, straight, quick work. The company make extra heavy blades ¾ and one inch widths, and from 12 to 17 inches in length for power saws. They make Sterling Kitchen saws, which ars worthy the attention of every close buyer, which are superior in finish and workmanship. Samples will be sent free—you pay express charges only. Send for their booklet.

ANCHOR POST IRON WORKS, Garwood, N. J., and office and show room 15 Cortlandt Street, New York City, have sent us their catalogue No. 29, illustrating a much larger scope of their business than any previous edition, combining, in fact, both their wire fence business and artistic wrought iron department, in which they manufacture all kinds of wire fences, entrance gates, etc. Their catalogue they have made very comprehensive, showing many new designs; also reproductions from photographs of work put up by them. They illustrate for the first time a number of arbors, trellises, wire espaliers and wrought iron pergolas. They state "With the best modern equipment, skilled labor and shipping facilities, we are confident that we can insure good workmanship at the lowest possible cost." They will be glad to send their catalogue to interested parties.

LIVINGSTON NAIL COMPANY, 104 Reade Street, New York City, are presenting to the trade their catalogue for 1905. It is a very handsome book, bound in red flexible leather, and contains 74 pages, in back of which are inserted eight blank pages of block rule paper, convenient for memoranda, etc. This business was founded sixty years ago and during the greater part of that time was conducted under the personal supervision of the late S. Otis Livingston. Since his death the business has been incorporated under the same name and continues under the management of his former employees. They manufacture horse shoers' supplies. Their newest horse shoe nail is the "Anchor," made under the "cold rolled" process from superior stock. This process strengthens the nail and adds largely to the tensile strength. The "Anchor" will drive high, yet leave sufficient length for clinch to hold firmly. Blades are broad and thin, permitting no injury to the hoof; it is made with four styles of head, and is guaranteed to equal any nail made.

NEW GOODS AND SPECIALTIES.

A NEW DOOR CATCH.

The American Hardware Manufacturing Co., Ottawa, Ill., who during the past year have been manufacturing and selling the American Door Catch for screen doors, have added to their line the No. 1 American Door Catch, which is a larger size to be used on storm doors, panel doors, gates, sheds and even light barn doors. The accompanying cut shows the No. 1 Catch attached to a panel door. It will be noted that there is no lock,

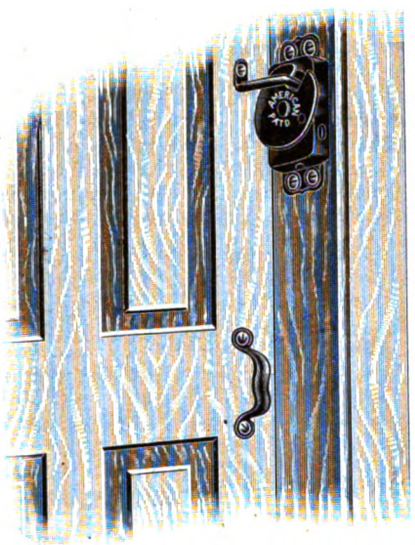

FIG. 1.

knob, or latch necessary when this catch is used. At the same time it holds the door firmly. No twist, no lift and just a slight pull or gentle shove, and the catch works automatically, whetner operated from the inside or outside of the door.

We also illustrate the No. 1 American Door Catch on a heavy panel door, the door being open, and just about to engage the

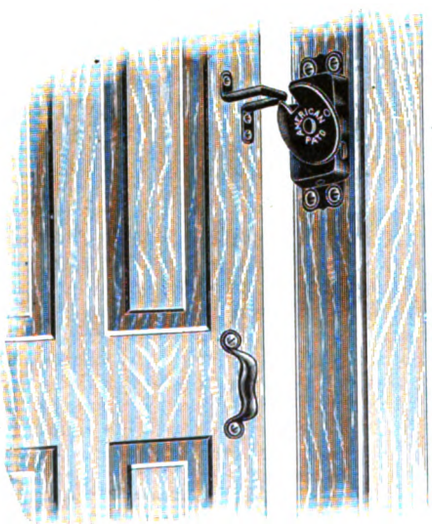

FIG. 2.

catch. The staple on door enters the slot in disc. This turns over the center; is controlled by a spring, and holds the door firmly up against the jamb. This is quite a feature in storm doors, as it keeps the door tight against the jamb all the time, preventing the cold air from going in, the warm air from getting out, and also preventing the door being blown open by draughts.

The No. 1 Catch is generally placed on a door about from 24 inches to 26 inches from the top. It will work on any door that swings on hinges; right or left; up or down; in or out; flush or lapping, and do the work in an effective, silent manner.

Below we show the mechanism of catch, which explains itself. This catch is furnished complete with staple, screws and templet, all packed in a strong envelope. The templet is made of cardboard, showing the exact location of the screw holes in the door and jamb.

To any reader of this paper who is a Hardware dealer, the company will be pleased to send, upon request, free of charge, a sample catch, prepaid, and advise that the dealer then set it up on

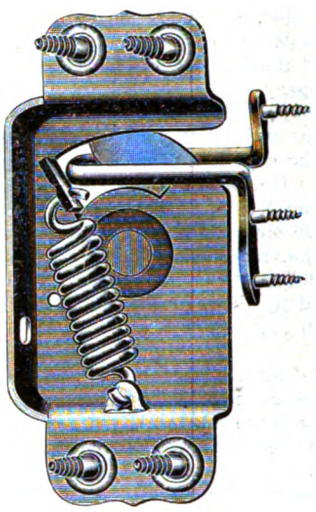

FIG. 3.

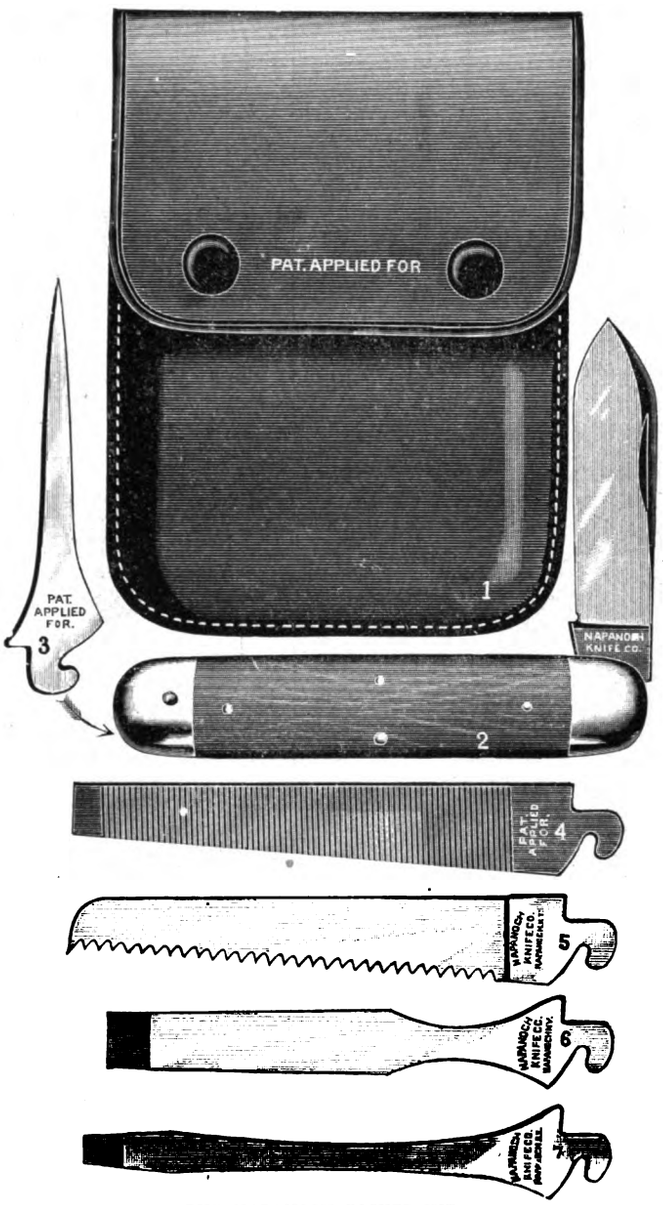
the door at his store or home, and see for himself just what it will do. The sale of the No. 2 Catch, or screen door size, was very great, and it is expected that the No. 1 will meet with as much success.

A SEASONABLE ARTICLE.

An article that should meet with an especially large sale throughout the Fall and Winter is the Twentieth Century White Flame Heat and Light Burner, being placed on the market by the Twentieth Century Manufacturing Company, of New York. This article, which is illustrated herewith, is composed of three separable parts, and in packing are nested compactly in a paste-

TWENTIETH CENTURY WHITE FLAME HEAT AND LIGHT BURNER.

board box, the whole package weighing 18 ounces. This burner can be used to good advantage by the Hardware dealer for window display, as it not only furnishes light, but at the same time prevents the frosting of the window. The Twentieth Century Company furnishes with each order a large assortment of attractively printed showcards, electrotypes for local advertising and circular matter.



AUTOMOBILES FOR BUSINESS.

Much has been written about the automobile for sport or pleasure, but very little about the automobile for commercial or utilitarian purposes. *The Horseless Age* (New York), the pioneer automobile publication in the United States, accordingly devotes its issue of July 5 to a thorough treatment of its subject from the business standpoint purely. The edition comprises over 150 pages, and the reader will be surprised at the array of trucks, buses and delivery wagons that are reproduced in its columns, convincing the most skeptical that the horseless age is at last dawning for the poor work horse, as well as for the roadster. Business men in all branches of trade will find in a perusal of its pages much food for thought. Experiences of those who have been using automobiles for trucking, delivery and carrying passengers are freely and truthfully given, together with practical points on the engineering problems involved, so that any prospective buyer of business automobiles may be carefully guided in the selection of the proper vehicles for his particular work.

AN ATTRACTIVE NOVELTY.

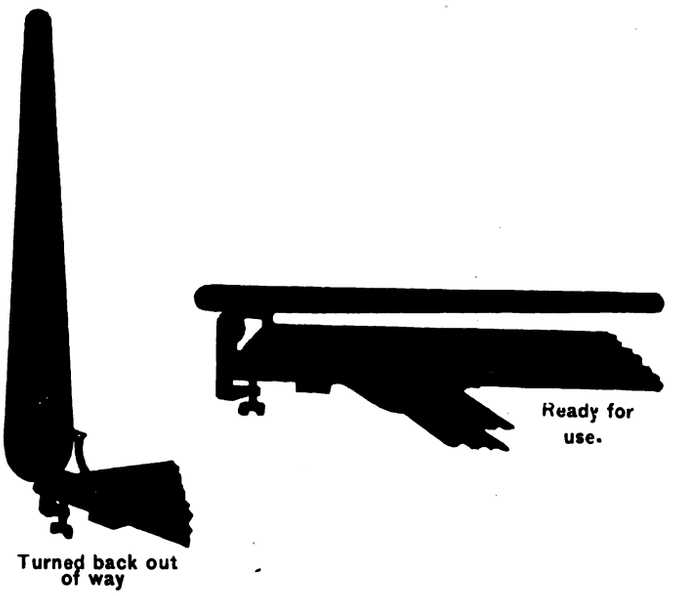
U. J. Ulery, 7 Warren Street, New York City, is placing on the market an entirely new pocket specialty, illustrated herewith. As shown in the illustration, the article consists of a well-made

THE NAPANOCH POCKET KIT.

pocketknife, 3⅞ inches in length. One end of this knife is made so that five different tools can be inserted at will. These tools consist of a reamer, a four-inch file, a saw, chisel and a screw driver. All of these articles are easily adjusted and are securely held in place by the back spring of the knife. In making this specialty the very best material is used, and it is sold under an unlimited warrantee.

THE INDESTRUCTIBLE SCREW DRIVER.

We illustrate herewith Thomson's Indestructible Screw Driver, made by the Thomson Drop Forge Company, Plantsville, Conn. This article, on account of its very evident merit, it meeting with a

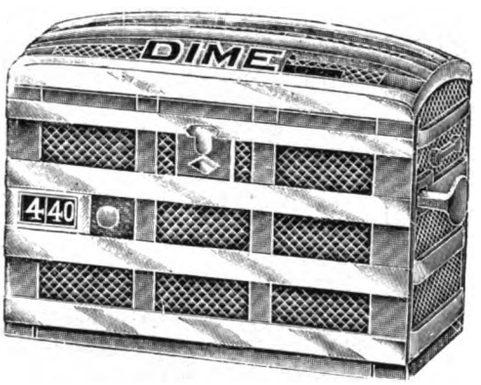


THE INDESTRUCTIBLE SCREW DRIVER.

ready sale in all stores where it is carried in stock. The handle end of the blade extends in one solid piece through the wooden part, and is so attached to the metal cap that even a severe blow with a sledge hammer will not split the handle. The cap, ferrule and blade are made of drop forged steel and the handle of selected wood. It is made in sizes from 2½ to 30 inches in length. The manufacturers have recently increased their capacity so that they are now in position to handle orders promptly.

THE AUXILIARY IRONING BOARD.

An article that finds a ready sale, particularly at this time of the year, in Hardware stores, is the Auxiliary Ironing Board manufactured by the Specialty Manufacturing Department of



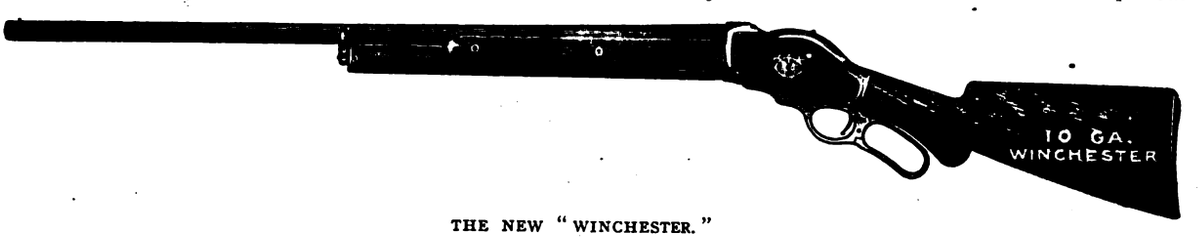
THE AUXILIARY IRONING BOARD.

W. H. Glenny & Co., Rochester, N. Y. As will be seen in the accompanying illustration, this specialty has many convenient features that can be used for the regular ironing board, and for ironing sleeves, shirt waists, etc. The "turnback" feature is obviously a great convenience. This ironing board is built of carefully selected material and is exceptionally durable.

A LINE OF TOYS.

An attractive line of toys is being placed on the market by O. B. Fish, 6 Harrison Street, New York. Among his leading novelties is a Registering Bank made in the form of a trunk and illustrated herewith. It has a combination lock and is nicely fin-

ished in nickel. These banks are made for holding dimes and cents, and will only register the kind of coins for which the bank is intended. They cannot be emptied until the proper amount has been deposited. Another novelty that should meet with a ready



sale is the Safe Bank also made with combination lock, a reproduction of the kind used on larger safes. This bank is in size 6 by 4½ by 3¾. It weighs 4 pounds, is made of cast iron polished with copper oxodize and lacquer finish.

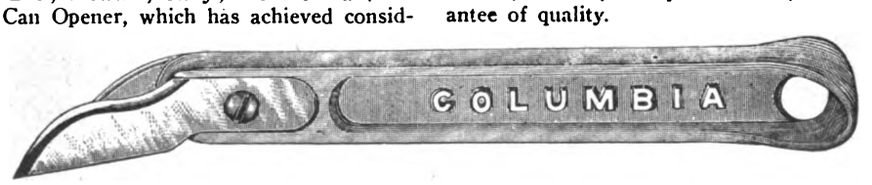
A NEW "WINCHESTER."

The Winchester Repeating Arms Company, New Haven, Conn., inform us that they are now prepared to fill orders for their model 1901 Winchester Lever Action Repeating Shot Gun. This is said to be the only 10-gauge Repeater on the market. It is made to handle either smokeless or black powder and is particularly well adapted for wild fowl shooting. The gun resembles in outline the original Winchester Lever Action Repeating Shot Gun, but differs in detail. It has a tighter breech joint, more completely supporting the valves in chamber. A positive firing pin retractor is provided. The finger lever is made separate from the breech block and with a finger lever lock. When the action is closed, the gun is locked against opening by this finger lever lock, and is instantly released by a downward pressure on the finger lever. The standard gun is made with a 32-inch rolled steel barrel, hardened and browned frame, and pistol grip stock of plain walnut, not checked, finished with a checked steel butt plate. Barrels for this model are bored to shoot close and hard, and no gun will be sent out that does not make a good target. Unless otherwise specified, guns with 32-inch, full choked barrels will be sent out in all orders; but shorter barrels, or barrels with different styles of bore, either modified choke or full cylinder, will be furnished when so ordered, without extra charge. Damascus barrels of different grades, and other extras, can be furnished.

THE NEW "WINCHESTER."

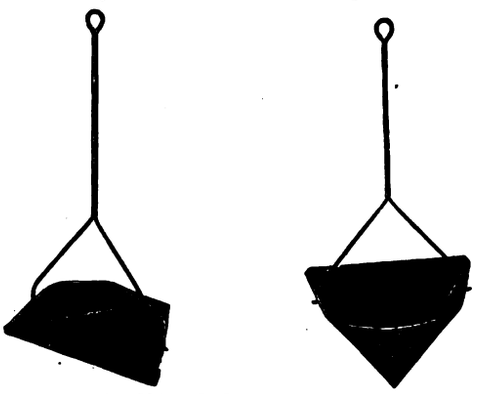
THE VICTOR BOLT CLIPPER.



The Roberts Manufacturing Company of Somerville, Mass., are selling to the trade a Bolt Clipper known as the Victor. This article, which we illustrate herewith, is worked on a new principle by the use of a cam and cam nut in place of the screw to separate the handles of the joint to throw the jaws together. The manufacturers guarantee that the Victor Bolt Clipper is made of the very best stock obtainable, and in the most careful manner. Every Clipper is tested thoroughly before it leaves the factory. Joseph F. McCoy & Company, 157 Chambers Street are Eastern selling agents.

THE VICTOR BOLT CLIPPER.

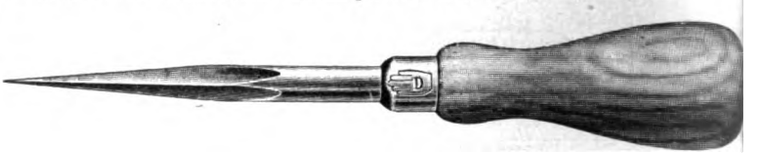
COLUMBIA CAN OPENER.



A. F. Meisselbach & Bro., Newark, N. J., are the manufacturers of the Columbia Can Opener, which has achieved considerable popularity. The knife is made of finely tempered steel, and has a sharp cutting edge, which makes it work with smoothness and with extreme ease. In its construction the end of handle is enlarged and rounded so as not to hurt the hand when forcing the knife into the can. It makes a clean cut, as it opens the can at the extreme edge without slipping or tearing. They are packed in a neat partition display box, holding one dozen.

COLUMBIA CAN OPENER.

A HANDY DUST PAN.



An article that will no doubt find very ready sale among housekeepers is the Twentieth Century Dust Pan, just placed on the market by Schofield & Company, Freeport, Ill. As will be seen in the illustration, the pan can be used without stooping, and can be pressed so closely to the floor as to take up all the dust. When the pan is raised the back drops down automatically, holding the dust in the pocket in such a manner that it will not spill out when being carried about. It is made of pressed steel, to retail at twenty-five cents. These pans are packed 6 dozen in a case, with a shipping weight of seventy pounds to the case.

THE 20TH CENTURY DUST PAN.

SCREW BIT AND DRIVER PUNCH.

The screw driver bit and solid punch shown herewith are among the small tools made by the Ducharmes & Co., Shelburne Falls, Mass. These goods are made of the best tool steel obtainable; and the manufacturers state that they replace, free of charge, any tools that break, bend or are at all imperfect that have their trade mark (Hand D) stamped on them, this trade mark being a guarantee of quality.

SCREW BIT AND DRIVER PUNCH.

The Keystone Nail Company, Inc., Philadelphia, are the sole owners of the patents on the Porter Patent Cooling Machines with which, in connection with their hot process, they manufacture galvanized nails, screws, etc. The galvanizing is all done with pure spelter and is cooled without submerging in water by the use of the Porter machines. In using this process, the strength of the iron is not affected and the coating will not scale. As a further advantage this process makes the work evenly coated and perfectly separated, avoiding much loss.

A REMARKABLE HISTORY.

It is said of the Bissell that it is ten times the largest carpet sweeper factory in the world, and that this company manufacture and market 30% of the world's consumption of carpet sweepers. The business has grown from its small beginning in 1876, until to-day it is recognized as one of the largest and most substantial of Grand Rapids' enterprises. The business was founded by M. R. Bissell in 1876, and to his genius and enterprise great credit is due for the success the business has attained. In 1884, when the company burned out, and which, on account of a trifling insurance on a loss of $130,000, the business seemed well-nigh wiped out of existence, a man of less ability and less self-reliance than Mr. Bissell possessed, would have failed, so crushing was his loss; but as adversity tests the metal in a man, this calamity to the Bissell Company brought into play all the best qualities of Mr. Bissell's character. While the big plant was burning, and when Mr. Bissell saw that total destruction of it was inevitable, he left the scene of his misfortune and immediately leased other quarters, and the afternoon of the same day of the fire had workmen cutting up lumber for carpet sweepers, and just nineteen days after the disaster commenced shipping goods.

Mr. Bissell knew that the temporary quarters procured would never be equal to the rapid growth of the business, and therefore set out at once to rebuild the factory, and in a few months the building was completed, finer in every detail than the factory that was destroyed. In 1888 the company met its most crushing loss in the death of its president and founder, M. R. Bissell. Just at a time when the business was finely established and after buying a magnificent home in the heart of the residential section of the city, and when life and the future seemed to hold out so much to him, he died. Although comparatively a young man when he died, he had accomplished much, and his untimely taking off was a great loss not only to the business which he founded, but to the city of Grand Rapids as well.

After Mr. Bissell's death Mrs. Bissell became president of the company, in which she takes a deep interest, constantly keeping in close touch with the business, and by her kindly ways and sincere consideration for all her employees, inspires results that without such influence could hardly be achieved.

At the time of Mr. Bissell's death C. B. Judd was made manager of the company, and continued in this capacity until the year 1890, when failing health compelled him to resign. Mr. Judd was a hard, earnest worker, and during the period of his management the business was prosperous. After Mr. Judd's retirement the management was given to R. E. Shanahan, who has been identified with the company from the time of its organization, and who has worked his way from bill clerk to this position of secretary and general manager.

During the past five years, under Mr. Shanahan's able management, the growth of the business has been enormous, practically doubling in this period.

M. Shanahan, the treasurer of the company, was associated with Mr. Bissell in the crockery business before Mr. Bissell had done much with the carpet sweeper. He was closely identified with the pioneer work during the early struggles of the business, and occupies an honored place in the company's official staff to-day.

T. W. Williams, the vice-president and New York manager of the Bissell, is a true type of the cosmopolitan business man, and one of the strong factors of the company. He has been identified with the business from its inception, and to his untiring efforts much credit is due for the large business of the company, not only in the East, but in foreign countries as well, as Mr. Williams has had charge of the export business of the company oustide of Great Britain.

W. J. Drew, who for many years was at the head of the company's mechanical department, and who originated many valuable improvements in sweepers, has not of late given any attention to the business, though he still retains his interest in the company.

Fred. McR. Deane, the assistant treasurer of the company, has been connected with the business twenty years, and by faithful, efficient service, has attained to his present responsible position.

W. E. Gill, at the head of the order department, has been connected with the company since 1886, at which time the Blumb & Lewis Mfg. Co., with whom Mr. Gill had been associated for years, sold out to the Bissell Company. Mr. Gill's long association with the shipping end of the Bissell business has made him an adept in matters pertaining to his department, including a knowledge of the geographic location of places throughout the world, as the Bissell sweeper is sold in every quarter of the globe.

T. W. WILLIAMS.

MRS. BISSELL.

R. E. SHANAHAN.

James L. Pollitt, a thorough-going Englishman, has managed the Bissell business in Great Britain for the past thirteen years, and through ability and indefatigable effort has built up a large business for his company.

J. W. Shanahan, the superintendent of the Bissell Company, has been identified with the mechanical end of the business for twenty-three years, working his way from the bench to his present responsible position. He has made a deep study of every detail of the manufacturing end of the business, and through the introduction of improved methods has greatly augmented the efficiency of the mechanical forces of the company.

The Bissell Company has factories in Toronto, Canada, and Paris, France, also large offices and warerooms in New York and London, England. Their trade extends to every country where carpets and rugs are used. To meet the growing demand for their product the Bissell Company is planning a large addition to its factory, and the work will probably start in July. This company makes carpet sweepers exclusively, in many styles, ranging from the tiny toy machine to the large hall sweeper, with brush 25 inches long. Its factories comprise over 175,000 square feet of floor space, and over 400 people are employed in the factories and offices of this concern.

Judicious advertising has played a strong part in the upbuilding of the Bissell business, but the foundation of its success must be attributed to the recognized superiority of its goods. The Bissell Company is the largest consumer of 2¾-inch bristles in the world; it requires the entire product of 20,000,000 hogs to

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

The time for selling JAP-A-LAC is all the time. There is no season of the year when JAP-A-LAC will not sell nor when it cannot be used to advantage in every home.

Because of the many special uses found for JAP-A-LAC during the Spring and Fall house cleaning seasons, the volume of sales is naturally greater.

The real JAP-A-LAC dealer can sell JAP-A-LAC every day in the year. Realizing this, we have decided to continue our advertising the year round.

Our advertising during the balance of the year will embrace a larger number of magazines than we have been using, and will carry liberal spaces. We shall be telling the women of the country of the uses to which JAP-A-LAC can be put.

We are sure to stimulate the demand for JAP-A-LAC and make it an every-day seller for the dealers. A little attention to this well-advertised commodity will bring *new customers and increased profits* to the dealers—who are handling it.

Don't let your stock get depleted. If you have never sold JAP-A-LAC, give it a trial. You will find it the quickest and easiest selling article of its kind on the market.

The Spring advertising has more than doubled our sales up to date. The Fall advertising will do the same. The reason for this is that we tell the women what JAP-A-LAC is and how to use it.

Let the women of your community know that you keep JAP-A-LAC, and you will secure their patronage.

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

ADDRESS: 641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

make the brushes used in Bissell sweepers annually. This company maintains large, well-equipped printing offices in Grand Rapids and London, where they turn out some of the finest specimens of the printers' art. They even do their own embossing, and make the claim that no finer work of this kind can be turned out in the State of Michigan. Their capacity per day is 3,000 regular domestic size sweepers, and 4,000 toy sweepers—or five regulars, and six and a half toys per minute, for ten hours a day. Their factory is equipped with a 350 horse power Corliss engine, and an auxiliary water power equal to 100 horse power. They have their own electric light plant, with a capacity of 1,200 lights, 16 C. P.

Over eighty patents have been issued to the Bissell Carpet Sweeper Co., covering the entire range of valuable mechanical features in carpet sweeper construction. Bissell sweepers have taken awards and medals for superiority in the following expositions: American Institute Exposition, 1884-85-86-87-88-89-90-92; Massachusetts Mechanical Charitable Association, 1887, 1892; Anglo-Danish Exposition, London, 1888; Paris Exposition, 1889, Gold Medal; Paris Exposition, 1900, Gold Medal; Pan-American Exposition, 1901, Gold Medal; Japanese Exposition, Osaka, 1903, Gold Medal; Louisiana Purchase Exposition, 1904, Grand Prize.

A NEW SEEDING PRESS.

An article that will prove an acceptable addition to the furnishing of any kitchen is Stocking's Simplex Straining and Seeding Press, manufactured by the 4-S-Food Press Company, 70 Warren Street, New York, which we illustrate herewith. It is especially adapted for removing pulp of a fruit and berries from the seed and fibre, for straining soups and broths and for granulating potatoes and other vegetables. As will be seen from the illustration it is so made that it has no seams for holding corroding juices, and further, that it is cleaned with the greatest of ease. It is designed to displace the colander and wire sieve now generally used in kitchens for doing this class of work, a method that has always been unsatisfactory. A postal card sent to the manufacturers will secure their booklet which describes this article in detail, and which gives numerous receipts for making good things with it.

SECTIONAL VIEW OF PRESS.

Hayes Pump & Planter Company, Galva, Ill., have distributed a new catalogue recently, devoted to the Sucker State Grain Drills, comprising hose, disc, shoe and press drills, with or without fertilizer attachment. The Hayes Pump Co. have acquired the patents, business and good will of the Sucker State Drill Company, of Belleville, Ill. Sucker State Drills have been made since 1858 and while crude compared with the present Sucker State, they claim were superior to the product of any other drill factory of that time. They also claim that a comparison of the present machine with those of competitors will establish the claim that by reason of an original advantage and a longer and more thorough experience, the superiority of Sucker State Drills has been upheld. They wish to assure the patrons of Sucker State Drills that the high quality will be maintained, and, with increased facilities, they will be able to take care of your trade promptly. To the trade in general an investigation of the pages of their catalogue will reveal their claims of superiority justifiable.

REVIEW OF THE MARKETS.

WIRE NAILS: The demand is somewhat improved without change in prices excepting for slight reductions at competitive points. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$1.80
Carloads to retailers	1.85

New York.—Demand is fair and market remains firm. Annoying delays in the handling of shipments by transportation companies are reported.

Single carloads	$1.99
Small lots from store	2.05

CUT NAILS: The Cut Nail Association will meet July 26. Present demand fair. Prices for carload lots $1.70 base, f.o.b. maker's mill. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities, 10 cents advance per keg on Cut Steel Nails.

New York.—Carloads on dock	$1.89
Less than carloads	1.95
Small lots from store	$1.95 to 2.00
Pittsburgh.—Steel cut f.o.b. mill	$1.70
Iron cut f.o.b. mill	1.80

Chicago.—Market very dull.

Carload lots	$1.90 to $1.95
Small lots from store	2.00 to 2.10

BARB WIRE: Dullness of market brings reports of shading of prices by a few jobbers and mills with stocks on hand. Quotations are unchanged, as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

Chicago.—Prospects for Fall trade very good, based on numerous inquiries. Official prices are:

	Painted	Galv.
Jobbers, carload lots	$2.10	$2.40
Retailers, carload lots	2.15	2.45
Retailers, less than carload lots	2.25	2.55

SMOOTH FENCE WIRE: Market firm, except for a slight shading at some competitive points. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.65
Retailers, carloads	1.70

These prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

WINDOW GLASS: Prices were advanced 10 per cent. at a meeting of the Western Window Glass Jobbers held July 13.

LINSEED OIL: An advance of one cent was made on July 13, and another on July 17, and an additional increase of 1 cent per gallon took place on July 22. The following are the quotations, f.o.b. New York, announced by the Dean Linseed Oil Co.: In lots of 5 barrels or more, 53 cents per gallon, of 7½ pounds. In lots of less than 5 barrels, 54 cents per gallon, of 7½ pounds.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.	
Calcutta Oil	60 cents per gallon.

ROPE: Market is weak and demand rather light. General quotations are as follows:

	Cents per pound.
Pure Manila, 7-16 and larger	11½ to 12
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8

Less ¼ to ½ cent to the large trade.

IMPORTANT CHANGE OF DATE.

The November meeting of the National Hardware Association and the American Hardware Manufacturers' Association will be held November 8th, 9th and 10th, instead of the 15th, 16th and 17th. This change has been made on account of the possibility of an extra session of Congress on the week commencing November 13. The headquarters of the manufacturers will be at the New Williard, Washington, D. C.

TENNESSEE TRADE.

NASHVILLE, TENN: We take pleasure in advising you that the conditions in the Hardware trade of this section are very satisfactory, while the volume of business is never very great in mid-summer, at the same time it is up to the usual standard. Some of the salesmen and a number of the house employees are, of course, taking their annual vacations, but everybody has about as much as they can do, and the orders that are being sent in by the travelingmen on the road are for good quantities and cover a wide range of goods. Liberal orders are being placed for Fall and Winter merchandise.

Such lines as Guns, Cutlery, Heating Stoves, Stove Pipes, Toy Wagons, Lanterns, Horse Collars and Saddlery goods are all moving well. Prices are being well maintained, and, in fact, we consider the market in a firmer and stronger condition than it has been for the past two or three months. The reports that we get from the South on the crop prospects are very satisfactory, as a whole, but in some sections the excessive amount of rains have done a good deal of damage. The corn crop will be as good as usual, the wheat crop in Tennessee will be short, the cotton crop in the South will be light this year, but the advance in the price will more than balance for the shortness of the crop.

We are making preparations to handle a very large business during the Fall and Winter months, and we feel very confident that our expectations will be realized.

GRAY & DUDLEY HARDWARE CO.

KENTUCKY TRADE.

"Trade in Louisville and surrounding country is as good as could be expected," said W. B. Belknap in this office a few days ago. "Farmers are generally prosperous, for while the potato crop is being marketed at a very low figure, other products are bringing good prices." Mr. Belknap's firm is erecting a new building for their rapidly growing business. In the office will be installed a system for washing and cooling the air so as to make the interior an even temperature at all times. Mr. Belknap says that he believes that taking such good care of the people in his office that they will feel better when they go home at night than when they came in the morning.

GEORGIA PROSPEROUS.

ATLANTA, GA.: It would be folly to find fault with the volume of business, which can only be described as highly satisfactory.

If we were naturally grumblers, this condition ought to put us in a better frame of mind. The freedom with which the orders are coming in, coupled with the short force due to the summer vacations, has made our shipping and billing departments "get busy" in earnest.

We are glad indeed to attribute this satisfactory condition to the general prosperity of the farmers. We are glad to see them "on top," and we hope that they may long continue in such condition financially, so that they will be able to supply themselves and families with the many comforts to which they are entitled by never-ending hard work.

KING HARDWARE CO..

ILLINOIS.

PEORIA, ILL.: Trade conditions are good and prospects better.

CLARK, QUIEN & MORSE.

OREGON.

PORTLAND, ORE.: Hardware in Portland is moving fairly well in spite of the season. Although it was to be expected that this would be a dull time of the year, so far the amount of business done has been rather larger than is customary. Bridge and structural iron is in considerable demand, not only locally, but generally throughout the country. CORRESPONDENT.

THE JOBBERS' SIDE.

CLEVELAND, OHIO.: If a manufacturer could compel jobbers, retailers and consumers to buy only the factory brand it would be folly for them to make special brands. But jobbers and retailers would be greatly handicapped if they were compelled to handle only the same brands. Three or four retailers in the same place prefer different brands, as it is better for each of them that this should be so. The custom long established among jobbers of giving their customers exclusive sale of certain brands is a benefit to both jobbers and retailers. The claim that factory brands are superior is an attempt to beg the question. No jobber would allow a second-class manufacturer to make the goods upon which

Digitized by Google

his own reputation depends goes without saying. If the purpose of special brands was to buy them cheaper, the plan would have failed long ago. More attention is given to the quality of special brands than to any other goods a jobber handles. It is a compliment to any manufacturer to get an order from a good house, for special brands, for it makes him a permanent customer if he does his part. No jobber will change the maker of his special brand unless he is compelled to do so. One of the most perplexing problems is presented when this becomes necessary. If a manufacturer takes an order for 1,000 dozen axes at the price 25 cents less than his price for 10 dozen factory brands, it is not because they are to be a lower grade, but because of the size of the order, and if the jobber gives his customer this 25 cents, he is enabled to do so on account of his large order. Jobbers having three to five hundred customers to whom he gives exclusive sale can only protect them by controlling the brand. And in closely caring for the quality of his special brand he has secured himself valuable rights which it would be a serious loss to relinquish. The popularity of special brands among consumers is an adequate guarantee of their quality and no attempt to abolish such brands will succeed.

The Lockwood-Taylor Hardware Co.,
C. B. Lockwood, President.

TRADE IN THE SOUTH.

(Special Correspondence.)

New Orleans, July 18.

Prospective high prices for cotton, increasing export trade, immediate local prosperity, and ever developing activity in the timber section, have all united to cause considerable material progress and growth in the facilities for handling the Hardware trade of the city. During the past two weeks, despite hot weather and the drowsy atmosphere of midsummer, there have been planned and announced several rather important moves in the iron and steel manufactured goods world. The general volume of trade, lagging a trifle during the last two weeks in June, was pulled a trifle higher during the first two weeks in July by several features—chief among them the increasing demand for mill supplies and machinery fittings for the machinery belt in the pine lands, and in the constantly widening field for builders and structural goods in the immediate local market.

One of the most conspicuous features of the past fortnight has been the anonuncement that E. C. Atkins & Company, of Indianapolis, Ind., saw and tool manufacturers, were to open here a general headquarters for the Southern trade, together with a repair shop that would practically be a factory in itself to begin with, and certainly so during the not distant future. N. A. Gladding, vice-president and secretary of the corporation, has been in New Orleans arranging the details.

"Our coming to New Orleans," said Mr. Gladding, "is entirely due to the development of the field for our particular line of goods—and to the fact that in the future New Orleans will be nearer what we believe will be another great field—the hardwood forests of Central and South America." This is one of several similar enterprises that have established themselves here within recent weeks in greater or less degrees of importance.

In the local retail world, several evidences of changed conditions are in view. A. Baldwin & Co., having now approximately prepared for its use a great warehouse on the Illinois Central tracks, and having improved its facilities in the center of the city, is going to treble its ground floor area for the local retail department—the department that is just now busiest in catering to the house building, house fitting and house furnishing trade.

Woodward-Wight & Company, while dealing more in the Heavy Hardwares, has also made preparation for a more generous handling of the goods that appeal more directly to the local and immediate domestic trade.

The United Hardware Company, the new institution founded little more than one year ago, has increased its working force and is preparing to augment its facilities for handling wholesale trade.

Despite the stagnation in the implement trade, the agencies here have all kept at their early spring determination to increase their facilities. The Southern Moline Plow Company, operating through the agency of Victor Loisel, incidentally the United States Marshal at this point, has moved into its new Magazine Street location, and has just about finished fitting up the show rooms and getting the country visitors in the habit of seeking the right neighborhood. B. F. Avery & Son have also increased their storeroom in Canal Street.

Export business has held up exceptionally well during the past two weeks. There have been further Panama contracts, and those firms that have not succeeded in getting any of the plums thus far have been taking the stump in various ways to explain why they have done nothing and how it is that they will accomplish much in the future.

Rejuvenation of the river business has been a theme on many lips during the past fortnight, due chiefly to rumors of the establishment of a through line of river steamers to St. Louis and to Cincinnati. The significance of this is apparent to those who remember the implement and Hardware traffic that once came down the Mississippi River on the big steamboats that then plied between New Orleans and St. Louis and Cincinnati.

Jones & Laughlin Steel Company and the Lukens Iron Works are reported to be seriously considering the establishment of a barge line out of Pittsburgh, and the erection of big central distributing warehouses in New Orleans capable of caring for the export trade that these two firms expect to gain in the South American business.

While as yet the plan is merely tentative, it is being mapped in detail that it may be passed on. This is similar to the project proposed about eighteen months ago by the implement factories of Moline and Rock Island.

Meantime, a number of capitalists in New Orleans are seriously debating the project of putting on big through packets to St. Louis, capable of handling big cargoes of wagons, implements and whatever other freight requiring moderate freights and easy time, could be handled. The Hardware men of the city are deeply interested in the situation.

Good results are attending the action of the various committees of the several exchanges looking to the bringing in of manufacturing enterprises to New Orleans. Already a flood of correspondence has been started with all the manufacturing centers, and it is prophesied that several considerable establishments will soon be located here through the instrumentality of the movement.

THE PACIFIC COAST.

San Francisco, July 20.

The feeling all over the coast is one of confidence in a continuation of the prevailing good times, current indications being such as to maintain the optimism which has pervaded this section of the country for half a dozen years. The domestic and export trade of the three Pacific States continues brisk, real estate and building operations are very active, and both city and country banks reports money plentiful and easy at moderate rates of interest. To quote the venerable W. W. Montague head of a pioneer house in the trade "the signs of this coast are especially promising. We are to have good crops of almost everything, according to present indications. The wheat and barley crops are not turning out as heavy as promised earlier in the season, but the decrease in yield is largely offset by the good prices ruling. The shortage in the apple crop in the East, coupled with light crops of prunes and pears on this coast, point to a lively market for dried fruits this year, and prunes have already gone up 100 per cent. during the past month, and are still gradually rising. Prices for this important product bid fair to be better this year than for five years while the demand is correspondingly increasing, not only in this country, but in Europe. Stocks of canned fruit are being rapidly taken by the consumptive trade at excellent prices and the fresh fruits are accordingly stimulated. The hop industry is active, with prices away above cost of production. Beans too and dairy products are also bringing prices more than satisfactory to the producer, but cattle and sheep are not as high as they were a year or so ago, while the supply of both is apparently fully up to the current requirements."

A month ago it was related in this correspondence that President Bennett of the State Retail Hardware Association, had returned in a jubilant frame of mind from a Southern Coast trip, all because the trades association of Los Angeles had arbitrated differences of opinion that bode no good for the society and was again in harmonious working order, and now, this week, he was found in his store in this city enjoying a recurrent condition of jubilation, produced by the assured fact that the San Joaquin Valley Retail Hardware and Implement Association, with headquarters in Fresno, had followed the reunited action of the Southern Retail Hardware and Implement Association of Los Angeles. The Fresno trades people, as an association, had had troubles of their own that kept them apart for months as association co-workers.

Since the recent filing of a deed of record conveying the Union Iron Works of this city to George R. Sheldon of the Borough of Manhattan, New York City, in consideration "of certain valuable considerations and the sum of $100" business has been booming at the Union Iron Works. This week's news at this mammoth industrial enterprise is that keels have just been laid for two immense freighters of the American-Hawaiian steamship line to be built within a year, to go into service between this port, Honolulu and New York. These two big vessels are to be named the Columbian and Mexico. Each will be equal in size to the Texan, the biggest fleet of steamships.

CYCLE TRADE MEETING.

The fourth annual meeting of the National Cycle Trade Association will be held at the Astor House, New York, Tuesday and Wednesday, July 25th and 26th.

The following is the programme for this meeting:

TUESDAY, JULY 25.

10.30 A. M.—Meeting of Executive Committee in Secretary's office.

11.30 A. M.—Meeting of Active Members, Astor House, Room 74, corner Broadway and Vesey Street.

2.00 P. M.—Joint Meeting Jobbers and Manufacturers at Astor House.

Address of President—Charles L. Kelsey.

Address of Welcome to the Jobbers by Ralph D. Webster, Elmira, N. Y.

Response by Charles H. Turner, Albany, N. Y.

Address by Secretary, A. M. Scheffey.

Short addresses by members of the Association.

Introduction of Resolution by F. I. Willis on Co-operation of Manufacturers and Jobbers of Automobile Supplies. Seconded by C. W. Leng.

Dinner—6.30 P. M. Cafe Martin, Broadway and 26th Street.

Theatre Party—8.05 P. M. New York Theatre Roof Garden, Broadway and 45th Street. Vaudeville and "When We are Forty-one," headed by Harry Bulger, Elsie Janis and Dorothy Morton.

WEDNESDAY, JULY 26.

10.00 A. M.—Meeting Executive Committee in Secretary's office.

10.30 A. M.—Adjourned Joint Meeting if necessary at Astor House.

12.00 Noon.—Excursion to Coney Island, Luna Park and Dreamland via Iron Steamboat Company boats, leaving New York as follows: Pier 1, North River, 12.15 P. M., 1, 1.45, 2.30 and 3.15 P. M.

Leave 22nd Street, North River, 11.45 A. M., 12.30, 1.15, 2.00, 2.45 and 3.30 P. M. Music on boats.

Visitors are requested to apply for tickets to William J. Surre, Chairman, at Astor House, Room 74, at 10 A. M., Tuesday, July 25th.

The officers of the association are as follows: Charles H. Kelsey, Buffalo, N. Y., President; George T. Robie, Chicago, Ill., First Vice-President; Brace Hayden, San Francisco, Cal., Second Vice-President; Charles H. Turner, Albany, N. Y., Third Vice-President; Charles J. Schmelzer, Kansas City, Mo., Fourth Vice-President; A. M. Scheffey, Secretary and Treasurer.

A PRICE MAINTENANCE DECISION.

The recent decision of Judge Ray of the United States Circuit Court should act as a warning to Jobbers and Manufacturers to use special care in the making of Price Maintenance contracts. This decision was given in a suit by a firm of book publishers against Macey & Co., of New York, to restrain the latter firm from cutting prices on books. Macey & Co. maintain their right to sell merchandise bought by them for whatever price they pleased, and the court, in deciding the case, supported this contention.

In the decision Judge Ray said:

"To compel all publishers of and dealers in copyrighted books to come into the combination, submit to and be controlled by it and sell books at prices fixed by it, regardless of the value of the books, etc., or of the exigencies of the trade and situation of the seller, or be deprived of the privilege of purchasing, owning and selling such books. In short, such as refuse to come in are to be crippled or, perhaps, ruined in their business. As the combination extends throughout the United States, by the very terms of the agreement interstate commerce is necessarily restrained. A judgment for the complainants in this action will restrain interstate commerce.

"When all publishers of and dealers in copyrighted books—and nearly all new books are now copyrighted—combine to exact a fixed arbitrary price, etc., the readers of books become powerless, if they would read at all, not because of the monopoly granted or sanctioned by the Government in granting the copyright, but because of the new monopoly (the conspiracy of monopolists), created by the agreement and combination of these monopolists, one that is forbidden and denounced by the act of July 2, 1890 (26 St. L. 209), entitled, 'An act to protect trade and commerce against unlawful restraints and monopolies.'

"The defendants have not infringed and are not threatening to infringe complainants' copyright, nor have they violated any contract. The complainant is seeking to enforce against defendants an unlawful combination agreement to which such defendants are not parties, and by which they have not consented to be bound in selling books of which they are the absolute owners. The same result on a similar state of facts as to the effect of such notice was reached by the court in Bobbs-Merrill Co. v. Snellenburg, 131 Fed. Rep., 530.

"The defendants are entitled to a decree dismissing the complaint with costs."

OUR BRITISH LETTER

London, July 15, 1905.

(*From Our Special Correspondent.*)

COMING EVENTS.

During the holiday season, while trade is slack, many provincial ironmongers gladly avail themselves of the opportunity afforded by cheap excursions to visit the metropolis. The month of July has, during recent years, been largely chosen for these annual visits by country ironmongers in order that they might combine business with pleasure. The Ironmongery Exhibition, which has been held annually at the Agricultural Hall, London, for some years past, has been gradually growing in favor, until it is now a recognized event which few up-to-date ironmongers care to miss. I understand that the committee of management have been exceptionally fortunate this year in securing the cooperation of manufacturers of all kinds of general ironmongery, and, from letters which I have recently received from some of the leading makers who intend showing at that Exhibition, it is quite evident that the forthcoming show will be ahead of any previously held. In my next letter I hope to give an account of some of the exhibits, and also to draw attention to the chief American specialties shown. In another paragraph I allude to the Royal Show which has just been held in London. There are still several important county agricultural societies' meetings to be held in the provinces, and there are indications that many of these local shows will be specially interesting, and that the exhibits of British, American and Canadian implements and machinery will still further tend to create a demand for the use of modern inventions, whereby labor may be saved and time economized. The necessity for labor-saving contrivances in the harvest field is more and more apparent as the cry of "back to the land" becomes louder year by year, and as the keenness of competition which faces the British farmer increases.

A very interesting Musical Trades' Exhibition will be held next month at Islington, when some excellent instruments will be on view. I understand several importers of American organs will have good stands. The instrument trade is very closely allied to the Hardware and house furnishing businesses, both of which classes of traders are enabled to introduce the sale of musical instruments with marked success. The interest in electrical development continues to increase and Hardwaremen show their appreciation of the value of electrical contrivances for domestic machinery, lighting, motive power, and for sundry work, by the increased attention they are giving to this subject. A well attended Electric Tramway and Railway Exhibition has just been held in London, and, from information elicited during the Exhibition, from the stall holders, it is evident that some good business was done. A very important Electrical Exhibition is to be held in London in September next. The promoters have every confidence in its success, and so considerable has been the demand for space that Olympia, a very large and important building, has been secured as the location. Many factors, wholesale Hardwaremen and ironmonger electricians are looking forward with pleasure to this important event.

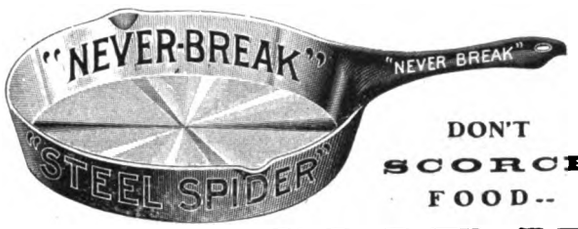
A SERIOUS INDICTMENT.

Senator Best, of the Australian Commonwealth, when addressing a large gathering of British merchants a few weeks ago in the City of London, made a serious indictment of British trade methods. He stated that "The United States of America and Germany are not only ousting Great Britain from her foreign markets, but they are flooding her home markets with goods cheaper than they can make them."

Senator Best paid a high tribute to the pushfulness and tenacity of American travelers and spoke of the tact and energy with which they assailed the markets of the world. The care with which American makers study the requirements of their customers was emphasized. He further pointed out that Americans are very quick and apt in the formation of tools specially fitted for certain purposes. He also mentioned that Australian carpenters had found American hammers more suitable for general work than those they were using; hammers were only one instance of a large group of tools of American types now being introduced in Australia very successfully. The boxing and packing of American tools is acknowledged by English merchants and Colonial buyers to be A1, but Senator Best concluded his remarks by saying that he had found English manufacturers were now closely following American lines of packing, and he endorsed the opinion which has lately been frequently expressed that the more advanced British manufacturers are well able to cope with their American contempories in the finish and packing of their goods.

CAN IRONMONGERS RETRIEVE THEIR POSITION?

It is now very generally being conceded that the ironmongery trade of this country is gradually loosing a considerable portion of its business in consequence of the encroachments of other traders. A gradual process of absorbtion has been going on until a very large portion of the furnishing ironmongery trade has been secured by house furnishers, drapers and general storekeepers. There are a number of traders who, falling far short of the American standard of a general storekeeper, carry on very extensive retail businesses, and, as these businesses grow, and as they are able to secure suitable additional premises, add first one department and then another until almost the whole of the household requirements in house furnishing goods may be obtained under the one roof. In this way drapers have added ironmongery branches, cabinet makers have laid in stocks of household ironmongery, and, even grocers have become ironmongers, selling largely culinary utensils, cleaning materials and domestic machinery. The problem to be solved is. How far this encroachment can be stayed? after which the question will arise, Can the business already lost be recovered? Such questions as these are forcing themselves under the notice of Ironmongers' Associations, and even individual and isolated ironmongers are waking up to the fact that something must be done to prevent the old trade, once so well conserved. going to pieces.



ANOTHER MOVE.

Already the builders, builders' ironmongers, and architects are becoming familiar with building trades' exhibitions, and are recognizing the importance of being able to pay periodical visits to these shows, where manufacturers take care to bring under their notice new inventions, economic contrivances, and safety appliances. Another move in the same direction, but of a more permanent type, has just been made in Birmingham, where a Builders' Exchange has been opened. Already about 230 firms have joined the Exchange, and have made arrangements to keep permanently on view specimens of up-to-date Builders' Hardware and ironmongery used in the construction and fitting up of modern dwellings, warehouses, etc. During a recent inspection of some of the exhibits I was much struck with the number of American specialties on view, which fact seemed to be rather unexpected in Birmingham the centre of the Black Country, where so much British Builders' Hardware is manufactured. Doubtless the Exchange, which will be opened daily to builders, merchants, contractors and architects will be the means of introducing more and more the use of new and improved builders' ironmongery.

THE ROYAL SHOW—A VERY POOR ATTENDANCE.

The most important event of the year to agricultural implement agents, ironmongers located in country districts, and others interested in the sale and use of agricultural implements and machinery has just taken place at Park Royal in the outskirts of the metropolis where the Royal Agricultural Society of England has just held its annual show. During the last few years the society has had to write failure, financially, in the report of its annual exhibitions. This year the well wishers of the society were in hopes that the special efforts made to redeem the past losses would be successful; unfortunately the small number of persons who passed the turnstiles has again shown that Londoners are not prepared to countenance the great work of agriculture by their presence and support. What the society will decide to do for the future is, of course, unknown, but, doubtless, some steps will be taken, either to revisit the great provincial centres, or by some process of reconstruction still continue to promote the interests of agriculture in this country. From the point of view of a well staged show, although occupying less space than on former occasions the "Royal" recently held was an ideal exhibition, not only of implements and machinery, but of cattle, horses and in fact of all that is new and dear to the heart of the farmer. The implement yards and the machinery-in-motion section were beautifully laid out and arranged conveniently so that the different groups representing the various kinds of farm work and procedure could be readily visited. Their Majesties, the King and Queen, the Prince of Wales and other distinguished visitors were present and inspected the chief features of interest on view. Although from a business standpoint the recent "Royal" left much to be desired, some very good sales were made, and, I understand, the American manufacturers who were present had very little cause to complain, their excellent machines and implements being well supported. The International Harvester Company was represented by all the different branches who have separate establishments in this country, one of the most prominent stands being that of the Osborne-Plano Company, Ltd., the British company who handle so successfully "Osborne," "Plano" and "Milwaukee" harvesting machinery.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Ashtabula, Ohio.—The Adams Hardware Co., with a capital of $10,000, has been incorporated by F. R. Hogue and others. Officers: J. G. Mitchell, president; E. N. Goddard, vice-president; H. E. Adams, secretary and treasurer.

Carson, Iowa.—G. W. Berkhimer is about to open a Hardware, stove, sporting goods and notion store.

Chicago, Ill.—Paddock & Grenoble Hardware Company has been incorporated; capital, $10,000; incorporators: L. A. Paddock, C. M. Grenoble, G. W. Allen.

Chillicothe, Ohio.—Messrs. Stocklin and Herrnstein have opened a new Hardware store on North Paint Street.

Fort Smith, Ark.—The O'Shea & Hinch Hardware Co. has been incorporated with an authorized capital of $25,000 to conduct a wholesale and retail business in shelf Hardware, stoves, tinware and agricultural implements.

Ingram, Wis.—M. Y. Cliff & Co. have opened a general Hardware business.

Jonesboro, Ind.—Jonesboro Hardware Company has been incorporated. Capital stock, $10,000. Directors: Byron S. Jackson, George H., Clara H. and Jennie Jackson.

Leonard, Texas.—The Girder-Wilson-Manning Co. has been incorporated to transact a retail business in Hardware, tinware, agricultural implements, furniture and vehicles, with a capital stock of $20,000.

Niobrara, Neb.—A. D. Hans & Co. have engaged in the Hardware and Implement business.

Oklahoma City, Okla.—A new concern under the name of the Larimore Hardware Co. will be located in the building corner of Grand and Broadway.

Parkersburg, W. Va.—The Hardware firm of Rector Bros. & Rardin, on Market street, on July 1st was incorporated under the corporate name of Rector Bros. & Rardin Company, with a capital stock of $50,000. The following Board of Directors was elected: E. C. Rector, W. M. Rector, T. E. Rardin, C. T. Dutton, J. C. Buck and E. L. Coleman. The Board of Directors organized by electing officers as follows: T. E. Rardin, president; J. C. Buck, vice-president; C. T. Dutton, secretary; W. M. Rector, treasurer; E. C. Rector, manager, and E. L. Coleman, attorney.

Reading, Pa.—The Geo. C. Unger Hardware Co. has been incorporated with $50,000 capital stock. The officers are: President, George C. Unger; vice-president, Eli Attwood; secretary and treasurer, H. Christian Huber.

Schulykill Haven, Pa.—Frank Starr and Geo. W. Beddell, of Port Carbon, on July 1st opened a Hardware store. Both are experienced in their line of business.

Texarkana, Texas.—The Timber Lake Hardware Co. has been incorporated with a capital stock of $20,000. Incorporators: E. D, Dyer, W. C. Timberlake, J. E. Morris, Will B. Stuart.

Waterville, Wash.—W. J. Kruger is opening a new Hardware store.

Changes.

Bowling Green, Ohio.—J. H. Folk, one of the old Hardware merchants of this city, has sold his interest in the firm of Hopper & Folk to J. J. Hopper, who, with his son, will continue the business.

Elba, Neb.—Miller & Brown have been succeeded in the Hardware business by F. W. Brown.

Edna, Kan.—Hammer & Tilton have sold their Hardware business to G. W. Reasor.

Franklin, Iowa.—Aug. Reuter has succeeded to the Hardware business of A. Reuter & Co.

Freeport, Ill.—Joseph Genant, who has been associated with Peter Graalman in the Hardware business for several years, has sold his interest to A. H. Wieman and the firm name will be Graalman & Wieman.

Jonesboro, Ark.—Jeter, Turner & Co. have been succeeded in business by the Jeter Hardware Co.

Jefferson, Okla.—F. P. Ewing has purchased the interest of F. J. Kover in the Hardware and furniture firm of Bradley & Kover.

Le Roy, Ia.—A. S. Stults has purchased the Hardware business of Rea & Rumble.

Lexington, N. C.—The Peacock-Springs Hardware Co. have dissolved co-partnership, J. L. Peacock withdrawing from the firm. Richard and Holland Springs have purchased Mr. Peacock's interest.

Los Angeles, Cal.—Dunham & Son have sold their Hardware business to W. F. Mueting & Co.

Marysville, Cal.—Chris Mayer and Lloyd Ashley, who formed a co-partnership a few months ago and purchased the Gridley Hardware store, have decided to dissolve partnership and Mr. Mayer has purchased the interests of Mr. Ashley in the business.

Mitchell, Neb.—A. Cochran has purchased the Hardware and furniture business of J. W. Richardson.

Monroeville, Ohio.—The Hess Hardware Co., of Monroeville, Ohio, has succeeded Zipfel & Wilhelm in the shelf and heavy Hardware, stove, implement, paint, sporting goods, plumbing and roofing business. J. C. Wilhelm will be identified with the new company.

Mounds, I. T.—W. M. Piles & Son have sold their Hardware and Furniture business to M. A. Staley.

Orange City, Iowa.—James Kraai has sold his third interest in the Hardware firm of De Cook & Co. to J. K. Brink.

Reger, Mo.—Myers & Johnson have sold their Hardware business to Rogers & Son.

Shickley, Neb.—Wm. C. Milroy has sold his Hardware business to McPherren Bros.

Sparta, Tenn.—T. H. Mason & Co. have been succeeded in business by the Mason-Everett Hardware Co.

Spokane, Wash.—The Holley-Mason-Marks Co. has been succeeded by the Holley-Mason Hardware Company.

Triplett, Mo.—Reed & Merrifield have succeeded to the Hardware business of T. G. Reed.

Utica, N. Y.—The firm of Stephenson Bros., Hardware dealers, has been dissolved by mutual consent. The business will hereafter be conducted by Robert L. Stephenson.

Wanette, Okla.—Smith & Simmons, Hardware dealers, have discontinued their branch at Asher.

Washtucna, Wash.—J. M. Pearson has sold his interest in the Hardware firm of Pearson Bros. to J. W. and W. D. Pearson, and they will continue under the same name.

West Point, Neb.—G. L. Neiburg has succeeded to the Hardware business of Neiburg & Stolzman.

Spokane, Wash.—The Hardware firm of Holley, Mason, Marks & Co. filed supplemental articles of incorporation yesterday changing its name to the Holley-Mason Hardware Company. F. H. Mason is president; F. J. Finucane, vice-president, and Gustave Reith, John D. Chickering and Julius Havighorst, employees, are directors. The change merely affects the name of the company. Its capital is left as before, at $400,000. The recent project whereby the capital was to be increased by the issuance of $400,000 in preferred stock, of which Charles Sweeny was to be a heavy purchaser, has been dropped. Mr. Sweeny stays out of the company. Mr. Finucane, his financial representative, has personally bought a large block of stock, and his formal election as vice-president has followed.

Valley Junction, Iowa.—The True & Pollard Hardware stock was recently conveyed to the Brown-Hurley Company, of Des Moines, together with the fixtures, book accounts, etc., for a consideration of $2,128.

Waterloo, Iowa.—On May 20, 1905, the authorized capital stock of the Cutler Hardware Co. was increased from $80,000 to $110,000, and amended articles of incorporation were filed on May 22. The paid-up stock, which was formerly $75,000, will be increased to $100,000. The increased capitalization of this well-known wholesale Hardware company marked an important step in the development of a business which has grown rapidly and, withal, permanently.

Wichita, Kan.—F. G. Smyth & Sons, Hardware and Implement dealers, have commenced the erection of a fine new warehouse on North Santa Fe Street, immediately north of the old wareroom which stands near the corner of Douglas Avenue and Santa Fe Street. The building when completed will involve an expenditure of $35,000. The new warehouse will easily outrival any building of the kind in Wichita, and will be used for storage and transfer of implements.

Youngstown, Ohio.—The Morris Hardware Company has decided to erect the largest warehouse in Youngstown on East Commerce Street. It will extend from Champion to Walnut Street, a distance of 315 feet. It will be 40 feet wide and three stories in height, with basement. The building will be of brick and cost $60,000. There will be no fancy work about the structure, which is planned for warehouse purposes exclusively. Work will be started at once.

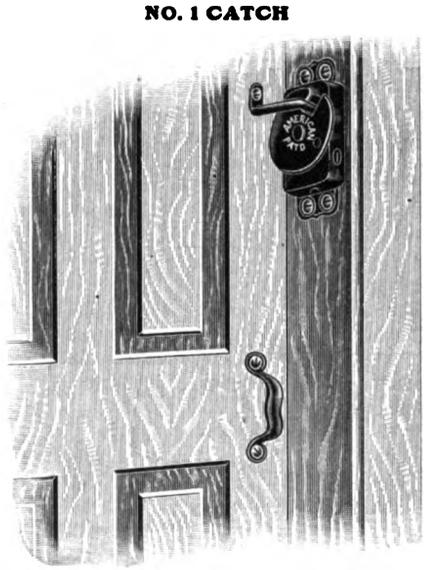
No. 2 Retails 15c.

THE BEST CATCH ON EARTH, AND AT THE RIGHT PRICE.



Sold by all Leading Jobbers.

Drop a postal for sample catch, mailed free. Attach it to a door and note result.

A mounted wood model free with first order of 3 dozen.

MANUFACTURED BY

NO. 1 CATCH

A few places where the No. 1 Catch can be used: Panel doors, storm doors, barn doors, refrigerators, gates and heavy doors, of any kind that swing on hinges.

The American Door Catch is both automatic and universal. The catch will take the place of the ordinary lock and the old style latch. It is simpler, cheaper and more effective.

AMERICAN HARDWARE MFG. CO.,
OTTAWA, ILLINOIS.

Digitized by Google

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Bartonville, Ill.—Ground has been broken for the two new buildings of the Atlas Wire Company at Bartonville. The buildings will be 350x80 and 300x50, respectively. Aside from these there will be boiler rooms, etc. All of them will be of brick, with concrete foundations. The Atlas will make wire to be used by the Keystone Fence Company and will manufacture nails and wire novelties.

Binghamton, N. Y.—The new Innes-Demarest Stove factory, that is in course of construction near Glenwood avenue, is being rapidly pushed to completion. The concrete foundations are practically finished, and there is every indication that the building wil be ready for occupancy by Fall.

Boston, Mass.—The Middlesex Oven Company has been incorporated. Capital, $50,000. Promoters: Andrew H. Allen, Henry G. W. Young, Stephen M. Yeaman.

Chattanooga, Tenn.—The Hays-Henderson Saw and Supply Company has been incorporated. The company was formally organized with the following officers: W. P. Hays, president and general manager; R. B. Henderson, vice-president and treasurer; W. J. Springfield, secretary; directors: C. H. Huston, W. L. Frierson, W. J. Springfield, R. B. Menderson, W. P. Hays. The company has purchased property at the corner of Montgomery avenue and Fort street, where a large plant will be erected in the near future. The company has been organized with a capital stock of $25,000, and will engage in the manufacture of high-class saws. It is thought that the plant will be in running order by October 1.

Cincinnati, Ohio.—The Wm. G. Fischer Stove and Range Company has been incorporated with a capital of $20,000, by W. G. Fischer, G. W. Platt, J. W. Walters, Gus Rost and Edward Steible. It will take over the business of William G. Fischer Manufacturing Company.

Columbus, Ohio.—The Safety Meter Lock Co., of Columbus, which was organized recently, has been incorporated. The capital stock of the company is $50,000. The incorporators are M. A. Corbett, J. S. Mossgrove, Benton Morrow, Edwin H. Sill and Asa J. Hatch.

Des Moines, Iowa.—Z. L. and C. L. Randleman have received patents on a device known as the Cyclone Dish and Vegetable washer. They will erect a factory at once and hope to start manufacturing the Washer by September 1st of this year. The factory will give employment to twenty-five men to start.

Freeport, Ill.—The American Incubator Company has been incorporated. The capital stock is $10,000, and the incorporators are J. W. Miller, O. R. Zipf and S. C. Ridgway.

Grand Rapids, Mich.—The Rapid Heater Company, Ltd., has been incorporated. The company is organized with a capital of $60,000. The executive officers are: C. H. Berkey, chairman; W. J. Loomis, secretary, and Norman W. Mather, treasurer.

Lowell, Mass.—The Noshake Grate and Heating Company has been incorporated. Capital, $50,000. Promoters, Joseph W. Piper, John I. Coggeshall, Kirkley Hyde.

New York, N. Y.—The Progress Scale Company has been incorporated; capital, $25,000. Directors: Simon Wormser, Charles Howard, A. H. Brown, New York.

Pittsburgh, Pa.—W. H. Say, P. Daniels and E. A. Wirth are the incorporators of the Automatic Can Manufacturing Company. They are Pittsburghers and propose to build a plant in McKees Rocks for the manufacture of a new type of safety oil can. The new company is capitalized at $5,000.

Rockford, Ill.—A company has been incorporated and stock already sold in a concern which will undertake the manufacture of W. A. Banks' soft coal stoves and furnaces. The incorporators are: A. W. and M. A. Banks, Frank S. Regan and others. An agreement has been made with the Moline Stove Company by which they manufacture the stoves for the present and also put the patent into their stoves. The company has been incorporated at $10,000, but within the next year it is the plan of the company to increase this a considerable and put up a small plant of their own.

Three Rivers, Mich.—The King Beet Tool Co. has been incorporated to manufacture sugar beet tools.

Worcester, Mass.—Whitcomb-Blaisdell Machine Tool Company has been incorporated. Capital, $200,000. Promoters: Alonzo W. Whitcomb, Charles E. Hildreth, Samuel H. Clary, William A. Blaisdell, Camilla G. Whitcomb.

Changes.

Bradford, Pa.—Work has been completed on the construction of the new brick plant of the Case Cutlery Company, situated on Bank Street. The building is three stories in height and it is composed entirely of brick. It is one of the best constructed buildings of its kind in the city.

Cleveland, Ohio.—The National Handle Company has increased its capital stock from $30,000 to $100,000.

Fremont, Ohio.—The Conway Stove and Range Co. have given contraets for the erection of their mammoth new factory in this city, to be completed by October 15. The foundry will be 300 by 80 feet; the warehouse 330 by 88 feet; the office 45 by 60 and the stock room 140 by 45 feet. The concern will employ at least 300 men.

Moline, Ill.—A run of thirty days has been completed at the plant of the Fuller Mfg. Co. in East Moline, and the work done is the first since a year ago last October, when the plant was closed. A force of twenty-five men is at work and the number will be gradually increased to forty. That number will be at work by September, when it is planned to have the plant running well on the Fall output. Since the closing of the plant the heavy stock of drills which the company had stored in its warehouses has been disposed of. The factory will probably be run steadily in the future. E. P. Greer, head of the concern, is here at present directing operations.

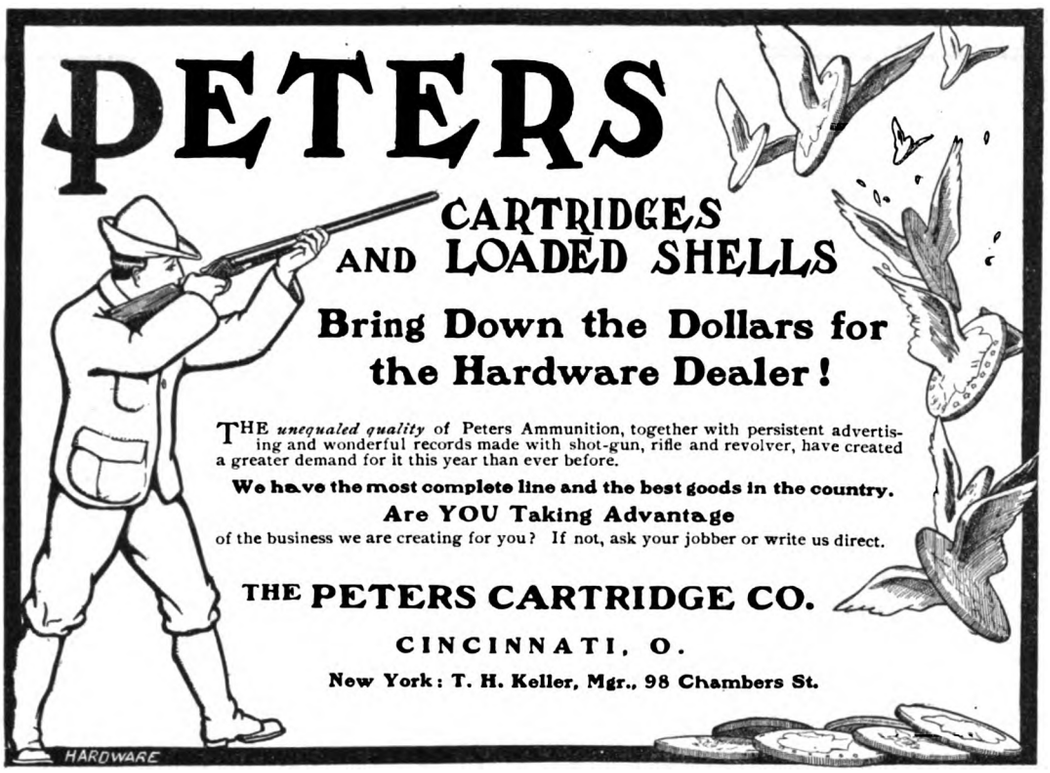
Princeton, Ill.—The Star Ball Bearing Axle Company has changed the firm name to Evans-Coppins-Starks Co.

Schenectady, N. Y.—The Wall Lock-Nut and Bolt Co. have been given a five-acre lot on which to build a factory and will shortly proceed to dispose of shares of its stock.

St. Louis, Mo.—The Ebbing Manufacturing Co. succeeds G. A. Milbradt & Co. in the manufacture of rolling step ladders. The new owner has transferred the factory from Nos. 1922 North Broadway to Nos. 1336-1342 North Eighth Street, where the manufacturing capacity is 50 per cent. greater than that of the old plant.

New Britain, Conn.—The old St. Mary's rectory property, at the corner of High and Lafayette streets, was sold to the Corbin Screw corporation, a branch of the American Hardware corporation. The old rectory was built in 1855 by the late Rev. Luke Daly, who was pastor.

Quincy, Ill.—The addition to the plant of the Lahan Stove Manufacturing Co. has been completed. This addition more than doubles the molding room capacity of this factory. The original floors for molding had a capacity for nine molders. The improvements adds space for ten more molders, or nineteen in all. This concern started up with an increased force, and expects to be kept busy for many months. This is a new industry, not one year old, and yet it has been found necessary to double the capacity of the plant. This certainly speaks well for the managers and for the product they are turning out, including their well known Lahan heater.



Minneapolis, Minn.—Janney, Semple, Hill & Co., the Hardware jobbers, will enlarge their plant considerably. When completed the establishment will cover an entire half block between First and Second Streets and next to First Avenue, except for a frontage of 22 feet on First Street. For a good many years the firm has been established at this locality and has several times enlarged its building. In 1901 it built through to First Street a five-story warehouse of the same width as the Second Street frontage except the 22 feet on the north side and the corner at First Avenue and First Street, which was 52x86 feet wide. This corner has now been secured, and the warehouse will be enlarged to cover that space. The present buildings on the corner are of no particular value. The alley is bridged over so that it is not in any way obstructed.

Oxbow, N. Y.—F. O. Hinsdale has moved his stock of Hardware from the Clark store into the Ormiston store, purchased of E. E. Downing. The store has been remodeled.

PATENTS
procured promptly and with care in all countries. Also trade marks and copyrights.

PETERS

CARTRIDGES AND LOADED SHELLS

Bring Down the Dollars for the Hardware Dealer!

THE *unequaled quality* of Peters Ammunition, together with persistent advertising and wonderful records made with shot-gun, rifle and revolver, have created a greater demand for it this year than ever before.

We have the most complete line and the best goods in the country.

Are YOU Taking Advantage

of the business we are creating for you? If not, ask your jobber or write us direct.

THE PETERS CARTRIDGE CO.

CINCINNATI, O.

New York: T. H. Keller, Mgr., 98 Chambers St.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL

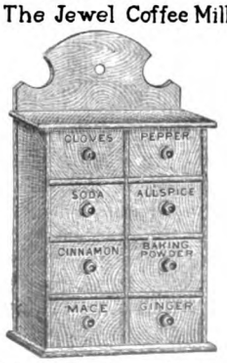
with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL

with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture



The Gem Mop Head.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET

is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Atlanta, Ga.—Messrs. J. A. Peek and Paul Watson formed a co-partnership and will open a retail Hardware and sporting goods store.

Camden, N. J.—Charles M. Buckman Co. has been incorporated to manufacture bicycles, etc.; capital, $125,000. Incorporators: Chas. M. Buckman, Robert K. Dix, C. Edgar Shreve, Camden.

Cromwell, Conn.—The Best Ammunition Company has been incorporated with a capital of $50,000. The incorporators are: Charles B. Frisbie, Cromwell; Lyman D. Mills, Middletown; Charles A. Bailey, Cromwell.

Elmira, N. Y.—The Snyder Bros. Game Co. has been incorporated by Elmer Dean, William H. Snyder, Johnson Little, E. W. Gleckler and Claude R. Snyder; capital, $15,000. All kinds of games will be manufactured.

Ft. Wayne, Ind.—Harry Crance and E. J. Wilkinson have opened a Bicycle store at 517 Cointon Street, where they will carry a stock of new wheels and conduct a repair shop.

New York, N. Y.—The Consolidated Novelty Co. of America has been incorporated. Capital stock, $50,000. Incorporators: Thos. J. McNally, John A. Wigton and Peter A. Burns. They will manufacture guns, targets and toys.

New York, N. Y.—The Palace Automobile and Machine Co. has been incorporated to manufacture and deal in automobiles, etc.; capital, $30,000. Incorporators: Hamilton Farnham, No. 208 124th Street; Charles H. Darmstadt, No. 229 West 116th Street; Louis F. Darmstadt, No. 184 South Street, all of New York, and others.

Oakland, Cal.—The Oakland Sporting Goods Company has been incorporated. The capital stock is $10,000 and the incorporators are I. M. Brentner, C. B. Lehman, A. H. Norton, J. C. Rudolph and B. B. Brentner. A general sporting goods business will be carried on in this city.

Vienna, Ga.—T. S. Methvin has opened up a new Hardware and sporting goods store, capital stock, $5,000.

Woodbine, Ia.—Messrs. Hansen and Canfield have opened a new Hardware and sporting goods store.

Changes.

Chicago, Ill.—An enormous deal in the sundry line was consummated this month, when the Excelsior Supply Company, 233-237 Randolph Street, acquired the entire bicycle and automobile sundry stock of the Western business of the Pope Manufacturing Co. The above firm is now the Western distributor for everything of the best in the auto supply line, all the well-known makers of sundries and accessories being represented in its immense stock.

Gillespie, Ill.—C. F. Bowersock has sold his Hardware and sporting goods store to the Barringer-McDavid Hardware Company, of Hillsboro, Ill. For a time the business will be continued in its present quarters.

Glens Falls, N. Y.—The firm of Budd Brothers has sold its bicycle manufacturing and sales business to Miller Brothers.

London, Eng.—The business of H. Atkin, gunmaker, Jermyn Street, has been converted into a company under the style of H. Atkin, Ltd.

New York, N. Y.—A change has recently been made in the interior arrangements of the big sporting goods store at 304 Broadway, owned by Schoverling, Daly & Gales. This consisted in a rearrangement of the departments and the fixtures, looking toward the more expeditious filling of customers' orders. The company's stock of sporting goods is now larger than ever.

New York, N. Y.—The New York Sporting Goods Company removed from its old Nassau Street stand to the store numbered 17 Warren Street. It is only a few steps from Broadway.

Philadelphia, Pa.—The A. J. Reach Co., manufacturer of sporting goods, is building a four-story and basement brick addition to its plant at Tulip and Eyre Streets. A large part of the addition will be used for storage purposes.

Redditch, Eng.—Guillaume & Co., Ltd., fishing tackle makers, have opened a London office at 65 Hatton Garden, E. C.

Rock Island, Ill.—Young & McVombs, sporting goods dealers, on account of necessary increase of stock to meet the demands of their trade, have opened a branch establishment at 1709 Second Avenue.

St. Albans, Vt.—The Robin Hood Powder Co. has begun the erection of a building to be used in the manufacturing and drying of their primers.

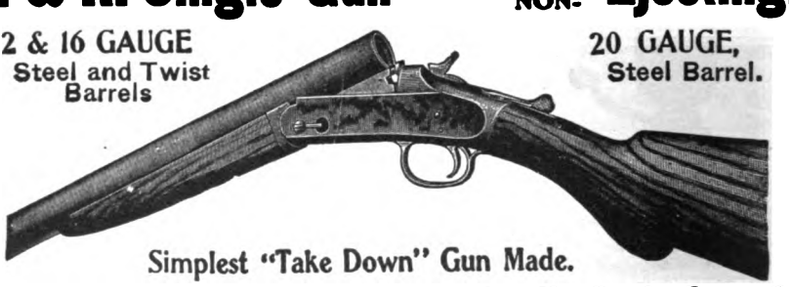
Winnipeg, Man.—The Crescent Bicycle Company, of this city, have purchased the entire stock of bicycle sundries and parts kept by the Marshall-Wells Hardware Company, who are giving up that line.

Embarrassments.

Buffalo, N. Y.—Ephraim Bros., bankrupt sporting goods dealers, have made an offer to creditors to pay 35 cents on the dollar. It is said the debts of the firm amount to about $53,000, and the assets, $20,000.

Peoria, Ill.—A petition in bankruptcy was filed in the United States Court on June 11 by Martens, Robinson & Co., Hardware and sporting goods dealers. It gives its liabilities as $7,859.52, with assets at $10,-236.67.

Miscellaneous.



Sidney, Ohio.—The annual meeting of the stockholders of the Sidney Tool Company was held at the office July 3d. The following Board of Directors was chosen: I. H. Thedieck, J. O. Amos, A. C. Getz, E. J. Griffis and W. H. Wagner. The Board of Directors organized by electing I. H. Thedieck, president; J. O. Amos, vice-president; A. C. Getz, secretary, and E. J. Griffis, treasurer. A six per cent. dividend was declared, being an excellent showing for the first year's business.

Rochester, N. Y.—A permit was granted yesterday at the Fire Marshal's office to the Gleason Tool Company to erect a factory on the lot adjoining Culver Field, adjacent to the New York Central Railroad, on University Avenue. The estimated cost will be $45,000. The contractors are Denniston & Co. The building will be 307 feet long and 100 feet wide, with two wings. It will be 48 feet high. It is proposed to rush the construction of this building so it will be ready for use in the Fall. The Gleason Tool Company recently purchased the entire tract of land in this vicinity, including Culver Field, now used as the baseball field. It is expected that next year the company will take possession of Culver Field and erect additional buildings, as the factory on which work is now to start is only the beginning of the plant.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

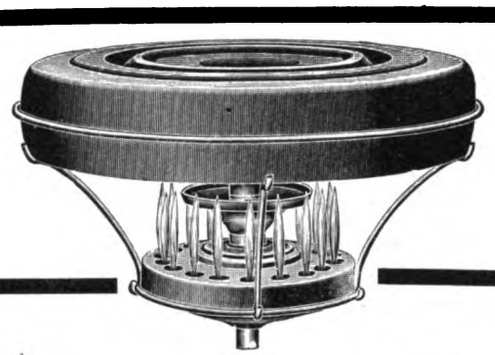
There Are Lots of Men

who think a Razor Strop is of little importance. This is certainly a mistaken idea; a good razor strop, when made PROPERLY is the WHOLE THING, makes shaving easy.

The Gibford RED-E-FOR-USE Razor Strop is a joy to the user.



If you have not sold the Gibford strop, write for catalog and allow us to send you a sample half dozen, express prepaid.

WRITE FOR CATALOG ANYWAY.

LAMSON & GOODNOW Carving Sets

HAVING had "quality" for our watchword for sixty-eight years, we are turning out Carvers that are looked up to as the standard of quality.

Putting the best material into all our Carvers, and exercising scrupulous care in finishing them. -:- -:- -:- -:-

L. & G. Excellence

is the inevitable result. More than that: They are the most popular—the most profitable to buy and sell. -:- -:-

If you are not acquainted with the L. & G. proposition, write us. We'll send you our L. & G. Catalogue and quote you L. & G. prices on our entire line of cutlery. -:- -:- -:- -:- -:-

Flawless Edge Tools

We make all kinds of Edge Tools.

Although we have been in the business since 1837, we have been growing younger every year—using the youngest machinery, the newest methods and doing everything in a down-to-date way.

Standards of Excellence

That is the recognition given them in the markets of the world. The Highest Award was given them at the Paris and Pan-American Expositions.

May be that is the reason why more of our goods are sold than of other manufacturers in our line.

Our goods and prices interest most Hardwaremen. Are you interested? Write us at once.

Mention HARDWARE.

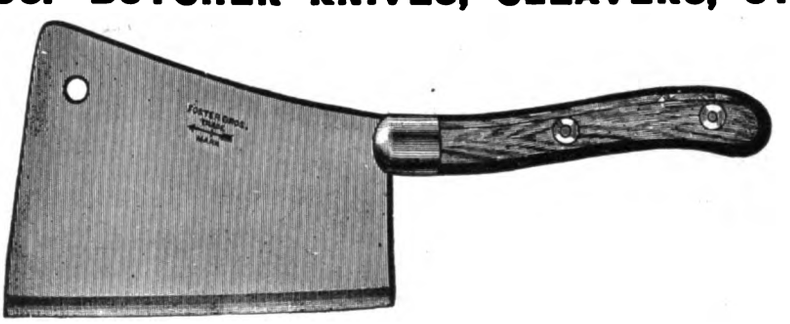
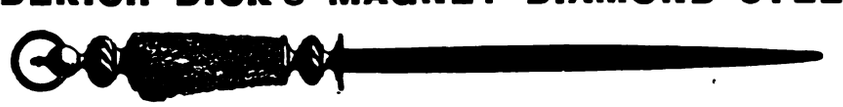
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



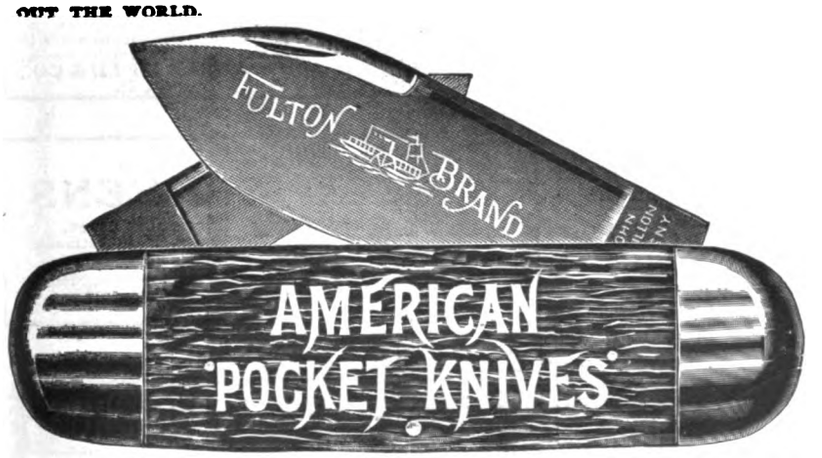
has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.



and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

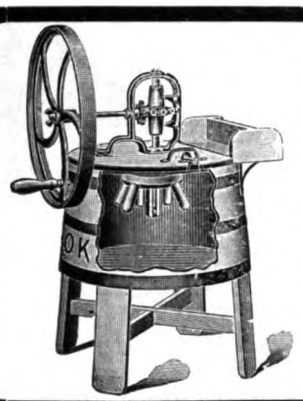
FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

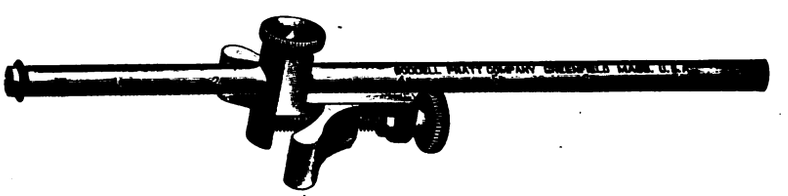
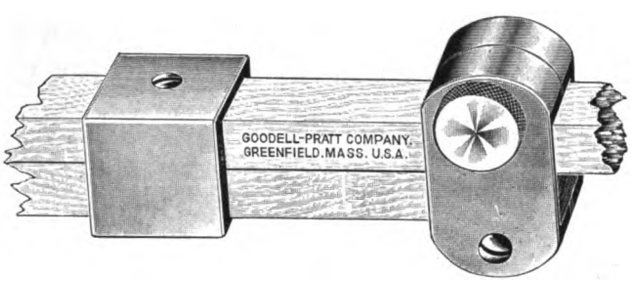
MORE NEW TOOLS

Every one was especially designed to fill a real want--the Goodell-Pratt Tools always are. They are practical first of all. After that they are made the best way we know how, and we've been making tools a good many years.



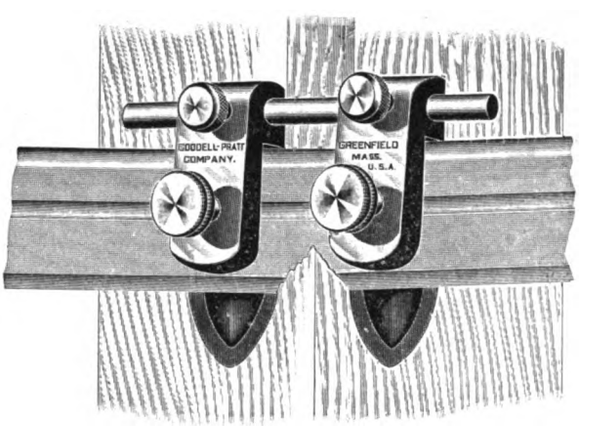


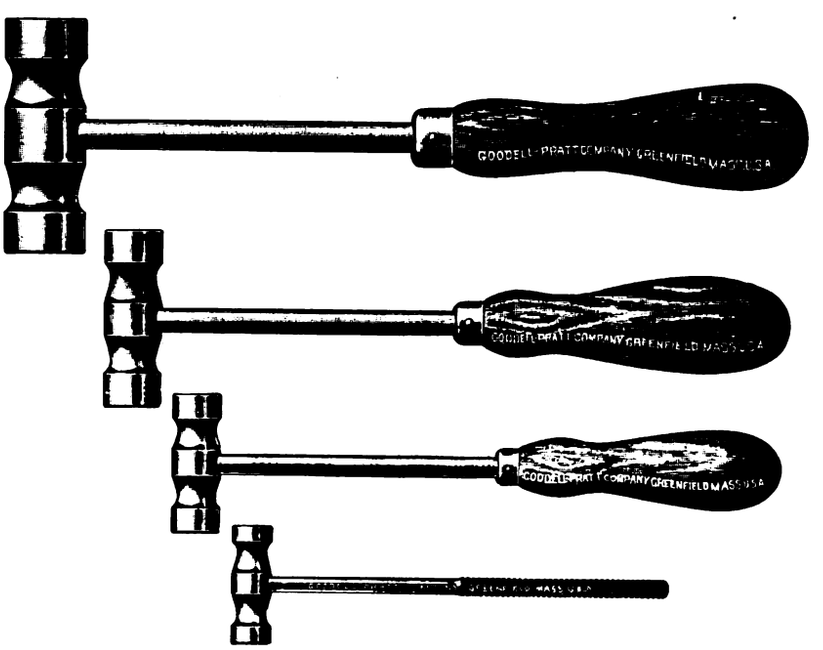
CIRCULAR OR OVAL GAUGE
No. 225

A Roller Gauge that can be used on straight work, but particularly designed for circles and ovals. Has 8 inch graduated beam with roller marker.

CIRCULAR OR OVAL GAUGE
No. 226

This tool differs from No. 225 (above) only in having a fine adjustment for the head for use on close work. The adjustment can be operated after head is clamped in position.





POLE COLLARS--Nos. 45 and 46

For use on either solid or adjustable measuring poles. The set consists of one solid and one adjustable clamp collar, each with an opening one inch square.

A great convenience for carpenters and mechanics in general. Two styles of finish—japaned or full polished and nickel plated.

DRAW-SHAVE GUIDE OR CHAMFER GAUGE
No. 44

Designed and very useful for cornering heavy timber. Insures evenness and uniformity in width of the chamfer. Helps to do good work, and saves time. Can be attached to any draw-shave.

Write to-day for our Catalogue No. 7. You ought to have it. Free.

PROFIT MAKING LINES

SMALL TOOLS.

There is perhaps no line of goods regularly handled in the Hardware store that offers such splendid opportunities for display both in cases and windows, for advertising and for the practice of up-to-date business methods, as small tools, including those used by carpenters, masons, farriers and in fact artisans in general. If the merchant is to make a success of his tool department he must use his best judgment in selecting his stock from the almost endless brands of almost every kind of tool used. He must know the requirements of his trade and be guided as far as possible by the wishes of his customers as regards brands. It is obviously impossible to keep in stock every brand demanded, but it is always a wise policy to go with the majority to select these goods that are easiest sold. For the benefit of

WINDOW OF HENRY C. SAY, ATHOL, MASS.

"Doubting Thomases" the merchant must know why the brands of tools in his stock are deserving of the patronage of his customers. Without the knowledge necessary to advance such arguments he will stand a poor chance in competing with his brother merchant or the catalogue house. While on the other hand with a well selected stock, well displayed, properly advertised and with confidence in the goods, brought about by knowledge concerning them, the Hardwareman is in a good position to keep down to a minimum the sending of orders to distant cities by his neighbors. Practically every maker of tools stands ready, indeed is anxious, to assist the dealer in every way possible to move his stock. Manufacturers are each year spending large sums for creating a demand for their goods among consumers. To their retail dealers they give booklets, circulars, window cards, cuts for advertising and many valuable suggestions for getting trade, so that the live retailer need never be in want for materials with which to get after and to hold business. The following articles from makers and dealers in tools are full of valuable advice to the tool-handling Hardwareman.

GET THE GOODS—ADVERTISE.

By F. E. Wing—The L. S. Starrett Co.

Two things which, in our opinion, are absolutely necessary to enable the retailer to sell small tools are: First, to have the tools, and second, to let people know that he has them.

Some articles can be sold from a catalogue and customers may be willing to wait while they are ordered and received, but a dealer cannot work up a good tool trade and not carry anything but a catalogue in stock.

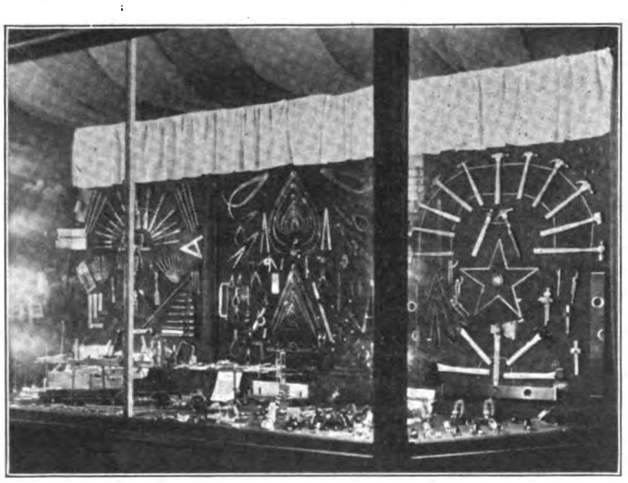
We would advise a dealer who wishes a nice trade on small tools to post himself thoroughly on what tools are required in the shops or factories in his town, also to find what makes of tools are popular among the workmen and then put in a stock of the most salable sizes, which might amount to $100 or $150.

His next step is to let people know that he has the tools, and to this end, various things will at once suggest themselves, perhaps the most obvious being to display the goods in a show window, next to advertise them in local papers. Another way is to send out one of his clerks who may have an aptitude for this class of work, among the workmen in the shops with a sample-case showing up the various tools, not necessarily to take orders at the time, but to let the workmen see what the tools are, and to tell them where they can be obtained.

When the dealer can afford to do it, it is well to put in a show-case containing an assortment of tools, tastefully arranged.

We send out a great many such cases, selling the tools at regular prices, and loaning the cases.

Another thing which is important in working up a small tool trade is to have men in charge of that department of the store and in fact all who have anything to do with selling tools, conversant with the tools, themselves, that they can explain what tools are for, how a micrometer is read, what the good points of a particular surface gauge are, etc.



Our salesmen are always glad to spend a day or so with any hardware clerk to post him on the way our tools are made, what they are used for, etc. and the number of clerks who are taking an interest in such things and wishing to have a correct knowledge of tools so they can talk intelligently about them to their customers, is rapidly increasing.

To aid the dealers in advertising our goods, we furnish catalogues with the dealers imprint on the cover, and a variety of other advertising matter, including circulars describing individual tools, card-board hangers, crystaloid signs, counter-mats, etc.

MODERN METHODS NEEDED.

By W. M. Pratt—The Goodell-Pratt Co.

It is very plain to the writer that it will be necessary for the average retail hardware merchant to adopt different tactics from

SAN BERNARDINO HARDWARE CO., SAN BERNARDINO, CAL.

those which have during the past ten years been generally in vogue if he expects to keep abreast of the procession and turn a satisfactory volume of mechanics tools.

In the first place it is necessary that he himself, or whoever he may have in charge of that department, shall carefully study the needs of his clients; he must know what tools are adapted to the use of such mechanics as he may class or wish to class among his customers, realizing that he can hardly expect to sell ship augers to a jeweler's apprentice or drill chucks to the gro-

Digitized by Google

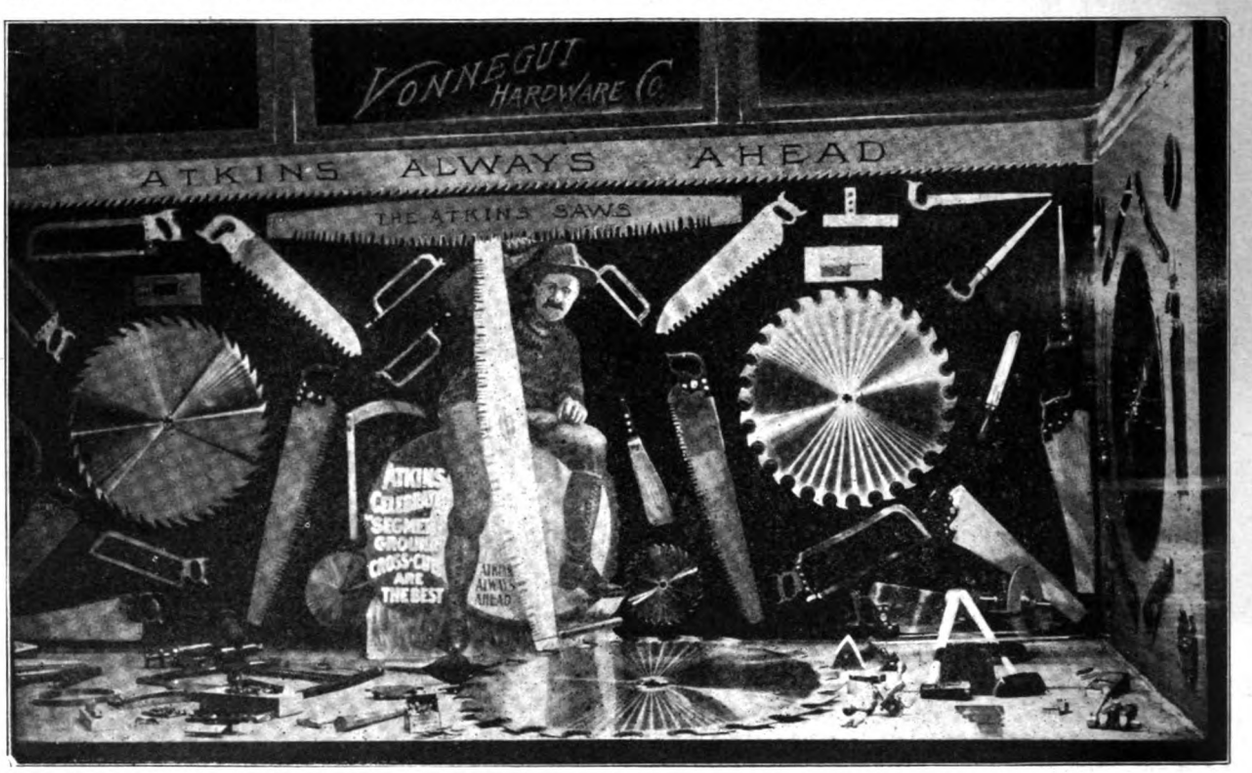
cery store. After having devoted sufficient time to the study of the outside conditions, let him next turn his attention to his own stock, see that this is well arranged, well kept in good assortment; it is not necessary that he should have a large assortment of any one line but it is essential that he should have a good assortment of such tools as he intends to carry or as are suited to the requirements of his trade.

Referring particularly to our own line here, it would be folly for a dealer to think that by carrying one single size of our Hand or Breast Drills he could accommodate all the mechanics who would call upon him for tools of this character and if he wants to hold the trade upon articles of this kind he must make his assortment complete.

One word in regard to window desplays, when making these the dealer often makes the target more prominent than the bull's eye, in other words his window display becomes a whole picture rather than an attempt to portray one article or one single class of articles. Let some certain line in his window be very complete, very striking and very prominent, it will bring them forcibly to the notice of every passerby; whereas a conglomerate assortment only leaves the recollection of the picture when what he wants to impress particularly is the memory of the article.

One more point, let him take good care that such clerks as are employed to wait upon the mechanics who call at his store are not only extremely courteous but well drilled and well posted; nothing incurs a mechanics displeasure or so quickly fills him with disgust as to have a clerk in a Hardware store make statements which are without foundation in fact and which they are unable to prove. Perhaps I have put this a little too strong and should have modified it by saying that if such statements as these are made, they should be made in a manner that cannot antagonize; it is more often the way we say a thing than the thing we say that merits approval or incurs enmity.

Another advantage is that a clerk cannot mix the sizes without putting himself to some trouble. There is also a saving of time in waiting on a customer, if he does not know exact size wanted, as by taking down one shelf box you have six sizes on the counter and are seldom obliged to reach for a second box. This also avoids putting box back in wrong place as you are likely to do in a hurry if a number of boxes are taken down. With this system we handle all small tools and general Hardware and it enables us to put an immense stock into a small space.



This saves hiring extra help as a few clerks are able to handle a large retail trade in this manner. We have had two years of experience with this system and would suggest but few changes if we were to put in fittings for a new store.

KNOW THE GOODS.

By John J. Tower—The Tower & Lyon Co.

Leaving out a class of buyers with whom price is everything—a smaller class of buyers among tools probably than in other lines—we are disposed to say that high grade tools are their own best advertisement. Those who use them will recommend them.

A free use by the retail dealers of neat and attractive show cards, adapted to catch the eye, such as manufacturers are more and more sending out with their tools, will promote inquiries by mechanics of the retail dealers. Following this should be an intelligent knowledge by the salesmen of the tools which they are showing. Unfortunately, a class of retail salesmen seem to think that inquiring mechanics know it all, and that they have no responsibility for making known the merits of the tools which they show.

A DISPLAY OF ATKINS GOODS.

In too many cases the failure to study carefully the goods leaves them ignorant of the points which need to be explained and shown up, as is the case generally with the finest tools. An experienced salesmen is one who, if not himself, a practical mechanic, has by careful study made himself familiar with the goods which he sells and is able to help his customers understand them. Nothing short of this will make a successful salesman or dealer in fine tools.

More and more, we think, manufacturers are circulating consumers by attractive illustrated leaflets or little pamphlets which, well prepared, and pointing out clearly the peculiarities of their tools, are always gladly received and in very many cases carefully studied by the mechanics receiving them, where the dealer is protected in prices. We know of no more effective way of helping the retail dealer.

A TIME SAVING METHOD.

By G. W. Campbell—The A. S. Morss Co., Boston.

We have been told by traveling men that our tool cabinet is one of the best in the country and we have also been told that our original ideas for carrying a large stock of small hardware in a small space is not equaled. Of course it is natural for us to think our way is the best, still we have had our store remodeled for two years and have not attempted to advertise it. We have had people from all over New England come in and see our arrangements.

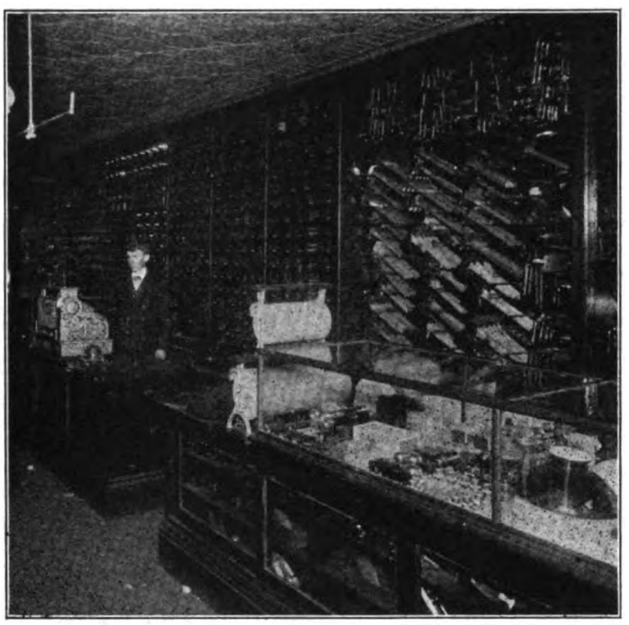
We have shelf boxes 16 inches deep with several partitions and with sliding covers so that but one section of the box can be opened at a time. We carry a stock of auger bits 3-16 to 1½ inches in diameter, eighteen sizes in all. This complete stock takes three shelf boxes 12 by 3¼ face, 16 inches deep, six sections to a box, making virtually eighteen separate shelf boxes with an opportunity of showing two sample bits on each box. A Hardwareman can readily appreciate the saving of space if he proposed showing sample bits on his box.

WINDOW DISPLAYS BRING BUSINESS.

By Orr & Locket Hardware Co., Chicago.

We keep one section of our window full of tools the year round; no matter how much other stuff there may be that should be shown, that section is simply re-arranged, but tools are never absent from our front windows. We find that by displaying unusual goods a demand for new goods is worked up without any effort on our part outside of dressing the window.

As far as advertising goes, we have been advertising in a mis-



Digitized by Google

cellaneous way for several years, but now find that large orders come best by catalogues, and in some lines of business a catalogue is a vital necessity, and a necessity to any firm who desires to give their goods even a hearing. We believe quite thoroughly as far as this line goes in the method of a "name and a price" as applied to our advertising, and in many cases help it out with cuts. We also issue special catalogues of any sub lines in the Tool Department that are of enough importance to warrant such a catalogue. These catalogues cost considerably less than the large ones, and in most cases are reprints from the large plates, and we find they do very good execution.

CLERKS MUST BE POSTED.

By L. H. Schmitt—The H. D. Smith Co.

Replying to yours of the 13th, we think that good tools well displayed, salably priced and offered by clerks who are posted are a great help to retail selling.

AN INTERIOR VIEW, A. S. MORSS CO., BOSTON.

The writer served his time in a retail store and was brought up to consider the learning of the Hardware business the same as learning of a trade. Great care was taken to impress upon him always to try to sell the better, and if possible the best, grade of goods that the house kept for sale, the principle being that even if the percentage of profit was not larger the net amount of dollars and cents was.

You ask—how do we assist the retailer to sell our line? The principle thing with us is to get the retailer interested in our line, after that our goods are so distinctive and carry so much of their value visible that all we ask our retail friends to do is to give them an opportunity to sell themselves.

THE TRADE PAPER HELPS.

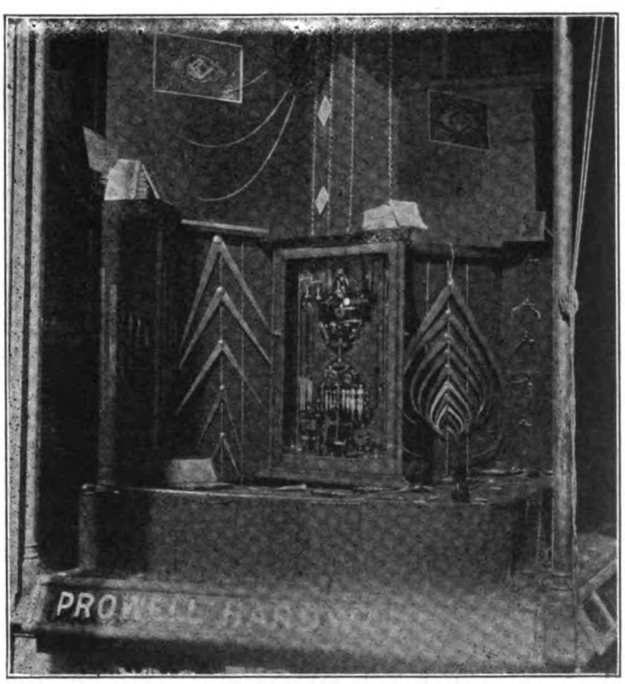
By Ford Auger Bit Co.

Replying to your favor of July 13th, would say we find that a good ad. in a trade paper is a help to the retail dealer in selling small tools. They not only get information regarding the tools which they sell from such ads., but also suggestions which they can use in their own advertising. We enclose herewith a copy of an advertisement which appeared in Hardware several months ago, and which has since been copied in local papers by a great many retail dealers. We gladly furnish electrotypes for such advertisements.

Another thing which we do to help the retail dealer is to furnish small cards illustrating our goods and mentioning some of their good points. These cards have a blank space upon which the retail dealer may stamp his name, and they may be put upon the show case or mailed out with monthly statements.

We find that it helps also to back up Ford tools by the most liberal guarantee that it is possible to give.

HELPING THE DEALER.



There are few firms among the manufacturers of Small Tools who are giving more attention to assisting dealers in moving their goods than the L. S. Starrett Company, Athol, Mass. This firm has recently sent us an assortment of samples of a number of the advertising novelties which they are furnishing to retail dealers in large quantities. Each article in the entire lot is made up with an apparent disregard for expense, the main idea being to get out something that the dealer can show to an advantage, something that will attract attention to Starrett's goods and at the same time that will add to the general appearance of the store. Among these novelties are the following: A felt change pad in red, with a very neat design in white and black; a crystaloid easel sign in red and gold, showing at the top a picture of Mr. Starrett; at the bottom the firm trade-mark and across the center in large, white letters, "Starrett Tools;" a transparent sign that will adhere to show windows; this shows the Starrett trade-mark and the usual inscription, "Starrett Tools;" Window Cards and Inside Hangers are furnished in a large variety of styles and designs. These are all carefully printed in large type so that they can be read with ease. Each one shows either the Starrett trade-mark, with some strong comment concerning Starrett Tools or illustrations of different tools. All are fitted with cords for hanging. Smaller hangers, very attractively printed on both sides, are also supplied; besides this, the Starrett Company get out a very handsome line of small booklets and circulars on which are provided blank spaces for the dealer's name, and the well-known Starrett tool booklet filled from cover to cover with valuable information concerning goods of this class.

* *

An excellent line of "Dealers Helps" are being supplied to the retail trade by the Massachusetts Tool Company, Greenfield, Mass. Among these are an attractively printed line of circulars, booklets and catalogues; a complete nickel plated metal and glass show case which holds a very modest display of this company's tools and which is most attractive for such purposes. This case is made so that it can either be hung on the wall, stood on the counter, or placed in a show window. Wherever it is placed it adds greatly to the attractiveness of the store. This is a matter worthy of the investigation of all dealers who are handling small tools.

THE NOVEMBER CONVENTIONS.

AUGUST 10, 1905.

Editorial Trade Review

The volume of business being transacted by retail merchants seems to be rather larger than usual at this time of the year, and demands on jobbers for quick shipment from stock of Summer goods are of a very satisfactory character.

Merchants' stocks in general are pretty well thinned out, notwithstanding the fact that their purchases earlier in the Spring were heavier than customary.

Our San Francisco letter in this issue has a distinctly optimistic tone. All lines of business on the coast seem to be in an exceptionally prosperous condition.

The presence of yellow fever in and around New Orleans will prove a serious handicap in that section for several weeks, but with the Federal Government in charge, matters should be in proper shape by the time Fall trade really opens.

Manufacturers throughout the whole country seem to be waking up at last to the necessity of early and vigorous action in reference to our foreign trade. Reciprocity treaties with our best foreign customers are needed, and it is hoped that action in that direction can be taken during the coming session of Congress.

Further effort will undoubtedly be made during the next session of Congress to put through a parcels post law. Hardwaremen throughout the whole country should, in every way possible, co-operate with the officers of the National Retail Association and other organizations in the effort to prevent the Post Office Department playing into the hands of Mail Order Houses. The cry, "The Express Companies Own the Government," used by the Parcels Post promoters, has an attractive sound, and will no doubt win a large following, but, in view of what has been printed in the trade press and the addresses in association meetings on this subject, it would seem that few, if any, Hardwaremen could so far overlook their own interests as to be found in the enemy's ranks.

The address of W. P. Lewis at the Michigan convention, printed in another column of this issue, is the strongest kind of an argument for State Associations. It would seem that Hardwaremen who will not join their State organizations for any other reason would be led to take such action by the low price for insurance offered by the National Company.

THE FUTURE OF OUR EXPORT TRADE.

By Wm. M. Pratt.

The student of political economy, international law, or even of commercialism, who makes an attempt to study the statistics showing our exports and imports, will certainly be given food for reflection. How much more then must this subject appeal to those manufacturers who have through hard work and diligent perseverance been able to build up for themselves a very attractive volume of business in foreign markets; in some few instances this may have been accomplished because perhaps of the very attractive prices which manufacturers have seen fit to make in order to keep their productive capacity up to a certain standard, but I believe this is an exception rather than the rule, that the majority of those who have gone after the foreign trade have worked it up along other lines.

Now, if this trade is at all valuable to us, if we desire to foster it with the hope that it may even continue to grow, it is but natural that we should look around and take careful note of what the future may have in store for us, and we find at once that the narrow commercial policy of this country towards the merchants abroad is having a detrimental effect upon our interests there. We find that there is a feeling in all the principal markets of Europe that the United States is not playing fair in this respect, that it is willing to give, but it does not wish to take commodities; it calls for it's exchanges entirely in gold and it is arousing a sentiment not only in the minds of the foreign buyer, but in the minds of the foreign consumer, that if such tactics are to be continued, would it not be well for them to protect their own industries and keep their trade at home?

The history of an exchange of commodities between countries has always shown the preponderance of the give and take principle, there must be a mutual desire, a feeling of friendliness and good fellowship, if such trade is to continue and be made profitable. Now in 1905 during our great commercial transition the political parties of this country differ upon this subject, it is however the party in power to whom we must look for help, that is the party which stands for the protection of American industries. Let it be protection in the broad sense of the word, a protection which shall give to the small manufacturer—who has through his diligence worked up a small export business—to the small producer and the wage earner he employs, the benefit of a broader commercial policy, either in the form of

RECIPROCAL TREATIES,

trade agreements, or a reduction of the present tariff, which shall benefit them in the same manner that the protective tariff has fostered and benefited the larger industries of this country during the past decade.

The writer feels like saying to those two Solons in Washington, whose narrow mindedness upon this question is exasperating to say the least, "Quousque tandem abutere, Catilina, patientia nostra?" (How long O Cataline will you abuse our patience?")

How long will you allow your eyes to be blinded and your ears to be closed to the wishes and appeals of your constituents? How long will you force to remain within it's shell the embryonic bird, which is no longer an embryo but which is now reaching a stage of development when it can well be given greater freedom and allowed in a measure to support it's weight upon it's own wings? Will you still continue to take counsel only with those overgrown and abnormally wealthy trusts and institutions whose profits have been largely augmented because of the fact that an excessive protective tariff has been in vogue? Or will you allow the light of progress to drive out your prejudice and let the voice of the people be heard?

This proposition is a simple one, if the United States desires to remain within it's own boundaries and does not wish to go abroad in search of a market for it's surplus products, then the wall which we have built about our boundaries can be kept at it's present height; if, however, we do desire to take our place among those nations of the world and so become a factor in the world's commercial life, then must we adopt a more liberal commercial policy and show a disposition at least to play fair.

It has some times been said that this issue was largely one which interested New England alone. I want to say to the readers of this Journal that it is not only the manufacturers of New England, it is equally the stock raisers and grain growers of the West, the cotton planters of the South, the machinery manufacturers of the Middle West and the varied interests of the Pacific Coast, whose future prosperity must depend, and largely depend, upon the speedy and satisfactory settlement of this issue. The opening gun which was fired by the Boston Chamber of Commerce, Committee of One Hundred, more than

Digitized by Google

a year ago is echoing in various other centers; in East and West and South calls have been issued for conventions and gatherings at which this subject is to be taken up and discussed, and public opinion aroused.

Let the Journals who number among their readers people interested directly or indirectly in the prosperity of our industries pass the good work along, the endless chain of public opinion can do its work quickly and well; let us so arouse the voters of this country that Congress will feel compelled to take speedy action in order that the valuable trade relations which we have been able to establish and maintain in foreign countries may be fostered and preserved.

THOMAS COLDWELL.

Thomas Coldwell, president of the Coldwell Lawn Mower Co., Newburgh, N. Y., died Friday, July 28, at his home in Newburgh. He had been in poor health for several years and had been spending the Summer at his country home near Stormville, but was brought to Newburgh shortly before his death.

Born in England in 1837, his father brought him to America in 1841, and the family settled at Matteawan, N. Y. After a brief attendance at school he learned to cut files at the age of eleven years; at fifteen he was grinding files with his father and

THOMAS COLDWELL.

at eighteen was bound out as an apprentice to learn how to forge files. He invented a file cutting machine in 1863 and was practically the inventor of the first gun carriage of a certain type made for the government. A little later a file stripping machine was produced by the subject of our sketch, and in 1805 Mr. Coldwell entered in the employ of H. N. Swift then the only lawn mower manufacturer in the United States, whose yearly product was about 150 mowers. These mowers were very heavy and crude in construction and naturally the tools with which they were made were if possible more crude than the machines themselves. Mr. Coldwell at once applied himself to the inventing of new tools for making mowers and as well to the improvement of the mowers themselves. Practically every important part of the modern lawn mower is the result of the work of Mr. Thomas Coldwell.

Chadborn, Coldwell & Company was organized in 1870, being changed the following year to Chadborn-Coldwell Manufacturing Co., with a capital of $4.000. Of this concern Mr. Coldwell was president and held the office for over twenty years. In 1891 he organized the Coldwell Lawn Mower Company with a paid-up capital of $60,000. It started business with a capacity of from 150 to 250 mowers a day which found their way to all parts of the globe, due to the tireless energy of the president of the concern in making improvements for machines and in reaching out for trade.

In spite of his many business interests, Mr. Coldwell found considerable time to give to religious and benevolent work. He was for many years an officer of the First Baptist Church and a leader in Y. M. C. A. work. He is survived by two sons and one daughter. Both of the sons were associated with him in business, the eldest, William H., being general manager and secretary of the company.

SPECIAL BRANDS FOR THE RETAILER.

By C. P. SHERWOOD.

I must confess I am in favor of "Special Brands," be it the effort of Manufacturer, Jobber or Retailer. In my experience of Retail Hardware business of 35 years, I have found that the merchant becomes to his customers, if he has always sold the best goods he could buy and stood by them, a standard of value, and his word as to the quality of such goods goes without especial regards to whose "Special Brand" is on it. I, therefore, have argued that one who, from the results of his own efforts, reaches success with an established Trade Mark or Brand he is entitled to such benefits and should have just as much field to reap those benefits as though he made the goods because he has created the demand for them, as results of his labors.

I have always found the Jobbers, handling many goods under their Special Brands, to have had goods of good quality that gave good satisfaction, their warrantee being as good as though they had made them, and in years brought them a special trade, earned by their own efforts, which should be theirs and of profit to themselves. I think if the retailer followed out the idea in his whole trade of Special Brands and devoted his efforts to establish such in his business he would find that, as the years rolled by, he had a trade that no one could get from him easily. No Catalogue House could duplicate his Brands, as they have been offering most all the Manufacturers' Brands to our customers in the past at ruinous prices.

If you want to see the results of "Special Brands" and the benefit arising therefrom to those who so use them, I would show you the Seed Jobbers, the Plumbing Jobbers, Drug Trade, etc., etc.

In New York City a large retail Seed House sell everything for the Farm and Garden under their own name, seed, implements, etc.

Through the efforts and labors of the many years of successful dealing this Retail House educated the customers to believe that their brand of goods is synonymous with themselves and the customer will have no other unless it bears their name, although the same goods, under another name, might be bought elsewhere for less money—so much for "Special Brand."

"Special Brands" are not subject to competition, the manufacturers cannot control them, the originators are masters of the situation; and, gentlemen, unless you establish some identity, let it be Special Brands most assuredly—as the best means—you are not your own masters and the originator of the Brand holds the trade.

There are very many established brands of goods whose merits and advertising have created a popular demand and the profit to the retailer is very limited in many cases because the maker of these goods through his own efforts holds the situation and reaps the benefit, and every one selling finds the tendency to cut profits and thereby make an undesirable business.

MAKER'S BRAND—DEALER'S NAME.

(National Cutlery Co., Detroit.)

To say "Special Brands" to a manufacturer is like shaking a red rag at a bull. Personally we are very frank in our position in regard to this matter. We are building up a reputation on the "S & S" brand of cutlery, axes and tools which we are able to do on account of the quality of the product and we feel that it would be very poor business policy on our part to make up an article of this quality and put it in the hands of those who would compete with us with our own goods under some brand which they own and which they can have made for them by any manufacturer after their reputation has been established. We are securing all the business that we can handle on our regular factory brands and it has not therefore been necessary for us to supply any "Special Brands," except where, in the case of a few large accounts, we put on their name in connection with our registered "S & S" trade mark.

We thoroughly realize the dealers' position in regard to this matter and we feel that it is wrong for a manufacturer not to take his (the dealers) protection into consideration. By the dealer's name appearing on the article which has given satisfaction, the consumer is constantly reminded of the store where the purchase was made and this of course constitutes a permanent advertisement for the dealer to which he undoubtedly should be entitled providing he places a sufficiently large order as a consideration for the extra expense entailed in putting his name on the article.

We accomplish this result by putting a dealer's name on the product in connection with our "S & S" and we protect him in the trade in his locality as it is to our mutual advantage to have him feature the line and work up a trade on same which he surely would not do unless we were willing to protect him in the trade which he has established. This is the position which we take on the "Special Brand" question, and we have met with no serious opposition.

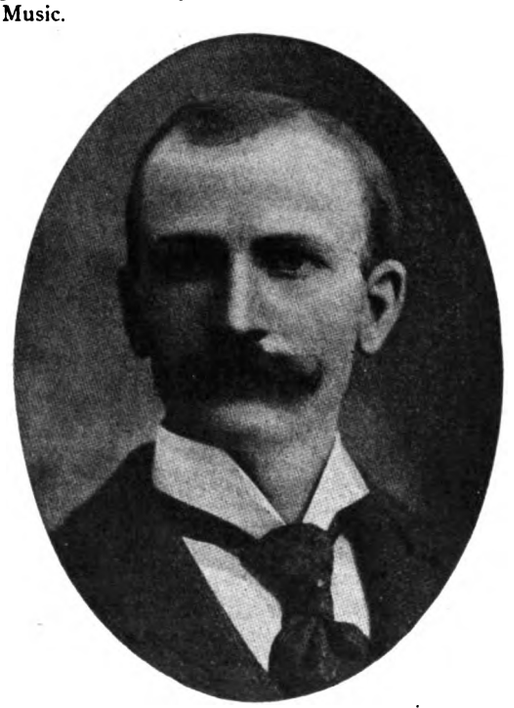
MICHIGAN CONVENTION.

During Wednesday, Thursday and Friday of this week the members of the Michigan Retail Hardware Dealers' Association are in convention at Saginaw, Mich., the headquarters are at the Hotel Vincent and the convention's sessions are being held at the Germania Temple of Music. The most of the entertainment features are to take place in Germania Garden. The various Hardware manufacturers are well represented as usual and a large number of interesting displays are to be found in rooms throughout the hotel. The past year has been a very prosperous one for this association, it having added to its membership list nearly 300 new members, making their present membership over 500. The following is a programme of the meeting:



WEDNESDAY, AUGUST 9TH, 1905.

OPEN SESSION—9.00 A. M.

Meeting of the Executive Committee at Executive Headquarters, Parlor A., Hotel Vincent.
Reception of members and enrollment of new members.
Payment of dues and distribution of badges.

2.00 P. M.

Meeting called to order by the President at The Germania Temple of Music.

PRESIDENT J. B. SPERRY.

Address of Welcome—Hon. Henry Lee, Mayor of Saginaw.
Response by J. B. Sperry, President of the Association.
Appointment of Committees on Credentials, Constitution and By-Laws, Resolutions, Question Box, Legislation, Finance and Nominations.
Reading of Minutes. Reception of Communications.
Annual Address of the President.
Annual Report of the Treasurer.
Annual Report of the Secretary.
Address, "Our Friends"—T. Frank Ireland, Belding, Mich.
Voluntary Remarks by Delegates.
Paper—The History of our Association. Henry C. Weber, Detroit.
Reminiscences by members.
Address.

8.00 P. M.

Individual entertainment of visitors at Germania Gardens.

THURSDAY, AUGUST 10TH, 1905.

OPEN SESSION—9.00 A. M.

Address—Subject to be selected. E. B. Standart, Holland.
Discussion of the above address.
Address—W. P. Bogardus, Mt. Vernon, Ohio, President The National Retail Hardware Association.
Remarks by Members.
Address—Mutual Fire Insurance. W. P. Lewis, New Albany, Ind.
Discussion led by A. T. Stebbins, Rochester, Minn., and C. A. Peck, Berlin, Wis.
Address—The Traveling Man—By one of them.

2.00 P. M.

Closed Session for Retail Hardware Dealers Only.
Reports of Committee on Credentials, Constitution and By-laws, Finance, Legislation and Resolutions.
Consideration of Committee Reports.
Unfinished Business—New Business.
Opening of the Question Box.
Report of Committee on Nominations. Election of Officers.
Selection of the next place of meeting.
Good of the Order.
Adjournment.

8.00 P. M.

Bohemian Night for Hardware Dealers and Friends. Dutch Lunch and Vaudeville Entertainment given by Saginaw Merchants, Jobbers, Manufacturers and Visiting Salesmen at Germania Gardens.

FRIDAY, AUGUST 11TH, 1905.

Jobbers, Manufacturers and Traveling Representatives Day.

The entire programme has been turned over to a committee of salesmen of which T. J. Furlong, St. Ignace, is chairman and announcement in regard to the details of the programme for this day will be made at the convention.

ANNUAL ADDRESS.

BY J. B. SPERRY, PRESIDENT MICHIGAN ASSOCIATION.

It was just eleven years ago when a few of us met in Detroit and organized this association. Persistent efforts have meant life to this body and we have grown in membership and in strength, until now we have become a necessary adjunct to modern business methods.

When I look about me and see the familiar faces of my associates of years gone by, mingled with so many new members, my heart swells with pleasure, and it is hard for me to express my gratification and the satisfaction I feel in the work which has been done in the past year by your officers and body. Don't go away and leave anything undone; don't go away and say we should have done this, or we should have done that. Do it now, that's what we are here for. We're not orators or public speakers, and we don't expect to hear any flowery talks. We're Hardware dealers, met in convention to exchange ideas and opinions, and that is what we have got to do in order to make this meeting the success I hope to see it. Every one of you has some idea that might benefit the other; let's have it.

Never before has our association been in such a healthy condition. The work of our officers the past year has resulted in more than doubling our membership, and we are now in a position to get better results than ever before. Our influence increases with our strength. We have the help and confidence of the jobbers and the sympathy and support of the manufacturers. The results depend on ourselves. I cannot too deeply impress upon you the necessity for united action, for active members and for the exchange of ideas and opinions. Don't be selfish or inactive and remain away from our convention just because you can reap the benefits anyhow; get in the game and give your help. That's what we want.

National Association work I will say nothing about, as we have with us again our worthy national president, Brother Bogardus, whom you have to know to appreciate. Any one going away from this convention without making his acquaintance misses a great treat.

Our friend Ireland, from Belding, will also talk on what the National Association is doing. The different Hardware Mutual Fire Insurance Companies are all on a sound financial footing, and are saving their policy holders from 25 to 40 per cent. of the cost of the old line companies. They are past their experimental stage and I believe they are worthy of our endorsement and patronage. By taking out a policy, you can easily save your association dues and the expense of attending the Annual State Convention. Later on you will hear more about Mutual Fire Insurance.

Now, gentlemen, just a recommendation and I am through. Increasing our membership means more work for our secretary. He is paid but a trifle now for his labor, and that trifle is still on the debit side of his ledger. I would recommend to this body that he be reimbursed for the work that he has done in the past, and that there be some material advance made in his salary. Our bank account is double, yes, treble, that of any previous year, and I feel justified in making this recommendation.

In closing, I might say that I entertain great hopes for the future of this organization, and I wish to thank the officers and Executive Committee, that have ever been ready to assist in the work whenever called upon to do so. I want to again impress upon you the necessity for a free exchange of thoughts and ideas, new members as well as old.

PARCELS POST.

BY PRESIDENT W. P. BOGARDUS, OF THE NATIONAL RETAIL ASSOCIATION. DELIVERED AT THE MICHIGAN CONVENTION.

There is, perhaps, no question so vital to the retail trade, no matter what line it may be, as to the question of Post Parcels. A question whose ramifications reach out to all lines of trade, and affect all kinds of retailers.

And it is one of the questions that will not be settled until it is settled right. Theoretical Post Parcels is a dream of certain theorists who look on the government as a power organized for their protection and upbuilding, a power whose duty it is to care for their individual welfare and success. Forgetting that the government under which we live is a political government devoted solely to the advancement of our political interests, not in any way a business government established for the purpose of making money, but established for the purpose of protecting the political rights of the people, such as life, liberty and the pursuit of happiness. To take any other position means that we depend on our government to help us make a living.

Some may say that we do this when we ask for a tariff. But that is hardly fair, for tariffs are made for the country and not for individuals; for the development of industries that will add to our population by increasing the opportunities for work, stimulating immigration, that our land may be tilled, our factories may resound with the busy hum of whirling wheels, our mines yield their wealth, and the white wings of our commerce dot every sea.

It is argued, by some, that the Parcels Post is for the greatest good of the greatest number, that the consumer will receive the benefit, and, as they are the largest majority, therefore the enlarged Post Parcels will be a national benefit.

In the development of this idea it is proposed that all the needs of the consumer shall be supplied by transportation facilities furnished by the government, and so there will be no need of express service or other private means of transportation, for the government will assume the transportation of all goods, and will take care of all of the commerce of the country.

The new scheme suggested by the Postal Reformers is under the plea that it is a movement of the Manufacturers' Association of New York. In the furtherance of this project there has been issued and sent broadcast over the country a little folder, sometimes blue and sometimes green, purporting to come from the Manufacturers' Association of New York; who these manufacturers are or who are the officers of the association is not stated, urging those who receive the folders to sign their names to a portion of the folder and send it to their Congressmen, and this is what they want sent:

First: Letters and sealed packages at one cent per ounce or fraction.

Second: All other mailable matter at a rate high enough to direct the large bulk of merchandise to natural channels of distribution, but low enough to serve the useful purpose of a Parcels Post.

In 1904 a measure was introduced into Congress by the Postal Reformers, proposing to carry a pound for a nickel and eleven pounds for a quarter, and in favoring this law they argued as follows: "To the American to-day the most important department of public intelligence is the advertising department." The cent a pound publishers' post makes this news available. Any attack on this service is an attack on every business advertiser in the publishers' columns. The Postmaster-General's proposed increase from one to four cents per pound in the tax on the circulation of the magazine press would not only do a grievous wrong to the publishers and to the reading public; it would seriously damage the business interests of the country. This year in arguing for the two rates of postage, they say: "The products of industry and agriculture follow the natural channels of distribution via the transportation lines to the wholesaler and retailer. There is one exception. The publishers of second class matter have a special channel of distribution direct to consumer, provided by Congress, namely, the United States Mail. Their product is taken in bulk, without stamps, at one cent per pound, while the product of every other industry is compelled to pay 16 cents per pound and stamp each package. The result is that 67 per cent. of the total of matter carried is of the second class, which produces less than four per cent. of the total revenue. The subsidy to publishers in second class mail rates precludes the press from printing these facts." Last year it would be a grievous wrong to increase the tax to the publishers. This year they demand equitable laws that will do away with "the waste and abuse" that prevails "under the laws now operative."

To class magazines and newspapers as mere merchandise is neither fair or true. The standing of our country among the nations of the world is largely due to the facilities we have enjoyed to gain knowledge and information by the almost universal distribution of the newspaper and magazine that comes daily, weekly and monthly to our homes.

The disclosure of the gigantic municipal corruption that has disgraced our large cities, the story of the mighty frauds that have been perpetrated by great combinations and trusts, that have robbed the public and defied the laws; the history of the great financial transactions that when brought to light have been found to reek with bribery, to be stained with perjury, and robbery of the innocent, and the consequent awakening of the public to make an indignant demand for a cleaning out of the Aegean stables of municipal corruption, the regulation of the combinations and trusts, the complete investigation of financial transactions to the end that a thorough knowledge of these things would make it possible to apply remedies, so that the public might be more thoroughly protected and their interests better conserved. Shall the story of the great inventions that have made living more pleasant and homes more comfortable. the record of the great triumphs in science and literature and art be classed as merchandise to be shipped through the mails at the same rates as a spool of cotton or a bar of soap?

The proposed plan is unreasonable, for with one cent postage on letters and only one other class of mail matter our mails would be burdened with such an amount at so unprofitable rates as to seriously cripple the entire system. Besides, there is no equity in sending merchandise a long and short distance at the same price. It costs more to send merchandise a thousand miles than it costs to send it one. Now, if that is true, then the act of the government carrying any merchandise in the mails is radically wrong. It is not fair to charge no more for a long haul than a short one, for the long haul gets the transportation for less than it is worth. It is not just to the short haul to pay as much as for the long haul, for then the charge is excessive. It is not equity for an average to be struck between the cost of the long and short hauls, for then some are favored at the expense of the others. To carry out the proposed modification of the postal laws would result in throwing the large majority of retail trade to the large cities. "But," says the advocate of the new ways, "see what low prices the consumer will get." Is it always profitable for the consumer to get the lowest price? Does not the consumer pay too much, no matter what the price, when he destroys his home market? Does the consumer gain anything when he sends his money away from home; when he has no selection of the goods he buys; when he has to take what is sent him, whether it pleases him or not; when he contributes to the wealth of great city stores, who never in any way help him to bear the burden of his taxes; who are interested in none of his home improvements; who add in no way to the tax duplicate of his community; who never buy any of his products, and so keep the money he has paid out in circulation in the community where he lives, but are ever a drag on his resources? Do you say that the low prices given the consumer compensate for all these drawbacks? Will the enlarged Post Parcels be a good thing for this country if the results follow as they have followed in other countries where it has been thoroughly tried in the concentration of business in the large cities? Is there any business sense in the government undertaking to carry merchandise at five cents per pound through the mails when it costs sixteen cents per pound for transportation and the other necessary expenses for handling? Can we endorse any line of action on the part of the government that looks to its entering into active competition with the citizens in business enterprises?

Post Parcels is a delusion, the scheme of radical men who look to countries governed by monarchs and kings for their inspiration, and who are willing to have our government supply our wants and minister to our comfort. It is not favor that we want, but a fair chance to earn an honest living in competition with our fellows.

MUTUAL FIRE INSURANCE.

BY W. P. LEWIS, TREASURER NATIONAL HARDWARE MUTUAL FIRE INSURANCE COMPANY. ADDRESS AT MICHIGAN CONVENTION.

My purpose here is to urge the members of this association to carry policies in the National Hardware Mutual Fire Insurance Company, of Huntington, Pa. Michigan has an association membership of 550. If every member had a policy in our company for the limit, namely, $3,000, we would have in force in Michigan alone $1,650,000. A showing of this kind would so exhilarate my nerve ganglia that I would feel like blowing myself for a trolley ride to Bay City. But what are the facts? Michigan, with 550 members, has 30 policy holders in the National Insurance Company, or about 6 per cent. of her membership. Michigan, with a possible total risk of $1,650,000 in the National Insurance Company, has a total risk of $47,000, or about 3 per cent. of the amount they are entitled to carry. On this exhibit I am compelled to abandon that Bay City outing. What is a fair inference from this condition of affairs? There are two negative views. First, that Mutual Fire Insurance is of little value, or second, that 94 per cent. of the Michigan membership are slow. I shall combat the first proposition and leave the second for the members

Digitized by Google

to combat. In presenting, therefore, the reasons which have been sufficient to warrant the organization of a National Mutual Fire Insurance Company, I shall ask a bit of forbearance.

In the growth of all State associations it was found that members demanded material evidence of the value of membership. It was pointed out that they were making common cause; that they were learning to know each other better, thus developing the fraternal spirit; that there was an exchange of valuable ideas, and the acquirement of money-making information; that manufacturers and jobbers, by reason of magnificent displays and personal attendance, contributed greatly to the interest; that there was at every convention most attractive entertainments and outings. Any one of these, and certainly all of them, should be reason enough for every Hardware merchant in the State to apply for membership and to attend the conventions. But there were many merchants who, when solicited for their application, said it cost $4 to join. It cost railroad fare. It cost hotel bills. They could see no advantage, and so declined. I feel sure, however, that this unworthy argument was never used freely in Michigan, but to that class who would not recognize the more "spirituelle" reasons for acquiring membership in their respective State associations. The co-operative or Mutual Fire Insurance idea came with distinct force. Here was a tangible advantage in membership. Every merchant must have fire insurance and in the Mutual Company he could get $50 worth for, say, $30. The difference, $20, being sufficient to pay not only his dues, but possibly railroad fare and hotel bills, with all "spirituelle" advantages thrown in. Or if it were inconvenient or impossible to attend, he would positively make $16 on a $4 investment in one year. But the rule was inexorable that he must be a member of the Hardware Association to have the advantage of the insurance. It thus developed that Mutual Fire Insurance was a power, because those who were in could make a little money on their insurance premiums and those who were out were interested sufficiently to come in, that they, too, might participate.

The first view, therefore, that Mutual Fire Insurance is of little value, is highly erroneous. The second postulate is safe in the hands of the membership. When the Michigan membership understand all the facts, understand the underlying principles, have the fullest confidence in the management, comprehend the possibilities of the plan, and become men of action as it is in them to be, as their ancestors were, the results will be beyond criticism.

The surging energies of Michigan must not slumber. There is a great Mutual Fire Insurance Company to be built. It was conceived in wisdom. Has grown in power and is extending a beneficent protection to twenty-five States of the Union. Shall Michigan forget the history she has made? Shall she forget the prestige she has won? Is there any one here who thinks Michigan has measured to her full height or has taken her rightful place among the builders of this National Company?

Pennsylvania, with a membership of 206 in the State Hardware Association, has 182 policy holders in the National Company, or about 90 per cent. The National Mutual Fire Insurance Company is the child of the National Retail Hardware Association. The following resolution was unanimously adopted at the National Convention in Indianapolis, March 22 to 24, 1904:

"Resolved, That a vote of thanks is due and is hereby tendered to the officers and Executive Committee of the National Hardware Mutual Fire Insurance Company for their untiring and successful efforts in launching the National Insurance Company, and we respectfully recommend this company to all association members as offering safe and reliable insurance at minimum cost."

It has been said that people who have done nothing themselves are most active in claiming relationship with persons of note. The National Insurance Company is proud of its parentage and appreciates fully the temper of the foregoing resolution, but the National Insurance Company solicits business on its merits. No policy holder who has suffered fire loss has any but sentiments of the warmest approval for its methods of business. The management is able. (I refer, of course, to the president and secretary.) These officers are deeply interested in the company's welfare. They are ambitious for the company's future. They are keenly alive to every opportunity of development and they have succeeded wonderfully. The company was formally organized in August, 1903, just two years ago. The first policy was written in November, 1903. The business to date is about $1,000,000. There is absolutely no "graft" of any kind, large or small, and the salaries are petty. But the management is encouraged to believe that while some of the expected benefits from Hardware Association effort may fade, grow dim and pass away, Mutual Fire Insurance will loom larger and larger on the horizon of permanent achievement. Why should there be any hesitation in buying a policy in the National Company? Are you fearful of Mutual Insurance? The best flat insurance on earth to-day is that written on a class risk, with a limited policy, and Hardware is probably the best class risk. Are you fearful of the mutual liability? The extreme mutual liability of a policy holder in the National Company is an amount equal to the original deposit or premium. It would take a conflagration that would sweep the State to call for the limit of this mutual liability. Are you fearful of the officers? They are under ample bond in the best guaranty companies. Men of Michigan, the National Mutual Insurance Company is organized on the best mutual plan known. Its officers are honest and competent. The field is large and ripe for a forward move.

The National Company should be made, can be made, and will be made, the greatest Mutual Company in this country. Pessimism discovered no country, developed no people, organized no enterprise, is always destructive. I urge you not to cast lot with the herd of pessimists, whose acute, but petty, minds see only difficulties and harbor always suspicion. Persistent optimism, persistent action and a few years of time will win for the Hardware merchants a great insurance company, whose influence as an association builder can have no equal. The estimated dividend this year is 22 per cent. With awakened Michigan in the fore it will be 32 per cent.

COMMITTEE REPORT ON MUTUAL FIRE INSURANCE.

The special committee on Mutual Fire Insurance, appointed at the recent Virginia Hot Springs convention, has made its report, which is being sent out to members of the association. The report is as follows:

Birmingham, Ala., June 30th, 1905.

Mr. F. B. Dunlop, President, Southern Hardware Jobbers' Association, Ft. Smith, Ark.

Dear Sir: We, your committee to look into the subject of Mutual Fire Insurance and report back to the association, submit the following:

First. We believe that mutual fire insurance is based on sound and correct principles, and eliminates a large part of the expense necessary in old line companies and will furnish pure insurance at the lowest rates, and hence is desirable on our part.

Second. We do not think the limited business our membership could give to a company, which could be written on a sound basis where the risks were limited to $5,000 each, would authorize us in organizing a company of our own; and for this reason we recommend those of our membership who have insurance to place at present to give it to some mutual company already organized, which would be more economical than to have a small company which would require all the premiums to maintain the office and other fixed and necessary charges.

Respectfully submitted,

(Signed) J. D. Moore, Ben J. Schuster, Geo. E. King, Committee.

CYCLE TRADE MEETING.

The Fourth Annual Meeting of the National Cycle Trade Association, the programme of which was published in our last issue and which convened at the Astor House July 25-26, was one of the most successful meetings ever held by this organization. Following the example of their brothers in the Hardware trade considerable time was devoted to the discussion of Restricted Prices, although nothing of a definite character was decided upon. Considerable time was spent discussing the relations between manufacturers and jobbers in the trade and the suggestion was offered that an association of manufacturers be formed. The following committee was appointed to consider this matter. W. A. Graham, John H. Graham & Co., New York; Charles A. Persons, Persons Manufacturing Co., Worcester, Mass.; William F. Remppis, Reading Standard Cycle Manufacturing Co., Reading, Pa.; J. W. Bowman, Fiske Rubber Works, Chicopee Falls, Mass., and H. S. White, Shelby Steel Tube Co., Pittsburgh, Pa.

During the last session of the meeting the following officers were elected for the ensuing year:

President, E. J. Lloyd, Pittsburgh; first vice-president, Charles W. Leng, New York; second vice-president, Brace Hayden, San Francisco; third vice-president, Charles H. Turner, Albany; fourth vice-president, C. L. Kelsey, Buffalo; secretary and treasurer, A. M. Scheffey, Irving Building, New York.

EXECUTIVE COMMITTEE.

Charles H. Turner, Albany Hardware & Iron Co., Albany, N. Y.; Brace Hayden, Dunham, Carrigan & Hayden Company, San Francisco, Cal.; A. J. Holmes, Farwell, Ozmun, Kirk & Co., St. Paul, Minn.; C. L. Kelsey, Kelsey Company, Buffalo, N. Y.; Charles W. Leng, John S. Leng's Son & Co., New York City; C. L. Elyea, Alexander-Elyea Company, Atlanta, Ga.; E. J. Lloyd, Bindley Hardware Company, Pittsburgh, Pa.; W. H. Coles, McIntosh Hardware Corporation, Cleveland, Ohio; Geo. T. Robie, Excelsior Supply Company, Chicago, Ill.; C. J. Schmelzer, J. Schmelzer & Sons Arms Co., Kansas City, Mo.; F. I. Wims, H. T. Hearsey Vehicle Company, Indianapolis, Ind.; James Fintze, Ball-Fintze Company, Newark, Ohio.

Legal Matters

OF INTEREST TO HARDWAREMEN

RECENT DECISIONS.

(*From Bradstreets.*)

The Supreme Court of North Carolina, in the case of Green vs. Western Union Telegraph Company, sustained the right to recover damages for mental anguish, where, by reason of the failure of the telegraph company to deliver a telegram, friends failed to meet a sixteen-year-old girl who arrived after midnight in a strange city and was compelled to drive two miles in company with a strange driver in search of their residence.

* *

In the case of Mills et al, vs. Brill, recently decided by the Appellate Division of the New York Supreme Court for the First Department, suit was brought to recover the possession of merchandise sold by the plaintiffs and appellants to the defendant, Brill, in reliance upon statements made by him as to his financial condition for the purpose of obtaining credit. The statements in question, which were subsequently shown to have been false and fraudulent, were made by the defendant, Brill, to representatives of two commercial agencies, and were relied upon by the plaintiffs, who, upon the strength of them, delivered to him a quantity of gloves. A few days afterwards the plaintiffs elected to rescind the sale and demanded the return of the gloves. Brill refused to return them, and they thereupon brought action. The defendant got a verdict in the trial court, but the Appellate Division reversed a judgment entered thereon. It was argued on behalf of the defendant, Brill, among other things, that the false representations were not made by him to the plaintiffs directly. This objection was summarily disposed of by the Appellate Division, which said: "It is true the representations made by Brill were not made to the plaintiffs personally, but that is of no importance. They were made to the commercial agencies for the purpose of obtaining through them a credit and were just as effective for that purpose, and, if false, subjected Brill to the same liability as though made to the plaintiffs personally."

* *

The case of Pratt et al. vs. Morris et al., recently decided by the Kentucky Court of Appeals, arose out of an action to recover for goods sold by sample and warranted to be the same in quality, material and in all other respects as the sample. The purchaser agreed to examine and inspect them and each part thereof at once upon arrival, and if they failed to comply with the warranty, to give written notice in five days thereafter by registered letter to the owner, otherwise the warranty was to be waived. The purchaser pleaded that when the goods were shipped to him they were in such condition that the quality could not be tested within five days; that they were worthless and of no value, and that this was known to the plaintiff when the goods were shipped. The court held that it was error for the trial court to instruct the jury that if the goods were of no value for the purpose for which they were sold and purchased at the time they were delivered to the plaintiff they should find for the defendant; that where the purchaser was an experienced druggist and knew whether the goods bought could be examined within five days, he could not be relieved of a contract deliberately made on the ground that it would be inconvenient for him to examine them within five days; that if the defects could not be determined in five days he should not have made the contract, and that if the plaintiff, under cover of the contract, and knowing that the goods could not be tested in five days, knowingly sent inferior goods for the purpose of perpetrating a fraud on the defendant, they could not recover if the defendant within a reasonable time discovered the defect in the goods and offered to return them. The court further held that if the defendant, after discovering the defects in the goods, continued to control and sell them before giving notice and offering to return them, then he was liable, but that if after the plaintiff refused to take them back the defendant inadvertently sold some of them, not with the intention on his part to treat the goods as his own, he would be liable only for the goods sold.

♣

The Newburyport Silver Company, Newburyport, Mass., manufacturer of silver ware, is to remove its business to Keene, N. H., the change being made necessary by the demand for larger manufacturing facilities.

MUTUAL FIRE INSURANCE.

The Retail Hardware Dealers' Mutual Fire Insurance Company of Minnesota have recently issued their statement for June 30, 1905. This association is to be congratulated on the healthy condition of its finances. They report an increase of business in 1904 of 40 per cent. and the return premium for 1905 was 35 per cent. Their losses during the first half of 1905 amounted to $10,425.65. Insurance in force June 30, $2,150,163. Premiums $30,363.23. The cash on hand June 30 was $54,023.22. The premiums due $2,188.42, making the total assets $56,211.64. After deducting the re-insurance reserve the net surplus is $36,327.76. The officers of this association are the following:

Charles F. Ladner, president, St. Cloud, Minn.; Julius Schmidt, vice-president, Wabasha; M. S. Mathews, secretary, Minneapolis; H. Hauser, treasurer, Franklin. The Board of Directors are: A. T. Stebbins, Rochester; Charles F. Ladner, St. Cloud; H. Hauser, Franklin; Julius Schmidt, Wabasha; E. Houghtaling, Fairmont; C. H. Casey, Jordan; W. T. Cowing, Alexandria; L. Gewalt, Breckenridge; F. W. Lucas, Litchfield; W. H. Tomlinson, Le Sueur; W. J. Urbatch, Austin.

BISSELL'S ANNUAL MEETING.

The annual stockholders meeting of the Bissell Carpet Sweeper Co., was held on the 20th inst., the following officers being elected for the year:

President, Mrs. M. R. Bissell; vice-president, T. W. Williams; treasurer, M. Shanahan; assistant treasurer, F. M. Deane; secretary and general manager, R. E. Shanahan. Directors: Mrs. M. R. Bissell, R. E. Shanahan, T. W. Williams, M. Shanahan, W. J. Drew, F. M. Deane, W. S. McCay.

The company has closed one of the largest and most successful year's business in its history, and is now planning for a big Fall and holiday trade. Plans are being made for a large addition to their factory, and which will include new and thoroughly modern offices.

ANOTHER MYERS PATENT.

The excellent satisfaction given purchasers of the Myers Sure Grip Sling Unloader for Double Rail steel track has created a demand for a sling carrier that would operate on the single rail steel track manufactured by this firm. To meet this demand, P. A. Myers, of Ashland, Ohio, has developed a carrier of the general type of the Sure Grip Sling Unloader for double rail, but designed to operate on single rail. July 18, 1905, the patent office granted him patent No. 795,001, covering a carrier designed to operate on single rail track. This carrier embodies all the proven features of the Sure Grip Double Rail Sling Unloader, but capable of operation on single rail.

♣

The factory of the B-B Manufacturing Co., Davenport, Iowa, was quite seriously damaged by fire recently. Filling of orders was delayed only about two days and by the end of the week shipments were being made on time as usual. This firm is meeting with great success with its improved Dewey Hog Waterer and at the time of the fire they were crowded to make shipments as fast as goods were demanded. This would seem to indicate that the above mentioned article should be kept in stock by every Hardware dealer whose customers are to any extent among the farmers.

♣

The Chapin-Stephens Company, Pine Meadow, Conn., is installing a 500-light electric plant to supersede gas in lighting its factories and offices. The company has also just installed a new 60 horsepower boiler for heating and kiln drying purposes.

♣

Considerable damage was done in Bridgeport, Conn., on July 31st, as a result of the heavy rain bursting several reservoir dams. The Union Metallic Cartridge Company suffered a loss of about $75,000, chiefly in the basement where large quantities of their goods were stored. The running of the plant was only slightly interfered with in spite of the quite serious loss.

♣

The New Castle Stamping Company, New Castle, Pa., has provided for addition and improvements to the plant by a bond issue of $150,000. George L. Patterson, assistant cashier of the National Bank of Lawrence County, is president; C. J. Kirk, vice-president, and T. F. Morehead, treasurer. The capital stock of the company is $200,000.

ADVERTISING A SMALL STORE.

What can advertising do for the small merchant? How can he, with his smaller resources, cope in an advertising way with the lavish appropriations that department stores can afford to spend on publicity? These are life and death questions at the present moment to tens of thousands of honest, hard-working merchants throughout this country. How shall they be answered?

For one thing, assuredly not by any set rule of advertising conduct. General advice and general plans are very nearly useless in a case like this, writes L. G. Quackenbush in the *Ad. World*. The lines along which the smaller store can successfully fight the battle of trade against big and formidable rivals vary according to the field of conflict and the conditions under which the strife is waged, and even then, victory is not always to be won, however worthy the store and however strong the plan of campaign. But it may perhaps be possible to point out here some of the weak spots in the big store's armor in such a way as to suggest new lines of advertising endeavor to the discouraged small store keeper—new means of working out his own way. And it is with this thought in view—seriously, gravely in view—that I venture upon this discussion.

Big stores live and have their being on a bargain-giving basis. The grist of bargains, real or apparent, never ceases. Each day brings it flood of attractions, counted on to draw people into the store and lead them to other purchases in regular lines paying a greater per cent. of profit than the advertised specials. And it is manifestly impossible for the small store to meet them on this ground and wage a winning fight. They can afford the newspaper space for big display and bold price figures and cuts that eat up many inches of space at one swoop. They can make much of items intended to act as drawing cards; because they have the room to do it in. They can out-do you in bigness and splurge and it is futile to attempt to copy their tactics in smaller space. But they cannot out-do you (unless you let them—and I am talking to alert, up-to-date merchants) in excellence of merchandise, goodness of qualities and up-to-dateness of styles.

THEIR ADVERTISING PREACHES PRICE

solely and purely. They can only be checkmated by the use of directly opposite tactics—by strong, ceaseless insistence on quality and merit; on the concentration of purpose you are able to bring to bear on your one line, and on your consequent supremacy in it over any house that divides its attention among a multiplicity of interests.

The big store must divide its fire; must flit from one department to another, and from one line to another in the same space. Its space cannot all be focussed to the driving home of one great main argument—as the little man's space can and should be. Eternal harping on the same string may not be as picturesque as dealing daily with the features of a dozen different departments; but where it is done with skill and power (with repetition of subject but with continued variation of word and form) it can make an ineffaceable impression on the public mind. Your store has its strong features—its particular class or classes of goods in which it need take a back seat for no one. If not, it is a pretty tame and characterless store. Weave these features into the heart of your advertising story day by day—not in the apologetic, half-hearted way, but with the earnestness of purpose that makes advertising sink deep and carry conviction. There is too general a tendency on the part of small stores to ape the larger advertiser in the construction and character of their advertising. They aim to duplicate his style, on a smaller scale. They crowd their ads. full to the uttermost with bargain prices in imitation of his, on their own corresponding class of goods. In many cases their anxiety for trade leads them to quote really better bargains than the big store is giving in the same line. But, even under these conditions such advertising is seldom effectual. The glamor and glitter of the big announcement overshadows its smaller brother, when both attempt to exploit the same things in the same way. I would not discourage the making of special bargain prices as bait for bargain hunters, in any store, however small. But I would make them subordinate in its advertising to other things, instead of the main, all-embracing feature.

To turn to another phase of the subject, I believe that small store advertising should work

THE PERSONAL, INDIVIDUAL NOTE

for all it is worth. The big store is simply a machine. The personality of both proprietor and salespeople is sunk in that of the business. Its advertising is necessarily impersonal. The small store is not bound down by this necessity, and it can and should take advantage of that fact. The talk can be homelier and more direct. In place of high-flown metaphors and fancy frills of rhetoric which pervades big store advertising (and is perfectly appropriate to the end aimed at in such advertising) the small store's announcement should read as its proprietor talks. It should be cast in the plain, confidential, familiar mold of expression. Everything possible should be done to associate the advertising directly with the man or men who will meet the customer at the door. In the case of a store conducted by a single owner, under his own name, the ads can advantageously be written in the first person. It is contrary to common custom to do so, but I believe in its wisdom, nevertheless. "I" is stronger than "we" in almost all small store advertising. It has a face-to-face directness that the other lacks. People are more impressed by statements which a man is not afraid to boldly endorse in his own person. Some of the most effective small store advertising that is being done in this country to-day takes the form of daily store talks, either directly signed by the proprietor or else bearing his name at the head in such a way as to create the impression that he (not his clerk or his ad-writer) is the man who is talking.

SUBSTITUTION.

Briefly defined, "substitution" is selling an article of a brand different from that called for by the purchaser.

There are two ways of effecting a substitution.

First, by keeping the purchaser in ignorance of the fact that he is not getting what he asked for; and second, by offering such argument as will induce him to accept another brand.

The first method is dishonest, and, of course, highly reprehensible. It is possible, however, only in cases where there are no trade-marks or other means of identification in evidence.

The second method is the one most extensively practiced. It is based on the accepted principle that every man has a right to bring the merits of his goods to the attention of prospective purchasers, and as long as the arguments he presents are founded on fact, it is a perfectly legitimate business proposition. Therefore, the substitution effected by this method is not necessarily "evil." In fact, the one object of every advertiser is substitution—to induce the public to buy his goods instead of those of other advertisers—and he cannot reasonably blame the dealer for acting on the same principle.

The cry of the advertiser is that the dealer tries to substitute an unadvertised article for one that is advertised. This is very frequently the case. It is also frequently the case that the dealer tries to substitute one advertised article for another advertised article; and it is also frequently the case that the dealer tries to substitute an advertised article for one that is not advertised. The writer has had experiences along all these lines. But in either case, the dealer is acting well within his rights. If he is handling a brand different from the one called for, no one can justly deny the integrity of his efforts to sell his brand by honest argument.

Another cry of the advertiser is that the article substituted for his is "of inferior quality." This may be true in some instances. Still, it must be remembered that every advertiser always claims that his own brand is superior to any other, so that the cry does not carry much weight in so far as it applies to the legitimacy of substitution by the second method.

These considerations, says *Profitable Advertising*, then, show conclusively that substitution, unless it be effected by the first method, is not in itself "evil."

It is, however, an obstacle to the greatest success in advertising. Moreover, it is an obstacle which cannot be entirely overcome. No matter how great a demand may be created for a certain brand, there will always be dealers selling other brands. Advertisers ask for too much when they ask for the elimination of substitution. They might as well ask for the elimination of competition. Such a condition might be ideal, but it isn't likely to be realized.

Niagara Falls Metal Stamping Works, Niagara Falls, N. Y., manufacturers of Hardware specialties, have issued considerable circular matter of which they have sent us three. One exploits the Niagara Wall Tie or Brick Bond and the Niagara Veneer Tie or Brick Bond for securing brick frame in brick veneer buildings. Another circular is devoted to the Die Sinking, Designing and Engraving Department. This department is in charge of one of the most expert Die Sinkers and Engravers in the country and they are prepared to furnish first-class work promptly. The third circular is issued in the interest of inventors. They make Hardware specialties and novelties for others. They do not buy patents or manufacture on royalty, but they are always ready to consider the making of an article, and if it be found not in their line, they can usually refer inquiries to those who can serve you. In making estimates on an article it is always desirable and usually indispensable, to have a model of of the article to be made. For further information address the above named firm.

RECENT TRADE PUBLICATIONS.

THE NATIONAL CASH REGISTER CO., of Dayton, Ohio, are the authors of an exceedingly pretty book called "Nature, The Factory and The Home." It is a brief account of a welfare movement with some remarks on the art of landscape gardening with many illustrations. The book has been written with the hope that it will bring others to accept the principles which have promoted health, beauty and simple living in the N. C. R. neighborhood. The widespread interest in landscape gardening in America makes timely the interesting accounts recorded of the N. C. R. Company's efforts during the last nine years to adjust the relations between Nature and the Factory and the Home. They state "If this book makes vines, shrubs and flowers grow where none grew before, the time and labor will not be counted as lost." If you have not received one of these most interesting and instructive books the National Cash Register Company will be very glad to send you one upon request.

E. H. SHELDON & Co., 271-285 Madison Street, Chicago, Ill., manufacturers and patentees of Manual Training Specialties, have sent to the trade a catalogue exploiting their line which includes such goods as clamps, vises, tools, benches, lathes, mitre vises, bench stops, etc. The book is well arranged and is illustrated throughout. They particularly call attention to their manual training benches of which they present four styles. They aim to construct a bench for the widest range of technical work; to stand the most vigorous and unskilled work; to last indefinitely and at a cost not materially greater than the short-lived equipment composed of wood vises and wood bench stops. Their benches are knocked down, not common to cheap construction. They ship samples on approval and pay return charges if not accepted. Their catalogue describing their full line, may be had for the asking.

J. STEVENS ARMS & TOOL CO., Chicopee Falls, Mass., have sent us a copy of an envelope size pamphlet issued by them demonstrating "The Stevens Policy," which emphasizes that a satisfied customer is the best advertisement. "Stevens Policy" epitomizes a square deal for everybody—sportsman, merchant and wholesale distributor. Their advertising department works for you and with you. The broadcast publicity campaigns they are constantly waging emphasize the earnest and persistent efforts they exert in behalf of their wholesale and retail distributors. Their little book contains six advertisements, electrotypes for any or all of which will be furnished on demand, only asking that you bear the light express charges on same. Send for their "Stevens Policy" book.

FLINT & WALLING MANUFACTURING CO., Kendallville, Ind., manufacturers of windmills and water supply goods, among their latest publications, have issued two envelope size booklets. One is entitled "The Tale of the Wind," or "Let the Wind do your Work;" which is an attractive little story mixing business with pleasure. The other booklet is "The Proof of the Puddin'"; which with them means to prove by deeds their assertion that they produce up-to-date and efficient windmills and water supply goods. They claim to be the largest, most modern and best equipped factory in the world, producing exclusively windmills and water supply goods. Send for their printed matter.

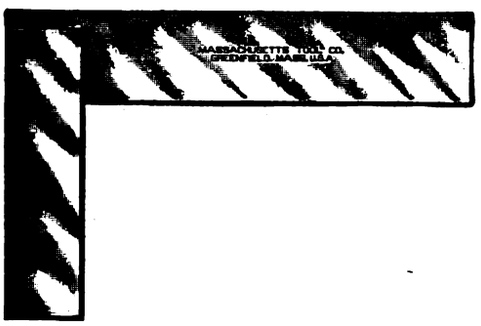
BUFFALO FORGE COMPANY, Buffalo, N. Y., makers of the Buffalo forges, blacksmiths' tools, power blowers and exhausters, heating and ventilating pumps, ventilators, etc., have issued an attractive catalogue containing 247 pages, exploiting the same. It is their 1905 edition, general catalogue No. 167. In this catalogue no adequate presentation could be made of the larger portion of the Buffalo Forge Company's products. Both the limited space and the fact that constant changes and improvements soon render all but standard articles obsolete, have necessitated this curtailment. They, however, issue at intervals sectional and special catalogues with which dealers are urged to keep themselves supplied as they will be sent free of all charge, when requested.

THE MERIDEN CUTLERY CO., Meriden, Conn., have sent us one of their recently issued pamphlets which is finely gotten up doing justice to the goods it exploits. These include illustrations of a handsome carving set comprising fork, knife and steel with stag handles, a bone handled table knife and one with a beautiful mother of pearl handle with sterling silver trimmings, which style is made in almost every utensil used on the table. The last illustration in the book presents a pickle-fork and sugar shell of handsome design composed of these materials. As they state "While the trade mark on carvers is a guarantee of quality and workmanship, there is a demand for excellence in style. The Meriden Cutlery Company have paid especial attention to this feature and are making new designs every season in addition to the regular patterns. Those with sterling silver trimmings are packed in fine satin lined boxes."

IVER JOHNSON ARMS & CYCLE WORKS, armories and general offices Fitchburg, Mass., New York office at 99 Chambers Street, have sent us one of their handsome catalogues, exploiting their firearms, revolvers and single guns. The special feature of the Iver Johnson Fire Arms is the safety hammer which cannot be brought into contact with the firing pin in any way except by pulling the trigger. Three parts comprise the safety hammer; the hammer, firing pin and intervening lever. When the hammer is raised to a point relative with the firing pin the trigger strikes a sear which releases the intervening lever from the hammer, and at the same time is held in line of the firing pin, which receives the blow of the hammer and transmits it to the firing pin, and the discharge follows. This mechanism is protected by strong patents and is found exclusively on Iver Johnson Automatic revolvers. It is, they state, the basis for their positive assertions that their automatic revolvers cannot be accidentally discharged. The hammer may be struct with a hammer with crushing force, yet the discharge would not follow for under no circumstances can the hammer of the revolver be brought in contact with the firing pin. The Iver Johnson Company would be pleased to supply their catalogue to those not already in possession of one.

THE BELCHER & TAYLOR AGRICULTURAL TOOL CO., Chicopee Falls, Mass., have issued a twenty-third edition, descriptive and illustrative catalogue and price list of agricultural implements manufactured by them. They have been adding a quantity of the latest and most improved rapid working machinery adapted for their especial use and expect to be able to fill all orders promptly, many of them the day they are received. Their goods are made from selected stock, and with their improved machinery they expect the quality of their work will be increased in excellence. Their implements, with their many labor saving devices, and attachments, are meeting with a marked and ever increasing sale. They claim that the National Reversible Sulky Plow, as perfected by them, now stands at the head for all kinds of plowing. Their line of walking plows are now selling in more markets and more extensively than ever before. They furnish their customers with circulars giving accurate description of all their leading goods. Catalogue may be had by request.

GLEASON AIR PUMP CO., Houston and Mercer Streets, New York, N. Y., have sent to the trade their 1905 catalogue of Air Pumps and appliances for automobiles, bicycles, yachts, physicians, air brushes, gas fitters, plumbers and all purposes that require compressed air. The catalogue is in large pamphlet form and is attractive in appearance. It is illustrated throughout and contains twenty-nine pages of information useful to those who use compressed air tools or appliances of any kind. If you have not received a copy, the manufacturers will be glad to mail you one upon request.



SAMUEL HARRIS & Co., 23-25 South Clinton Street, Chicago, Ill., manufacturers and dealers in tools and supplies of all kinds for machinists and manufacturers, have placed in the hands of the trade a pamphlet catalogue 4 by 5½ inches of 525 pages, illustrating, describing and pricing their product, which includes such goods as Harris' lathe dogs; Harris' hack saws, thumb screws, thumb nuts, steel machine wrenches, solid tap wrenches, socket wrenches, malleable iron ladles, small engine castings, governor castings, etc. In the back of the book is a comprehensive index making possible a ready reference. Also several tables are given to make work lighter, such as "Weights of round and square iron, one foot in length;" "Number of nuts and washer per pound," "Weight of metals," "Weight of sheet iron," "Table of areas and circumferences." The book will be found a handy and useful one to those interested in this particular line. Send for one.

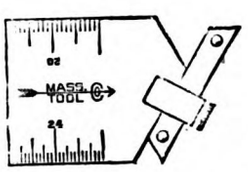
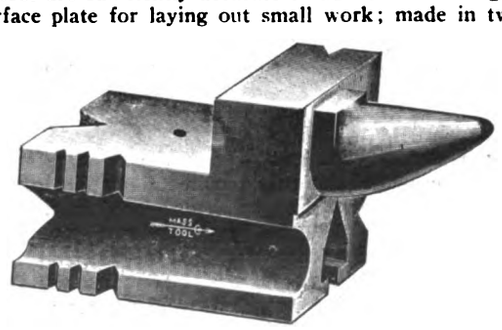
NEW GOODS AND SPECIALTIES.

FINE PRECISION TOOLS.



We illustrate herewith a few of the very large and attracuve line of fine tools manufactured by the Massachusetts Tool Company, Greenfield, Mass. One of these, The Adjustable Notch Center Gauge, is made of tempered crucible steel and all angles are accurately ground. The notch is made of separate pieces insuring a perfect angle to the extreme point. This is the only center gauge that will fit any size inside threading tool. These

A MASSACHUSETTS TRY SQUARE.

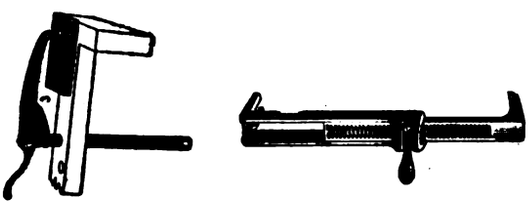


STEEL CLAMPS.

CENTER GAUGE.

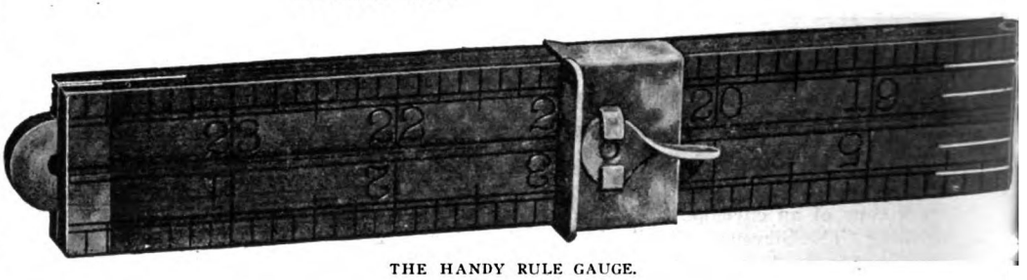
tools are graduated one corner each in 32nds, 24ths, 20ths and 14ths.

Another very serviceable tool is this firm's line of Parallel Steel Clamps. These are made for accurate work constructed of steel, case hardened and nicely finished, made in eight sizes from 1 to 6 inches in length with openings five-eighths to five inches. The Universal Bench Anvils are found very convenient and very practical for use on any tool maker's bench. They have planed and square surfaces, milled grooves and slots, in fact, the faces of the tool are sufficiently accurate to admit of its being used as the surface plate for laying out small work; made in two sizes.



BENCH ANVIL.

The line of try squares made by this concern are an exceptionally finely finished line of tools. They are made in five sizes, varying from a length of blade of three inches with length of beam of two inches to a length of blade of 12 inches to a length of beam of six inches.

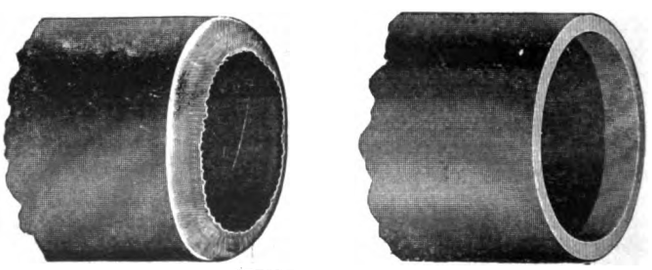


THE JOSEF UNIVERSAL CLAMPS.

Several new features are combined in the patent Universal Clamps manufactured by the E. E. Josef Manufacturing Co., Buffalo, N. Y. The flask clamps are so made that they adjust themselves instantly to any size flask and when in position are en-

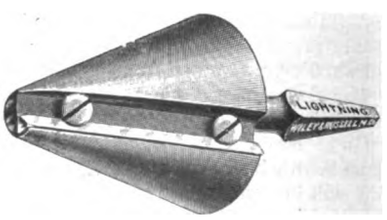
THE JOSEF UNIVERSAL CLAMPS.

tirely free from projecting parts making it possible to roll the flask without disturbing fastenings. It is obvious that this feature is a great labor saver. The Buffalo Universal Bench Clamp also made by this firm is an article that is meeting with a ready sale among bench workmen. The construction of this clamp is plain to one who will examine the illustration given herewith and it will be seen at the same time that there are a great number of different ways in which it can be used to advantage. The two articles mentioned above should be on sale in every Hardware store.



THE HANDY RULE GAUGE.

THE HANDY RULE GAUGE.



The Caldwell Manufacturing Company, Rochester, N. Y., have recently placed on the market a specialty that will without doubt find a ready sale among mechanics, and in fact, all those who make use of a pocket rule. It is known as the Handy Rule Gauge, and is illustrated herewith. It clamps on any standard two-inch rule and can be adjusted or removed in an instant.

LIGHTNING BURRING REAMERS.

The Wiley & Russel Manufacturing Co., of Greenfield, Mass., are making a new line of burring reamers. These tools are now being used by all first-class plumbers and steamfitters. The burr

BEFORE AND AFTER.

generally left in pipe after being cut off is very detrimental, as it diminishes the capacity of pipe from 25 to 50 per cent. The importance of removing this burr can readily be appreciated by both workmen and owners.

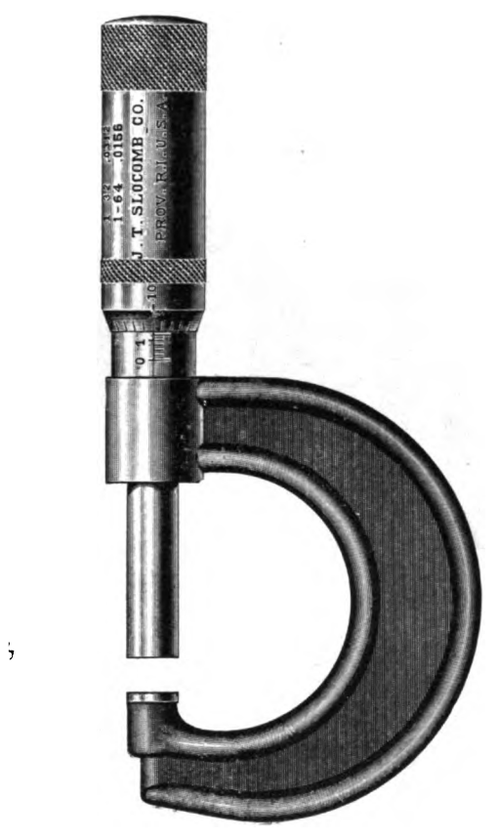
Digitized by Google

It is also a valuable tool for electricians, when piping a building to take electric wires. It is necessary to remove this burr, which, if allowed to remain, would scrape the insulation off of the wires as they are being drawn through, thus allowing the elec-

tricity to escape into the building and causing fires.

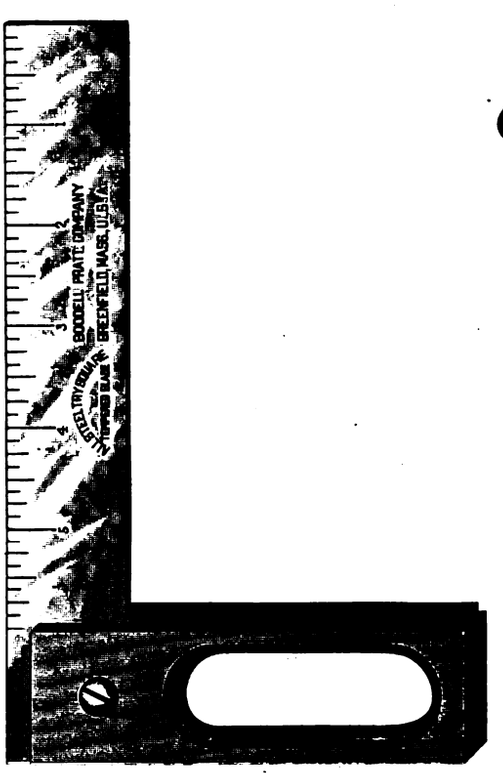
The following cuts show pipe before and after being burred with a Lightning Burring Reamer. They make several sizes and styles, two of which are shown in the accompany cuts.

CALIPERS.

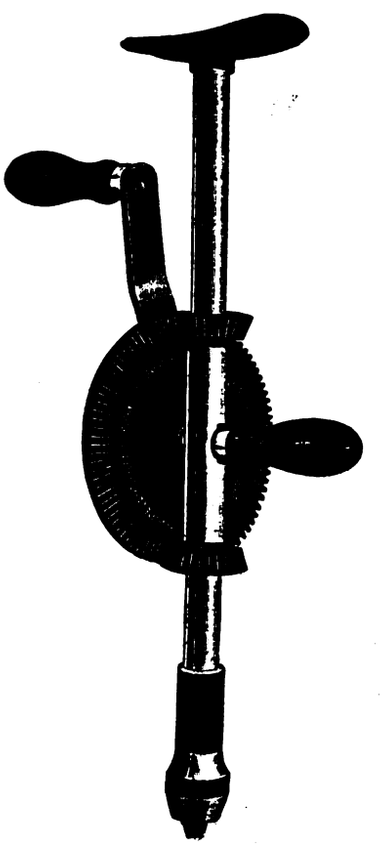


The J. T. Slocumb Company, Providence, R. I., have for many years been well-known as manufacturers of an excellent line of Micrometer Calipers, one of which is illustrated herewith. They have been making these goods for 11 years and their line includes 13 sizes and 74 varieties. All of these goods up to six inches are drop forged from bar steel. The larger sizes are made from steel castings. The special features—there are many of them—are carefully explained in the Slocumb catalogue.

GOODELL-PRATT TOOLS.



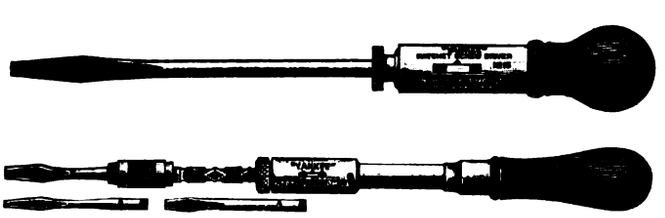
Among the new articles recently placed on the market by Goodell-Pratt Company, Greenfield, Mass., are the following: The Automatic Drill, No. 108, illustrated herewith, has a grip that is knurled the entire length. The rotating cap through which the drill points are extracted is smooth and solid and so shaped as to avoid injuring the hand. The end nut is so arranged that it cannot be screwed off and lost. With each of these drills are furnished eight drill points from 1-16 to 11-64.



The second illustration is that of the Goodell-Pratt Steel Frame Breast Drills, which are made by this firm in three styles. The frame is made of steel, the gears carefully cut, the breast plate is adjustable and the chuck strong and accurate.

Appreciating the demand for a try-square of better grade than has heretofore been used by the carpenters and other woodworkers, this firm has just placed on the market a line of all steel try-squares with tempered blades, one of which we illustrate herewith. The beam is provided with a patent rest so that it will lie flat on the work and stay flat without being held in position. Any user of these tools will immediately appreciate the convenience of this feature. These squares are made in plain or graduated blades six, eight and ten inches in length.

SLOCUMB CALIPERS.

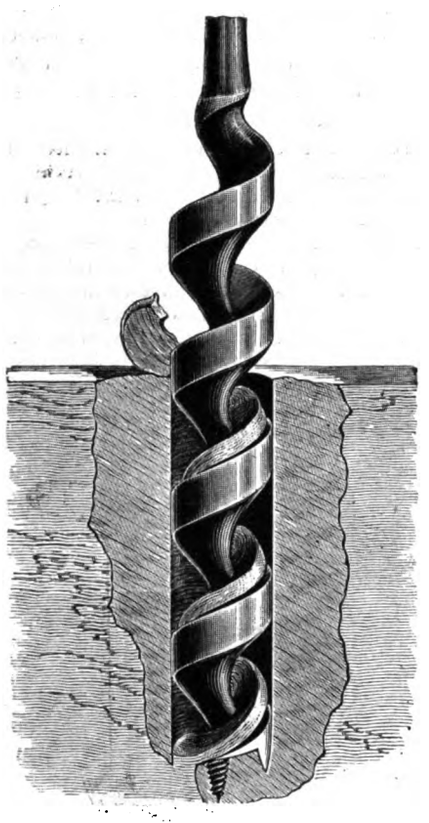


FROM THE GOODELL-PRATT LINE.

YANKEE TOOLS.

We illustrate herewith two of the famous line of Yankee tools manufactured by North Brothers Manufacturing Co., Philadelphia. Yankee tools were first offered to the trade in 1898. Their name is derived from the fact that they are the invention of a Maine Yankee and because they embody that ingenuity in the

A PAIR OF YANKEES.



doing of work for which they are intended which has made Yankee inventions famous the world over. One of the illustrations is that of the Yankee Ratchet Screw Driver No. 15, which is made in four sizes with a blade from two to five inches in length meeting the demand for a light blade screw driver for small screws in electric work, etc. The other illustration is that of the Yankee Spiral-Ratchet Screw Driver Nos. 30 and 31. This tool is made in two sizes, one with an extreme length of 13½ inches when closed and 19¼ inches when extended. The other 17½ when closed and 26¼ when extended. This driver was given the very severe test of driving 50,000 screws with one tool and at the end of this test there was no perceptible wear in the nuts. The bits are forged from the best steel properly tempered, ground and polished. The other metal parts are nickel plated and buffed. The handle is made of hard wood smoothly and nicely polished. Three bits of different width are included with each tool.

The Gray & Dudley Hardware Company has completed one of the buildings of its new plant at Nashville and another will be started at once. The entire plant is to cover a ground space of seven acres. It is reported that the new firm will commence turning out stoves by September 1st, at which time they expect to have about 100 men at work. By the middle of next year they expect that their pay roll will include at least 200 men.

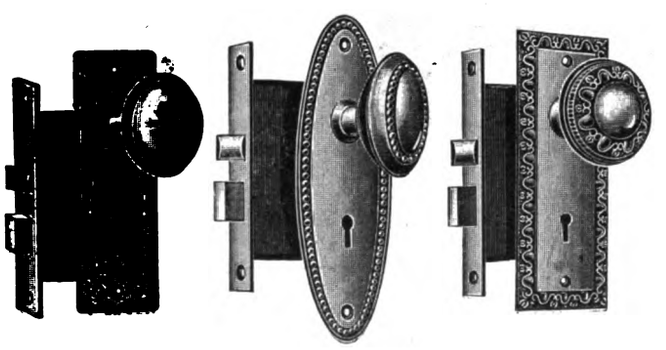
THE FORD BIT.

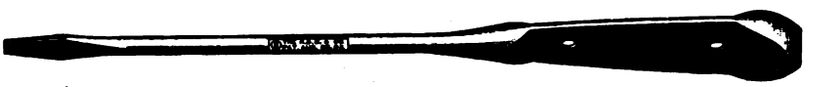


The accompanying illustration shows the ease with which the Ford Auger Bit penetrates a piece of wood and the cleanness of the cut. This bit, which is manufactured by the Ford Auger Bit Company, Holyoke, Mass., has a patented concave twist which keeps the chips from the sides of the hole. It is obvious that this makes the use of the bit much easier and that practically no pressure is required. These goods are sold by all jobbers. Catalogues may be obtained direct from the manufacturer.

HOW THE FORD BIT WORKS.

TAYLOR & BOGGIS GOODS.

We illustrate herewith four styles of Knobs and Escutcheons, being placed on the market by the Taylor & Boggis Foundry Co., of Cleveland, Ohio. Their Builders' Hardware catalogue shows their handsome line of these goods and should be on the desk of every Hardware dealer. This firm also manufactures light gray iron castings, dampers, damper clips, oil and gas stoves, furnace lamps, molasses gates, letter boxes and Hardware specialties.

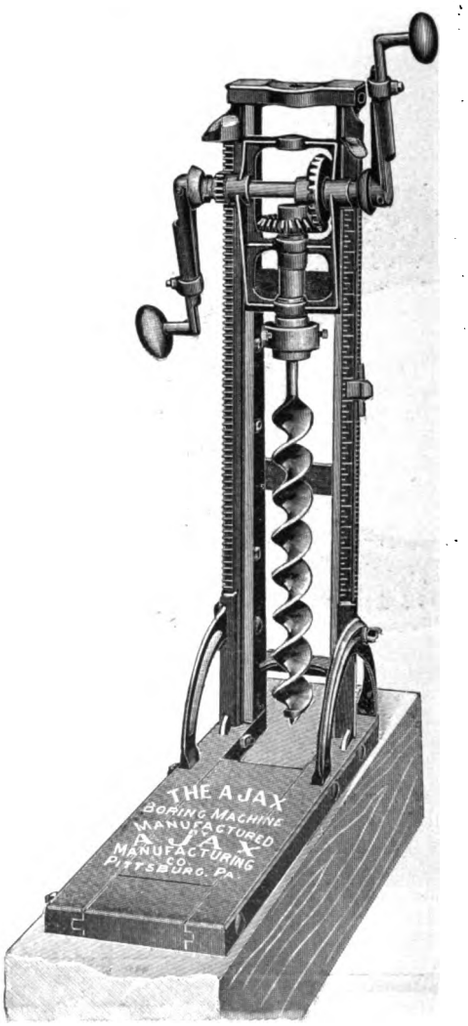


A FEW T. & B. STYLES.

THE PERFECT HANDLE SCREW DRIVER.

We illustrate herewith the Perfect Handle Screw Driver manufactured by the H. D. Smith & Company, Plantsville, Conn. This tool is a distinct departure from the ordinary class of screw drivers, particularly in the manner of its construction. As will be seen in the illustration the metal part of the driver is one solid piece broadened to make the handle. It is obviously impossible to twist the handle or break it and furthermore the handle is so shaped that it fits the hand, giving greater beverage and making its use more comfortable. The metal part is drop forged in one piece of steel of the toughest quality. The wood part of the handle is treated with a special water proofing process and is finished in natural colors.

FOR HEAVY WORK.



SHOWING CONSTRUCTION.

THE PERFECT HANDLE.

AJAX SPECIAL BORING MACHINE.

This tool, which is made by the Ajax Manufacturing Co., Pittsburgh, Pa., is meeting with an exceptionally good sale among the users of this class of tools. The illustration shown herewith represents the machine fitted with a two inch auger with a 15 inch twist. The Ajax Special Boring Machine was brought out to supply a want of bridge builders, trestle builders, railroads and contractors, for a machine that will bore through heavy timbers, up to twenty inches deep in one operation. The machine has a full drop of twenty inches, and will take almost any kind of an auger, with round or square shank, car bits, or any auger that has twist enough and is long enough for the purpose. This special boring machine is built about on the same lines as the Ajax Boring Machine, which is widely known to the wholesale Hardware trade. It is self-withdrawing, angular, especially well strengthened, and has all important parts made of malleable iron.

AJAX SPECIAL BORING MACHINE.

REGISTERING SAVINGS BANKS.

A very attractive line of novelties is being placed on the market by the Piaget Novelty Company, 265 Broadway, New York. Among their best sellers are the following: The trunk shaped registering bank herewith illustrated is made for dimes only, and can only be opened after ten dollars has been deposited. As each dime is deposited it is registered on the dial in front. It is hand-

somely nickel-plated and polished and in shipping they are packed three dozen in a case, each bank being in a separate box. Another bank on a similar style with a compartment for dimes and one for cents is also made by this concern. We also illustrate herewith a three coin bank made by this concern. It will receive dimes, nickels and quarters, registering each one correctly. It locks automatically when the first coin is deposited and cannot be opened until five dollars is inside. It is made of pressed steel, handsomely finished in bronze and ornamented.

MAKING "NEVER BREAK" GOODS.

"There is a great difference between 'Never-Break' seamless steel spiders, which we manufacture exclusively," said Henry W. Avery, treasurer of the Avery Stamping Company, of Cleveland, during a recent interview, "and the goods under the name of skillets and fry pans, as well as other brands of spiders so called. We were the originators of seamless pressed steel cooking utensils over twenty years ago, and are glad to be able to give others the benefit of our experience. We have done a great deal of experimenting, and found that utensils of less thickness than ours will not stand up under the usages to which they are subjected. With our goods scorching and burning are altogether out of the question. Skillets and fry pans and similar light goods will scorch and burn food because heat passes too quickly through the metal, but where the proper thickness is in the metal, the heating is gradual and even, until the right degree of heat is reached for cooking, and the heat is fully retained, as well as the best results secured.

"Ordinarily, spiders, fry pans and skillets are put on the market just as they are pressed from the flat sheet, except for the light covering of grease which they receive, which, however, is not sufficient for the purpose intended, namely, to keep the goods from rusting while they are on the dealers' shelves. We are the only manufacturers who put these goods under heavy pressure to permanently set them in their shape. This is done after annealing to a cherry red, and after this setting process they are reannealed to take all the strain and stress out of the fibre of the metal, and to prepare them to withstand the highest degree of temperature without losing their shape. 'Never-Break' spiders absolutely will not warp from the heat of any stove or fire.

"In the present day cooking gas and gasoline stoves is about the severest test for steel spiders, as the heat from the burner strikes on one spot all the time, and unless they are made of the proper thickness and with the toughness above explained, they will be found wanting. 'Never-Break' steel spiders are heavily covered with lacquer and will not rust. Unlike cast iron ware, 'Never-Break' steel spiders will not soak up grease or hold flavors. They are not porous, therefore are impervious to all contaminative retention of juices and liquids as well as odors. Right after cooking a dish of onions or fish, any dainty meal such as cream potatoes, etc., can be prepared in 'Never-Break' spiders without a trace of previously prepared victuals. The smoothness of the cooking surface enables entire removal and perfect cleansing of all foreign matter."

HELPING THE DEALER.

The Glidden Varnish Company, Cleveland, Ohio, manufacturers of Jap-a-lac announce that their recent advertising campaign in the magazines and other publications of general circulation proved so resultful in helping the dealer move goods that it will be continued through the Fall and Winter months. There is no question but that all Hardwaremen who carry Jap-a-lac in stock will be greatly benefited by this extensive advertising campaign as the Glidden Company are carrying advertisements in 35 of the leading magazines, with liberal space in each.

* * *

The Robeson Cutlery Company, Rochester, N. Y., are supplying their customers among the retailers, without additional cost, with a very attractive article for window display. It consists of a small easel made in imitation of wrought iron and is certainly a very unique and effective idea. It is fitted with one article of the Robeson line riveted to each vessel on which is printed in white an appropriate inscription and the price. When a number of these are properly placed in a well-dressed window the effect is especially pleasing. This is a matter that is worthy of investigation of all Hardwaremen who handle cutlery.

R. K. CARTER & CO. CHANGES.

R. K. Carter & Co., who represent in a buying capacity some of the best known jobbers of Hardware, etc., have transferred W. B. Paulscraft from the management of their Pittsburgh office, to New York, where he will have charge of the Hardware buying department and their special loose leaf price book. Mr. Paulscraft was for some ten years assistant manager of the old Hardware Buyers' Association, or "Anvil Club," and in that capacity was well known to most of the Hardware trade. Mr. George Piper has been appointed manager of their Pittsburgh office. Mr. S. H. Groser, who for some ten years represented Oliver Bros., syndicate buyers, in a special capacity, and who has since that time been with the business department of the *Iron Age*, leaves same to take charge of some of the special interests of their business and will visit both the jobbers and manufacturers in their behalf when occasion requires it. Mr. Alfred G. Greening, president and treasurer, and Mr. Frank K. Blauvelt, vice-president, will continue in the active management of the business.

PETERS WIN AGAIN.

At Fort Worth, Texas, July 12, 13 and 14, the majority of the 55 contestants, including the winners of second and third professional averages, and second amateur average, used Peters Loaded Shells. The Ithaca gun was won by Otto Sens, who broke 25 straight with Peters Ideals. The Mitchell gold medal was won by M. E. Atchison, of Giddings, Texas, with a score of 50 straight. Mr. Atchison tied with three others on 25 straight, then shot 25 in the shoot-off, using Ideals. He also made a run of 112 straight on the last day of the tournament.

At Betterton, Md., July 12, 13 and 14, E. H. Storr, using Peters Target Shells, won high average, breaking 480 out of 500 with a sliding handicap. Mr. Storr made a run of 97 straight, 89 from 20 yards, and 8 from 19 yards. At Cambridge, Md., July 7, Mr. Storr was high average, losing only 3 targets out of 165. Peters Target Shells are well named, for they certainly do smash them up.

On July 21st, Mr. John M. Pemberton, of Ashvale, Ark., holder of the Arkansas Flying Target Championship, successfully defended his title against Mr. S. M. Powell, of Little Rock, scoring 45 out of 50. Both contestants used Peters Premier shells.

Mr. C. A. Young won high average at Dayton, Ohio, July 22, 97 per cent., using Peters Ideal Shells.

Mr. C. A. Young, representing the Peters Cartridge Co., won high average in the shoot at Degraff, Ohio, July 20, losing only 16 out of 275 targets.

High average at Decatur, Ill., shoot, July 18 and 19, was won by H. W. Cadwallader, the Peters Cartridge Co.'s representative; average 96 per cent.

♣

It is reported that the Simmons Hardware Company of St. Louis will locate another important branch at Toledo, Ohio.

♣

The Davis Sewing Machine Co., Dayton, Ohio, received an order a few days ago for 800 bicycles to be shipped to Yokohoma. This firm is shipping about 10,000 machines a year to the Orient.

♣

The United States Hoe & Tool Co. have completed their extensive plant at Columbus, Ohio, and have started operations. Their line will include Hoes, Rakes and Garden Tools. The officers of this company are the following: E. A. Cole, president and treasurer; J. W. Kauffmann, vice-president; T. F. Connors, secretary.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

The time for selling JAP-A-LAC is all the time. There is no season of the year when JAP-A-LAC will not sell nor when it cannot be used to advantage in every home.

Because of the many special uses found for JAP-A-LAC during the Spring and Fall house cleaning seasons, the volume of sales is naturally greater.

The real JAP-A-LAC dealer can sell JAP-A-LAC every day in the year. Realizing this, we have decided to continue our advertising the year round.

Our advertising during the balance of the year will embrace a larger number of magazines than we have been using, and will carry liberal spaces. We shall be telling the women of the country of the uses to which JAP-A-LAC can be put.

We are sure to stimulate the demand for JAP-A-LAC and make it an every-day seller for the dealers. A little attention to this well-advertised commodity will bring *new customers and increased profits* to the dealers—who are handling it.

Don't let your stock get depleted. If you have never sold JAP-A-LAC, give it a trial. You will find it the quickest and easiest selling article of its kind on the market.

The Spring advertising has more than doubled our sales up to date. The Fall advertising will do the same. The reason for this is that we tell the women what JAP-A-LAC is and how to use it.

Let the women of your community know that you keep JAP-A-LAC, and you will secure their patronage.

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

ADDRESS: 641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C.,

PATENTS EXPIRED JULY 10, 1905.

385,706. Knife Sharpener. W. E. Ginn, Woodberry, Md.
385,711. Weather Strip. T. Hibbert, Cochran, Ind.
385,799. Padlock. M. W. Fraim, Lancaster, Pa.
385,834. Corkscrew. W. N. Barrett, Meadville, Pa.
385,844. Saw Handle. G. N. Clemson, Middletown, N. Y.
385,880. Coffee Pot. W. Racer, Harrison, Ark.
385,906. Door Securer. A. J. Chase, Boston, Mass.
386,055. Combination Pocket Tool. W. R. Buzzell, Shelburne, Mass.

PATENTS ISSUED JULY 11, 1905.

794,241. Sash Holder. J. B. P. Michaud, Eganville, Canada.
794,249. Nut and Pipe Wrench. K. Peterson, Jamestown, N. Y.
794,253. Razor Holder and Sharpener. B. A. Robeson, Florence, S. C.
794,254. Milking Pail. P. H. Sanger, Onaway, Mich.
794,292. Baking Pan. J. S. Frey, Glendale Station, N. Y.
794,297. Lantern. W. S. Hamm, Lakeside, Ill.
794,298. Lantern. W. S. Hamm, Lakeside, Ill.
794,310. Combination Tool. J. H. Pristley, Cherokee, Iowa.
794,332. Broom. C. T. Adair, Adair, Ga.
794,369. Screen Door. B. S. D. S. Martin, McPherson, Kan.
794,385. Screen. F. C. Wright, Cavespring, Ga.
794,400. Door Securer. M. Farrell, San Francisco, Cal.
794,417. Flat Iron Heater. A. V. Maniachi, Melbourne, Victoria, Australia.
794,448. Wrench. B. S. Boggs, Newry, S. C.
794,476. Sheet Metal Punching Device. J. Wilderman, San Francisco, Cal.
794,482. Pipe Wrench. H. B. Best, Morgantown, Pa.

PATENTS EXPIRED JULY 24, 1905.

386,509. Bench Plane. J. A. Traut, New Britain, Conn.
386,510. Padlock. W. F. Troast, Lancaster, Pa.
386,511. Lock. C.R. Uhlmann, Peoria, Ill.
386,522. Latch Case. C. W. Bullard, Chicago, Ill.
386,541. Railway Signal Circuit Breaker. E. B. Ives, New York, N. Y.
386,736. Cutting Nippers. H. S. Brownson, Boston, Mass.

PATENTS ISSUED JULY 25, 1905.

795,428. Wrench. F. G.Cornell, Louisville, Ky.
795,433. Boring Implement. J. H. Foust, Milton, Pa.
795,434. Wrench. A. Gagnon, Helmville, Mont.
795,456. Wrench. F. W. Stanton, Waupaca, Wis.
795,486. Pipe Wrench. F. G. Cornell, Louisville, Ky.
795,607. Electrician's Tool. A. E. Haff, Adams, Mass.
795,682. Wrench. O. W. Blake, Turret, Colo.

PATENTS EXPIRED JULY 17, 1905.

386,105. Egg Beater. C. A. Bryant, Wakefield, Mass.
386,112. Ice Cream Freezer. J. M. Dawley, Chillicothe, Columbus, Ohio.
386,170. Toasting Pan. Wm. T. Van Dorn, Lincoln, Neb.
386,186. Hinge. G. Dahlman, Englewood, Ill.
386,197. Hoe. G. Hain, Dailey, Mich.
386,217. Cuspidor. J. L. O'Connor, New York, N. Y.
386,227. Stove Pipe Thimble and Cap. A. Williams, Saratoga, Kan.
386,231. Milk Can. J. H. Bassler, Myerstown, Pa.
386,239. Mashing Machine. L. Ducharme and G. Erard, Woonsocket, R. I.
386,259. Sad Iron. R. Olp, Wakefield, Mich.
386,267. Weather Strip. R. C. Redman, Salem, Ore.
386,271. Latch. L. S. Shelly, Steelton, Pa.

PATENTS ISSUED JULY 18, 1905.

794,729. Ladder. J. McDonnall, Chicago, Ill.
794,976. Window Shade Holder. J. M. Glickman, Cleveland, Ohio.
795,122. Fastening for Curtains, Etc. F. J. Henry, Buffalo, N. Y.

Digitized by Google

REVIEW OF THE MARKETS.

WIRE NAILS: Volume of business fair. Market firm. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to Jobbers	$1.80
Carloads to Retailers	1.65

New York.—Quotations are on the basis of $1.99 for single carloads and $2.05 for small lots from store.

CUT NAILS: The looked for action by the Cut Nail Association did not materialize, owing to the absence of several manufacturers from the meeting. The market remains irregular, and prices of Steel Nails range from $1.65 to $1.70, f.o.b. maker's mill. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points West of these cities, 5 to 10 cents advance per keg on Cut Steel Nails.

New York.—The local market remains unchanged. Small lots from store are now quoted on the basis of $1.90 to $1.95.

BARB WIRE: More than the usual demand prevails throughout the West. Orders received at mills, moderate. Official quotations are as follows, f.o.b. Pittsburgh, 10 days, or 2 per cent. discount for cash:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

Chicago.—Prices are officially unchanged as follows: Painted Wire, $2.10; Galvanized, $2.40; car lots to retailers, 5 cents higher; less than car lots, Painted Wire, $2.25; Galvanized, $2.55, Staples, Bright, in car lots to Jobbers, $2.05; Galvanized, $2.35; car lots to retailers, 10 cents extra, with an additional 5 cents for less than car lots.

SMOOTH FENCE WIRE: Prices are somewhat unsteady, but the outlook is encouraging. Quotations are as follows: f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.65
Retailers, carloads	1.70

The foregoing prices are for base numbers 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

ROPE: Demand continues fair, with prices more or less irregular. General quotations are as follows:

	Cents per pound.
Pure Manila, 7-16 and larger	11½ to 12
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8

Less ¼ to ½ cent to the large trade.

LINSEED OIL: Market remains firm with good demand for small lots. New York quotations are as follows: City Raw, 54 to 55 cents per gallon, according to quantity; State and Western Raw, 51 cents per gallon, with 2 cents per gallon advance for Boiled Oil or either kind.

BINDER TWINE: Hardware dealers who sell Binder Twine report their sales greatly in advance of last year. Twine sales were but nominal last year, due to the poor wheat crop. Reversed conditions this year have been responsible for the increased sales, and it is probable that the sales this year are almost one-third larger than last.

HOLLOW WARE PRICES.

The following changes are reported in prices of Hollowware:

HOLLOW WARE (CAST IRON.)

Stove Hollow Ware:	
Plain or Unground	65%
Ground Ware	60%
Enameled Ware	55%
Country Hollow Ware: per hundred pounds	$2.75
White Enameled Ware:	
Maslin Kettles	70%
Covered Ware:	
Tinned and Turned	40%
Enameled	50%
Glue Pots:	
Tinned	35%
Enameled	40%

COLLECTIONS SLOW IN CHICAGO.

We have nothing special to write about at this time, with the exception that trade has been keeping up remarkably well throughout this section of the country, although collections for the past month have been quite slow. Prospects for business for the balance of the year could scarcely be more promising.

TROUT HARDWARE CO.

TRADE IN PITTSBURGH.

Travelers started on the Fall Campaign August first and report trade in good condition. Orders received are in fair quantities and a good many of them so that the aggregate shows up well. All the industries in and about our city are well employed. The coal companies make complaint of low prices caused by strong competition, but prices in the steel are remunerative. Pittsburgh merchants will make another trade excursion August 8th to 10th. This being the fourth, will take in the Valley of the Monongahela, which is a hive of industry and almost a part of Greater Pittsburgh. LOGAN-GREGG HARDWARE CO.

TRADE IN THE NORTHWEST.

ST. PAUL, MINN.—Conditions in our territory are very good with prospects of possibly more than an average crop, though this will not be assured for sometime, as harvesting does not begin until about the middle of August. In the meantime the orders we are receiving are very satisfactory, showing a faith in the future which is sublime.

The market conditions are favorable to carrying good stocks as there are no signs of weakness in prices. Our retailers are doing well and are without question the best satisfied lot of merchants in the country. No competition, which is aggravating, exists and our jobbers are serving them with the best of goods at the lowest prices. HACKETT, WALTHER, GATES HARDWARE CO.

THE PACIFIC COAST BOOMING.

Effect of Chinese Boycott so far not Extensive.

Conditions on this coast continue bright. The crops while not large as expected several months ago, are still sufficient for our own use, with more or less of a balance for export, and the loss in quantity is more than counterbalanced by the increase in prices. The markets for fresh and dried fruits have thus far been exceptionally good, the 1905 pack of canned fruit has already been largely sold, the wool clip is meeting with an urgent demand which has kept the market bare for months, and hops while lately suffering a steady decline, are still almost 100 per cent. over the cost of production. The farmer, whether a grain or fruit raiser, is thus doing unusually well, and as long as he continues to reap fine returns from his land prosperity will abide with the coast. The dairymen, too, have been making money beyond their most sanguine expectations of a few years ago.

These bright rural conditions are being reflected in pronounced trade activity in the different cities and towns. Wholesale and retail business are both lively, building operations are remarkably active, real estate is being sold and resold at advanced prices, and the colonist rates offered by the railroads are rapidly increasing the population. The three coast States, California especially, are full of strangers from East of the Rockies looking for homes, for most of the new comers come to stay. If the present rate of increase from this source be kept up the census of 1901 will contain some surprises. All of these new comers add something to the money and trade activity of the coast and their importance as a factor in the prevailing prosperity can hardly be overestimated. Hardware merchants of this metropolis city of the Pacific Coast have no cause to complain of the year 1905 thus far, and think it will probably prove a record breaker as far as trade is concerned.

Last evening when the writer called at headquarters of the California State Retail Hardware Dealers' Association for news relating specifically to the trade throughout the State, the secretary, Henry Gracey, was found too much pre-occupied—incidentally to a fire of the previous day that threatened destructions of his stock and building. As it was about $4,000 worth of his goods were more or less damaged by the downpour of water from the scene of the fire, the apartment house of several floors over the

store. Mr. Gracey was busy superintending the preparing for the fire adjusters a schedule of his damaged stock, and for the trade news solicitor snatched only sufficient time to say: "My loss incidental to the fire is covered by insurance; the State Hardware Association is in fine condition, enjoying splendid growth, the arbitration committee being without work to do. Within the coming week a new and complete Hardware store will be open at 235 Powell Street, by O. Lord, a thoroughly efficient Hardwareman.

On this passing final day of July there is quite a flurry in export trade circles, started on the street a day or two ago by the report that the much-touted Chinese boycott against American goods has gone into effect and that all the large milling and flour companies and wholesale houses in the export trade had received stop orders from their agents in China and all the existing contracts had been canceled. Simmering down this talk the finding is that the big local Chinese exporting house of the Hue Kai Company is refusing to buy usual amounts for shipment and this gave rise to the rumor that the boycott was effective and was so believed by some of the merchants. When asked the reason for this stop order a member of the Hue Kai Company said:

"We have received cable stop orders from China. We buy for export, and, having been informed that our export market is closed, it would not be good business policy for us to buy on a chance. The boycott may continue in force for six months, and maybe longer; we are informed that it will be maintained until the United States accords Chinese merchants, students and travelers coming to this country proper treatment."

And the outside manager of the Russo-Chinese Bank, Tin Eli, an educated Chinese, said:

"We are informed by our correspondents in China that about 10,000 of the principal merchants have signed the boycott resolutions, which carry a penalty of about $4,000 for their violation. We are further informed that Chinese newspapers are now refusing advertisements of American firms and have cancelled the existing contracts."

An authority representative of a prominent local flour exporting house said: "We have sold no flour for export to China for the past six weeks; formerly we had quite a trade in our brand, but of late orders have stopped suddenly."

Another local house in this line of similar expression reports receipt of information from its correspondent in China that he had met the agent of the Pacific Hardware & Steel Company (Miller, Sloss & Scott), and had been informed by him that he found it very difficult to sell goods on account of the boycott. When asked with reference to this, George W. Crum of the export department of said Hardware and Steel Company said:

"We do very little directly with the Chinese. We sell almost entirely to American and European firms having established houses in China. We have received no complaint from them and no stop orders."

Simmered down to the absolute fact, the only "stop orders" received from China so far are from Chinese sources in this city and are undoubtedly caused by cables from China, and naturally give rise to the suspicion that they were sent for the purpose of creating a belief in the boycott and to play a part may be diplomatically as an American eye-opener in connection with the Chinese exclusion question.

According to the 1904 report of San Francisco Chamber of Commerce the value in round numbers of China's purchases from this city's merchandise exporters was $9,000,000, a nine-twentieth portion of China's purchases for the year in the United States. Of foreign goods altogether China buys annually about $200,000,000 worth. Of the merchandise San Francisco shipped to China last year nearly one-third was flour, about one-half million barrels being exported. Industrial Press Association.

NOTES ON NEW ENGLAND HARDWARE TRADE.

Mid-summer business is better than usual through New England. Collections, however, are reported as being somewhat backward. Although building materials and building operations are high, still there is much activity in this line.

One of the young, but fast-growing, Hardware concerns of the East is the Union Hardware and Electric Supply Co., of Providence. Within the year this concern has moved into its present large store, which more than doubled its floor space, but the business has been growing so rapidly that the store adjoining on Exchange Place, has now been leased. This new store will be used for some departments which are being enlarged, and will be occupied next month. The wholesale business of the Union Hardware and Electrical Supply Co. is being pushed and the concern are constantly extending into larger territory. Mr. Dudley, of the concern, said that the outlook for Fall trade was good.

Your correspondent recently called in on J. B. Varick Co., of Manchester. I would like to be able to picture the very attractive appearance of their store. Especially the second floor, where Summer goods—fishing tackle, hammocks, croquet, boats and canoes and bicycles were being displayed.

It was a very hot day and all the several clerks in this department were kept on the jump to supply customers' demands. The John B. Varick Co. have been very successful in building up and holding business in sporting goods and have proved that the Hardware Store is the sporting goods store.

The New England Hardware Store having the largest show windows is Edwards & Walker Co., of Portland. It's one of the sights of the city to see these windows, so attractive and well displayed are the goods. This concern's business, too, is rapidly growing and many new departments have been developed in the past few years. The sporting goods line is being pushed both in the wholesale and retail, and has been found a good paying part of the Hardware business.

Rice & Mills, of Bangor, are now thoroughly settled in this new and enlarged store and are doing a splendid Summer business. The new store—just adjoining the old location—is used exclusively for the retail business, while all shipping is done from the old store. Both stores are united with a large archway and the offices are in the rear. All these Eastern jobbers are strengthening their position and are thus in better shape than ever to meet any new competition. It would be impossible for a large New York jobbing house to get the business away from these local jobbers at a profit.

There was an air of prosperity about the store of the Fitchburg Hardware Co., Fitchburg, Mass., that spoke well of this concern's prosperity. An extensive line of house furnishing goods is carried by the Fitchburg Hardware Co., and has been found to be profitable. From the house furnishing line, this firm have worked into crockery, silverware and some lines of jewelry. Wall paper was recently added to the paint stock and has helped to enlarge the business.

The matter of the future of the large jobber, covering a large and distant territory, may be one of discussion and of uncertainty, but there is no doubt but that the local jobber covering a local field will always have a good business.

The best illustration of this is to be found right here in New England, where these local concerns have been able to hold a good wholesale trade, even in a country that is growing slowly.

Hammernail.

TRADE AROUND ST. PAUL.

Replying to your request of the 1st inquiring as to the situation in the Northwest at this season, which is the important time in the year with us, we are pleased to say that the conditions are very good.

Our wheat crop has come on surprisingly well during the last month and harvest has now begun on it. The crop was injured to some extent during the June rains, which were unusually heavy and long protracted. However, as things now stand we have a fair average crop, and, with favorable weather for maturing it during the next two weeks and also for securing it in the harvest, we shall be in good shape.

All crops have been doing well. Corn has been catching up during this fine weather and if frosts hold off until early September there will be a good crop of corn.

Upon the whole, the Northwest is in good shape.

Farwell, Ozmun, Kirk & Co.

GRAPHITE.

Editor Hardware:

There is always such a sameness to our letters that we think it quite as well to drop the attempt of writing you a trade letter.

It does seem as though there is no end to our building projects. We have just completed an "L"-shaped factory, 40 feet in width and 100x100, four stories and basement. That fatcory is for our brass and rubber department.

The building from which the brass and rubber department has moved will be used for an extension of our graphite lubricating greases and lubricating graphites.

We have broken ground and commenced work on an addition to our pencil lead and power department, which will be 50 feet in width and extend through the entire block 200 feet.

Whenever we pick up one of the various departments of our factories and handle it as though our lives and bread and butter depended upon it, we find a ready market.

We have lately done this with our Graphite Axle Grease, with the result that the six months of 1905 show an increase of 139% over sales of Graphite Axle Grease for the corresponding time of 1904.

Our graphite paint department has also forged ahead under the careful management of the manager in charge.

Graphite lubricating greases and Dixon's famous Ticonderoga flake graphite are sold up to our capacity, hence the vacating of the brass and rubber department and the addition to the grease and lubricating graphite department.

While we cannot say that we have a small and select clientele, we can say with full truth that we aim for quality as well as for quantity. The Dixon Company spares no pains in endeavoring to obtain and to use only the very best ingredients in all of its goods. The profits, therefore, are not as large as they might otherwise be, and there are no special temptations held out to competitors, but there is a reputation being made for the Dixon products that should be a gold coin asset for the Dixon Company.

Yours very truly,
Joseph Dixon Crucible Company.

SPECIAL BRANDS.

By C. F. M.

Special Brands are here to stay and I do not have the slightest idea that a single one of the "Brave Nineteen" expected to eradicate the evil entire, but it has been growing so rapidly of late—by leaps and bounds—that the manufacturers thought it high time to call a halt.

Even the retailer is arguing to-day he and not the jobber is most benefited by his own brand, hence it should be meted out as a privilege to the retail merchant and not the jobber.

It was the abuse of private brands, labels, etc., that brought matters to a climax, and from now on the tide will change. The principal reason for special brands was to make a greater profit—Barnum would say to humbug the people.

Frenzied Cookery Worse Than Frenzied Finance

The squabbles ruin your digestion as well as your bank account.

Cooking with "NEVER-BREAK" Steel Spiders, Griddles and Kettles is the best form of Life Insurance.

Right thickness. Prevent scorching or burning of food.

Ask for catalogue. Also price list of shovels, etc.

THE AVERY STAMPING CO., Cleveland, Ohio

Sole Mfrs. "NEVER-BREAK" goods.

STOP TAKING CHANCES

THERE'S A HEAP O' SATISFACTION

in a name—a name that stands for bestness—best quality. Take Axle Grease for instance; if there's any kind that gives all-a-round and lasting satisfaction, it's

FRAZER'S AXLE GREASE.

It's the Grease of quality; puts all the "just as good as" Frazer kind in the shade. Sells quickest; lasts longest. Sold in boxes, cans, pails, kegs, barrels. The question is: how much do you need.

FRAZER LUBRICATOR COMPANY,
85 Murray St., New York.

If the retailer and consumer could but hear jobbers, their buyers and salesmen comment on competitors' special brands, they certainly would be afraid to buy them, and if they who know about the quality of the same condemn other jobbers' brands indiscriminately, what can the consumer judge of such brands?

As a rule special brands are very much inferior to factory brands and sold at a greater profit, and the consumer does not get value received.

Jobbers have contended their buyers watched quality most carefully and were competent to judge, but is it common sense to argue, much less to imagine, the average buyer is as competent to judge the quality of an article as the maker. The buyer may judge of its appearance, and many jobbers are so zealous in arguing their cause to state manufacturers were honest enough to take special care of their special brands, giving them preference over factory brands, and often of superior quality. I have never quite reached that point of belief, neither do I believe any one else honestly believes it; it isn't human nature. Every one knows mighty well if a maker of high-grade goods with an established reputation had a "batch" coming through his factory, a part to go into special brands and a part his own best factory brand, and a few of the goods were a trifle "off color," yet not in any way defective, that nine-tenths of us all would (unconsciously) let all the "off color" goods go into the special brands, and it would not be dishonest to do so.

This talk of a high quality of special brands is "Tommy Rot." We all know, as a rule, special brands stand for nearly everything but quality.

If the manufacturers had realized years ago as they are realizing now that it is necessary to place restricted selling prices on well-known factory brands, allowing the jobber a satisfactory profit thereon, which he is entitled to, we would be hearing less about private brands, no profit on factory brands and catalogue house evils.

The jobbers appear to want the manufacturers to bear all the burden of conditions they bring about themselves.

HOW MIRRORS ARE MADE.

The making of modern mirrors consists first in ridding the glass to be used of all defects and then silvering. If the mirror is to be beveled, additional operations of beveling and preparing the glass precede the silvering. Nowadays silver has, to quite an extent, taken the place of mercury in this industry.

In selecting glass suitable for mirrors, the experienced workman, by placing a piece of black cloth behind the glass, and looking through at an angle, quickly discovers all defects. Even the scratches and stains must be removed in the making of a really good mirror. Scratches are removed by holding the glass upon an upright buffing wheel covered with felt. The stains are removed by a device known as a "blocking machine." Unless it is to be beveled a glass free from stains and scratches is ready for silvering.

For beveled mirrors, plate glass is used. The bevel is obtained by holding the glass against a horizontal roughing wheel, sand and water playing an important part in the operation. The bevel, like the surface, must also be polished. An emery wheel is used to remove the sand and clean the surface. Then after being held against a horizontal grindstone, a polishing wheel with pumice stone is used. To brighten the glass, a buffing wheel rouge upon it is employed.

At least three things are claimed for silver in place of mercury in the making of mirrors. In the first place, that it reflects more light; secondly that mirrors can be turned out in less time, and, in the third place, that the work is made more healthy for the employes. In silvering a modern mirror, after the glass has been freed from defects and sufficiently polished and washed, a preperation that will hold the silver is poured on. Next the glass is removed to a perfectly smooth table which is heated by steam. As the silver solution is poured upon this table a goodly per cent. of it at once begins to adhere, the remainder later being drained off. Over the back, shellac is then applied to keep out the moisture.

In the earlier days of mirror-making, sheets of tin foil were first placed upon the surface of the glass and pressed closely to it, after which it was covered with quicksilver, the quicksilver at once forming an amalgam with the tin. Various methods are employed in making mirrors where quicksilver is used.—*Popular Mechanics.*

"REASON WHY" ADVERTISING.

The success of catalogue houses in getting business by advertising is explained in an interview with the advertising manager of one of the largest houses of this kind, that recently appeared in *Judicious Advertising*. The Ad. Man said:

"We thoroughly believe in Reason Why advertising," he said. "Development of the best ways of presenting Reasons Why, though, has naturally been a slow growth. Here is a catalogue of vehicles and harness, which we sent out in 1896. It contains a dictionary of trade terms and phrases that not only explains technicalities in the catalogue itself, but offers a means of knowing quality in any vehicle. Perhaps it was the desire to make all necessary trade terms clear that led the compiler of this catalogue to include the dictionary. It is one of the earliest examples of a method that has since become general in our price lists, catalogues and printed matter.

"Succinctly, this method aims to teach people who read our catalogues and literature to examine all advertising matter, ours first of all, with the same cold, critical judgment they would bring to bear on an article they were actually about to buy. We show them how to go further and examine the standing of the firm that offers a certain article, and to tell the difference between a selling offer that is honest on its face, and one that is certainly dishonest when examined logically. Hardly a piece of printed matter goes out of here without a diagram or technical talk of some sort illustrating various kinds of the same article and showing just where worth ends and worthlessness begins. This Reason Why policy has really been forced upon our house by the hundreds of irresponsible firms that do business in the mail order field upon advertising statements rather than satisfactory merchandise. Our printed salesmanship arguments teach our customers that nothing is free in this world, and show them the tricks in other trades.

"Cheap bicycles have tires without a maker's name, rough unfinished frames, bearings like those on a sulky plow, and were painted by the dipping process. Cheap roofing paper is loaded with tar that soon dries and evaporates, or cracks, instead of the asphaltum necessary to good roofing paper. Cheap stoves are made of low grade iron, the pieces being bolted together instead of accurately ground, fitted and sealed. Some of the cheap shot guns on the market are as likely to shoot out of one end as another. Cheap telephones are sold by the hundred to unthinking people and eat up in the first year more than the original saving in repairs, if they work at all. Steel bath tubs made of 26 gauge steel are regularly sold, the advertisers keeping quiet about thickness, as only a 20 or 22 gauge steel is durable. These are but a few of the conditions that prevail in our business. Every department has its own particular tricks to expose and we expose them in our advertising, giving the people who get our catalogues precisely the information that enables our buyer to guard against trade tricks.

"Reason Why also permeates every description in our catalogues and price lists. We take the greatest care in descriptions of each article to avoid the use of trade terms. None of our writers is permitted to refer to a manufacturer's catalogue in writing descriptions, but must go and get the article itself, set it up before him and tell what he sees. Even measurements and weights are obtained at first hand. Consequently all descriptions are clear and comprehensible to anyone, trade terms being wholly omitted. The latter are frequently meaningless to manufacturers themselves, being simply arbitrary names to describe certain qualities, but the extent to which they are continued and handed down in catalogues is amazing.

"The Reason Why policy is just as proper for the retail merchant as for his mail order competitor. It takes a little brain work on the part of the dealer to work out this class of advertising matter, but it is not an extremely difficult matter if he will only forget for the moment that he is writing, and talk with his pencil just as he would talk over the counter to his customer. Then a careful going over, a little boiling down and the result is, eight times out of ten, a trade pulling ad.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS ISSUED JULY 4, 1905.

793,641. Combined Door Closer and Fly Chaser. B. Dodd, Boulder, Col.
793,655. Coffee Pot. W. L. Haley, Alvin, Texas.
793,656. Can. R. Hanna, Sherman, Texas.
793,686. Pipe Wrench. F. Sherkel, Jr., Houtzdale, Pa.
793,705. Lawn Edge Trimmer. R. P. Winsor, Providence, R. I.
793,714. Steak Tenderer. C. A. Deal, Franklin, N. C.
793,724. Cork Screw and Spoon Holder. A. M. Irby, Vernonhill, Va.
793,729. Wrench for Threashing Cylinders. M. Mahlen Osakis, Minn.
793,748. Combined Step Ladder and Ironing Board. W. P. Smith, Nevado, Mo.
793,781. Self Heating Soldering Iron. W. E. Garrett, Dawson, Ill.

PATENTS EXPIRED JULY 31, 1905.

386,817. Coffee Pot. A. Harry, Los Angeles, Cal.
386,829. Pocket Candle Case. J. H. Johnson, Boston, Mass.
386,864. Lifting Jack. A. W. Anderson, Goodhue, Minn.
386,870. Spray Nozzle. D. T. Ellis, Bridgeport, Conn.
386,885. Door Hanger. R. J. Hosner, Romeo, Mich.
386,954. Lifting Jack. J. Baldwin, New York, N. Y.
387,015. Fish Hook. G. Smith, Brooklyn, N. Y.
386,038. Triangular Lamp. C. Bergener, Rochester, N. Y.
387,133. Combined Saw Set and Punch. W. G. Avery, Cleveland, Ohio.

PATENTS ISSUED AUGUST 8, 1905.

795,882. Chain Door Bolt Lock. R. T. Atkin, New York, N. Y.
795,995. Door Check. T. C. Martin, Cleveland, Ohio.
796,001. Plane. J. H. McGhan, Baker City, Ore.
796,026. Door Fastening Device. F. G. Willard, Utica, N. Y.
796,113. Hinge. J. R. Corbett, Rochester, N. Y.
796,145. Can Opener. G. H. Parish, Kingston, N. Y.
796,182. Adjustable Auger. A. G. Bohlin, New York, N. Y.
796,187. Screw Driver. J. D. Campbell, New York, N. Y.
796,201. Brace. B. W. Frampton, Allegheny, Pa.
796,206. Wrench. O. G. Guss, Delphos, Ohio.
796,305. Wrench. E. Enderes, Littleport, Iowa.
796,352. Compound Tool. J. W. Quilling, Ursa, Ill.
796,371. Wrench. R. F. Thompson and G. Despond, Toronto, Canada.

MICKEY'S MUSINGS.

A trust is a evil thing—Dubbly so if you kant get into it.

A hatchet-faced stenogerfer is a sine of a happy hoam.

p. s. de boss's.

A peak-a-bu shurt waste on a blond stenogerfer has recked more biznesses dan unwys speckelation.

Our casheer lately lef' for parts unknone. It wus roomered he was behined. He wuzzent. He wuz ahed. The furm was behined.

The only way to beet de races is to give yer munney to de Salvation Army. p. s. i kno coz ive tride.

Wen de udder feller's kollecktor cums arounr our plais, de boss calls him a infurnal skoundrel. Wen de udder feller turns *our* kollecktor down, de boss sez he is a dam roag. Such is hoomanity.

Wen a clurk gets down before offis ours hez either industrus, or hez been out all nite an' aint got no plais els to go.

Wat regard has capytal for laber! De boss kict becoz I used one of his postig stamps fer a pursonal letter. Dat shos he dont kar 2 cents fer me.

A neet desk is the sine of an orderly mind—or a lack of biznes.

De minit a clurk goes to raisin side fuzz on his face, its a sine he'z goin to hit de boss fer a raze.—*Judicious Advertising.*

TABLE OF ALLOYS.

The following is a list of the principal alloys in use and should be kept for reference:

A combination of zinc and copper makes bell metal.

A combination of copper and tin makes bronze metal.

A combination of antimony, tin, copper and bismuth makes britannia metal.

A combination of copper and tin makes cannon metal.

A combination of copper and zinc makes Dutch gold.

A combination of copper, nickel and zinc, with sometimes a little iron and tin, makes German silver.

A combination of gold and copper makes standard gold.

A combination of gold, copper and silver, makes old standard gold.

A combination of tin and copper makes gun metal.

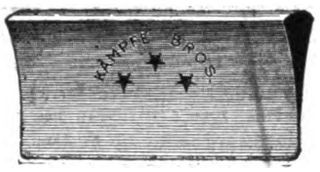
A combination of copper and zinc makes mosaic gold.

A combination of tin and lead makes pewter.

A combination of lead and a little arsenic, makes sheet metal.

A combination of silver and copper makes standard silver.

A combination of tin and lead makes solder.



A combination of lead and antimony makes type metal.

HIGHEST AWARDS

WHEREVER EXHIBITED

THE REASON WHY

Star Safety Razor Blades are Superior in Quality

Star Blades are hand forged from high-grade special refined bar steel. Each blade is hardened and tempered individually. They are concaved and honed by hand on scientific principles—this is the *old-fashioned process; it cannot be improved upon.* In addition to this, the Star Safety Razor Blade is a *magnet* in itself—will never irritate the skin and will retain a keen cutting edge, as age improves its keenness and cutting qualities.

Many methods have been devised to cheapen the process of manufacturing razors, and many manufacturers sacrifice quality to reduce the cost of production by stamping their blades from *sheet metal,* hardening them in lots of 200 or 300 at a time and grinding and honing by machinery. Such products are *invariably of inferior quality.* Extensive advertising may influence many to purchase such merchandise, but they realize after a trial that they have made a poor investment, and have lost many good customers by selling them an inferior and unsatisfactory article.

The Star Safety Razor has a reputation for quality and superiority throughout the civilized world. More Star Safety Razors are in daily use than all other makes combined, and these daily *shavers* are our best advertisers; they are constantly recommending the Star Safety Razor to others. Merit alone has brought about these results.

Competitors may not admit the truth of our arguments. However, we are *absolutely sure* in our statements because we have the *practical experience and positive knowledge.*

Would you part with the razor handed down by your grandfather? No! Why? That razor was made before the cheapening process was known. Star Safety Razor Blades are made the way your grandfather's razor was made. We have no secrets. We *know* how to make a *superior blade* and spare no *expense, skill or labor TO DO IT.*

All genuine Star Safety Razor Blades have the three "stars" and the name "Kampfe Brothers" stamped on the face of the blades, also the name "Kampfe Brothers, N. Y., warranted" on the back of the blade, as above cuts will show.

The Star Safety Razor

is the only mechanically perfect safety razor on the market to-day. It is constructed on scientific principles by practical and experienced mechanics who have been manufacturing the Star Safety Razor and blades for the past quarter of a century with great success.

Write us for full particulars, catalogue and quotations.

Star Safety Razor with frame opened o it can be easily cleansed and dried

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Anderson, Texas.—The Anderson Hardware and Furniture Co. has been incorporated. Capital $10,000. Incorporators, J. T. Prestwood, Dudley Brown and W. S. Brown.

Bowling Green, Ky.—The Barnett Hardware Company, which has been doing business for several years on Main street, has incorporated under the same name. The incorporators are J. L. and C. E. Barnett and W. W. Mansfield and the capital stock $3,500. The purpose of the corporation is to conduct a general Hardware and queensware business. J. L. Barnett is general manager and treasurer. The stock will be largely increased and there will be added an extensive line of stoves, cooking ranges, etc.

Charleston, S. C.—The formal reorganization of the Marshall-Wescoat Hardware Company has been effected, and the concern is now again actively engaged in business under new management, with an increased capital stock and facilities for the conduct of its business. The company has been organized with capital stock of $120,000. Walter Pringle is the president; E. H. Pringle, vice-president, and J. J. Wescoat, general manager. The house is an old established concern and under the present progressive management, with sufficient capital, the company will do a better business than ever before.

Dayton, Ohio.—J. L. Castle has opened a new Hardware store.

Emmorton, Md.—C. C. Spencer & Co. have opened a new and attractive store and will carry a full line of general merchandise and Hardware.

Evergreen, Ala.—The Dunn Hardware Co. has been incorporated. Capital stock, $10,000. Incorporators are Henry W. Dunn, S. J. Ebberthon, C. P. Deming and D. E. Witherington.

Ft. Wayne, Ind.—The Freiburger Hardware Company has been incorporated. The capital is $10,000. Joseph J. Freiburger and Martin A. Oerber are stockholders.

Kansas City, Mo.—The Kansas City Doorknob, Bell and Supply Co. has been incorporated. Capital stock $50,000.

Le Sueur, Minn.—A. W. Heberly, of Henderson, has associated himself in the Hardware business with J. W. Groetsch, under the firm name of Groetsch & Heberly.

Linden, Ala.—The Linden Furniture and Hardware company has been incorporated. Capital stock $5,000. Incorporators, Thomas D. Matkin, E. F. Dunn, A. A. Matkin.

Madison, Kans.—J. E. Ellsworth has opened a new stock of Hardware.

Midvale, Idaho.—J. L. Keithley will start a Hardware store.

Milaca, Minn.—The L. A. Anderson Hardware Company has been incorporated.

Newton, La.—Chambliss Hardware Company has been incorporated with a capital stock of $25,000. W. H. Chambliss, N. H. Thorn and others, incorporators.

Pensacola, Fla.—The Gordon & Brown Hardware Company have opened a new store and will carry everything in the hardware line, both wholesale and retail.

Reading, Pa.—The George C. Unger Hardware Company has been incorporated. The capital stock is $50,000.

Savannah, Ga.—The Osborne-Marlow Company has been incorporated by John Howard Osborne and Elliot S. Marlow. The concern proposes beginning business with $5,000 capital stock, but reserves the privilege of increasing the amount to $100,000. The Osborne-Marlow Company will conduct a wholesale and retail hardware, willowware and stove business.

Scott's Bluff, Neb.—King & Hall are about to engage in the Hardware business.

Tipton, Iowa.—The Tipton Hardware Co. has been incorporated. Capital $25,000. The officers of the company are C. M. Cook, president; A. J. Pearce, vice-president; S. G. Frink, secretary and treasurer.

Winona, Wash.—J. B. Ferguson has started a new Hardware store.

Changes.

Altus, Ark.—S. I. Rosen has been succeeded in the Hardware and house furnishing business by S. I. Rosen & Co.

Bristol, Conn.—The business of P. H. Sessions & Son, which has for many years been carried on as a partnership, has been taken over by the corporation of J. Sessions & Son. There will be no change in the management. Alfred L. Sessions is president of the company.

Breckenridge, Neb.—Wm. Gray has sold his Hardware business to William C. Sadler.

Castle Rock, Colo.—Wallace Holcomb has bought the Hardware and lumber business of Preston Day.

Chesterfield, Ill.—J. A. Wooley traded his Hardware store and stock of goods to L. O. Haywood of Brighton for a farm consisting of 178 acres.

Dannebrog, Neb.—M. A. Madson has purchased the Hardware business of C. T. Krough.

Delhi, N. Y.—Wood & Inderleid have bought out the business of S. P. Olcott.

Eureka, Kan.—Wm. Johnson has sold his Hardware and implement business to Stewart Bros.

Evansville, Ind.—Fred. H. Straub is now a member of the Hardware firm of Fred. P. Straub & Co. Mr. Straub has been connected with his father's Hardware business for 18 years.

Ft. Smith, Ark.—The Speer Hardware Co., wholesale shelf and Heavy Hardware, house furnishing goods, machinery, vehicles, etc., has increased its capital stock from $60,000 to $300,000.

Girard, Ill.—J. W. Boston has sold his furniture and Hardware stock to J. W. Clear.

Goodlettsville, Tenn.—Chas. Cartwright has succeeded to the Hardware business of Cunningham & Cartwright.

Grand Junction, Colo.—A. N. Bucklin has sold his Hardware business to S. R. Voils.

Guilford, Mo.—A. D. Wilson has sold his Hardware business to G. B. Rimel.

Harper, Kan.—O. J. Whitney has succeeded to the Hardware and implement business of Melvin & Whitney.

Havensville, Kan.—J. Logan has purchased the Hardware stock of F. Day.

Havensville, Kan.—N. Fred. Pitcher has sold his Hardware business to L. O'Meara.

Hylton, Texas.—Duncan Bros. & Cave have succeeded W. E. Duncan in the Hardware and general merchandise business.

Milwaukee, Wis.—The Kiefer & Haessler Hardware Co. has recently increased its storerooms and will make a specialty, in addition to its regular lines, of builders' Hardware. Mr. Haessler, who has recently identified himself with the business, was for 15 years with the Philip Gross Hardware Co. of this city.

North Bend, Ind.—Farrell & Gaughen have succeeded to the Hardware business of W. M. Orr.

Onawa, Iowa.—Johnson & Abild have been succeeded in the Hardware business by Goodburn & Abild.

Pea Ridge, Ark.—Patterson Bros. have moved their Hardware business to Gravetti.

Port Huron, Mich.—Charles A. Sturmer has purchased the Otis E. Taylor Hardware store on Military Street.

Scranton, Pa.—The wholesale and retail hardware business of Thomas F. Leonard, at 505 Lackawanna avenue, has been transferred to the Thomas F. Leonard company. The company was recently organized by Mr. Leonard and several of his employees. The entire capital stock of $1,000,000 is subscribed and paid in full. The officers elected are: Thomas F. Leonard, president; John J. Richardson, vice-president; William F. Shean, treasurer; Richmond N. Roche, secretary. The organization of the company was necessitated by the increasing volume of Mr. Leonard's business, which required more space, stock, employees and supervision.

St. Ausgar, Iowa.—Tollefson & Moe have succeeded to the Hardware business of Tollefson & Bohack.

Strang, Neb.—Wheeler & Messiman have succeeded to the Hardware business of Wheeler & Sheppard.

Uniontown, Pa.—The Hunter Heating Co., of Uniontown, and the Shell Hardware Co., with stores at Connellsville and Somerset, have been merged under the name of the Schell Hardware Company. The capital stock will be increased from $60 000 to $100,000.

Vancouver, B. C.—Arrangements have been made for the sale of the Hardware business of MacPhail & Co., 651 Granville Street, to Logan E. P. McAdam, late of Dunedin, New Zealand, who takes over the business on September 1.

Verona, Mo.—A. M. Sherwood has purchased the business of the Verona Hardware and Implement Company.

West Branch, Iowa.—Smith & Son have sold their Hardware business to Myers & Zeller.

Wheeling, W. Va.—E. C. Rogerson has sold his Hardware store on Jefferson Avenue to Isaac Williams, of Searlsville, Ohio.

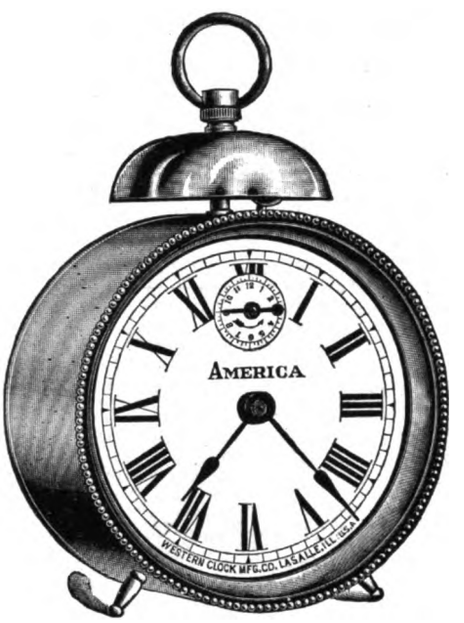
There Are Lots of Men

who think a Razor Strop is of little importance. This is certainly a mistaken idea; a good razor strop, when made PROPERLY is the WHOLE THING, makes shaving easy.

The Gibford RED-E-FOR-USE Razor Strop is a joy to the user.

If you have not sold the Gibford strop write for catalog and allow us to send you a sample half dozen, express prepaid.



WRITE FOR CATALOG ANYWAY.

THE BISSELL SWEEPER

LIKE the Steinway Piano, prides itself upon its age and its reputation. This is an age when mediocrity frequently takes refuge behind the claim of "novelty," "something new," as if novelty necessarily meant superiority.

It therefore behooves the trade to carefully consider the difference between the article of recognized merit and established reputation, and that which rests its hope for patronage chiefly upon the claims of "novelty," "something new," etc.

The Bissell Sweeper of to-day represents the highest point of development in the sweeper art, and logically so. We have been engaged in this business exclusively for twenty-nine years, and have developed mechanics in this highly specialized line that are veritable artists, and that necessarily cannot be found outside our factory. The reasons are plain; we have furnished the only opportunity in all this wide world for this particular development of mechanical skill.

Back of all this mechanical development which time and opportunity alone accomplishes, the Bissell Sweeper is absolutely the only one ever put upon the market under a sound, sincere price maintenance policy, that insures to the dealer a good profit in the sale of our product.

Write for our special State and County Fair Offer.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Anderson, Ind.—Anderson Tool Co. has been incorporated; capital stock, $10,000. Directors, Edward S. Lea, Clement W. Hooven, Chester G. Brown, Thomas N. Stilwell and Horace C. Stilwell.

Bradford, Pa.—The Case Cutlery Company has commenced operations at its new plant on Bank Street, about 30 men being employed. This force will be steadily increased and it is expected that within a month the factory will be working at its full capacity. The equipment of the establishment is of an elaborate, up-to-date kind and the finest varieties of cutlery will be manufactured there.

Brooklyn, N. Y.—The Riley Machine Works has been incorporated to manufacture and sell tools, engines, machinery, etc. The directors for the first year are: Reuben Riley, Frank M. Riley and Amanda Riley, of Brooklyn.

Camden, N. J.—M'Govern Manufacturing Co. have been incorporated; objects, manufacturing grates, grate bars and any form of iron or steel, mining, etc.; capital, $100,000. Incorporators: Paul Reilly, William Nuneville, Philadelphia, Pa.; William S. Darnell, Camden.

Cincinnati, Ohio.—Nail Machine Tool Co. has been incorporated. Capital stock, $34,600.

Columbus, Ohio.—The Columbus Plow Co. has been incorporated by Henry J. Booth, Albert Reckenbacher, D. E. Sullivan, William McGlinchay and Nahum Jones. Capital $30,000.

Columbus, Ohio.—The United States Hoe & Tool Company commenced practical operation on July 13. The company expects to be in complete working order shortly, when several hundred men will be steadily employed in the manufacture of small tools. The officers of the company are: President and treasurer, E. A. Cole; vice-president, J. W. Kauffman; secretary, T. F. Connors; superintendent, George Clow; sales agent, B. F. Hadley.

Connellsville, Pa.—The Monessen Manufacturing Company has been incorporated, and will begin the manufacture of three newly patented tools within another month. The three articles consist of a patent hatchet, a wagon brake adjuster and a combination tool serving as a box opener, screw driver and nail puller. These are patents of J. R. Balsley of New Haven, which the promoters bought outright. The devices all look like winners from the start. Following are the officers of the new company: H. N. Odbert, president; William Mitchner of Bellevernon, vice-president; S. B. Graham of Bellevernon, secretary and treasurer; the directors are R. F. Luce, S. B. Graham, H. N. Odbert, William Mitchner and D. M. McCloskey of Charleroi.

Craton-on-Hudson, N. Y.—American Machinery Company has been incorporated to manufacture machinery, tools, etc.; capital, $25,000. Incorporators: George Murray Brooks, No. 43 Wall Street; George A. Littlejohn, No. 2000 Madison Avenue; Erna Paulus, No. 17 Battery Place, all of New York.

Crescent City, Fla.—The Preston-Miller Company has been incorporated with a capital of $20,000, to manufacture and sell tacks, tubs, crates, packages, etc. C. H. Preston, president John W. Miller and Daniel T. Gans are among the incorporators.

Jersey City, N. J.—Harker & Co. has been incorporated; agent in charge, Clarence Kelsey. Capital, $100,000. Incorporators, Stephen L. Harker, Eusebio F. Cabezola, Margaret J. Cabezola and Nellie H. Harker. The company is to manufacture and cover wire of all kinds.

Kansas City, Mo.—The Interstate Manufacturing Co., an implement concern, has been incorporated. The capital stock was given as $100,000. The incorporators are John M. Wilson, R. B. Taliaferro, J. E. Markle and J. M. Wilson as trustee for L. R. Wilson, all of Kansas City.

La Salle, N. Y.—The Evershed Manufacturing Co. has been incorporated to make and sell dumb waiters, elevators, refrigerators, etc. Capital stock $50,000. Directors for the first year are Henry Keller and Frederick Deimer of La Salle; Frederick E. Gee and Albert W. Morse, of North Springfield, Pa., and Geo. F. Graf, of Buffalo.

Monmouth, Ill.—S. J. Wolff is to engage in the manufacture of razors and knives. He will also put in an automatic machine for lawn mower grinding.

Newburyport, Mass.—The Ordway Oven & Heating Company has leased a part of the paint shop of the Newburyport car works, and will manufacture bakers' tools.

Paducah, Ky.—The Rubber Grip Tool Handle Company has been incorporated with $20,000 capital.

Pittsburgh, Pa.—The Prouty-Pierce Gasoline Locomotive Company has merged with the Western Wheelbarrow Company and the concern will hereafter be known as the Western Wheelbarrow Manufacturing Co. The company has incorporated under the laws of Kansas for $150,000 and will manufacture wheelbarrows and trucks. S. W. Pierce, a banker of Junction City, Kan., is president; T. G. Dade, vice-president and general manager, and Henry Parsons, an Armourdale real estate man, secretary.

Salem, Mass.—The Salem Machine Knives Company has been incorporated; capital, $25,000; president, Joseph B. Couin, treasurer, Pierre St. Pierre.

Sandyhill, N. Y.—Mill Machinery Manufacturers has been incorporated; objects, manufacturing Heavy Hardware. Capital, $10,000. Incorporators: William J. Gallagher, Frank M. Chapman, Brodie G. Higley, all of Sandyhill.

Springfield, Mass.—The International Machine and Screw Company has been organized to manufacture machine screws by means of a new machine which has been invented by George T. Warwick of this city and which has commended itself to all who have seen it. The company is to be incorporated with a capital stock of $500,000 and the stock books are now open for subscriptions. The officers of the company are all well-known local men, as follows: President, T. W. Leete; vice-president and general manager, George T. Warwick; directors, T. W. Leete, George T. Warwick, D. O. Gilmore, Henry E. Marsh and Sherman D. Porter. The International machine is said to make in 10 hours 18 times as many screws as can be made by the automatic machine now in use.

Toledo, Ohio.—The Toledo Plow Company has been incorporated by E. W. Toberton, H. E. Frankeberger, R. W. Kirkley, Charles W. Bond and Frank H. Gear. Capital stock, $25,000.

Toledo, Ohio.—The Toledo Specialty Furniture Co. has been incorporated by Carl Kieper, Emil Kieper, E. Horten, Frank L. Mulholland and Charles Hartmann. They will manufacture refrigerators, ice-boxes, office furniture, etc.

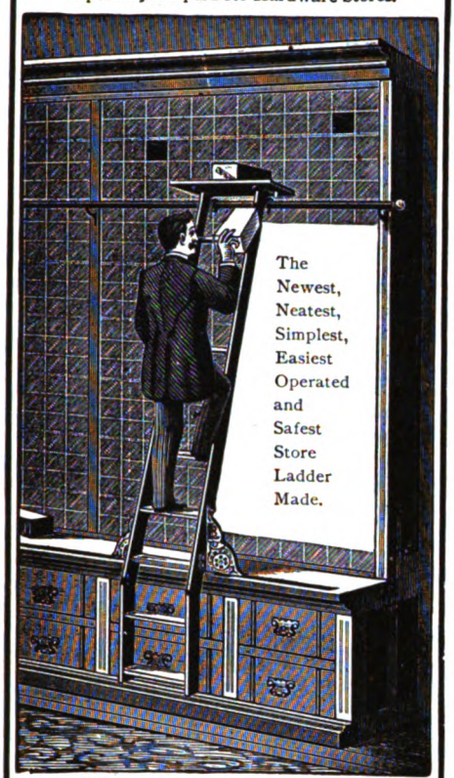
Changes.

Binghamton, N. Y.—The 1900 Washer Co. is to erect a branch factory in Germany for the manufacture of machines for European sale. The company has been planning for this factory for some time and by the opening of it will be enabled to sell machines on the continent much cheaper than under present conditions. The final arrangements for this factory are now being carried on and when they are completed men from the local factory will be sent to Germany to start the work properly, and train the employees.

Hartford, Conn.—The Capewell Horse Nail Co. is establishing a factory in Toronto to supply the Canadian market.

Lorain, Ohio.—The American Stove Co. will erect a new factory building. It will be a one-story building 81 by 153 feet in size.

New Britain, Conn.—The Corbin Screw Company has bought property on Myrtle, Lafayette and High streets from the St. Mary's Roman Catholic Church. The consideration is in the neighborhood of $50,000. It is understood that a new plant will be erected and that the company will concentrate its several plants.



Reading, Pa.—Remaley, proprietor of the local screen factory, will build a $150,000 addition to his shops and install a perforating plant of which there are only three in the country.

Reading, Pa.—The Reading Stove Works are making a number of improvements to their plant. An addition 49 by 230 feet is being built to the foundry, accommodating some 35 more molders.

STANDARD METAL STRAP CO., 336-342 E. 38 St., New York

In days of yore upon our shore,
The Pilgrim Fathers landed,
They called the spot good Plymouth Rock,
On which they first were stranded.

That name's been placed with fitting grace,
Upon our world-famed floor wax;
Many times it has made a prosperous trade
For dealers whose business has grown lax.

THE ENDURING QUALITIES
OF
Plymouth Rock Floor Wax
(THE BEST HARD WOOD FINISH)

Make it the best and most popular finish for the consumer and therefore the best wax for the dealer to handle.

PLYMOUTH ROCK FLOOR WAX is the Best Finish.

Because it doubles the life of hardwood flooring and preserves its appearance unchanged for years
Because it does not obscure but emphasizes the natural beauty of the wood, bringing out the grain with rare subdued effect.
Because in any temperature or any climate it works perfectly, neither flaking in cold weather nor sticking in warm weather, but keeping the floors in smooth, polished condition.
Because it renders floors dust and dirt proof and is easily cleaned.
Because it does not show scratches or heel marks.
Because it is very economical—a pound finishing several rooms and renewal being seldom necessary.

It's a good thing for the dealer who wants an article that holds customers.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Chicago, Ill.—The Armac Motor Co. has been incorporated with $50,000 capital. S. T. Meservey, A. N. Eastman and E. P. Eastman figure as the corporators.

Chillicothe, Ohio.—Stocklin & Hermstein are a new firm who will handle a fine line of Hardware and sporting goods.

Cleveland, Ohio.—The Smokeless Powder and Cartridge Co. has organized with a capital of $5,000 and will shortly begin the manufacture of smokeless powder.

Dallas, Texas.—The Moseley Sporting Goods Company has been incorporated with a paid-up capital of $30,000. The incorporators are J. H. Moseley, E. W. Miller and J. A. Rose, all of Dallas.

Dayton, Ohio.—The Pneumatic Tire Protector Company has been incorporated by G. G. Peckham, Walter S. Thomas, E. E. Cooto, G. T. Thomas and D. W. Wood. Capital stock $10,000.

Elizabeth, N. J.—The Stanton Manufacturing Company has been incorporated. Capital stock $10,000. Incorporators: A. C. Stanton, Maxwell K. Willoughby and Frank Southmayd all of Roselle Park. The company will make automobiles and motors of all kinds, also tools, machinery and parts.

Hume, N. Y.—The Allegheny Powder Co. has been incorporated to manufacture explosives; capital, $20,000. Incorporators: Cart J. Howden, Frank W. Hark and Frank W. Cole, all of Filmore, N. Y.

Montreal, Can.—The General Explosives Company, Limited, has just been incorporated. The shareholders are Mr. R. L. Dillon, of Montreal, John McMartin, contractor, of Cornwall, and several Ottawa gentlemen. The capital stock is $20,000. The object is to manufacture explosives, make cartridges, acquire, and sell patents necessary for such business, and generally to carry on the manufacture and sale of powder, dynamite and other explosives.

Pensacola, Fla.—Walter S. Horton has opened a bicycle shop at No. 12 East Intendentia Street, where he will keep for sale and rent all the standard makes of bicycles. He will also deal in general bicycle repairing, typewriting, guns, pistols, locks, etc.

Port Huron, Mich.—The Boyce Hardware Co., which takes over the stock of Hardware and sporting goods of S. L. Boyce & Son, has been incorporated by Samuel L. Boyce, Charles F. Boyce, Miss Jennie B. Boyce and Miss Florence A. Boyce. The company is capitalized at $30,000.

Schuylkill, Pa.—Frank Starr and George W. Beddall of Port Carbon, Pa., will deal in sporting goods in their store at this place.

Smithtown, N. Y.—Jacob Bowers has opened a new repair shop.

Changes.

Akron, Ohio.—The Goodyear Tire & Rubber Company have commenced the building of two large additions to their plant and this, with the installation of new machinery and a powerful engine, will place the plant in position to handle the growing business of this company. An addition to the engine room, 80 by 38 feet, is being built while the tire department is being almost doubled in size, a new building, 90 by 46 feet, being now under course of construction as an addition to the present tire shop. A new 1500 horsepower cross compound Corliss engine has been ordered and will be installed in the new addition to the plant. This will almost double the power capacity of the plant and will be used to take care of a large amount of new machinery that has been ordered.

Marlow, Tenn.—The Rand Powder Company, whose manufactory is being established on the Louisville & Nashville and the Southern railroads will begin operations about August 1. The Rand Powder Company will have a capacity of 600 or 700 kegs of powder a day. The plant has a power of 1,200 kegs a day. It is probable that after a short while its capacity will be increased to that extent. Sixty-five to seventy men will be employed by the company.

Minneapolis, Minn.—The E. A. Williams Cycle Company of this city has bought out the Minneapolis cycle branch of the Beckley-Ralston Company of Chicago. The Beckley-Ralston Company will continue the Minneapolis branch of its auto business. The E. A. Williams Company, having also bought out the Northern Cycle and Auto Company of this city last October, has, by the deal just closed, become the only large manufacturer and jobber in the cycle business. All three companies were conducting the jobbing part of their business in the large building at 116 Sixth Street south. The Beckley-Ralston Company retains a corner of the ground floor for the display of its automobiles, but all the rest of the space is now occupied by the local company.

Rockville, Conn.—E. J. Martin & Sons of this city, manufacturers of fish lines, are to erect a new boiler house in connection with their business. The business has developed so rapidly of late that the firm is in need of more power. The plans for the new boiler house call for a frame building 50 by 30, including boiler house and coal bin.

San Francisco, Cal.—The Emil. B. Bekeart Company of San Francisco have sold out their tire agencies and tire repair shops both in San Francisco and Los Angeles to the Fisk Rubber Co., who since July 1 have conducted these branches on their own account. The reason assigned is that the Bekeart Company could not handle increased business in this line and still do justice to their gun and sporting goods trade.

St. Paul, Minn.—The Armac Motor Co. which recently reincorporated under the laws of Illinois, with its capitalization increased to $50,000, will remove its present plant to Chicago on August 15th, locating at 464 Carroll Avenue.

Toledo, Ohio.—Ezra E. Kirk, for so many years general manager of the Kirk Manufacturing Company, and of its successor, the Consolidated Manufacturing Company, has retired from the company, and for the immediate future will devote himself to private interests.

Torrington, Conn.—The Eagle Bicycle Company which has been manufacturing bicycles at its factory here for fifteen years has decided to drop that line of business and will instead make gas engines and auto accessories.

Xenia, Ohio.—The Miami Powder Company will establish a powder and dynamite mill about four miles south of Thebes.

Miscellaneous.

Auckland, New Zealand.—A. Bevins & Company is desirous of obtaining the agency of firms in the sporting goods line. He gives as his reference the National Bank of New Zealand, Ltd., with offices in London.

Warren, Pa.—The Pennsylvania Shovel Company has increased its capital stock from $10,000 to $150,000.

Youngstown, Ohio.—The Youngstown Bolt Company has been transferred to the Morgan Spring Company, of Worcester, Mass. A large number of Youngstown capitalists are interested in the purchase of the plant and have subscribed bonds to the amount of $200,000, an equal amount to that which the Morgan Spring Company will invest.

Washington, D. C.—Anderson & Sons Co. has been incorporated to engage in manufacturing iron and steel machinery, tools and articles of like nature. The corporation is capitalized at $150,000, and the incorporators are Wm. R. Anderson, E. W. McCormick, B. E. T. Kretschmann and S. A. Terry.

Waverly, Ohio.—The Waverly Pump Company has been incorporated with a capital stock of $25,000 to manufacture pumps. The officers of the company are: E. Camm, president; C. N. Richardson, vice-president; Edward Barrick, secretary.

Changes.

Port Huron, Mich.—The Roberts Handle Co. has been dissolved.

Detroit, Mich.—The National Twist Drill & Tool Co. has increased its capital stock from $20,000 to $40.000.

Pogosa Springs, Colo.—F. H. Sparks has purchased the business of the Pogosa Hardware Co.

Powhattan, Kan.—N. P. Sprague has sold his Hardware business to Emmons, Graham & Joss.

St. Louis, Mo.—The St. Louis Well Machine & Tool Co. has established a branch office at Oklahoma City, Okla., with C. P. Taneyhill in charge. Stock will be carried at this branch, including not only products of the St. Louis Well Machine Co., but also a full line of drill rope made by the American Manufacturing Co., New York.

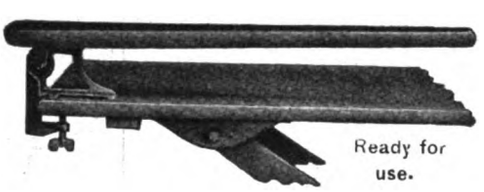
EVERYBODY—EVERYWHERE
IS CALLING FOR
"Ever-Ready" Safety Razors

The only $5.00 retail proposition on the market to-day that gives the customer a run for his money and allows the retailer a profit that is worth his while. **"Ever-Ready" sets contain twenty-four keen, perfect blades**—a dozen more than any other similar priced razor. "Ever-Ready" blades are as thin as paper and yet can be rehoned and resharpened at will—another incomparable feature.

Advertised at $5.00—
BIG PROFITS TO RETAILERS

Get in your order to-day—through your nearest jobber or direct to the makers. If you're unacquainted and want to see first—make a postal request for samples and we'll do the rest.

"EVER READY"—THE RAZOR WITH A YARD OF BLADES



Reichard & Scheuber Mfg. Co.
66 Duane St., New York City

Makers of Yankee Safety Razors—Yankee Sets—Stropping Machines and Radio Magno Razors.

AUXILIARY IRONING BOARD

Turned back out of way

Ready for use.

A Money Maker

USED THE YEAR 'ROUND - USED THE WORLD 'ROUND

A most substantial and satisfactory auxiliary to table or regular ironing board for ironing sleeves, shirt waists, etc. The turn-back feature is its great convenience. None other has it. Always in place. Never in the way.
It is not a cheaply-constructed article, but one built for every-day use and for universal satisfaction.

We have further information we will be glad to give you.
Better write for it.

W. H. GLENNY AND COMPANY, SPECIALTY MFG. DEPT.

ROCHESTER, N. Y., U. S. A.

Digitized by Google

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"SEEING IS BELIEVING."

ADVERTISE JUDICIOUSLY

But before you advertise at all see that your stock of goods is "*right.*"

The man to whom you sell cheap stuff may be satisfied for the moment, but later when he is disappointed in the se v-ice, the short life of the article, and its poor appearance—all the advertising on earth will not coax him into your store again. You may have given him what he *wanted*, or thought he did, but should have given him what he *needed.*

Quality goods are good advertising, they not only hold your old trade but bring in new customers as well.

Our line of quality goods, spring hinges, jamb, floor, cabinet, show case, lavatory, etc., door springs and pulls, and kindred articles, we guarantee to be no higher in price than inferior grades.

Invest a penny—drop us a postal asking for our Builders' Hardware Catalog No. 12 and price list and we'll introduce to you our "business getters."

The Crystal Coffee Mill

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

THE CRYSTAL COFFEE MILL

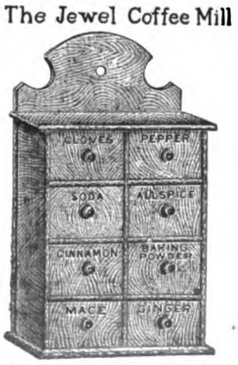
with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL

with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Jewel Coffee Mill



The Gem Mop Head.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET

is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

No other Hack Saw enjoys such a universal prestige among practical mechanics for "Sterling" quality and for doing straight, true and quick work as the

"STERLING"

HACK SAW

It's the most economic Hack Saw to buy—the most profitable to sell for that very reason.

You cannot afford to be without our catalogue. Get it To-Day.

Diamond Saw & Stamping Works
BUFFALO, N. Y., U. S. A.

HURWOOD BRAD AWLS

Are of the lasting kind. One piece of best quality crucible steel extending from point to head and a rivet through ferrule, wood and steel, have given our Brad Awls the name and fame of outlasting six of any other kind made.

Built for business they are business builders.

* *

Our catalog tells an interesting tale about Hurwood Tools. You ought to have a copy for reference. Shall we send it?

The "Leader" Lemon Squeezer

Has no loose parts. Is unbreakable. Works rapidly and thoroughly. Most compactly put together.

Two styles — nickel plated and Japanned.

Mention HARDWARE.

The LEADER MFG. CO.
Hartford, Conn.

Columbia
Can Opener

It never slips nor tears. A high-grade can opener at a low price—10 cts. retail. Discount most liberal to the trade. Send for it.

A. F. Meisselbach & Bro

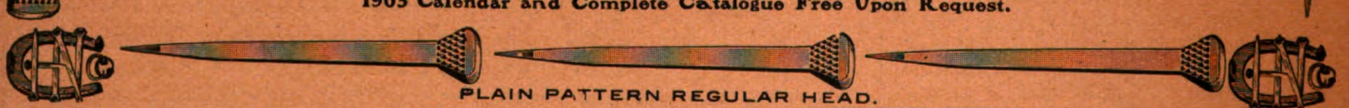
LOUISIANA PURCHASE EXPOSITION

THE CAPEWELL HORSE NAIL CO.,
Hartford, Conn.

St. Louis, U. S. A., Feb. 22, 1905.

Gentlemen:—We have used the Capewell Nail for the last seven years in the shops of the Columbia Transfer Company, of which I am President, and we have also used the Capewell Nail in the shops of this Company on all horses, some 450 in number, used in placing the exhibits and doing other teaming work during the World's Fair. *It has given us excellent satisfaction and our smiths prefer it to any other nail on the market.*



Yours very truly,
GENERAL SERVICE CO., J. M. Allen, Vice-President and General Manager.

No. 1 Fire Pot $6.00 Net

Even the air you breathe on entering a successful business establishment *is full of vim and energy.* The equipment and furnishings are bright, clean and up-to date. *Only the latest and best tools are used* Experience has shown that loss of profit follows the use of poor or out-of-date equipment. For this reason if fire pots are used *the No. 1 will always be prominent in successful shops.* It's many good points make it practically indispensable to mechanics.

Our catalog is free. It tells all. Jobbers sell at factory price.

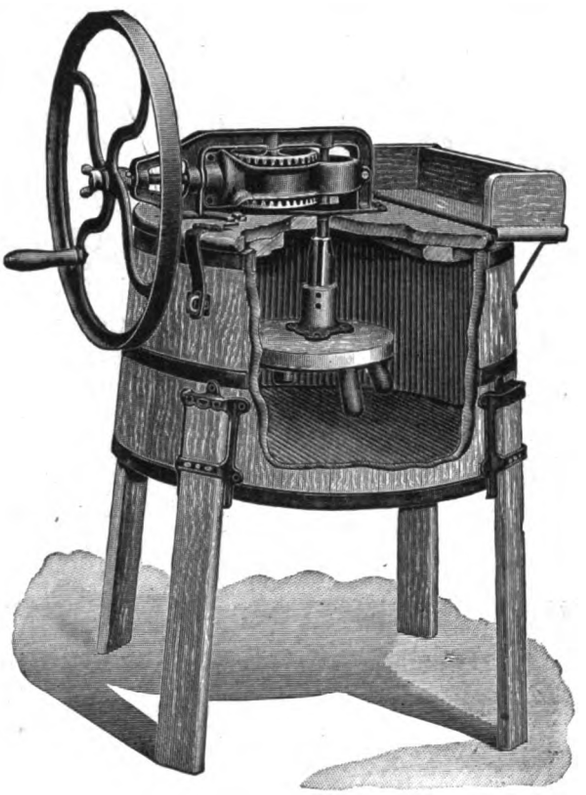
"BOSS" WASHING MACHINES

Illustrations represent our two best selling washers.

They are non-competition, therefore, most profitable to handle and sell.

Write at once for catalogue and price list, also our nearest distributing point to your location.



The only line of Washers not found in the catalogues of Catalogue Houses, therefore appeal to every dealer for support.

ADDRESS

Boss Washing Machine Co.

CINCINNATI, OHIO

BOSS DOUBLE ACTION

This machine is built on the true principle of rubbing clothes, similar to rubbing them on the old fashioned board, only that it just rubs a quantity at one time, and without the slightest injury to the finest of fabric including laces.

IMPROVED BOSS ROTARY

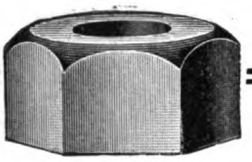
Has gears protected by shield or cover.
Has Telescopic dasher post.
Has large cypress tub and rub block.
Has either stave or detachable legs.
Has Highest Speed of any rotary.

FIRST IMPRESSIONS ARE LASTING ONES

Patent Vrooman Sanitary Sink Strainers

are in such universal use that nearly every girl is familiar with their merits, and when she, too, becomes a housewife her first thought of kitchen cleanliness will be a Vrooman Sink Strainer.

The simple construction of Vrooman Strainers gives them great durability, makes them easy to clean and allows them greater capacity than any other strainer.



The habit grows on the housekeeper. After once using a Vrooman Strainer she will be satisfied with no other. Better cater to that habit--it means dollars to you.

Women Demand It. All Jobbers Handle It. You Ought to Sell It.

HARDWARE

NEW YORK, AUGUST 25, 1905

PROFIT MAKING LINES

PREPARED PAINTS AS A FACTOR IN AN UP-TO-DATE HARDWARE STORE.

In many parts of the country prepared paints constitute an important part of a general Hardware stock; yet strange to say, there are instances where this important adjunct to a Hardware trade appears to have been overlooked altogether.

Paint manufacturers tell us that the Hardware merchants constitute their most progressive and successful agencies, and there are many reasons why this should be so. There would appear also to be many other reasons why the Hardwareman should avail himself of the advantage sure to come from such a staple and profitable department, provided that it is managed within reasonable limitations and with all the advantages and helps offered by the up-to-date manufacturer.

It is evident that the use of paint appeals directly to the larger and better class of general Hardware customers. The builder, the contractor, the house owner, the farmer, who depend on Hardware for many important needs, find paint equally essential and even if other things were no more than equal they would find it convenient to include their paint with building materials, trimmings or household necessities. It not only becomes a convenience and expedites business for them but facilitates delivery and the ease of renewing supplies.

The merchant loses no time in talking paint while selling other house material and it becomes a distinct gain to both sides.

Not only this, but a paint stock complements and fills out the other Hardware lines and the customer who may at first been attracted only by the paint proposition, finds other wants appealed to in discussing this purchase, and the general business grows thereby.

There are other features sufficiently evident but worthy of consideration.

A prepared paint stock with its convenient packages, always sold unbroken, requires little or no additional expense for storage or help; it is quickly and economically handled and sold; properly kept, it always makes an attractive appearance on the shelves and the depreciation, if any, on stock carried over, is so extremely slight as to be of no account.

There are at least two good paint selling seasons, Spring and Fall, when there is good opportunity to push the goods forward and insure sales by active advertising and display.

This opens the way for a good paint demand during nearly six months of the year while the sale of the numerous household specialties in the way of Family Paint, Buggy or Wagon Paints, Enamels, Stains, Varnish Paints, Gold and Silver Paints, Etc., has no limit of time or season and they are likely to be articles of constant and daily demand.

It should not be forgotten either that from the standpoint of profit the prepared paint trade has strong points in its favor. On prepared house paints which command the largest single sales the margins vary from 25 to 40 per cent., depending mostly on the quality selected, the enterprise of the merchant and the interest he takes in demonstrating the excellence and economy of his goods.

In the selection of such a line the wisest judgment is essential. Don't under any circumstances handle cheap stuff or allow your name to become associated with inferior, short measure paint, sold only on the price or an ambiguous guarantee. Get the best. Get a well-known, well-advertised brand that has been tried and tested and proved its merits. Arrange for an exclusive agency to get full benefit from your efforts in building up a trade; then maintain your prices on a satisfactory margin and pass a sale now and then, if necessary, rather than do violence to a consistent and reasonable business policy. Such a course has never been known to fail in establishing a growing and a paying business.

On the various small shelf lines the profit is much greater, usually about 60 per cent. and though, as we have said, the individual sales may be smaller, the opportunities for them are so far more numerous and the chances for advertising the wide variety offered are so effective, that they present a most attractive line for the enterprising merchant.

There is probably no line of manufactured goods which are accompanied by more forceful and helpful selling features than the best prepared paints of the present day.

The few leading manufacturers of brands with a reputation behind them, are devoting no end of ingenuity, skill and expense to place the arguments, necessities and requirements for good painting before the general consumer and vie with each other to do this in the most attractive, persistent and effective way. The amount of these helps offered to legitimate agencies is almost unlimited, practically depending only on the opportunities they have for making such work productive of trade, and their proper and faithful use of this valuable material.

Altogether we regard the prepared paint proposition of the present day as one of the most natural and profitable adjuncts to the general Hardware line and we believe it merits the most serious and careful attention both from those who are now handling such goods and from all who have not yet seen their way clear to do so.

GETTING THE BUSINESS.

By Arthur Welch,

(Adams and Elting Co., Chicago.)

The increasing popularity of paints as a line for the Hardware dealer is another proof of the fact that "nothing succeeds like success."

The relationship between paint and Hardware appeared so remote, up to a few years ago, that Hardwaremen refused to even consider it. Now matters are vastly different. The progressive dealer in Hardware everywhere is putting in an increasing stock of paints, stains, varnishes and oils, and is getting a share of the profits on the communities' paint bill, along with the druggists and regular paint dealers.

We suppose the experience of Adams & Elting's "Ad-el-ite" Paint and Paint Specialties in this matter is much the same as that of other brands. For a long time Hardwaremen refused to believe that there was a demand to be created among their patrons for paint products. They were content to let people go to the drug store, or the paint shop, or buy direct from the factory, because they could not preceive any profit in handling such a line. However, recent years have seen a decided change in their attitude and the fact that every day dealers in Hardware are "stocking up" on paints, is the best proof in the world that there is money in it for them.

The reasons are plain if one stops to consider the matter.

First—The demand for paints, and paint products is much greater than ever before and is daily increasing.

Second—Paint is really a supplementary line to Hardware.

The last decade has seen a marvelous increase in the use of paints. People have come to know that it is economy to keep their buildings well painted; that the cost of re-painting is much less than the cost in wear and decay of unprotected buildings. Also the artistic standard is much higher than it was fifteen years ago, and we find, generally, in city and country, tastily decorated houses, barns, fences and out buildings.

Another factor in the growth of this wonderfully increased market for paints is the tremendous amount of building in both city and country. An army of carpenters and builders is kept constantly busy, and following them are thousands of painters engaged in the adornment and protection of these new structures. This new development of business has had the effect of forcing the Hardwareman to carry paint, and very properly so, for it is the obvious thing for him to sell.

Digitized by Google

Suppose a man is doing some building. He must go to the Hardware store for his nails or bolts, and there is the opportunity to sell him his paint. Or he may require some tin roofing and there is another chance to make a sale of paint. The man who buys a reaper or mower needs paint for the shed he may be building to house it in. In addition the Hardware dealer may easily make a sale of paints for interior decorations to the man or woman who needs some screws to strengthen an old chair, or is buying a handle for a bureau, which he or she is refinishing. In fact the purchase of any article of Hardware used in the construction or repair of household articles indicates the need of paint also, and the Hardwareman is the fellow on the spot who ought to be in a position to supply it.

Since 1895 hundreds of Hardwaremen have put in a stock of Ad-el-ite Paint or Paint Specialties, and in practically no instance is there a record of a dealer disappointed in results. Most of them are highly enthusiastic over their success and Ad-el-ite Paints are now sold by some of the biggest Hardware jobbers in the United States, and every day new Hardware dealers are sending in trial orders. The Hardware dealers most successful in selling paints, devote a portion of their advertising appropriation and their display space to paints. In the season they give over a window exclusively to paints and paint specialties, and run in the local newspapers the electrotypes with their own ads, which the paint manufacturers furnish free.

The more progressive and larger stores are also holding demonstrations, which attract thousands of people into their places of business and at which the uses and merits of paint specialty goods are shown and samples are distributed.

These demonstrations following a period of active general advertising by the manufacturer and the use of considerable space in the local papers by the dealer, and added by street distribution of circulars announcing free samples, are becoming very popular and prove most profitable to the paint maker as well as to the Hardware dealer.

So the Hardwareman is happy, and the paint manufacturer is happy and the relationship between the two is daily strengthened by the satisfying element of profit.

HOW ONE MANUFACTURER HELPS.

By John Briggs & Co. (Boston.)

There is a growing tendency for the small builder to buy his own paint stock for such buildings as he may contract to put up. The builder is already in the habit of coming into the Hardware store to buy his Builders' Hardware and it is an easy matter to interest him in the paint line. We believe that the object of getting the builder's trade is for the Hardware store to make money, and the trade in this vicinity tell us that it has been their experience that the margin of profit on paint stock is much larger than on Hardware. Of course, this does not apply to lead and oil as made by the trust, but to mixed paints and oil colors as made by reputable manufacturers.

Replying to the question as to "Best method of handling stock," would say that we do not feel competent to answer this question as generally individual cases require different treatment.

In reply as to "Best method of getting trade" and "Advertising," would say that the method which seems to have brought the best results to our customers, has been to send us a list of the property owners, real estate dealers and builders. We take this list and circularize them, sending them sample cards, etc.

In regard to advertising a paint, beyond a certain reasonable amount of sample cards, slats and show cards, the extra expense must come out of the quality of the paint. The sample cards and slats, as a rule, are rather expensive to get up and it can be easily seen that if much more money is spent in advertising novelties, somebody has got to pay the bill.

The margin of profit on first-class goods made on a zinc and lead basis thinned down with pure linseed oil, is a great deal narrower than the retail trade is aware of.

HARDWARE AND PAINT.

By Acme White Lead & Color Works (Detroit.)

Why should the Hardware dealer sell paint? Briefly stated—

1. Because he deals in building materials.

2. Because paints are essentially building materials.

3. Because he comes in closer contact with house owners at the opportune time than the dealer in any other commodity.

As a matter of fact, paints are one of the component parts of the Hardware business. The Hardware dealer goes after the house owner to sell him the finishings for his house—comes in contact with him at the time he is most interested and has an exceptional opportunity to talk paint and sell paint.

If he is progressive, and the successful Hardware dealer is, he carries a full line of some reputable paint manufacturer—a line in which he has the utmost confidence. Confidence in the goods he sells is the first requisite to success. He instills this confidence into his clerks. With a proper knowledge of the paints he sells this is not a difficult matter, and it is comparatively easy to communicate this confidence to customers.

Paint is clean stock to handle, makes an attractive window and shelf display and should be given a prominent location in the store. This sets customers thinking about it and makes many a sale possible that would never be made were the paint stock kept in an out of the way corner.

There are paints, ready for use, made to meet every requirement in finishing inside and outside. Ascertain just what each customer desires to paint and sell him the special paint made for that purpose. Make him understand you are interested in giving him the right paint. When he finds, as he will on using the paint, that you were right and that his job is even better than he expected, he will come again for paint or whatever else he needs that you sell.

Keep in close touch with the manufacturer you buy from. Study their methods of advertising, make use of the advertising helps supplied. They are experts in selling paint and can and will help you create a demand for their goods.

By giving as close attention to paint as he does to Hardware, the dealer will invariably find it not only a source of profit but an aid in the sale of the latter.

But after all is said, the fact remains, that paint is building material pure and simple—an integral part of every Hardware stock.

THE MANUFACTURE OF VARNISH.

Next to the quality and adaptability of the goods, it will be generally conceded among consumers that the most important requisite in a varnish is "uniformity" of quality; and it is in this respect that a large tankage capacity gives an advantage over small manufacturers. Although in the manufacture of several lots of varnish, the same formula may be used, and the same "modus operandi" adopted throughout, there is still one essential feature that must be observed to insure absolute uniformity, so far as human means will permit, and that is the time allowed for the ripening process. This is something that can not be hurried; and the results obtained while the varnish is remaining in the tank undergoing the mysterious process of "ripening" cannot be produced by any artificial means so far discovered.

The proper time for ripening is from three to twelve months, according to the grade of varnish, so that it will be easily seen that to allow the varnish the full time to ripen, and at the same time keep a supply of "ripe" varnish on hand, sufficiently large to fill all orders and to meet emergencies, demands a very extensive storage capacity, and a poor equipment in this regard must necessarily prove disastrous to the production of uniform goods, a limited storage capacity compelling varnish manufactures to either ship unripe varnish or to refuse orders, or delay shipment until the stock ripens.

Varnish carefully and correctly made from a tested and approved formula is only half complete, and if not given the proper time to mature before shipping, will in all probability be condemned by the consumer to whom it may be shipped.

Varnish is frequently blamed for trouble which is really the result of carelessness on the part of the workmen. This will show that the trade should realize the great care taken by the manufacturers in the production of varnish. Nothing is done by guess work. Scientific rules govern throughout. Raw-material and finished product are submitted to laboratory tests; safe and sure precedents have succeeded the era of experimental uncertainties, and barring accidents the manufacturers know when starting to make a tank of varnish what the result will be beyond question.

The term "Japan" was originally given to the species of varnish producing that rich, black, glossy finish that had its origin in Japan. That secretive race, however, no longer possesses the monopoly of the art of japanning, as we have long since solved its mysteries, and produce Japan as lustrous and durable as were ever made by Japanese.

The word Japan has now a double commercial meaning, and may be roughly divided into two heads: Oil drying Japans and finishing Japans, the former being used by painters for drying paints and the latter for producing a finish on iron, wood and other surfaces.

Finishing Japans consist of two classes; Air drying Japans and baking Japans. Black is the color in most general use, although colored Japans are frequently used for various ornamental purposes. Sewing machine castings, small Hardware, tea-trays, wooden handles, and many other articles of this nature are among the things that owe their brilliancy and finish to Japan.

In common with varnishes, there are many outside influences

Digitized by Google

that conspire against Japan. Like varnish, Japans are susceptible to changes of temperature and should be kept and used in a warm room, never allowed to get chilled, or used in any other but its normal consistency.

The operation of baking is one requiring great care. The heat must be carefully regulated, and the conditions and capabilities of the oven and the surroundings carefully considered. A too high degree of heat, improper ventilation of oven, and many other causes are enough to spoil any baking Japan ever made.—*Paint, Oil and Drug Review.*

PAINT REMOVERS.

A good paint remover in paste form can be made by mixing a solution of one pound caustic soda, and one pound pearl ash in one gallon of hot water with starch and china clay, in equal proportions to the consistency of stiff paste, says an exchange. The starch causes the remover to set to a jelly on cooling. Work treated with these alkiline paint removers must always be carefully washed down before painting. Sometimes it is necessary to wash down with vinegar and water to "kill" the alkali which, if left, is sure to eat through and injure the paint. Paint and varnish removers of a spirituous nature are usually composed essentially of amyl alcohol or of fusel oil which contains a proportion of this alcohol. Amyl alcohol possesses the property of readily dissolving oils and gum rosins, and hence, instead of removing these materials by a process of saponification as is the case with the alkaline removers, the spirit removers actually dissolve or at least render soft and pulpy the hardened oil and gum. Other ingredients of the spirituous removers are coal-tar benzine, acetone nitro-benzine and light hydrocarbon oils. Many of these preparations, however, are protected by patent rights.

CURDLING OF VARNISH.

The term curdling is applied when the mass of varnish in bulk gelatinises, or assumes a partially solid consistency, and when varnish added to paint breaks up into clots instead of becoming evenly amalgamated. The phenomenon is not by any means uncommon and deserves some attention. In the first form of curdling noted above, that in which the whole mass of varnish sets to a solid or semi-solid mass, excess of driers in the varnish is usually the cause, and it is therefore, as a rule, varnishes of the kind known as "hard drying" that usually exhibit the fault. Thus, hard church oak varnish, or a hard cheap oak varnish, is sometimes found to become quite gelatinized even when packed in tins away from the air.

The addition of varnish containing resinate driers, or of terebine containing the same ingredient or adulterated linseed oil, very often causes curdlng. Certain oils, such as colza, which from time to time find their way into paint oils greatly induce curdling under such conditions. Curdling then may be considered a sort of finger post indicating that things are not as they should be, but whether the fault lies in the varnish or in the materials that have been mixed with it should be the subject of careful investigation.

NINGPO VARNISH.

(*From United States Vice-Consul Cloud, Hangchau, China.*)

I desire to call attention to what is known among foreigners in this country as "Ningpo varnish," made from the sap of the "varnish tree" (*Rhus vernicifera* or *Vernix vernicia,*) which grows very extensively in Western and Southwestern China. The name was originally given because varnishers from Ningpo were more skilled in its preparation and use than others.

The sap is gathered in the interior and brought to Huichoumin, in the Southern part of Anhui Province, where it is refined and then distributed to all parts of the Empire. It is sold by the retailer in the raw or pure state—that is, the pure, refined sap, and in the prepared form, which is a mixture of the refined sap with certain proportions of "wood oil." It is in the proper blending of these that the skill of the varnisher is shown, as the color desired, the wood to be varnished, moisture of the atmosphere, and temperature are conditions that enter into the problem. The uses of the varnish are manifold. Wherever varnish is desired the Ningpo kind is used, and is so far superior to the ordinary varnish of commerce as to be in a class by itself. It is particularly adapted to floors, tables, cabinets and such articles as are in constant use. It is also excellent for furniture of all kinds, as it does not scar easily and may be scrubbed with boiling water without the slightest injury to the very high polish of which it is capable.

The greatest drawback to its use is the danger of "lacquer poisoning" to the workmen who use it. This is similar to "ivy poisoning," and when the sap is fresh is regarded as rather dangerous. Once the varnish is dry there is no danger whatsoever. It may be used in any climate that has a rainy season or wet weather. The varnishing is always done during the wet season and is allowed to dry slowly as the moisture of the atmosphere decreases.

The market value of the pure sap, after refinement, is about $1.15 Mexican coin (about 53 cents) per catty (1⅓ pounds avoirdupois), while the mixed varnish may be had for $0.56 (about 27 cents) per catty. It may be mixed ready for use before shipment, and does not deteriorate when once it has been properly blended. Something like a hundred years ago the Ningpoese had a monopoly of the varnish trade; but in some unaccountable manner they have lost it to the Huichau firms. Practically all the varnish used at the present time comes from Huichau, as its monopoly depends on a knowledge and skill which the Huichau people seem to be able to guard most effectively.

The supply of the crude sap would seem to be unlimited, as the trees from which it is derived are found in great abundance in all the Middle Western and Southwestern Provinces. With proper methods of gathering the sap and of refinement it should be made one of the most profitable industries of China. So far as I am able to learn but little or none of it is exported to America.

A JAPALAC SHOW WINDOW.

One of the most effective methods of favorably reaching the public eye, is shown in the following:

OUR EXPORTS INCREASE.

Exports of manufactures from the United States in the fiscal year 1905 were not only the largest on record, but are in excess of the combined exports of all articles in the centennial year, 1876, and nearly 140 million dollars more than the total imports and exports of the country at the close of the civil war.

Statistics just compiled by the Bureau of Statistics of the Department of Commerce and Labor show that the exports of manufactures in the year just ended amounted to $543,620,297, as against $452,415,921 in the preceding year, $433,851,756 in 1900, and $183,595,743 in 1895. The growth in exports of manufactures far exceeds the growth of population or the growth in commerce as a whole.

About 30 manufactured articles were exported during 1905 with value in excess of $1,000,000 each, and that of these articles all except 7 showed an increase as compared with exports of 1904.

Iron and steel manufactures supply about one-fourth of the manufactured articles exported from the United States, the total in 1905 having been $134,727,921, as against $111,948,586 in the preceding year, an increase of nearly 23 million dollars. Steel rails showed an increase of 6 million dollars, chiefly in shipments to Canada, South America, Mexico, the West Indies, Japan and other oriental countries, in several of which railway development is proceeding at a rapid rate. Machinery also showed an increase in 1905 of more than 6 million dollars over 1904. A conspicuous feature, however, is the large increase in exports of locomotives to Japan, 151 engines having been sent thither in 1905, as against 74 in the previous year. Mexico and Argentina increased their purchases of American sewing machines, while Japan increased her purchases of electrical machinery and Builders' Hardware, each in a substantial degree.

Editorial Trade Review

The trade reports are of the most favorable character, and orders that have not been already placed for the Fall trade on account of vacations and a season of relaxation intervening, are being hurried forward toward completion. The Manufacturers are already in receipt of those specifications from the wholesale trade, which give them enough to work upon in the earlier stages of the season's business, and the factories are getting in shape to run full time from date of resuming production. Orders present the customary quantities for prompt shipment, while requisitions for future shipments are left to be furnished later. Prices ruling on regular goods are of a character that braces the market and give a sanguine tone to future requirements; the advances that have been announced are apparently made with a view to even up the market on special items and not to hold up orders. Where the goods in question are approaching too nearly quotations that afford but little profit, it does no harm to make a slight change in price that enables them to be marketed without unprofitable allowance.

The demand for certain lines of goods invariably purchased for stock requirements for Fall and Winter trade is fully as sanguine as was anticipated by the Trade generally. Stove Boards, Scoops, Shovels and Spades, Pipe Elbows, Axes, Lanterns, etc., are certainly showing a condition of activity that speaks well for the immediate future of these regular goods, and warrants the preparing of stocks largely ahead that are certain to be in a condition of depletion when the retailers show their hands and demand recognition.

On Builders' Hardware the demand is as full and complete as ever. The requirements for Fall trade are of the most satisfactory character, and the Manufacturers respond with their deliveries on specified dates requiring considerable effort to do justice to the orders. Better grades of goods are being called for, as the finest work is placed on new buildings; the great number of such edifices in course of erection in the leading trade centers being remarkable in point of numbers, and seemingly with no economy of outfit, which is in all essential particulars up to date in everything that calls for first-class Hardware to fill the bill.

The latest reports on the crops pronounce them to be indeed of phenomenal extent in almost every direction. The Middle and Western States are intending to shower agricultural wealth upon our farmers, who, instead of becoming "bloated bond holders," place under cultivation increasing acres of this teeming soil, until the country will present an unbroken area of production, requiring more storehouses and barns to house it, which are invariably added. The farmers' increasing wealth will benefit the Hardware trade immensely by the increasing number of its requirements, while the large profits of the railroads make happy the hearts of the speculative stockholders. The only uncertainty in regard to crop development is in the Southern States, where the cotton crop is uncertain, especially in the vicinity of the yellow fever agitation, which affects Louisiana and Mississippi and parts of Georgia and Alabama, where the merchants are inactive in purchasing goods until the fever has abated or at least shown signs of improvement. Many of the traveling men canvassing this territory have found it desirable to abandon their routes. In other parts of the Southern territory the greatest prosperity is visible; in the large cities structures of the better kind are being erected, such as business houses, public buildings, office buildings and fine residences for the wealthier class.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Savings Bank Deposit—Right of Survivor.

QUESTION: "A" and "B," who were husband and wife, each had an account in the same savings bank. Some months before the wife's death they had signed and sent to the bank a paper of which the following is a copy: "Gentlemen—We, the owners of bank books number ———, desire to have our accounts merged into an account running to "A" or "B," or the survivor of them, our object being that in case of the death of either, the other may draw the whole money." The wife having pre-deceased the husband and both parties now being dead, is the husband's administrator entitled to the entire fund?

REPLY: We think if the order was delivered to the bank during the life time of both parties and it was never revoked by either, that it would operate to vest the title to the entire deposit in the survivor. We think the effect of the paper was a direction to the bank to change their respective deposits so as to make each a joint owner, analagous to a joint tenancy in real estate, so that upon the death of one the survivor became the owner of the whole.

Liability of a City for Discharge of Fireworks on Streets.

QUESTION: Has a person who is injured by the explosion of fireworks on a public street in a city any right to sue the city to recover damages for the injury?

REPLY: While there is great difference of opinion in different States as to the liability of a city under such circumstances, it is well settled in New York, New Jersey and other leading jurisdictions that a city is liable if it permits the discharge of fireworks on a public street where it has power to prohibit them. Evidence of such acquiescence or permission is usually obtained from a municipal ordinance or a license or permit granted by the mayor, aldermen or common council. If such a permit was given, and in view of the place, the danger involved and the occasion, the discharge of fireworks was an unreasonable and unwarranted use of the streets and exposed persons and property to injury, it would properly be held to be a public nuisance for which the city would be liable. Of course, there is always a distinction between highways depending on their location, the extent of their use and the danger involved in case of accident. Fireworks in certain streets may, or may not, be a nuisance according to the circumstances, which usually present a question of fact. But the principle of municipal liability is established.

SPECIAL BRAND COMMENT

AN IDEAL ARRANGEMENT.

BY A. H. ABBE.

I know of no law compelling a retail Hardware dealer to buy special brand goods unless he wishes to do so. It seems to me that the association through their committee are taking up a matter that as an association we should have no control over.

I read with much interest the creed as given by my friend Mr. Norvell in his address at the Hot Springs convention and it seems to me that the whole matter can be solved something after the following: Let the manufacturer sign an agreement as follows: "We hereby agree that we will sell our product through the legitimate Hardware jobbers only." "We will have only one price for all jobbers large or small;" "We will agree to sell to only such jobbers as the secretary of the National Hardware Association may designate as jobbers who are entitled to buy goods from us at the jobbers' price;" "We agree to sell our product to no jobber outside of the National Hardware Assciation;" "We agree not to sell our product to any retail merchant of any nature."

Would suggest to the National Hardware Association that they increase the salary of their secretary, Mr. Fernley, to such an amount as will compensate him for making a list of legitimate jobbers in his association and keeping us posted as to the same.

Now let the jobber agree as follows: "We hereby agree that we will buy all of the Hardware that we handle from the manufacturers who are associated with the National Hardware Manufacturers' Association;" "We hereby agree also that we will not attempt to buy from said manufacturers at less than the established price that they may from time to time place upon their product;" "We also agree that we will sell Hardware to the legitimate Hardware trade only and that we will have only one price on the goods that we sell, the same to apply to every retailer to whom we sell goods;" "We also agree to confine ourselves in our sales to such retail Hardware merchants as Secretary Corey of the National Hardware Association may name as being entitled to buy goods from us."

Let the retailer agree as follows: "We hereby agree that we will buy all our Hardware from the jobbers who are associated with the National Hardware Association;" "We also agree that we will pay the prices as they may be established from time to time by the National Hardware Association;" "We will agree that we will not under any circumstances try to induce the manufacturer to sell us goods;" "We will also agree that we will retail Hardware at a fair legitimate profit and percentage that may be agreed upon by the secretaries of the three associations, that is the manufacturers, jobbers and retailers.

Would also suggest that Mr. Corey's salary be increased to an amount that will compensate him for the extra labor involved in carrying out his part of these agreements.

There is no doubt but that such agreements as these can be executed and of course should be lived up to.

This would place the manufacturer, the jobber and the retailer in a position where they would know just what they were doing. It would place the Catalogue Houses among the list of retailers where they belong and all of the rest of us retailers would know just what the other fellow was paying for his goods. Would this not be an ideal condition of affairs to do business under?

I have been inclined to write as above from the fact that some of us seem to think that we are in business not for profit, but to do good to our fellow men.

I for one am free to admit that I am in business to make what I can out of it and if I see an opportunity to buy a line of goods at a price that I think is low, leaving me a margin of profit, I am inclined to buy of the party who offers such a price.

To get back to the subject of "Special Brands," would say, personally, I buy very few goods except with the manufacturers' label on them. There is one object only to be obtained from "Special Brands," and that is to have your customer, be he retailer or consumer, believe that the goods are made especially for you and to cover the manufacturer's name out of sight.

The jobber, of course, is making new business for himself wherever he goes, and feels that if he induces a customer to buy a certain brand of goods that he is entitled to the profit that comes from the future sales to that customer on this particular brand of goods. He wishes also to avoid having the customer try to go around him and buy the article from the manufacturer.

This is wholly in the nature of self-protection, on the other hand, the manufacturer who is represented dislikes of course very much to abide his identity and to not be known to the trade, his position is just as justifiable as the jobber is in his position.

The majority of retail merchants, I believe, prefer to have their customers think that they are buying their goods of the manufacturer. There is a belief among the people that the dealer who buys at first hands is likely to have the better prices than the one who buys from the jobber.

I do not think that this question should be so agitated as to create a feeling of animosity between the manufacturers, the jobbers and the retailers. It cannot be forced on the trade and it seems to me that the less said about it from this time on the better.

The "millennium" has not yet been reached and while there are wide channels for good to be accomplished by association work, and by united action on the part of the three branches of the trade, there are questions that it sometimes seem to some of us we can settle, but when we reach them we find that the solution is not so easy to find.

FAVORS SPECIAL BRANDS.

I am most positively in favor of Special Brands rather than factory brands. My reasons are:

First: Buying from a reliable jobber we can always rely upon good goods, which can be sold with a strong guarantee, because the jobber stakes the reputation of his specials.

Second: In case of defects, it is a much simpler matter to get them replaced or credited through the traveling salesmen.

Third: The Catalogue Houses are making a special effort to reduce the prices of standard brands, perhaps as a bait only, but nevertheless the price is there and the retailer's profit is last.

Fourth: By Special Brands you cannot conflict with your competitors. Factory brands become a question of price only.

Fifth: On Special Brands I can make profit which is satisfactory. On Factory brands, I cannot.

I could give many more reasons if I had the time.

MAX UHLIG (Holdredge, Neb.)

DEPENDS ON POINT OF VIEW.

A Western firm writes HARDWARE as follows:

Being both in the jobbing and manufacturing business, all phases of the Special Brand controversy have had to be firmly met by us. As manufacturers we do no Special Brand business, it being a damper on ideals and enthusiasm and that striving for perfection necessary to success, as one loses the business under pressure of the first break in prices. As jobbers, handling some of our own private brands, the temptation to be influenced in buying, by price and profits, against our own better judgment has been too strong to resist.

THE RETAILER NEEDS QUALITY.

(Contributed.)

It is certainly true that the retailer has every reason to have a higher regard for quality than for any special name or device, whether it be manufacturers or jobbers brand. There is a greater chance for success in handling goods of high quality thus establishing a reputation, which in time becomes a great asset, than undertaking to push an inferior article because there is a larger percentage of temporary profit.

It seems to me that the retailer who recognizes this principle is the one who will win in the end, and to such a man Jobbers' Special Brands are looked upon with suspicion. Human nature itself is sufficient authority for arriving at the conclusion that greater dependence may be placed in goods bearing the manufacturers' name, than those bearing the merchant's.

It is to be assumed that the manufacturer maintains, as nearly as possible, smooth operation of his own plant, but in the process there is sure to be a smaller or larger percentage of his output which will not pass critical inspection and examination. The question arises what is the manufacturer to do with those inferior lots? If perchance he is making Special Brands, is it not more natural for him to put his name on the best goods, and the other fellow's name on the inferior ones, especially as he is compelled to sell the latter at a lower price.

I feel sure that the better class of retailers already realize this condition, and I have no doubt that a larger measure of prefer-

Digitized by Google

ence will be given to Manufacturers' Brands in future, because of the very able opinions expressed by the leading retailers in the Trade Journals since the Manufacturers' Convention in June.

There may be as many special Brands in the near future as in the past, but I think that the quantities sold under each name will gradually grow less, and the man who will do much to bring about this condition is the retailer.

THE RETAILER TO ARBITRATE.

By L. G. Mattison.

The Special Brand question is developing. The time is past when the simple assertion that standard brands are the only thing or that we must have Special Brands will settle the question with the ordinary merchant. He is being educated by the logical deductions that are being made by the leaders on both sides of the controversy. Mr. Bogardus in his Hot Springs address summed the question up as clear as a bell, and without doubt voices the opinion of the majority of the Hardware dealers throughout the country. But Mr. Norvell in nosing around in his committee work has seen things among the manufacturers, has smelled something and has lifted the lid a little. Mr. Norvell does not put as much confidence in the integrity of the manufacturer as does Mr. Bogardus. He hints at a great many shady things that the manufacturer does and not without some foundation. I think it is Lincoln Stiffens in his "Crimes of the Cities" who makes the assertion that the business man is at the bottom of almost all political graft and the business men referred to in this case were almost entirely manufacturers. The manufacturers were the first to combine, put their wits together and commence to manipulate things. They soon had the jobbers where the hair was short. The jobbers, with a shrewdness born of desperation, figured out the Special Brands idea which would give them a leg to stand on. The scheme worked, but as soon as they have got comfortably steady on their pins the manufacturers rise up and try to block them. It is now a scrap between the manufacturer and the jobber and the retailer is called in to arbitrate.

As a retailer I should be in favor of maintaining the old standard brands provided that by so doing the manufacturer would keep a level head, and not conclude to skin the jobber and retailer out of their legitimate profits.

SPECIAL BRAND OPINIONS.

(From Manufacturers.)

Regarding Special Brands, we think that the whole matter is summed up in the 31st verse of the 25th Chapter of Genesis.

* *

We have nothing to say on the subject of Special Brands, further than that we have never deemed it advisable to manufacture goods under any other than our own regular brand.

* *

We are not interested in Special Brands, as these are something that we have always been against.

* *

We do not make up our high-grade goods under any Special Brand, nor are we required to do so, the jobbers preferring to sell them under our name. We make a cheaper class of goods, which we sometimes put up under Special Brands, but only when we are able to take orders for them in very large quantities.

SELECTING A TRADE MARK.

In the selection of a trade-mark the first question to consider is its commercial adaptability to the purpose for which it is intended. There is a fitness in names, signs or symbols used in connection with the vending of merchandise which, in itself, may become a thing of great value. Some names or trade-marks are absolutely without point or meaning, and as such are of little value, whereas, other trade-marks are so striking and peculiar and characteristic of the particular goods or trade with which they are connected as to aid the advertiser in exploiting them.

It is important, therefore, in the selection of a trade-mark to review carefully the commercial adaptability of the particular name or mark as a trade-mark. When this is accomplished, it is important that the name or trade-mark be submitted to counsel for review to determine several questions, first as to whether the mark has been used by another in connection with the same class of merchandise. If it has, it may not again be appropriated for that purpose, for there may not be two identical or similar trade-marks for the same class of goods. The first mark is the one that is valid. To ascertain these facts, it is necessary to make examinations of the records of the Patent Office and also to investigate the trade publications to ascertain, if possible, whether the mark has been used before. It is not always possible, even with the examination of all of these records, to finally say that the mark is new, but it is important to take these steps before embarking on an expendiutre of capital. I recall one case where a client of ours selected the words "Red Star Cough Cure." We made an examination of the records of the United States and abroad and reviewed the catalogues of the trade to find anything to interfere with it. The mark was registered and a large sum of money was spent in the establishment of the business when it was discovered that a druggist of a small Western town had used this mark in connection with a cough medicine manufactured by him for twenty years. It became necessary, in order to save the business, to buy the rights and good-will of this druggist, which were secured at the cost of several thousand dollars.

When it is discovered that the mark is commercially good and has not been appropriated before, the remaining question is as to its legal sufficiency; that is to say, whether it is descriptive of the character or quality of the goods, whether it is deceptive, whether it is truthful, whether it is a geographical name, etc., etc., all as indicated in previous remarks. Assuming, however, that it fulfills all of these requirements, it is a mark to be cherished and one on which possibly, by judicious advertisement and business management, a great commercial enterprise may be founded.

You may be interested to know, also, how the monopoly in the use of a trade-mark is maintained. The right to a trade-mark is acquired in this country and in England by what is known as adoption and use; that is to say, the first user is permitted to use it uninterruptedly. But in most of the foreign countries the right is obtained by compliance with registration laws regulating that subject. It is highly important that the owner of a trade-mark should register his mark in all countries in which he does business or expects to do business, as this forms the foundation of the right. Where an infringement occurs, the remedy is by suit in equity. A statement of the case is prepared and filed with the court of equity and testimony is taken to prove the origin and ownership of the mark, and also the registration thereof, if it is registered, and also to prove the infringing acts of the defendant. When these are all before the court, argument is had and the court determines whether the infringing device is an interference with the rights of the complainant in the case. If the court determines that it is an infringement, an injunction order is issued, which is an order directed to the defendant commanding him to discontinue the infringing practices. This order is served on the defendant, and should he violate this order, he will be subject to puuishment for contempt, which, in some cases, means fines or imprisonment.—*Extracts from Address by James Low Stewart.*

CHINESE CHARACTERISTIC TOOLS.

By F. A. Gannon.

John Chinaman is a poor farmer. No enterprising Hardwareman advertises to him the latest ideas in farm tools, or sells him the newest seeds or the hundred and one labor-saving devices that the Yankee farmer enjoys. It is a well-known fact that the Chinese are a hundred years and more behind the times in the use of modern inventions, but it is difficult to conceive by what strange contortions of minds they have managed to produce their peculiar implements for agriculture and other purposes.

For instance, in the collection of the Peabody museum, in Salem, Mass., a Chinese plow has a single handle, and an iron shoe, but it contains wood enough to build a house, and the wood is put together in such an awkward, puzzling manner that one opens his eyes in wonder at it, especially a long curved arm that sticks out ahead of the shoe like an inverted bowsprit.

A rake, with four long iron prongs, and a hoe, look like reasonable implements, as does a harrow, but a water raiser is a device that one would expect to meet only in clumsy, slow moving China. This water raiser looks something like the endless belts used as conveyors in many American factories. But it is built entirely of wood. Its joints are cleverly hinged, however. The belts revolve, as scoops up water, but a small American boy, with a small American pump, would drown that Chinese water raiser in about three minutes.

A buck saw is a characteristic Chinese implement. It's teeth are set backwards, exactly opposite to the American way. It's frame is of hard wood, but it is stiffened up with twisted bamboo, just as an old time New England saw used to be tightened up with twisted hemp. A Chinese plane consists of a block of hard wood, through which a blade has been forced, and is held fixed in its place. Chinese rules and squares look like common sense tools, except that they are marked with the queer Mongolian hierogylphics. A Chinese hatchet has a square head, and, although it is fully 1½ inches thick in its thickest part, yet it is

Digitized by Google

ground down to such a keen edge that a lusty Yankee would have little trouble to split the morning kindling with it. And a New York mason would have no trouble in using a Chinese trowel, except that he might not find the Union label beneath the mortar that still sticks to the iron.

One part of the Chinese exhibit in this museum that gives a man a shudder is that containing Chinese barber tools. A Chinese tonsorial artist would skin an American a mile, for fact, not for slang, or at least, it looks as if that would happen if he got the unfortunate "Melican" man into the chair. A typical Chinese razor has a blade about two inches long, and a third of an inch thick at its heel. This blade is jointed to a handle as thick as a fat lead pencil. Possibly its edge was once keen, but the blade was never concaved, and it now looks as if it would do a fair job for a school boy. Other razors are much like it.

However, it must not be presumed that the Chinese are clumsy because their tools look so. They can outcarve any nation. Some beautiful specimens of ivory carving from China—boats, temples, flowers and other articles—are contained in this museum, and, in particular, is an ivory sphere, about six inches in diameter, containing 12 and 20 movable spheres, each one of the twelve and of the twenty being inside the other, and each being carved with delicate tracings. How in the world it was ever done is a Chinese puzzle; also a testimonial to Chinese skill and patience.

The ways of the Chinese are peculiar, according to Bret Harte, but the demand of the Chinese is for modern goods in the Hardware and other trades, according to George E. Anderson, U. S. consul at Hankau, China, and other authorities. China is credited with originating the mariner's compass, printing, gunpowder, poker and many other devices, good and bad, but, despite her early start in civilization her people are to-day sadly lacking many of the necessities of an up-to-date world. Therefore there are markets in China for modern American goods, and, according to various reports, certain American goods have gained a little foothold in coast cities and trading towns, just a tiny grip on China's mass of 400,000,000 people. "There's millions in it," is the vain opinion of the Chinese trade, promulgated by the dreamy Colonel Sellers, but it remained for the hustling Yankee, German and Englishman to realize Seller's vision, in ways most practical and profitable.

Queer Hardware is to be found in China, and some choice specimens of it have been collected in the Peabody museum in Salem, Mass. Chinese agricultural implements and Chinese carpenter and mason tools are peculiar, in the sense that Bret Harte uses the word, and other Chinese things are picturesque.

For instance, a Chinese gentleman of the old school takes his cutlery with him when he goes out to dine, a nice assortment of private chop sticks, a keen thin-bladed knife, six inches long, and a fan, all of which fold up in the peculiar Chinese way, and is carried in the girdle, the pants pocket of the shirted Mongolians. Several fine specimens of these chop stick sets are contained in the museum.

Other picturesque bits of Chinese Hardware are finger nail guards, or curved thimbles elongated three or four inches, so that they will protect the long finger nails that the Chinese admire, and that discourage the manicure industry in the Flowery Kingdom. A fly brush of cocoanut fibres suggests that the man with the modern metal fly catcher might find plenty of trade in model Chinese homes.

Some Chinese guns and weapons are wonderful tools of the warrior's art. One match lock gun is ten feet long and it's butt and stock looks like a piece of timber. It is matched by a spear like sword equally high, and more ferocious, for it has a saw like edge and a spike prong. Two handed swords are six feet long, and several cannon suggest those old Revolutionary guns that are stuck up in New England towns for hitching posts. A whole arsenal of these monstrous weapons would not stand up for ten minutes against a modern repeating rifle, or even a Rough Rider with a couple of favorite Colts.

A dolchin is a curious looking Chinese scale. It's method of use is not apparent. It consists of a hard wood pole six feet long, and it's swivel, and also its platform chain is at the same end. Some small and peculiar looking balances, made largely of wood, are used for weighing gold.

A Chinese rice mill is of stone. A little iron padlock is about the size of a bullet, and a few brass locks and keys have a multiplicity of parts. A Chinese razor—well, it looks like an instrument of torture, and before viewing it thoroughly, it is well to glance at the Sam Sing's Hop Toy set, that is guaranteed to send him into the land of joy in a few moments. The Chinese opium smoker uses a number of knives and needles in preparing his opium. However, the Yankee trader would undoubtedly prefer to supply Hardware more beneficial to the somnolent nation, and these things may be taken up later.

Trade Meetings

NEW MICHIGAN OFFICERS.

At the closing session of the Saginaw Convention of the Michigan Hardware Dealers' Association the following officers were elected for the ensuing year:

President—J. H. Whitney, of Merrill.
Vice-President—E. B. Standart, of Holland.
Secretary—Arthur J. Scott, of Marine City.
Treasurer—Henry C. Weber, of Detroit.

Executive Committee, for two years—J. B. Sperry, of Port Huron; T. Frank Ireland, of Belding; C. M. Alden, of Grand Rapids; J. H. Murray, of Cadillac, and George P. Griffin, of Albion.

It was decided to hold the 1906 convention at Detroit.

HISTORY OF THE MICHIGAN ASSOCIATION.

By Henry C. Weber,

(Read at the Saginaw, Mich., Convention.)

On July 9th, 1895, a small coterie of men, numbering altogether eighteen, representing nineteen different Hardware firms in the State of Michigan, gathered together at the Hotel Cadillac, and there in convention assembled, laid the foundation of the Michigan Retail Hardware Dealers' Association. To appreciate the importance of this step it is necessary that we have in mind the condition of the retail Hardware trade prior to that time. There had been no previous effort at organization; in fact the retail Hardware business was still in a chaotic state; it was just emerging from its undeveloped and pristine state. The rapid growth and the activity of the department stores and mail order houses were retarding its development. Any united effort upon the part of those who made Hardware their exclusive profession was necessary for the individuality and the life of that business. There was no fellow-feeling among those engaged in the same trade. Friendships between rival dealers were practically unknown, and rivalry and competition in business often developed into feud. Obnoxious laws working hardship upon the mercha it were upon the statute books, the repeal of which no individual alone could accomplish. The enactment of just laws on the subjects of Trust, Bankruptcy, Tariff, Interstate Commerce, Etc., in consonance with the progress of the times was necessary, of which an intelligent understanding could only be gained by an interchange of ideas of those in like business; trusts were forming among manufacturers, raising the prices to the consumer and cutting down the profits of the retailer, a condition which a merchant standing by himself alone could not combat. This was the situation when F. F. Carleton of Calumet issued the call for the first convention of our association, and to him, who became its first president, and Mr. H. C. Minnie, of Eaton Rapids, the first secretary, mainly belongs the credit for this inception and the success of that first meeting.

The others who were present and who on that account are worthy of mention here are as follows:

D. B. Martin, of Bay City; Charles F. Bock, of Battle Creek; F. D. McDonnell, of Bay City; D. W. Bloodgood, of Wyandotte; C. Frank Ireland, of Belding; John Popp, of Saginaw; L. R. Brockett, of Battle Creek; D. A. Kanter, of Holland; A. R. Barrett, of Union City; W. J. Boyce, of Port Huron; W. T. Hibbard, of Lansing; J. B. Sperry, of Port Huron; C. A. Harvey, of Morley Bros., Saginaw; John B. Jochim, of Ishpeming; Edward A. Moye, of Marquette; Henry C. Weber, of Detroit.

These eighteen men, fired by the enthusiasm of the two leaders, took on the roll of missionaries and went out to preach the new doctrine, to gather others into the fold. At the adjourned meeting which was held on February 12th, 1896, in Saginaw, the membership had already increased to forty. A constitution and by-laws were then adopted, and the organization completed. None who were present at that memorable session will forget the rejoicing of the members and the open-hearted hospitality extended by our Saginaw brethren.

The second convention was held at the Cadillac Hotel in Detroit on July 8th, 1896. The roll of members had then run up to ninety-five. At this meeting an important innovation was made; papers on subjects of practical interest to Hardwaremen were for the first time read and there members were, by an interchange of ideas and experiences, given the benefit of the latest and best thought along the lines of their own business. These papers

Digitized by Google

awakened in the individual Hardware merchant a lively interest in matters to which he had given but little or no attention before, and they have become one of the important features of all our meetings. At this session I had the honor to be chosen as your president, and Mr. H. C. Minnie was continued as secretary.

The third convention took place at Battle Creek on July 14th, 1897. The members then numbered one hundred and thirty-one. The importance of the association was then already apparent, and its influence had impressed itself upon the legislation of the State. At the previous convention, C. A. Harvey, of Saginaw, brought to the attention of the association the imperfect state of the lien law, affording little or no protection to the dealer, and it was resolved then to procure the passage of proper laws remedying the condition. In my address as president at the third annual convention, it was my privilege to call attention to the fact that due to the efforts of this association and of its members, a fair and satisfactory lien law had been passed. At this meeting the late Charles F. Bock was elected as president, and Mr. H. C. Minnie was again re-elected as secretary. Through the affability, untiring industry and energy of its president, the membership of this association was, during the succeeding year, swelled to one hundred and seventy-nine. Mr. Bock was an indefatigable worker, spending his own time and money traveling through many sections of the State to promote the interests and the welfare of this organization, and the success which he achieved will live as a monument to his memory.

The fourth convention was again held at Detroit on July 13th, 1898, and C. G. Jewett, of Howell, was made president, and H. C. Minnie was for the fourth time elected secretary. At the fifth convention, which again took place at Detroit on July 12th, 1899, Mr. Henry W. Weber, of Bay City, was elevated to the chair and F. H. Cozzens, of Detroit, became secretary, Mr. H. C. Minnie having declined a fifth term. During this administration delegates were sent to represent us and to take part in the formation at Chicago, Ill., of a national organization which has since become a power for good in the development of the Hardware trade.

The sixth convention gathered at Detroit on July 11th, 1900, electing George W. Hubbard, of Flint, to the presidency, and re-electing E. H. Cozzens to his former positions. At this time the association had again manifested its usefulness in procuring by its united strength the enactment of laws to meet the constantly changing and progressive condition of trade and commerce. The garnishment laws of this State had for many years contained provisions which made it possible for a man of small or medium salary, drawing it weekly, to beat his creditors out of that portion thereof which should rightfully go to them. An amendment adjusting this condition to conform with justice was vigorously opposed by a certain organized element, and it would have been impossible for the merchant single-handed to combat against it. Concerted effort through the medium of this organization, however, finally succeeded in procuring a change in the law that is more nearly consistent with justice.

The next three annual conventions were all held in the city of Detroit. At the seventh, H. C. Minnie, of Eaton Rapids, was elected president, and Fred H. Cozzens, secretary. At the eighth, Mr. T. F. Ireland, of Belding, was elected president and A. J. Scott secretary, and at the ninth, John Popp, of Saginaw, was elected president and A. J. Scott secretary. At the tenth convention which took place at Grand Rapids on August 10th, 1904, the membership was then two hundred and twenty-four. J. B. Sperry, of Port Huron, was made president, and A. J. Scott, of Marine City, re-elected secretary. During this vigorous and able administration, the most successful in the history of our association, the membership has risen rapidly and in an unusual degree, so that at the present time the total number is 537.

This growth has been so marvelous and could have been attained only by the most tireless energy, that I hope the appreciation of this association of the thoroughness and efficiency of its faithful officers will be happily demonstrated, and I propose right now that we give three cheers and a tiger for President Sperry and Secretary Scott. Their example is one to be emulated by all future officers.

NEW YORK STATE ASSOCIATION.

We have just finished mailing both to members of the association and to other dealers throughout the State a copy of the proceedings of the Buffalo meeting. It was our intention to reach every dealer who is rated with a copy of the work, but in case any were skipped, we would be very glad to mail one while the edition lasts if they will apply to this office.

The Board of Directors met in the Yates Hotel, this city, about two weeks ago. Among other things, fixed the date for the next year's meeting. It will be held in Binghamton on February 20th, 21st and 22d. The president has appointed his committees, or most of them, and the names of the members of several committees will be ready for publication in time for your September issue. We are receiving applications for membership right along, and the association is in good condition financially, and it made a little money out of the Buffalo program.

A committee, of which John G. Ferres, Johnstown, N. Y., is chairman, is working on the revision of the Constitution, which will be submitted at the Binghamton meeting. Members are buying insurance in several of the mutual companies freely, and the general tone of membership is very encouraging.

John B. Foley,
Secretary.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED AUGUST 7, 1905.

387,215. Locking Device for Stove Pipe Dampers. V. Doane, Jr.
387,226. Hose Coupling. P. Gleich and H. S. Krause, St. Paul, Minn.
387,236. Skimmer. G. K. Knowlton, Hamilton, Mass.
387,259. Combined Step and Arm for Platform Attachments for Ladders. W. D. Robb, Abilene, Kan.
387,274. Cook Stove. G. W. Walker, Malden, Mass.
387,300. Combination Lock. C. Henderson, Boston, Mass.
387,328. Door Check. F. W. Tobey, Waterbury, Conn.
387,337. Saw Filing and Setting Machine. W. H. Beardsley and B. Perry, Eureka, Cal.
387,354. Wash Board. E. Hambujer, Detroit, Mich.
387,400. Combined Latch and Lock. J. C. Craig, Fenelon Falls, Ontario, Canada.
387,401. Combined Latch and Lock. J. C. Craig, Fenelon Falls, Ontario, Canada.
387,409. Screw Driver. G. E. Gay and J. H. Parsons, Augusta, Maine.
387,448. Auger. H. W. Richards, Eden, Fla.
387,456. Wrench. J. M. Silvis, Kittanning, Pa.
387,523. Combined Latch and Lock. J. Loch, New York, N. Y.
387,576. Washing Machine. R. Campbell, South Haven, Mich.

PATENTS ISSUED AUGUST 8, 1905.

794,025. Twine Cutter. J. D. Kennard, Seneca, Kan.
794,044. Wrench. C. A. Paisley, Winfield, Iowa.
794,057. Combination Tool. J. M. Sullivan, Chicago, Ill.
794,064. Fence Wire Pliers. H. L. White, Utica, N. Y.
794,119. Hoe. A. Richardson, Milton, Ore.
796,543. Shears or Scissors. William M. Viser, Harrodsburg, Ky.
796,549. Fruit Jar Cover and Fastener. Joseph P. Young, Marshaltown, Iowa.
796,631. Jar Closure. Ferdinand O. Fischer, San Leandro, Cal.
796,656. Screen for Doors and Windows. Olaus B. Jacobs, Chanute, Kan.
796,662. Mop Holder. William B. Lacy, Oakpark, Va.
796,674. Faucet. Edwin A. Rider, Stockton, Cal.
796,709. Fishing Net. Arthur S. Cornet, New Orleans, La.
796,717. Water Can. Malcolm E. Gray, Rochester, N. Y.
796,908. Clothes Line Fastener. Silas A. Hall, Brooklyn, N. Y.
796,913. Skate. Ernest Hunold, Providence, R. I.
796,948. Fishing Rod. Jonathan B. Tuttle, Claremont, Cal.

PATENTS ISSUED AUGUST 15, 1905.

797,006. Ironing Board. A. E. Langworthy, Atchinson, Kan.
797,019. Shade Attachment. J. K. Putnam, Montpelier, Ind.
797,137. Lock for Door Knobs. A. Marion, Fitchburg, Mass.
797,174. Hammer. W. A. Clason, Studley, Kan.
797,211. Combination Tool. D. L. McKinney and G. W. Henderson, Fairmont, W. Va.
797,261. Sad Iron Heater. B. Bryan, St. Louis, Mo.
797,340. Wrench. R. A. Brooks, Ashtabula, Ohio.
797,368. Folding Ironing Board. H. Pike, Chicago, Ill.
797,376. Vise. J. P. Schneider, Sr., Cincinnati, Ohio.
797,478. Adjustable Coffee Filter. H. W. Welles, Poughkeepsie, N. Y.
797,484. Combination Tool. H. C. Williams, Jersey Shore, Pa.
797,489. Wrench. E. L. Bellman, Fort Atlinson, Wis.
797,538. Wrench. C. F. Spery, Rockford, Ill.

MONTANA BUSINESS BOOMING

PROSPERITY IN THE NORTHWEST

The great natural resources of Montana are fast being developed—the population is increasing rapidly—the past three years have been very profitable to the cattlemen and farmers. Good prices for cattle, sheep, wool and farm products, a better market for copper and other minerals. These are the reasons for good business out here, and the Hardwareman has felt and is feeling the benefits of better business.

Billings is fast becoming one of the great sheep and wool centres of the world. On the plains and up in the mountains to the north and south and to the east of Billings about 6,000,000 sheep range. This has brought and is bringing a large business which centres in this little city of about 6,000 population.

The Hardwaremen in all these large places carry large stocks and are prepared to make prompt deliveries to customers. One Hardwareman of Billings carries at this season of the year upwards of $50,000 in wagons and implements alone. This is the Donovan McCormick Company. In speaking of genuine business conditions A. H. Roeser, the manager of the Hardware department said: "We are doing all the business we can well handle—our trade could not be much better—prices are well maintained. We have had good weather for the ranchmen and farmers and the outlook is good for Fall trade."

The store of the Billings Hardware Company is very attractive, being large, roomy and light. Two large double windows are used to good advantage in displaying cutlery, sporting goods and Light Hardware, in which lines the concern do a large business. Both retail and wholesale trade is carried on by the Billings Hardware Company. Another firm doing some jobbing business is Gegen Bros., who carry a large and well-assorted stock of Hardware, tools and implements.

The Western Hardware Company, a new corporation, was formed this month to deal in Hardware and kindred lines. Edwin Sande, who has been connected with some of the best concerns in the State, is the general manager. The others members of the concern are F. B. Connley, G. W. Burla, Richard Cedergreen, and Momey Cedergreen. In referring to the new concern and its outlook Mr. Sande said: "F. B. Connley (who was for some time manager of the old A. L. Babcock Hardware Co.) and myself are both practical Hardwaremen. Two of the other members of the concern have for some time been in the tinshop business—we will have a complete Hardware stock and the best equipped tin shop in the State." The many friends of Mr. Sande wish great success for the new concern. The Western Hardware Company being composed of pushing, practical, up-to-date business men, a big business future is in store for it.

Not often does one find as well arranged or lighter or brighter store than that of the A. L. Holter Hardware Co. of Helena, Mont., nor a store where the entire force are more polite or courteous. This store has a reputation throughout the State for its courteous treatment of customers—a Hardware specialty salesman spoke to your correspondent about it, saying: "Well that is one of those concerns with which it is a real pleasure to do business. A salesman is treated with such consideration—and every employee in the place is always inclined to treat a fellow kindly. I tell you if I've any inside prices Holter Hardware Co.'s buyer, F. C. Ashall, gets them." The president of the concern, A. M. Holter, is a gentleman of the old school, and it is his inborn kindness that has permeated the entire establishment. N. B. Holter is vice-president and B. G. Schrader is general manager. In speaking of trade conditions, Mr. Schrader said, "Business through the State was never in a more healthy condition. All crops and produce, minerals and metals are bringing good prices, labor is well employed." When asked if it was time that many people were moving into Canada from the section, Mr. Schrader said: "You see after all that's not so bad. The people who are moving to the North are for the most part ranchmen, and by taking their cattle from Montana are making way for the farmer—the big cattle ranches are being cut up into smaller farms which are being irrigated—and under irrigation will produce great crops, and thus in a way the new conditions and these changes are really a benefit to the State. A few 160 acre farms give more labor and bring more money into circulation than a large ranch of 10,000 acres with thousands of cattle."

♣

Another Helena concern doing both a wholesale and retail business is the Helena Hardware Co., located at 415 to 419 N. Main Street. This concern carry a large general stock of Hardware and do an extensive business in mining tools and implements. A good retail business is carried on by Dalton & Richardson, whose store is located at 335 N. Main Street, in the heart of the best retail district of Helena.

Never in the history of copper mining in Montana has there been as many men employed in the mines as at the present time. In the mines in Butte alone there are to-day over 6,000 men working—earning from $3 to $5 a day. During the past year, many new prospects have been opened up ,and the higher price of copper and lower cost of smelting, has brought some old mines in again on a paying basis.

BUTTE BUSINESS BRISK.

All these mines being operated is of course making a big demand for all mining supplies. Many new buildings are being erected, and there is a good brisk demand for building materials.

There is an air of enterprise and push about the store of the Montana Hardware Company in Butte that speaks much for its present success and for the future of this concern. F. F. West is the general manager and a man of much ability, which he proved in the handling of this business. A. J. Johnson is President, W. A. Clark, Jr., Vice-President, and A. ... Wethey, Treas. and Secy. The Montana Hardware Company have built up a large business in sporting goods, which department is under the management of Marvin Jenkens, who is recognized as one of the best posted sporting goods and shelf Hardware men in the West. In speaking of trade conditions, Mr. Jenkins said: "Business in this department is constantly growing and it is a line that shows a profit and brings men to the store. We are well satisfied with this branch of the business."

An extensive Hardware business is carried on by the Anaconda Copper Mining Co., the principal store being located here in Butte. A large part of the business is of course in mining tools and machinery, but a very complete stock of Hardware and sporting goods is also carried. S. H. Greenwood is manager and H. U. Doering looks after the Hardware and especially the sporting goods end. The store is being re-arranged, new plate glass cases with up-to-date inside electric lights adding very much to the appearance of the store.

One of the younger but fast growing Hardware firms of Butte is Henderson Bros. & Co. Although competition in the city is strong this concern has succeeded in building up a fine retail Hardware trade. Mr. Parmalee of the company said that their trade was just about 50 per cent more this spring than a year ago. A very complete line of crockery, a large stock of stoves and sporting goods are good paying parts of their business.

Another of Butte's well arranged stores is that of Davis & Weimscary Company, where a very well sorted stock of high grade tools and general Hardware is carried.

Closely identified with the Hardware trade is the business of selling sportng goods, and no review of the Hardware trade of Montana is complete without a mention of the store of Carl Engle, which is one of the best kept stores of the Northwest. Show cases and windows, floors and shelving are bright and clean and stock displayed looks as though it had just come from the factory.

H. G. Coy, who is the leading Hardware merchant of Anaconda, succeeding the old firm of Leck & Coy, said that business was very good and the outlook very satisfactory for fall trade. Mr. Coy carries a large stock of general Hardware, cutlery and housefurnishing goods. A line of merchandise not often found in the Hardware store is sold here by H. G. Coy; i. e., dolls and some lines in holiday goods. Mr. Coy said that the doll business was a good side line and he found that this line helped the sale of House Furnishing goods, bringing as it did women into the store.

A big stock of Hardware is carried by the Missoula Mercantile Co., of Missoula, Mont. This concern do both a retail and jobbing business and have a capital of upwards of a million dollars. The Hardware department is in charge of Mr. N. S. Little who is recognized as one of the best posted Hardwaremen in Montana. The store is splendidly arranged and large windows are used to good advantage in displaying seasonable goods. The firm's head Hardware salesman, Mr. Wilcox, is well and favorably known to the firm's many customers in all parts of western Montana. The Missoula Mercantile Co. do some very clever advertising and issue an up-to-date catalogue.

HAMMERNAIL.

WIRE ROPE LUBRICATION.

Elevator and other cables used for hoisting purposes, are subject to both internal and external wear; the former is caused by the rubbing of the wires and strands upon one another under pressure in bending over the sheaves, the latter by rubbing and wedging in the grooves of the pulleys.

Unless the cables are kept well lubricated they wear and deteriorate rapidly. As a lubricant for wire rope Dixon's Ticonderoga Flake Graphite has the endorsement of the leading manufacturers as well as the approval of those experienced in its use, because of the well recognized fact that flake graphite prevents the abrasion and wear of all parts coated with it. For this purpose graphite must be combined with suitable greases to make it adhere, but there has always been considerable danger and difficulty in applying grease to moving cables.

Dixon's Handy Graphite Rope Dressing supplies the ideal qualities of Dixon's Flake Graphite as a wire rope lubricant in such a form as to make it thoroughly acceptable to practical men who have used it. The package is of about the size and shape of an ordinary package and contains nearly three pounds of graphite lubricant. It is easily applied by holding the open edge of the package against the cable while in motion.

There is no trouble and no danger to the workman, no waste nor dripping off of lubricant. The economy and efficiency of Dixon's Handy Graphite Rope Dressing, in prolonging the life of wire rope and saving the expense of frequent renewals of worn cables, should commend it to the careful attention of every firm operating hoists or elevators.

For prices and full particulars address the makers, the Joseph Dixon Crucible Co., Jersey City, N. J.

◆

The entire plant of the Toledo Stamping Company, Toledo, O., has been purchased by R. W. Kirkley and others, who will start the entire plant in all departments at once. The leading line will be Shovels. Mr. Kirkley will run the plant for a short time as trustee for the purchasers, but it is their purpose later on to incorporate a company under the laws of Ohio.

◆

The Western Steel Gate Company, formerly of Two Rivers, Wisconsin, have moved to Green Bay, Wis., where they have largely increased facilities for turning out their regular line of Steel Gates, Post Hole Diggers and also an attractive line of machinery.

◆

The J. H. Williams & Co., Brooklyn, N. Y., manufacturers of Drop Forgings, announce the opening of a Western office at 18 So. Clinton Street, Chicago, with Mr. Charles E. Hathaway as manager.

POPULAR TALKS ON LAW.

Copyrighted 1905, by William C. Sprague.

Landlord and Tenant.

No. 5. Is the landlord bound to make the premises tenantable? When is the tenant justified in abandoning the premises or refusing to pay rent?

Where there is nothing in the lease laying an obligation on the landlord to make the premises tenantable, it is implied in the law that the tenant took the premises as they stood; in other words, there is no implied warranty on the part of the landlord that the premises are tenantable. The great exception to this rule is in cases where there is some secret or concealed defect in the premises which renders them dangerous to life or health, and the defect was known to the landlord and unknown to the tenant. For instance, if the tenant should rent property without knowing that it had been occupied just previously by a smallpox patient and this fact was within the knowledge of the landlord, the tenant would be justified in abandoning the premises. Some cases have gone to the extent of saying that this exception covers a case of defective heating or defective plumbing where the defects go to the extent of endangering life or health.

The tenant should see to it that in the lease the landlord agrees to keep the premises in a tenantable condition; nor should the tenant forget that the mere verbal promise of the landlord to keep the premises in tenantable condition, no matter when the promise was given, would not be binding.

After a lease has been executed the verbal promise of the landlord to repair is void, unless there was a consideration given for the promise; nor would a landlord's promise to repair the premises in consideration of the tenant not abandoning the premises before the end of the term be good, because of lack of consideration, the tenant already being under obligation to remain until the end of the term.

Any inducement, whether by writing or by word of mouth, made by the landlord, which leads the tenant to rent and which afterwards proves to be false or fraudulent, will of course justify the tenant in abandoning, but the representation or statement must be something more than a promise. A statement to the effect that premises are tenantable when they are not, such statement being used to induce the tenant to rent, may justify an abandonment of the premises, but an unfulfilled promise of the landlord made before the lease is signed, or at the time, or afterward to the effect that he will make them tenantable will not justify an abandonment; and, if verbal, such promise is void.

This brings us to the general question as to the circumstances under which tenants may abandon premises and refuse to pay rent. We have seen that the mere promise of the landlord to make repairs which he fails to fulfill, will not justify abandoning the premises and refusing to pay rent. It is the usual course pursued by tenants, but the courts as a rule will not permit the tenant thus to take the remedy into his own hands. There are two courses open to the tenant if the landlord has promised to make repairs, or to make improvements, and fails or refused to do so: one is to sue the landlord for damages, and the other is to make the repairs or improvements and sue the landlord for the cost of them. And the tenant may recover in his judgment not only for the cost of repairs but for the damage he has suffered by interruptions to his business or otherwise during the time that the premises were being repaired. But it is never allowable for the tenant to remain in possession and at the same time refuse to pay rent; nor is an unfulfilled promise ground for abandonment.

To this general statement, which seems somewhat unjust on its face, there is the general exception that if the premises are absolutely unfit for the purposes for which they were rented, or become so through the landlord's fault in not keeping his promise, the tenant is released from his contract and may abandon the premises, but this exception has not been upheld in every case. Where it has been upheld is only where there has been a total failure of consideration; that is, where premises have been totally unfit for the purpose intended, or where the landlord has broken an express promise to make them fit.

Another class of cases is where the landlord agrees to make certain repairs or improvements before the tenant takes possession. We have seen that after the tenant has once taken possession a broken promise on the part of the landlord, as a rule, does not justify refusing to pay rent or abandoning, but where the landlord has failed to make the repairs or improvements and the tenant has not yet taken possession, the tenant may refuse to take possession on the ground that he is released from his contract. Here, as in other cases, we caution the tenant that if the lease itself is in writing the landlord's agreement regarding repairs, to be binding, must be inserted in the lease itself. It is a general rule of the law that where the contract is reduced to writing the law presumes that the writing contains all the terms, and one is not permitted to offer testimony that adds to or varies the terms as written. It is admissible, however, to show that after the contract was made it was varied by verbal agreement.

If the landlord is to make repairs before possession is to be given to the tenant and the tenant enters the premises before the repairs are made, he does not thereby waive his right to have them made.

As fraud vitiates a contract so a tenant may abandon the premises and refuse to pay rent when he was induced to take the premises by false statements. The false statements need not be in the lease itself; anything said or done by the landlord, even though innocently, which is materially false, and at the same time induces the tenant to take the premises, will result in annulling the contract. The mere concealment by the landlord of some defect, provided the defect renders the premises dangerous to life or health, will amount to a misstatement, but the concealment of immaterial matters will not so operate.

If the tenant intends to take advantage of false statements to surrender his lease he must do so promptly upon discovering that the statements were false. His failure to do so promptly will lead to the presumption that he has waived his right. He may not only abandon the premises in such cases but he may sue for damages. Furthermore, he may remain in possession if he pleases, waiving his right to abandon the premises, and may sue for damages caused by the fraud.

(To be continued.)

RECENT TRADE PUBLICATIONS.

Flint & Walling Manufacturing Co., Kendallville, Ind., have issued catalogue No. 46, descriptive and illustrative of the Star windmills, towers, tanks and pumps which they claim are unequaled for efficiency, strength and durability. They warrant Star mills and towers, all kinds and sizes, and all goods they manufacture, to be made of first class material, with best of care and workmanship; when assembled and erected according to their instructions and cared for properly, to resist any winds that do not damage substantial buildings or other windmills in proximity for one year from date of erection. They agree to furnish, free of charge, at factory, all repairs needed within said year caused by faulty material or workmanship. They further guarantee Star Windmills to perform as much work, and more, than any other mill manufactured, and that in lighter winds. Such a broad warrantee certainly deserves a fair trial. One of their catalogues will be mailed to interested parties.

Kelsey Heating Company, Syracuse, N. Y., have recently issued considerable printed matter, from which they have sent us three pamphlets all of which are high grade works. One booklet is devoted to pictures of residences in different cities which are heated by the Kelsey Generators; another gives "A few opinions about House Heating" in which are given one or two letters only out of the many they have received from the users of their generators. Users of "Kelseys" give specific reasons for its superiority over other systems. The third and largest of the three books, which is their No. 5, exploits the Kelsey Warm Air Generators, for Homes, Church and School Heating. A Kelsey Generator, they state, is unlike any other heater and stands in a class by itself because of its capacity for warming great quantities of air and distributing the same evenly. It is a hot water boiler converted into a warm air generator. Their method of warming air in separate currents, they claim is by far the best method. These warm air currents are positively controlled and sent in any direction to rooms exposed or distantly located, or even to rooms on a level with the generator. The heating surfaces and weight of a Kelsey are much greater than that of any other apparatus having same size grate area and fuel capacity. For further information regarding this valuable cold weather necessity, write for booklets.

F. E. Myers & Brother, Ashland, Ohio, are the authors of an attractive envelope size booklet which is designated as Myers Talking Points or Points on Pumps. The book is published with a view to familiarizing you with the important and patented features of "Myers" goods, also their points of advantage, and the reason the dealers should handle them in preference to other makes. Referring to their "Suggestions to Salesmen and Dealers" they state: "Impress on your own mind, and the mind of every customer, the importance of our low and harmonized list prices. One discount applies to all pumps, pump fixtures and repairs resulting in low net prices, which compare favorably with the common and poorer finished goods of our competitors, securing for you conditions that if urged and pushed, will enable you to hold your position, regardless of what your competitors may do or offer." Also the booklet contains 26 pages devoted to "Hints on Hay Tools." Send for copy of their catalogue.

The Eastern Granite Roofing Co., Irving Building, New York, N. Y., have sent us a copy of their latest catalogue, attractively gotten up, finely printed on excellent paper. The book contains very many views showing buildings on which Granite Roofing has been used, together with a few remarks on the merits of the same. Granite Roofing, they state, is the standard roofing of America. It has been in use twenty years throughout the country, and has the unqualified endorsement of the most prominent railroad officials, architects, builders, contractors and superintendents of construction. In order to facilitate the work of laying Perfected Granite Roofing they supply a special mop, which they claim is beyond question the best made and the only suitable low-priced mop on the market. Its size permits its being sent by mail. Granite Roofing is compactly rolled in uniform sheets for shipment. Each roll is guaranteed to contain 110 square feet, and is 41 feet 3 inches long by 32 inches wide. In laying, each roll covers 100 square feet of surface, allowing a uniform lap of three inches for horizontal joints. The average weight per roll is 140 pounds. A copy of their booklet will be sent upon request.

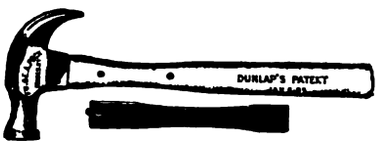
Lawson Manufacturing Co., 40 Dearborn Street, Chicago, Ill., for whom Frederick Pfeifer is New York agent at 101 Reade Street, has sent us a copy of their latest price list No. 28. This book exploits the Matchless Double-Acting Floor Spring Hinge. These hinges are ball-bearing which insures a minimum of friction, operating easily and without noise. To assist buyers in selecting size of hinges some general directions are given, which if followed will prove satisfactory. The Matchless Spring Hinge can be furnished without the side plates by using an invisible shoe or socket. Unless otherwise ordered, all spring hinges will be shipped with the side plates. When desired, they can furnish this hinge with pintle raised for one-half or five-eighths inch threshold. Send for price list No. 28.

Harrington & Richardson Arms Co., Worcester, Mass., have sent to their patrons catalogue No. 8. It is an attractive book in pamphlet form covering 31 pages of illustrative and descriptive matter relative to their revolvers and shotguns which are very strongly guaranteed. They state: "Simplicity of construction, perfect safety, absolute reliability in action, and superior accuracy are the qualities which characterize the Harrington & Richardson Arms Company firearms. With the proper care they will last a lifetime and will always be in working order. Firearms should be kept clean and well oiled in order to give the best and longest service." They repair and furnish parts for firearms of their own manufacture only. Send for catalogue for further information.

Simmons Hardware Co., St. Louis, Mo., have issued recently their catalogue No. 468 which is their regular annual lamp catalogue in which they give a very fine display of the goods referred to, showing the most desirable lines and shapes, goods that seem to be appropriate for a substantial demand for quality at the right prices. The goods are carefully selected from the latest and best products of the best factories, and will undoubtedly meet the needs of the average buyer, while at the same time affording the dealer a good profit on his sales. Considerable percentage of the very large volume of business handled in this line, they state, comes to them by mail from their customers, but it is handled with the same intelligent accuracy, promptness and price just the same as when handled by their salesmen. This catalogue will be found valuable to select from. It is a volume of 142 pages, printed on good paper, some of the illustrations representing three colors. They have also issued catalogue No. 470 covering a line of Sporting Goods handled by them, which, as may be supposed, is a very complete catalogue printed on fair paper, illustrating and describing everything required for Fall sports of every kind, including guns, gun goods, ammunition, hunters' clothing, foot ball goods, gymnasium goods, and skates and sleds. It will be found a valuable catalogue by the recipient from which to order goods required by their patrons with the full assurance that the character, quality, finish and price are right in every instance. They refer to the fact that people are always more liberal in expenditures for their own comfort and pleasure than when purchasing necessities, and as Sporting Goods come under the general head of luxuries, they are therefore in a legitimate class of large profit bearing goods. This is a copyrighted publication, and consequently well worth preserving.

J. D. WARREN MFG. CO.'S NEW PRICE LIST.

The J. D. Warren Manufacturing Co., Chicago, Ill., manufacturers of Hardware Store Fixtures, have just issued a new Price List under date of August 1st, embodying over 350 different patterns of Cabinets, Bases, Counters, Etc. They not only manufacture the above fixtures referred to, but equip a Hardware store complete in all of these requirements of Offices and Cabinets of whatever designs are necessary to suit the form and construction of the building and requirements of the firm. In their circular letter they make mention of the care taken in arriving at the prices as shown in the following extract:



> "In compiling, with expert assistance, our Price List of August 1st, 1905, the most careful sifting has been given to every detail concerning manufacturing to learn the exact cost of every inch of store equipment we make, so that the results ascertained would be accurate, and our selling price would be on a correct basis, and just to both buyer and manufacturer. In affixing same, the price of each cabinet and base is pro rata, as explained in the Price List."

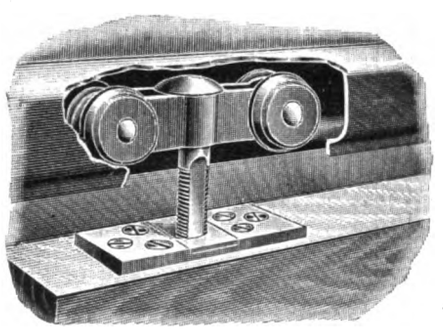
NEW GOODS AND SPECIALTIES.

INVINCIBLE WEDGE PLATE HAMMER.

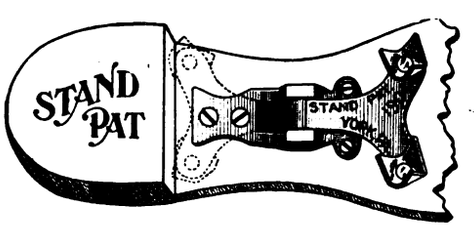
F. W. & E. A. Peck of Cohoes, N. Y., are manufacturers of an excellent line of hammers known in the trade by the above mentioned name. The manner of construction is plainly shown



INVINCIBLE WEDGE PLATE HAMMER.

in the accompanying illustration, a glance at which is sufficient to prove to the reader the practically impossibility of losing the head from the handle and further the greatly added strength given to this tool by the insertion of the wedge plate. These goods are made in three styles, Nos. 1½ and 1 in plain faces and No. 11½ in bell face.

A NEW McCABE HANGER.

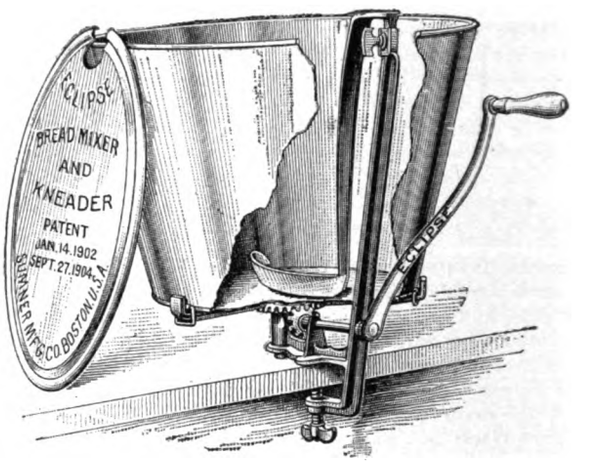


We show in the accompanying cut the improved No. 10 Parlor Door Hanger just placed on the market by the McCabe Hanger Manufacturing Co., 425-27 West 25th Street. This hanger is the result of time and money spent in an experimental department and this firm now offers a device with practically all the superior qualities of the No. 2 Hanger at one-half the cost of the No. 2. The No. 2 Hanger is in use in the Gould, Astor, Carnegie, Rockefeller and Vanderbilt houses, as well as many palatial residences of Europe. The carriage of the No. 2 Hanger is made from drop forging. The carriage of the No. 10 is made from stamped steel. The tracks for both hangers are made of cold drawn steel with parallel slot having flanges on both sides. The inside surfaces on which the wheels travel are self-cleaning and as smooth as it is possible to make them. Adjustments on both the track and carriages can conveniently be made at any time.

PARLOR DOOR HANGER NO. 10.

STAND PAT CREEPER.

The Stand Pat Creeper manufactured by McClennan & Gotwalt Company, Ltd., York, Pa., which we illustrate herewith, is made of brass and therefore is rust proof. The points are made of

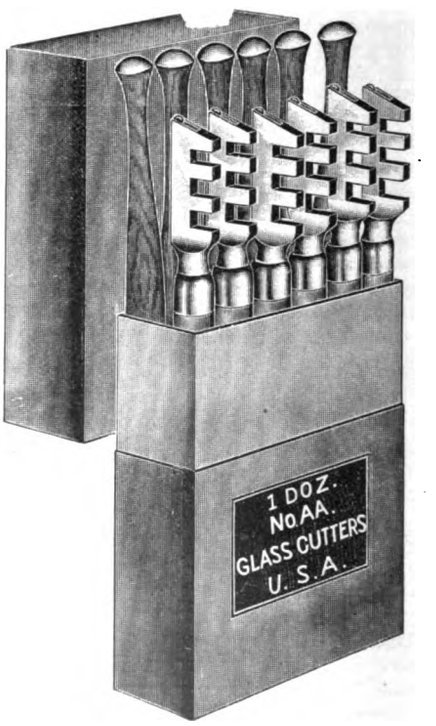


STAND PAT ICE CREEPER.

hardened steel and the springs are carefully tempered. As shown in the illustration the Creeper is attached to the instep of the shoe where it remains as long as desired. On entering the house it is easily folded against the shoe, making it impossible to injure the floors by its use. This article is made to retail at twenty-five cents per pair.

THE ECLIPSE BREAD MIXER AND KNEADER.

The accompanying cut shows a new Bread Kneader, made by the Sumner Manufacturing Co., 229 Franklin Street, Boston. Its novelty consists in the tinned dasher, being held firmly by a set screw to the frame, which is attached by a thumb screw to



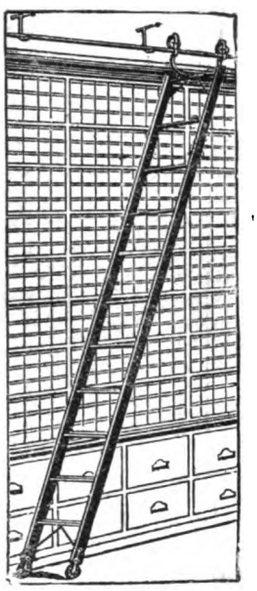
THE ECLIPSE BREAD MIXER AND KNEADER.

the table. The can is held by three wire loops to a spider, which is revolved by a gearing underneath. The manufacturers claim that the dough is thoroughly kneaded, and the quality of bread is most excellent, and always the same; the kneading is done in three minutes, and there is but little strength required to turn the handle; it works equally well with but one quart, as with eight quarts of flour.

FLETCHER-TERRY GLASS CUTTER.

We illustrate herewith the neat and attractive way of displaying the rosewood handle glass cutter manufactured by the Fletcher-Terry Company, Forestville, Conn. The display case is made of

FLETCHER-TERRY GLASS CUTTER.



black leatherette paper with gilt label. A large number of different styles of cutters are made by this concern and it is stated

Digitized by Google

that these goods will compare favorably with any line in the market in the matter of quality and price. This firm has recently installed machinery for making cutters out of flat steel in addition to their outfit for making the goods from round steel.

THE MILBRADT STEP LADDERS.

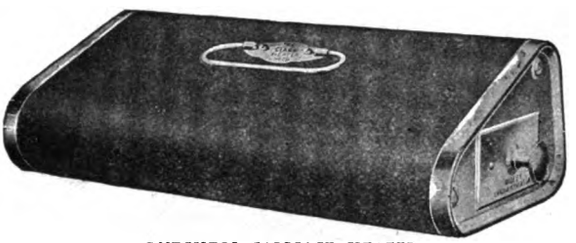
The Milbradt Step Ladders have been on the market for the past twenty years and have at all times been recognized as among the best. It is claimed by the Ebbing Manufacturing Co., St. Louis, who are now owners of this business, that they are selling more ladders than all other houses combined. These goods are made to order, each to fit its particular place, the best materials are used throughout and every ladder is carefully tested

MILBRADT STEP LADDER.

before leaving the shop. All the iron work is malleable with aluminum finish. As will be seen from the accompanying illustrations these ladders are made to run on a hanging track fastened to the shelf near the top or with cushioned tire wheels on the floor, or from a steel track fastened to the ceiling with wheels on the floor as well. The catalogue sent out by this concern contains full instructions with specimen drawings for taking measurements in the store and for making out specimens as to the size and style of the ladders required. This book will be sent to any interested dealers.

STANDARD CARRIAGE HEATER.

The Standard Stamping Company of Marysville, Ohio, are manufacturers of the Standard Carriage Heater, which we illustrate herewith. It is placed on the market at a medium price and should be investigated by those dealers who handle this class

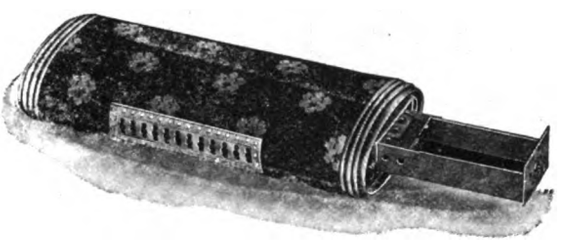


STANDARD CARRIAGE HEATER.

of goods. This heater has a full metal lining, making a hot air chamber entirely around it and forming a perfectly smooth guide for the fuel drawer, and perfect insulation against burning. The metal ends extend over the edge of the carpet, to prevent fraying. It is conveniently carried in one hand; is light, handsome, strong and thoroughly reliable.

NEW CHICAGO HEATERS.

Among the large list of Carriage Heaters manufactured by the Chicago Flexible Shaft Co., Chicago, Ill., are two heaters which seem to take rank among the handsomest goods in this line that have ever been put on the market.

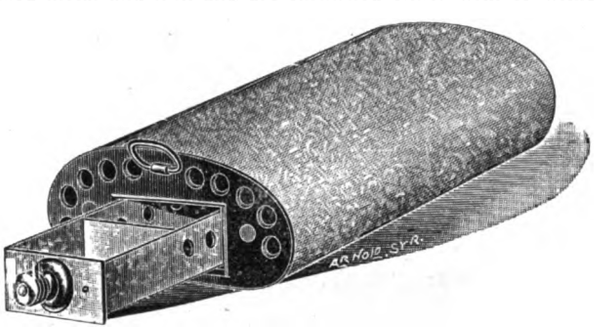


The first of these is called the "Dutchess" and is intended for automobiles or private carriages. The heater is about 24 inches long and is beautifully ornamented, the ends being nickeled. It has side and end ventilators and is covered with a rich maroon velvet plush. It is claimed to be the most handsome carriage

DUTCHESS CARRIAGE HEATER.

heater manufactured and the company report a good trade on same among owners of automobiles.

The other heater which attracts special attention is known as "Clark Heater No. 7X." It is shaped similar to the No. 7D,

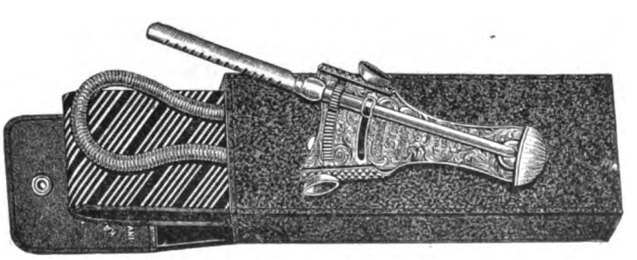


CLARK CARRIAGE HEATER NO. 7X.

which is one of the most popular heaters manufactured by the firm. It is covered with a maroon mohair plush. The ends are of solid steel and are heavily nickle-plated. This heater has both side and end ventilators, is 14 inches long and weighs 9 lbs. It is also a very beautiful heater and finds a large trade among that class of people who are always looking for the best.

OLMSTED CARRIAGE HEATER.

An excellent line of Carriage Heaters is being manufactured by H. R. Olmsted & Son, Syracuse, N. Y. They are made of galvanized metal and iron and are furnished either with or without

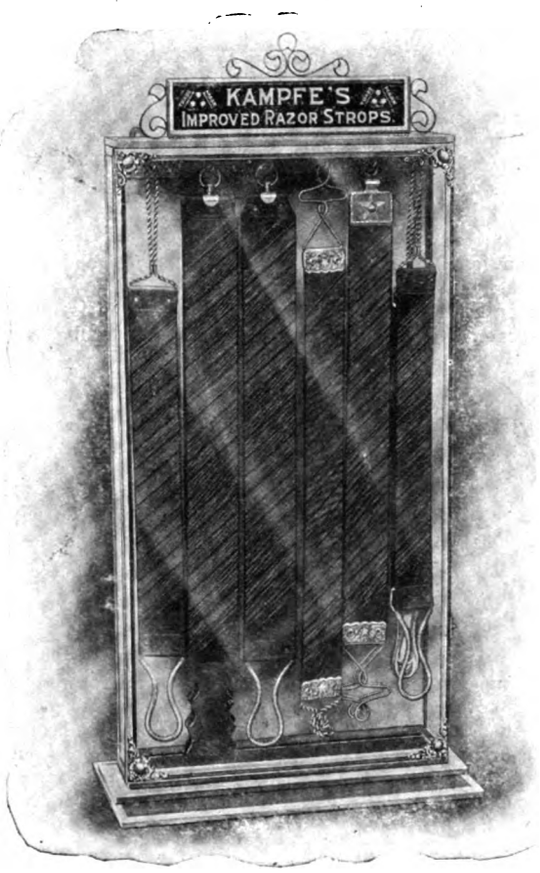


OLMSTED CARRIAGE HEATER.

carpet covering. It is claimed that they will produce a steady and comfortable heat for 8 to 10 hours if a whole charcoal brick is used. The fire is held in a galvanized draw, which will not rust. These heaters are being placed on the market at a price much lower than is usually paid for these goods and Hardware dealers who contemplate handling heaters will consult their best interests by getting prices from this concern.

NEW KAMPFE GOODS.

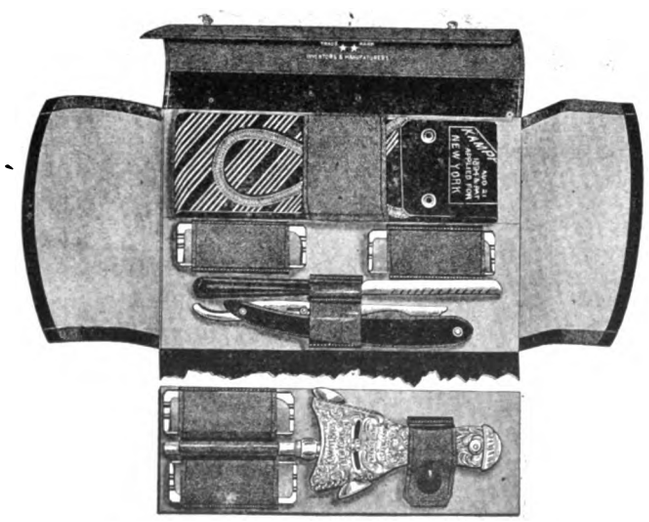
An article that will be greatly appreciated by users of Star Safety Razors is the case illustrated herewith, recently placed



STAR NEW LEATHER STROP AND CASE.

on the market by Kampfe Brothers, New York City. It is made of heavy, flexible, gros-grain leather, and is intended especially

Digitized by Google

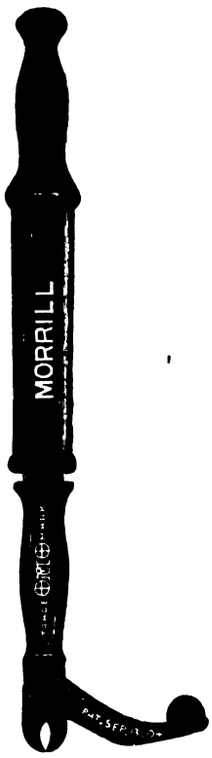


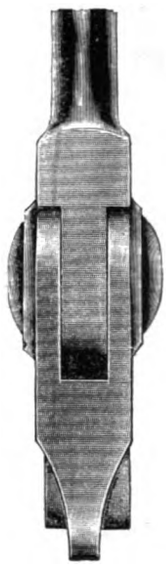
for those who prefer having the automatic Star Stropper and the Star Diagonal Leather Strop in a case by itself. The case is 6¾ inces long, 2¼ inches wide and 1½ high. This firm is supplying dealers in their Razor Strops with Kampfe's Improved

STAR IMPROVED RAZOR STROP ASSORTMENT.

Razor Strop assortment in a display case as illustrated herewith. The case is made of brass, nickle-plated, is 3 inches deep, 27 inches high and 20 inches wide. It can be used to hang on the wall, or to stand on the counter. This assortment is known as "C" and consists of four dozen of eight different numbers of Kampfe's Strop. The case is supplied free with an order for this assortment, and it makes an attractive display, keeps the contents in excellent condition and shows the goods to a good advantage.

The new Star interchangeable razor set, illustrated herewith, has just been placed on the market by this firm. The set in-





STAR INTERCHANGEABLE RAZOR SET.

cludes one interchangeable razor, a holder and handle, one or more blades, automatic Star stropper and honing handle, and Star diagonal leather stropper. The case is seven and a half inches long, five inches wide and one and a half deep. The interchangeable razor should certainly meet with a very large sale, particularly among those who prefer the old-style razor to a Safety. The interchangeable can be stropped on the Star stropper, which works automatically, no experience being required to produce a perfect edge.

THE MORRILL IMPROVED NAIL PULLER.

Charles Morrill of 277 Broadway, New York, has still further improved his Nail Puller by slightly changing the shape of the jaws by adding a trifle more metal, so that the tool is much stronger and grips with terriffic force. The ram is made of the finest cast iron obtainable and is designed in such a scientific way as to reduce the danger of breakage to a minimum. The shank

THE MORRILL IMPROVED NAIL PULLER IMPROVED FOOT OF PULLER.

and foot are of the finest drop forged steel and represent the highest stage of the art in their construction. The ram is finished with the best Japan and the shank and foot are specially treated to a rust-proof fire-burnt finish. The special features of this tool are many in number. The whole tool weighs a trifle under four pounds apiece, and is so designed as not to turn in hand while pulling nails or will not roll off inclined places. There are no springs to break. The shank and foot are mounted together in a box or mortise joint. This centralizes the pull and keeps the jaws from spreading sidewise, thus giving the tool a very long life. Two features that especially commend it to the user are the scientifically constructed foot that enables a nail to be drawn with one-half the power required in any other puller, and the handle and handguard on the shank which makes it impossible for the user to bruise or injure his hand. These pullers are each separately wrapped in paper and packed one dozen in a stout wooden case. Prices and terms can be obtained upon application to Charles Morrill.

THE BUFFALO CARPET AND RUG CLAMP.

The E. E. Josef Manufacturing Co., Buffalo, N. Y., are placing upon the market the Buffalo Carpet and Rug Clamp, whose utility is so unquestioned, it has for a small specialty, become exceedingly popular. We present an illustration showing its use. This little device is used to securely clamp carpets, rugs, sofa pillows, etc., to a line to give them an airing and to beat

THE BUFFALO CARPET AND RUG CLAMP.

them. The ordinary method of doing this has been to use the old wooden clothes pins while trying to hold a carpet on the line to beat or shake it. The annoyance caused by the wooden pins flying off and possibly hitting one in the eye, has not been looked forward to with any degree of pleasure. This is obviated by the simple use of this little appliance.

OUR BRITISH LETTER.

(*From Our Special Correspondent.*)

London, August 12.

IRONMONGERY AT THE AGRICULTURAL HALL, LONDON.

It is now six years since the first Ironmongery Exhibition was opened at the Agricultural Hall. This function, which has been held annually, has been well supported by British Hardwaremen. This year, however, there has been a considerable falling off in the number of exhibitors and in the attendance; therefore, the exhibition, which has just closed, cannot be said to have been thoroughly satisfactory. It is felt by some that the needs of the trade will be met by omitting a year, and it is hoped the number of new inventions and improvements in general Hardware brought out within the next two years will give fresh impetus to the trade interest, and enable the management to hold a thoroughly successful show in 1907. Those exhibitors who occupied space made up excellent stands, and, although there were but few novelties on view, a splendid assortment of household and domestic ironmongery and machinery was gathered together. As on previous occasions American manufacturers were fairly well represented. To the Block Light Company of England, whose head headquarters is at Saracen House, Snow Hill, London, belongs the honor of being the first firm to introduce American gas lighting mantles into Great Britain, and they were not slow to emphasize the fact and to show visitors the excellent qualities of their mantles and fittings. In view of the approaching autumn trade incandescent gas lighting appliances were very much in evidence and a number of new burners and fittings, in addition to those well-known to the trade were shown. Among the most striking novelties in this section were the "Black Diamond" mantles shown by the United Kingdom Lighting Trust, Ltd., which firm claim to have produced a mantle giving increased light, remarkably tough and pliable when handled. One of the latest domestic novelties was a new "crummer," which does away with the old style of rubbing bread through a sieve by hand; it is a cleanly and economical domestic accessory handled by Titt & Co., of 3 King's Road, Brighton. British ironmongers are well acquainted with the old-fashioned firm of R. & W. Wilson & Sons, Ltd., of 19 Wardour Street, London, and this firm not only manufacture japanned goods, including baths and trunks, for the home market, but do an extensive business in all parts of the world; their stand was specially interesting and one of the best staged in the exhibition. American heating appliances were ably represented by the American Radiator Co., of 98 Shoe Lane, London, who showed about twenty different types of radiators; their "Verona" radiators are exceedingly ornamental and their sterling quality much appreciated. During the last few years British ironmongers have taken up the sale of watches and jewelry and those who have been most successful in this class of business are R. H. Ingersoll and Bro., of Ely Place, London, whose beautifully arranged stand of American watches was much admired, and the different "helps to business" they supply their customers with tend to promote additional sales. These tastefully designed stands are specially made in order that watches may be shown in shop windows and show cases. It was particularly gratifying to learn that fully 75 per cent. of this firm's business is done through ironmongers, showing that, in this instance, at any rate, British Hardwaremen have not been slow to grasp the possibilities of money-making through the introduction of a popular side line.

THE SPORTING SEASON OF 1905.

Grouse shooting commences to-day (August 12th), and the reports from the Scottish moors are very encouraging. Young birds are strong on wing and the conveys are in a satisfactory condition; there is, therefore, every prospect of the sporting season being one of the best British ironmongers have experienced for some years past. Of course a large portion of the trade done in ammunition does not commence until the end of the present month, when preparation is being made for partridge shooting, which begins on September 1st; the pheasant season being delayed until October 4th, by which time the harvest is supposed to be gathered in, and the ground clear for large drives. Since the introduction of smokeless powder British makers have vied with one another in the production of high-class cartridges, and, undoubtedly, the ammunition now on the market may be thoroughly relied upon, and the guns which are being offered by the leading manufacturers are fitted with the latest improvements and include the highest types of modern gun-making. Since the South African War considerable impetus has been given to rifle clubs, and many young men now take great interest in acquiring proficiency in accurate shooting and target practice. For this purpose ironmongers are selling freely American rifles, side by side with those manufactured in Birmingham. The Harrington & Richardson Arms Co., of Worcester, Mass., have been specially successful in producing firearms suitable to the English markets. Their automatic ejecting single gun, model 1900, being very acceptable.

THE PRESENT POSITION OF THE R. A. S. E.

In my last letter I gave some account of the show of the Royal Agricultural Society of England, held on the new permanent show ground at Park Royal, London. In that account I intimated that, although the exhibition was excellent in every way, it had not received the support from British agriculturists in the more remote districs of England that the "Royal" was wont to draw when its migratory shows were held in the provinces. Unfortunately the loss of the 1905 show is very considerable, and the society has appointed a committee of influential and experienced men to consider the whole question and to advise the society as to the best means of continuing its labors for the good of the agricultural industries. Business men, naturally, are averse to this constant drain upon guarantee funds and feel that some radical change must be made in order to place the future prospects of the society upon a sound financial basis. Manufacturers of agricultural implements and machinery have long felt that as far as the Implement Yard was concerned the annual outlay at the "Royal" was not warranted, and many American, as well as English makers, feel that the money so spent could be better employed in more efficiently advertising their different machines, and getting in personal touch with their agents in the agricultural districts. The tendency appears to be toward an extension of local exhibitions, and, should the "Royal" be suspended for a time, doubtless, manufacturers will throw some energy in supporting local and county shows and backing up their agents in order that they may make larger demonstrations on these occasions.

IRONMONGERS AND THE HOUSE FURNISHING TRADES.

Although British ironmongers are very much averse to the American store system and are loath to give up the individuality of their trade—which fact has always been a strong point with Hardwaremen—they are gradually realizing that in order to retain their hold upon domestic ironmongery they must, in a greater or lesser degree, become complete house furnishers. In order to retain their sale of household ironmongery they must sell household furniture; and this is becoming more and more necessary in country towns, in consequence of the growing encroachments of gracers and others who are not slow to see the possibilities of increased business in their existing trade, in consequence of the enlargement of the borders. Household furniture requires space, and, unfortunately, many ironmongers are cramped for room and find it difficult to show furniture as efficiently as they would wish to do. Some traders who are unable, from this cause, to sell general furniture, have to be content with offering American roll-over desks and library furniture, to which they frequently add hall stands, coal cabinets, and some of the lighter and more ornamental household sundries made of wood. In the production of these goods the United States evidently excels, and the warehouses of many London factors are well stocked with such goods, which, from their appearance, finish and style have evidently been imported from the other side.

HOLIDAY MAKING.

The latter portion of July and the month of August are generally devoted to holiday making, and while ironmongers in the large towns and cities flock to the seaside and the country, rural ironmongers take their holiday in the metropolis and other busy centres. The meetings of ironmongers' associations during the past few weeks have been conspicuous for the small amount of business transacted, and the British Hardware trade journals, instead of business meetings, have to record summer outings and river picnics. Two of the largest ironmongers' associations in this country have spent gay times upon the water, and have taken the advantage of the opportunities which such excursions afford to cement still further the brotherly feeling, which, to a large degree exists between the ironmongers now associated instead of

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

The time for selling JAP-A-LAC is all the time. There is no season of the year when JAP-A-LAC will not sell nor when it cannot be used to advantage in every home.

Because of the many special uses found for JAP-A-LAC during the Spring and Fall house cleaning seasons, the volume of sales is naturally greater.

The real JAP-A-LAC dealer can sell JAP-A-LAC every day in the year. Realizing this, we have decided to continue our advertising the year round.

Our advertising during the balance of the year will embrace a larger number of magazines than we have been using, and will carry liberal spaces. We shall be telling the women of the country of the uses to which JAP-A-LAC can be put.

We are sure to stimulate the demand for JAP-A-LAC and make it an every-day seller for the dealers. A little attention to this well-advertised commodity will bring *new customers and increased profits* to the dealers—who are handling it.

Don't let your stock get depleted. If you have never sold JAP-A-LAC, give it a trial. You will find it the quickest and easiest selling article of its kind on the market.

The Spring advertising has more than doubled our sales up to date. The Fall advertising will do the same. The reason for this is that we tell the women what JAP-A-LAC is and how to use it.

Let the women of your community know that you keep JAP-A-LAC, and you will secure their patronage.

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

ADDRESS: 641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

the isolation of the past. The Liverpool Ironmongers' Association, joined by a number of Hardwaremen from other towns, had a very pleasurable excursion to the ancient city of Chester, spending a portion of their time on the river Dee, visiting the seat of the Duke of Westminster at Eaton Hall. The London Ironmongers' Association spent their holiday on Old Father Thames, having a most enjoyable excursion, embarking at Reading and finishing their day at Windsor, where they disembarked under the shadow of the walls of the ancient castle where the sovereigns of England have made their homes from the days when William the Norman built the first portion of that historic pile.

CANADIANS IN ENGLAND.

Last month was signalized by the visit of the Canadian Manufacturers' Association to this country. The visit was one continued round of pleasure, and, let us hope, profitable excursions. The Birmingham Chamber of Commerce entertained the visitors on June 27, on which occasion Mr. Chamberlain, in an exhaustive speech, dealt with the advantages which would result from a commercial treaty giving mutual preferential tariffs to both countries. He mentioned the strong belief in preference felt in Canada, which had been brought to a logical conclusion by the free gift, without reciprocity, of preferential tariff to Great Britain. In certain manufactures the trade between the Mother country and Canada has advanced in consequence, but, it will be interesting to your readers to know, in the group containing among other things brass and copper goods, electrical apparatus, paints, colors and varnishes, the benefit from the present scheme seems to have gone over to the United States, for in this section the trade between Canada and the U. S. A. has increased from one and one-half to five million dollars.

The Canadians visited most of the principal centres of commerce in this country. In Sheffield they went over the large works of Hadfield's Steel Foundry Co., Ltd., which have been greatly developed during the past few years. The manufacture of "Era" manganese steel, the invention of Mr. Hadfield, was witnessed. At the cutlery works of Thomas Turner & Co., great interest was displayed in the different processes, especially in the hand forging of tools and the grinding of cutlery, for which Sheffield makers have for so many centuries been famous. Birmingham contained many features of interest to the Canadians, not the least being the extensive works of the Birmingham Small Arms Co., Ltd., where gun stocking and machining were witnessed. In the automatic shop there is a fine range of machinery, where the manufacture of cycle parts is carried on. Indeed, the use of mechanical contrivances, considered so necessary in the United States, is fully appreciated at these works, and the whole scheme of production there is based upon turning out interchangeable parts by automatic machinery, economizing hand labor and making the output as large as possible. The delegates visited the works of Elkington & Co., where electro plating and silversmiths' work, with which the name of Elkington has so long been associated, is carried to a greater extent than in any other place in the world. At Walsall the works of D. Clark & Sons, brush makers, were inspected; and at Wednesbury the gigantic tube works of John Russell & Co., Ltd., were gone over. Altogether, the members of the association and their friends who visited this country had a good time of it and went back well pleased with their trip.

THE MASTER CUTLER-ELECT OF SHEFFIELD.

The Master Cutler-Elect of Sheffield, who will, in due course be appointed to succeed to the office of Master Cutler, is Sydney Jessop Robinson, who, in addition to his connection with the English firm of William Jessop & Sons, of Sheffield, is vice-president of the Jessop Steel Co., of Washington, near Pittsburgh, and has for many years past personally interested himself in bringing the plant at the American works into full operation. Sydney Jessop Robinson is a descendant of the Jessop family, who are deservedly well known all over the world in connection with the manufacture of high-grade steel.

INTELLIGENT COOKS.

The Avery Stamping Company, Cleveland, Ohio, is sending out neat art advertising cards showing beasts of the woods as "Intelligent Cooks," because they use the celebrated "Never-Break" seamless stamped steel cooking utensils. The firm will be glad to mail one of these cards to any Hardware dealer who is not in receipt of same.

REVIEW OF THE MARKETS.

WIRE NAILS: The usual demand for this period of the year is reported, with business steady and prices firm. The recently announced intention of the manufacturers in regard to upholding prices and adopting the policy of curtailing production instead, working well in strengthening the market. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers.....$1.80
Carloads to retailers..... 1.85

New York.—The local trade in Wire Nails has been of a character to inspire confidence being larger than a year ago. Quotations are: For small lots from store $1.95 to $2.00.

CUT NAILS: Regular demand is only moderate, but reports affecting contracts given for the future indicate that concessions made lately have been acceptable. Prices continue irregular, however, at $1.60 to $1.65 base for carload lots, f.o.b. mill, with Iron Cut Nails at the usual advance of 10 cents.

New York.—The local demand keeps about in ratio with Wire Nails. Orders have been given at the low quotations prevailing and the retailers feel well protected against the future. Quotations are as follows: For small lots from store $1.90 to $1.95.

BARB WIRE: Very light demand, usual at this time of the year, but in view of the anticipated large crops in sight, the prospective demand will be a heavy one. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in ten days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots.....	2.00	2.30
Retailers, less than carload lots.....	2.10	2.40

SMOOTH FENCE WIRE: A heavy Fall business in this staple is indicated, consumption being predicted by the large crops. At present, requirements are light and prices firm. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads.....$1.65
Retailers, carloads..... 1.70

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BRASS SHEETS, RODS AND WIRE, ETC.: An advance in the price of Sheet and Roll Brass, Brass Rods, Wire and Brazed Tubing amounting to about 4 per cent. has been made by the principal manufacturers of these goods. The whole line of Brass and Copper Material is quite firm and the demand is an excellent one.

SHOT: Under date of August 14 the United Lead Company announced an advance of 5 cents per 25-pound bag of Shot, except on Dust Shot. There is the usual abatement on ton lots of 10 cents per bag of 25 pounds, terms 30 days, or 2 per cent. for cash in 10 days. New prices are as follows:

Drop Shot, sizes smaller than B, per 25-pound bag..$1.70
Drop Shot, B and larger sizes, per 25-pound bag.... 1.95
Buck and Chilled Shot, per 25-pound bag..... 1.95
Dust Shot, per 25-pound bag..... 2.25

SHEET ZINC: Under date of August 10 an advance is announced in the price of Sheet Zinc, which is now quoted at $7.50 per 100 pounds in 600-pound casks, f.o.b. mill, subject to the usual discounts for cash and quantity.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger.....	11½ to 12¼
Pure Sisal, 7-16 and larger.....	10
No. 2 Sisal, 7-16 and larger.....	8 to 8¼

Less ¼ to ½ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....54 cents per gallon.
In lots of 5 barrels or more.....53 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

TRADE IN PHILADELPHIA.

August has a bad reputation for weather, and the month so far has been in thorough agreement with its reputation, the rainfall for the first half being nearly five inches in excess of normal, while the temperature has been high and the humidity so great that it has been most oppressive.

It is no wonder that under such conditions vacations should be extended, and salesmen report many dealers as absent from their places of business. Even under such conditions trade is fully up to the average, while rush orders are frequent, and these are very clear indications that stocks are low and Hardware needed for immediate use.

Fall prospects have not changed since the date of our last letter, unless it may be for the better, as the heavy rains, while coming late, have probably been a great help to the country and ensured the safety of coming crops.

Prices show but little variation, the only tendency in some lines is a higher price. Manufacturers claim that margins are close, and while this seems hard to believe while prices are on their present level, still within the last few days we have heard of two or three manufacturers who have gone into the hands of receivers or been reorganized, simply because of insufficient margin on their goods.

It must be borne in mind that while prices are on a higher level, raw materials are also much higher in price, and the margin to the manufacturer correspondingly reduced.

While there does not seem to be in the situation cause for a sharp advance in prices, the facts as stated go far towards maintaining the present range of quotations, so that dealers may order with some confidence, feeling that they will not be called upon to stand a loss caused by a decline in the value of their stocks.

Respectfully yours,

BIDDLE HARDWARE CO.

BUSINESS AROUND ALBANY.

Trade is settling down to a quiet condition after a most active Spring and early Summer season. Orders are still coming in, but are less in number and items. Deliveries of early Fall goods sold last Winter are now being made, and we will soon be entering orders for Winter goods, thus keeping ahead of actual needs, as is the present custom.

The dealers find prices quite uniformly steady on leading lines. Bar Iron is very firm. Black and Galvanized Sheets have been somewhat disturbed by efforts put forth by some mills to get in closer touch with the trade. The result is, a trifle different level has been adopted that should now be fully respected. These latter remarks apply as well to Tin Plate. In midsummer it is apt to be the case that some prices become fickle. The evening up of stocks, the running off of odds and ends in season goods is an advantage both to jobber and dealer, benefiting finally the people who like to get the advantage of purchasing good goods at bargain prices.

Speeding the parting and welcoming the returning members of the working forces of our establishments in this vacation season is a continuous feature from mid-June to mid-September. The browner faces, the cheery manner, the clear eyes, to say nothing of the doubtful fish and other dubious stories, tell how much good is gotten out of a fortnight's outing and how cheerfully one can commence work again after business cares and duties have been dismissed from mind, even for this brief period.

Hard work which business has exacted of us for a long time past is, in our estimation, after getting expressions from various reliable sources, likely to continue along, and we may require all of our added strength which vacation has provided to care for the continuance of good times and good business.

We trust we are not too optimistic.

ALBANY HARDWARE & IRON CO.

OPTIMISM IN PITTSBURGH.

There is a very hopeful feeling of a large Fall business among all classes, and in our opinion it is well founded. The country at large is bound to be prosperous with the large crops now being gathered, and money is abundant for all legitimate needs at fair rates. If we do not have increased business this Fall and Winter there is no use trying to forecast the future by the usual plan, for all the signs point toward it.

The coal industry in the Pittsburgh district has been unprofitable for the past six months by reason of over-supply and competition. This condition is passing as the Fall season approaches.

Digitized by Google

and better things are expected. To show the size of this business, one day's shipment by river on July 31st were something over 9,000,000 bushels. This immense body of coal went out in barges holding 15,000 bushels and boats holding 25,000 bushels each, and required thirty-one powerful tow-boat steamers to handle them.

The Merchant & Manufacturers' Association, of Pittsburgh, had a very successful excursion up the Monongahela River on August 10th and 11th. This valley is almost one continuous workshop for sixty miles above the city, and is really a part of greater Pittsburgh. A very good feeling was manifested among the merchants visited, and the trip was much enjoyed by the visitors.

Logan-Gregg Hardware Co.

MINNESOTA TRADE BOOMING.

We feel like inviting everybody to come into this territory and see the bountiful harvest. The States of Iowa, Minnesota, North and South Dakota, Wisconsin, Montana, Oregon and Washington all have raised a crop of large proportion, so we have cattle, sheep, wool, wheat, flax, barley, corn, oats, etc. to sell to the East as well as foreign countries. St. Paul is situated so that all this immense product comes to it or through it. St. Paul also has the stocks of groceries, hardware, shoes, drygoods to sell to the trade who supply the producers of all Fall products. In all the States mentioned there are still thousands of acres of virgin prairie and forest waiting for the man who has the energy and hard work to bring to bear necessary to develop these undeveloped acres. There are fifty-two new towns in North Dakota alone opened up within two months. While all of this so far has nothing directly about the Hardware business, still it has an indirect bearing as Hardware is used and we are supplying it in goodly quantities. Business is good. We are glad to have a steady market and can see nothing to prevent a good Fall and next Spring business.

Hackett, Walther, Gates Hardware Co.

THE SAN FRANCISCO TRADE.

Acting on information received that President Bennett of the State Retail Hardware Association had some trade news to give out this week, the Hardwareman chased for him, finally rounding him up at the headquarters of the California Pioneer Society, a place, by the way, where veterans in the trade throughout the State are wont to call when in the city. President Bennett replied that I had been chasing a canard report; that he had no trade association news of special interest, only the same old good story that Hardware has been exploiting of late, namely, that dealers throughout the State have enjoyed extra good business this year, and from the optimistic viewpoint they universally entertain, are writing fall orders in excess of what they have done for some years. "By the way," continued Mr. Bennett, "I came to Pioneer Hall to-day to see a historical relic that might be of interest to many Hardware readers; see here," and he led the way to a corner of the large room where there was an antique-looking desk, and this is the way he referred to it: "This redwood desk is a recent gift to the Pioneer Society by Colonel A. G. Whipple, the pioneer lumber merchant, who many years ago was in the lumbering business in partnership with a late president of the United States, General U. S. Grant. It was Grant's writing desk when in 1853-4 he was ranking captain in the Fourth U. S. Infantry and stationed as commanding officer at Fort Humboldt in this State. It was on this desk that in 1854 he wrote his resignation of the position he held in the army prior to his departure for the East, whither he went to engage in civil pursuits."

The industrially inclined people across the bay in Oakland are feeling first rate this week over the prospect that the firm of W. Dewees Wood Company of Pennsylvania will soon erect large steel works in that city. At this writing a representative of the Keystone State Company and Edwin Stearns, secretary of the Oakland City Board of Trade are in conference regarding the several suitable sites that can be had for the factory.

The California Asbestos Company has been incorporated, with a capital stock of $250,000, by W. H. Talbot, H. W. Goodall, H. J. Knowles, Robert Minor, A. E. Sharboro, J. G. Sutton and W. E. Balcom.

At the St. Francis Hotel where he is stopping, C. W. French, chairman of the executive Board of the Pacific Steel Company, is showing great chunks of California-found coal and iron ore. He will not say just where he found this coal and iron, but at an interview this week he did say: "This coast has all the coal and iron she needs to start manufacturies, and why they have not been started is owing to the fact that the people have been too busy in getting other people to the coast and so have left unfound magnificent deposits of coal and iron. We are buying all iron mines that we can lay hands on and have already purchased sixty-eight mines in this State and Lower California. Nor is this the extent of our enterprises. We are purchasing fine coal fields in Washington, British America and Alaska. The coal and iron we have found scattered about so freely in California has been experted by qualified men from Pittsburgh and they declare that it is the finest in the world." The company that Mr. French represents has its headquarters in San Diego, and General Harrison Grey Otis, the big newspaper proprietor of Los Angeles, is the president of the company.

Allen Cooley, of the prominent Marysville, Cal., Hardware house, White, Cooley & Cutts, returned this week from a wedding scene in Decatur, Ills., in which he posed as bridegroom, and Miss Mary Amelia Cook, the sweetheart of his boyhood days away back in Massachusetts, posed as bride. It goes without saying that Mr. Cooley did not return alone to California.

Industrial Press Association.

A NEW DEPARTURE IN THE HARDWARE BUSINESS.

We are in receipt of the following communication:

We will open in a few days, an exclusive retail and wholesale tool and cutlery store at 5 Viaduct Place, Atlanta, Ga. This is a new departure in the Hardware business as we will carry only tools used by all classes of tradesmen, such as, carpenter's machinists', plumbers', electricians', cabinetmakers', stonecutters', blacksmiths' and butchers' tools. Our object is to carry a complete line of goods giving the trade the largest possible selection and bring before our customers the highest quality of tools. In the cutlery line, for the present, we will carry large lines of pocket knives, razors, shears and scissors.

As near as we can learn at present, we will be the only exclusive dealers in tools and cutlery in the United States, and if we are wrong in this statement, we wish to be corrected. Our company is incorporated under the laws of the State of Georgia with an authorized capital of $25,000. We will have an up-to-date attractive store fitted with Warren shelving to suit the business. The incorporators are Albert E. Hill, president; C. M. Reynolds, treasurer, and L. S. Rolley, secretary.

We will be pleased to have all manufacturers and jobbers in the above lines furnish us with their catalogues and prices.

The Tool Company,
Albert E. Hill, Pres.

TAINTOR SAW SET ORIGINALITY.

John H. Graham & Company, 113 Chambers Street, New York, as agents for the Taintor Manufacturing Company, are distributing to the Mechanics and Retail Dealers throughout the country a valuable circular on stiff paper giving "Hints on the Care of Saws," and they have epitomized on this single sheet all the possible "Hints" as before mentioned, which would recommend the keeping of the same before the dealer or in the shop in which it would have daily use, the object being the especial advertising of the "Taintor Positive Saw Set," which is done in a manner that cannot help but prove as interesting as it is original.

PIKE'S RAZOR HONE ASSORTMENT.

The Pike Manufacturing Co., Pike, N. H., owing to the success of their Oilstone and Scythestone Selling Cabinets, are now putting on the market Pike's Razor Hone Assortment. They are offered in two sizes; one size costing the retail dealer $18.00, the other $10.00, and are designated as Razor Hone Assortments Nos. 1 and 2, respectively. In each assortment is found a well-selected variety of high-class Hones displayed in a nicely varnished case and protected by a glass cover. The attractiveness of package which so appeals to the merchant, as shown in the Oilstone and Scythestone Cabinets, is enhanced in the Razor Hone Assortments. The Pike Manufacturing Co. are sending out a very attractive booklet on their various selling assortments and every wide awake merchant should possess a copy.

STARRETT'S AT HOME WEEK.

The salesmen employed by the L. S. Starrett Company, Athol, Mass., and the managers of its branches were all gathered at the Home office for the week ending the 29th. July. The object in having them all come in at once, was to post them in regard to how Starrett tools are made, by observation in the factory, and to talk matters over with each other and with Home officers for mutual benefit.

On Tuesday a ball game was played at a local park between the salesmen and a nine made up of office men, resulting in a score of 40 to 4 in favor of the office men. On Wednesday the salesmen, with the officers of the company and a few others,

started on a trip to Block Island and enjoyed the sail down Providence River and back, the next day. On Friday they partook of a shore dinner at Fields' Point, near Providence, and returned to Athol that evening. The week was one of a good deal of enjoyment, as well as practical value to all concerned.

♣

A. W. Connor, Sales Manager of the Savage Arms Company, Utica, N. Y., has just returned from a two months' European trip through Holland, Belgium, Germany, Denmark, Norway, Sweden, Finland, France and England. While in England he attended the Rifle Meet at Brisley. At this meeting The Savage Arms Company awarded several prizes for best marksmanship with Savage Rifles. Savage Rifles have become so popular in England and on the continent and so has the export business of the Savage Arms Company grown within the past few years that. that company has established offices and supply depots at Hamburg, Germany, and London, England.

WESTERN CLOCK MANUFACTURING CO.'S NEW LINE.

The Western Clock Manufacturing Co., La Salle, Ill., with New York offices at 51 Maiden Lane and Chicago office at 131 Wabash.

COMO DESIGN.

Avenue, are putting on the market for the Fall trade the "Italian Series" of clocks, consisting of six designs, designated as Reggio, Parma, Como, Sienna, Pavia and Remo, of which we present three illustrations. These clocks are about 6½ inches in height, and are plated in ormulu gold and hand-burnished. The movements run from thirty-two to thirty-six hours, with one winding, and are quite handsomely mounted with a bevel plate glass, ivorine dial and gold-plated reflector. The line is made to be sold at

SIENNA DESIGN.

98c. each, and at this figure will allow the retailer a liberal profit. Low-priced clocks especially, are readily added to the assortment of goods that may be sold in an up-to-date Hardware store.

THE LEAD PENCIL.

Every American man, woman and child uses two pencils annually at the lowest calculation. Our per capita consumption is double that of Europe, because there is more illiteracy across the ocean, or perhaps because we are more extravagant and waste quite as many pencils as we use. There are six lead pencil factories in the United States; two in New York, two in New Jersey, one in Illinois and one in Massachusetts. Together they employ more than 2,000 people, pay nearly $700,000 in wages annually and their yearly output at the rate of 12,000 gross daily, is worth more than $2,000,000. We are now making as many pencils as all of Europe combined; we supply nine-tenths o. our home demand and ship a considerable quantity abroad. And yet, despite the growing importance of the industry and the fact that millions of people could not get through a working day without the use of a pencil, how few are there who can tell how this indispensable little article is made.

Structurally speaking, the lead pencil consists of an outer shield or covering, and of an inner piece of round, solid graphite. The wood, which is of prime importance, must be durable and compact; straight grained and soft, so that it may be alike easy to polish and whittle; if it is fragrant so much greater its value. Now, of all the trees in the world our Virginia or red cedar, which grows so luxuriously in the South, particularly in Alabama and Florida, is the only one whose wood meets all these requirements. Our pencil manufacturers own their own cedar mills, but the European makers, much to their dislike, are obliged to purchase their pencil covering from us. In order to place themselves on an equal footing, an attempt was made to transplant the Virginia cedar. Germany devoted a hundred acres to that purpose some forty years ago, but the climate proved unfavorable and a few stunted trees with wood as hard as oak, proclaimed the experiment a rank failure.

On the other hand, we go to foreign markets for our graphite, the best qualities of which come from Eastern Siberia, Mexico, Bohemia and Ceylon. Our largest factory, taking advantage of the cheaper labor market abroad, has all o. its graphite prepared in Germany and sent here ready for use. Nor is cheap labor the only consideration, for the German graphite makers, like the wood carvers of Switzerland and the toy makers of Nuremberg, follow the trade from father to son; take to it quite naturally and leave the rest of the world behind in expertness.

Pencil leads consist of a mixture of clay and graphite, both undergoing a careful and separate treatment before they are united. The raw graphite, after being reduced to a fine powder in a mortar, sifted and freed from impurities by mineral acids, is washed and fired to a bright red heat. The next step is to add water to the preparation and pour it into a vat, where the heavier particles sink. From this vat the water carries the lighter particles into another at a lower level, and then on into one or two more, where the heavier particles drop to the bottom and the finer particles are carried over. The graphite drawn from the last vat in the series is in a state of extremely fine division, and its value reserves it for use in the best of pencils only.

The clay, purged of sand and iron, goes through somewhat the same process, and then it is mixed with the graphite, the proportion varying all the way from equal parts to two of clay for one of graphite—the amount of clay depending strictly on the degree of hardness or softness wanted for the pencil leads.

When the particles of clay and graphite are thoroughly incorporated and ground together they are placed in bags and squeezed to the consistency of dough by a hydraulic press. The formless substance, ready to be shaped into pencil rods, is forced by a piston in continuous threads through the many apertures of a strong upright brass cylinder, each of the apertures being of exactly the same size as the leads that are to be fitted in the pencils. The long threads of graphite are received and arranged on straight grooves of a wide board and left to harden until they become as stiff as rods. Afterward they are cut into requisite pencil lengths—seven inches as a rule—packed with charcoal in a covered crucible and submitted to a high furnace heat.—*Pearson's Magazine.*

INVENTOR OF BALL COVER.

Few "fans" who have tossed a ball at some time in their lives could tell who invented the cover. Old "fan" inhabitants will remember the days when the leather that incased the balls in use was cut in four pieces and roughly stitched.

The present form was an idea of Ellis Drake's, and it was adopted by the late Harry Wright and his brother, George. The inventor of the two-piece cover was recently discovered in Providence, and as a result that patriarch who played a greater part in baseball development than any one ever knew, has told the interesting story of his invention. He says:

"I resided in Stoughton and was attending school at the time I invented the baseball cover in use to-day. My father was manufacturing boots at the time, and I had access to all the leather. I used to cover the balls we schoolboys used in playing the old 'round ball game, consisted in 'tucking out' by throwing the ball at or toward the batter while in transit from base to base, and he needed to be an athlete, contortionist and general invisabilist to dodge those balls that were thrown straight from the shoulder.

"In covering the balls according to the old form I found that the corners would give out first, and quick at that, and when we threw a ball at an opponent we could not inflict a black and blue mark on him to emphasize the victory, for the wind would get into the ragged flaps of the broken corners and retard its flight.

"So one day in school, when the teacher was not looking, and those were rare intervals, for he had several pairs of sharp eyes located in unexpected spots about his head, I took a piece of brown paper and inside of five minutes I devised the present form of cover of baseballs.

"Had I known its value a fortune was mine, but still I had the rich reflection that it has afforded a pleasure to the world, for the game would be a tame affair without that desirable geometric form of cover."

PEWTER'S CHIEF END.

It Now Goes to Supply Caps for Beer Mugs.

Pewterers no longer flourish, says the *Washington* (D. C.) *Post.* Vessels of pewter, in fact, are now mainly prized as antiques, and are little used because of the fear that food placed in them may take on a poisonous character. Yet there are still a few pewterers.

They are mainly native Germans. If they make platters and the like it must be in response to a demand for counterfeit antiques, and they are otherwise chiefly employed in casting tops for drinking vessels.

Most persons think of the warming pan as a forgotten utensil superseded by the rubber bag, but some old-fashioned folk still use the warming pan, and it is made of pewter. You may have a German pewterer make you a warming pan to hold a quart of hot water for $5, and it will outlast a dozen rubber bags. The pewter warming pan is the smoothest, neatest thing imaginable, with a double stopper, also of pewter, and thickness enough to insure its durability.

The main business of the modern pewterer is to make tops for beer mugs, pitchers, molasses jugs, and the like. His utensils are many curious molds of hard wood, smoothing tools of various forms, a bucket furnace, and a suitable cupel for holding the molten metal.

As to the metal itself, it comes in sheets of moderate thickness, which the pewterer chops up into scraps when he is ready to melt and mold his metal. Pewter melts at a relatively high temperature and cools rapidly, so that the pewterer's work is done with great expedition.

He will make you a plain top for your beer mug for 30 or 40 cents, and an ornamental top for 75 cents or $1. The molds are of many shapes and sizes, and when you have a mug to be capped you may pick and choose among them until you get a design to your taste. If you wish your name cut in the lid the pewterer will do it for you for a small additional charge.

Wise Germans, who keep their own mugs at their favorite saloons, go to the pewterer for lids, for every now and then some fellow-drinker who notes that his table mate has an uncovered mug comes the old student trick of capping it with the bottom of his own mug, which entitles the whole company to have their mugs filled at the expense of him whose mug is without a lid. If you will drink beer with your cronies it is well to make terms with the pewterer and contribute something to the maintenance of a dying trade.

PROVERBS UP TO DATE.

Better swallow your good jest than lose your good friend.

Sweet are the uses of adversity, bitter are the uses of prosperity.

The rising generation owes much to the inventor of the alarm clock.

When the last trump sounds, some woman will ask Gabriel to wait a minute.

A good field of corn is one thing a farmer doesn't care to have crowed over.

The dead march is not necessarily the one that the musicians have murdered.

The oil of insincerity is more to be dreaded than the vinegar of vituperation.

A walk may improve your appetite, but a tramp will eat you out of house and home.

The man who cannot be beaten is he who holds his head up when he has been beaten.

To remain a woman's ideal, a man must die a bachelor.

Love that needs proving is counterfeit.

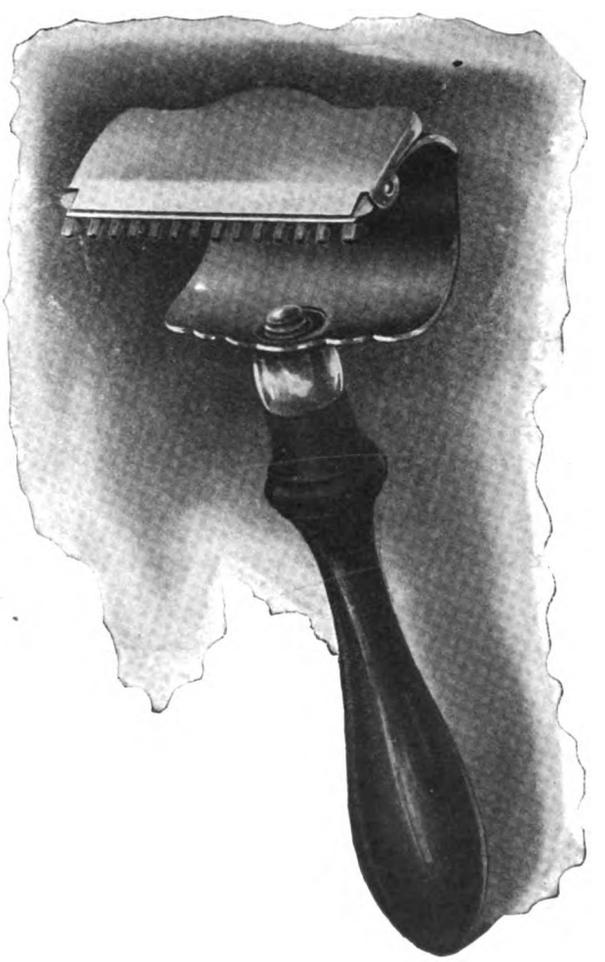
ZINN

Automatic Razor

"Zinn Did It"



The Triumph is Complete

Even five years ago we thought our *Gem Safety Razor*, in its every detail, to approach well nigh perfection. Though we've been at it for thirty years, yet we had reached the limit of improvement with the Gem.

We couldn't improve The Gem—so we made

The Zinn Automatic—

The Razor With the Always Keen Blades

It took years of experimentation to do it.

We made costly machinery for it—only to send it to the junk shop.

Various new and expensive processes in steel making and tempering were tried—only to be abandoned as useless.

At last we "hit the nail on the head" and made the Zinn Automatic. Its blades require no honing or stropping. They don't have to be sent to the repair shop to be fixed up

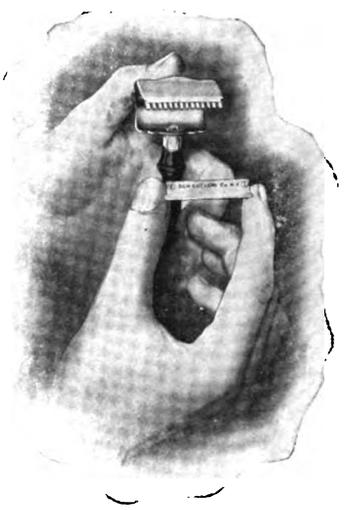
The Zinn

is the safety razor for all classes and conditions of men and beards.

No matter how tough the beard or how tender the face—the Zinn "does the trick"

We are justly proud of our success and so will every dealer and user be because

The Zinn is Simplicity Itself



Only two parts to it—holder and blade. Holder of German Silver with Ebony handle. 24 blades go with it, all put up in a rich morocco covered case, doe skin lined.

Digitized by Google

The Zinn

Is Incomparable

Just press your thumb, insert the blade and the Zinn, being self-adjusting, will do the rest: Give a quick, clean shave, without scraping or pulling.

NO HONING OR STROPPING IS NEEDED FOR ZINN BLADES . . .

Each blade will shave at least twelve times. Some tough-bearded customers tell us that a single Zinn blade lasts them a month.

24 BLADES WITH EACH ZINN . .

Every Zinn blade is packed in a separate envelope that absolutely protects it from dampness.

Extra blades are sold at 5c. each, mailed postpaid in packages of 24.

Zinn Steel the Secret of Zinn Perfection

Its tiny blades are tempered by electricity. That's the secret--if there is any.

They are so thin that 200 of them are only an inch thick!

They are so hard that they will cut glass and they are ground and honed to a cutting edge so fine, so smooth and so perfect that the Zinn shaves the toughest whiskers with ease.

Why waste time, money and patience, thrice-weekly or oftener, until "you're next" at the barber's, when you can save all that and more by letting us "put you next" to the

Zinn?

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Brayton, Iowa.—J. P. Pendixon has engaged in the Hardware and furniture business.

Burleson, Tex.—The Wilson Brothers Company has been incorporated; capital stock, $20,000. Purpose, purchase and sale of Hardware at retail. Incorporators, E. M. Wilson, J. J. Wilson, W. K. Middleton and J. L. Dunn.

Coal Hill, Ark.—The Winburne-Hunt Hardware Co. is being organized to take over the business of C. B. Winburne and Co. Capital stock $10,000. They will handle a general line of Hardware, farming implements, buggies and wagons.

Edgar, Wis.—The Marquardt Hardware Company has been incorporated; capital, $10,000.

Fort Scott, Kan.—S. O. Spencer has engaged in the Hardware business.

Ft. Wayne, Ind.—The Freiburger Hardware Company has been incorporated to buy and sell Builders' Hardware, etc. Capital stock, $10,000. J. J. Freiburger, M. A. Freiburger, M. A. Koester, Incorporators.

Gallatin, Mo.—Chapman & Co. have engaged in the Hardware business.

Guelph, Ont.—Bond Hardware Company has been incorporated. Capital $100 000.

Lansing, Mich.—The Wyandotte Hardware Company has been incorporated. Capital stock $10,000. It succeeds the Hardware and crockery business carried on by the old firm of Martin & Craig.

Lansing, Mich.—The Ypsilanti Hardware Co. has been incorporated. Capital stock, $10,000.

Lawrence, Kan.—Ernest & Kennedy will engage in the Hardware business.

Lexington, N. C.—The Springs Hardware Company has been incorporated with $10,000 capital stock. The incorporators are: H. H. Springs, R. C. Springs and F. E. Springs.

Lincoln, Neb. — The Patterson-Crosby Hardware Co. has been incorporated with a capital stock of $50,000.

Little Rock, Ark.—The Benton County Hardware Company has been incorporated. The capital stock of the company is $40,000, all of which has been subscribed and paid up. The officers are: F. G. Lindsey, president; Connellly Harrington, vice-president; W. J. Doke, secretary and treasurer. These officers, together with B. S. Terry and L. P. Kempner, constitute the board of directors.

Los Angeles, Cal.—Browning Hardware Company has been incorporated. Directors, Nat C. Browning, E. F. Browning, De Witt Browning, G. W. Campbell and Donald Barker. Capital stock, $10,000.

New York, N. Y.—Colonial Hardware Co. has been incorporated; general Hardware; capital, $30.000. Incorporators, Clifton E. Harris, No. 107 Chambers Street, New York; Josiah Quincy, No. 84 State Street, Boston, Mass.; James J. Nolan, No. 100 Broadway, New York.

Perry, Kan.—Rouse & Copely will engage in the Hardware business.

Rock Island, Ill.—The old established Hardware firm of S. M. Reynolds and Co. has incorporated. The firm hereafter will be known as the Reynolds Hardware Company. Capital stock, $15,000. The officers are as follows: President, S. M. Reynolds; vice-president and treasurer, Edward Balch; secretary, James H. Kough.

Savannah, Ga.—The Osborne-Marlow Co. is the title of a new Hardware establishment now fitting its shelves with a new stock at 129 Congress West. Mr. Marlow has been connected with the Hardware business here for twenty-two years. He was for eight years with J. D. Weed & Company.

Sedalia, Mo.—Harry W. Knight, for many years connected with the Biddle Hardware Company, of Philadelphia, has purchased the interest of D. H. Smith, in the Smith-Marshall-Howe Hardware Company, and will be president of the newly organized firm, the Knight-Marshall-Howe Hardware Company.

Tulsa, I. T.—Hale & Reynolds have incorporated as the Hale & Reynolds Co.

Visalia, Cal.—The Auto Hardware and Implement Co. has been incorporated. Capital stock $200,000.

West Palm Beach, Fla.—The Southern Furniture & Hardware Company has been incorporated. Capital stock, $5,000.

Changes.

Albia, Neb.—W. H. Davis has purchased the Hardware business of E. J. Batte & Son.

Allentown, Pa.—Reuben P. Steckel, senior member of the Hardware firm of M. S. Young & Co., has sold his interest in the business to his partners, Edward M. Young and Wilson P. Ludwig, and will retire from all business pursuits.

Almena, Kan.—C. W. Campbell & Co. has been succeeded in the Hardware business by Wm. Cropp & Co.

Athol, Kan.—C. E. Moore has succeeded to the Hardware business of Hudson & Moore.

Atlanta, Neb.—Hedlund & Reed have purchased the Hardware business of O. A. Fulk.

Baileyville, Kan.—D. T. Timberlake has sold his Hardware business to J. G. Eigenman.

Belmont, Iowa.—M. J. Carr has sold out his Hardware business.

Berkeley, Cal.—G. M. Parkinson of Parkinson Bros., proprietors of the Dwight way Hardware Company, has sold out his interests to W. A. Middlehoff of 2400 Grove Street. H. C. Parkinson, the founder and senior partner in this prosperous concern, will retain his interest and will continue in the active management as before.

Blythedale, Mo.—W. D. Baker has purchased the Hardware business of R. E. Elliott.

Bowling Green, Ohio.—J. H. Folk, of Hopper & Folk, has sold his interest in the business to J. J. Hopper, who, with his son, will continue under the style of the Hopper Hardware Co.

Burlington, Iowa.—Wm. Brand has sold his business to the Popular Hardware Co.

Cameron, Mo.—Craig & Hendrix have been succeeded in the Hardware business by Hendrix & Burris.

Centropolis, Kan.—W. D. Wartz has purchased the Hardware business of W. D. Bonhart.

Cowie, Iowa.—Johnson & Klippel have succeeded to the business of the Johnson Hardware Company.

Danville, Va.—Rutledge Carter has purchased a one-half interest in the Danville Hardware Company, on Union Street, from Mr. R. W. Carter, the former owner of the business, the business to be operated jointly by the two gentlemen at the same stand. The firm name will not be changed.

Deweese, Neb.—L. H. Price has purchased the Hardware business of J. F. Souchek.

Enterprise, Ore.—J. H. Hartshorn has added Hardware to his lumber business.

Fort Worth, Tex.—Alston Gowdy has purchased the business of the Ray Hardware Co.

Gainsville, Ga.—Henry Owen and J. D. Heard, who have been connected with the Davidson-Pruitt Hardware Co., of this city, for several years, have purchased the Farmers' Hardware Company, of Elberton, and have taken charge of same.

Huntsville, Tex.—Keeland & Moore have purchased the Hardware business of W. W. Randolph.

Jamestown, Mo.—Fullrich & Centysch have been succeeded in the Hardware business by Fullrich & Weisser.

Kalamazoo, Mich.—A. B. Post of this city, who has for the past two years been traveling for the Simmons Hardware Company of St. Louis, has purchased the stock and fixtures of the Sperry Hardware Company, one of the oldest houses in this line in Kalamazoo, and has taken possession. He will deal in a complete line of Hardware, house furnishing ware, paints, oils and glass, and a number of new lines will be introduced. Mr. Post has had sixteen years experience in the Hardware business, both in stores and upon the road, and is familiar with all of its branches.

Keswick, Iowa.—R. B. Hull has sold out his Hardware business.

Kiota, Iowa.—Bower Bros. have sold their stock of Hardware to Stoutner & Dunshee, who will take possession September 1.

Lincoln, Neb.—A. E. Crosby has sold his business to the Trester Hardware Co.

Loville, Iowa.—D. H. Rouse has purchased the Hardware business of Castner Cole & Company.

Memphis, Tex.—Gray & Hudgins have succeeded to the Hardware business of Berry & Hudgins.

New Castle, Ind.—The Hardware firm of Carpenter & Souder has been dissolved, Mr. Souder retiring. The firm is now known as the Carpenter Hardware Co.

New Westminster, B. C.—R. F. Anderson & Co. have been succeeded in the Hardware business by Anderson & Lusby.

Palmer, Kan.—Henry Dittmer has sold his Hardware business to C. E. Meyer & Company.

Pender, Neb.—Crollin Bros. have purchased the Hardware business of Henry Bayer.

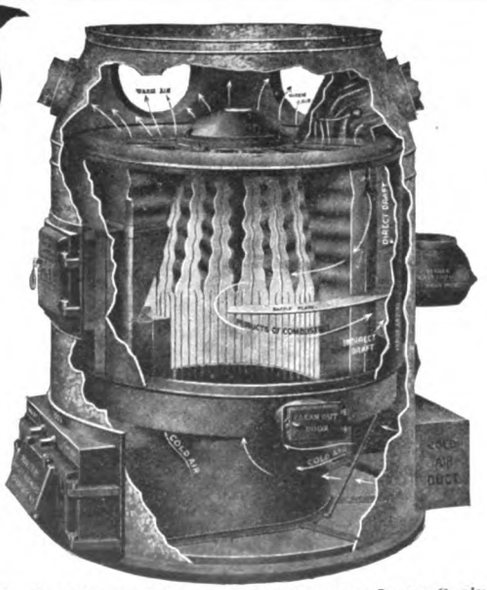
COMFORT SWING CHAIR

The America Alarm



Gives you an opportunity to offer a clock, accurate, efficient, guaranteed, at a remarkably low price and is sold at a figure that leaves you plenty of room for profits. Your jobber has the "America."

The Western Clock Mfg. Co.
La Salle, Ill.

NEW YORK 51 Maiden Lane
CHICAGO 131 Wabash Ave.

THE NEW IMPROVED

KELSEY WARM AIR GENERATOR

Sectional View Showing New Style Cast Inner Casing

In most towns the Heating Business can be likened to "Two Bites to a Cherry."

The business, perhaps, is limited, and the competition is so keen that the Dealer who secures the most contracts must fight the hardest, offer the most inducements, make the lowest prices—with little or no profit.

The **Kelsey** Agent isn't in that class.

The **Kelsey** Agent with the **Kelsey** Warm Air Generator, has a construction that's made on different principles from any Hot Air Furnace.

As there are a lot of sound principles in the **Kelsey**, so there are a lot of good, sound, convincing "Talking Points."

It's easy to convince an intending purchaser that the **Kelsey** IS much better than any Hot Air Furnace—and after the sale is made and the furnace installed, the purchaser immediately becomes a standing advertisement of the best kind for the **Kelsey**.

May We Send You Our Agency Proposition?

"Theres Only ONE Warm Air Generator"

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Akron, O.—The Star Mop Wringer Co. has been incorporated by Orlando Wilcox, D. E. Weir, M. F. Roose, J. H. Adams, H. Deuber—$10,000 capital.

Belle Center, Ohio.—The Belle Center Stove Company has been incorporated with $10,000 capital, by F. S. Preston, S. D. Preston, C. L. Hamilton, J. H. Preston and Jennie M. Preston.

Columbus, O.—The Syracuse Chilled Plow Co., a New York corporation, was admitted to Ohio, to locate in Columbus. C. C. Holloway, of 81-2 West Goodale street being the agent. The company has $300,000 capital stock.

Detroit, Mich.—Crosby &. Co., manufacturers of stove enamel, stove blacking and various kinds of polish, have incorporated with a capital stock of $100,000, taking over the business conducted by Charles F. Crosby and Andrew Cunningham at 48 Jefferson Avenue and 138 Woodbridge Street.

Dixon Mo.—The Clipper Lawn Mower Co. has been incorporated. Capital, $50,000. Manufacturing tools and implements. Incorporators: R. K. Ortt, James Knox and J. E. Bast.

Franklin, La.—The Planters' Hardware Co., Limited, lately organized here, opened for business August 1.

Hamilton, Can.—The Consolidated Hardware Company, with F. E. Robson of Toronto at its head, and several Hamilton business men interested, is starting up on Park Street South, this city. The company will manufacture Hardware, such as wire goods, tacks, etc., and will employ between twenty and thirty hands.

Hartford, Conn.—The Nettleton Manufacturing Company has been incorporated. The new company intends to locate in this city and handle Hardware, woodenware, cutlery, firearms, etc. The incorporators are: John T. Nettleton, Joseph N. Nettleton and Frederick S. Bacon.

Jamestown, N. Y.—The Derby Tool Grinder Co. has been incorporated. It is proposed to make and sell tool grinders, tool holders and tool sharpeners; also machinery, machinery supplies and engineers' appliances and devices. The capital stock is $15,000. The directors for the first year are as follows: Silas L. Derby of Frewsburg, Edwin H. French of Falconer, and Arthur W. Kettle, James Gaira and Edward Appleyard of Jamestown.

Jamestown, N. Y.—Wm. Hjorth & Co. are building a large factory on Taylor Street for the manufacture of wrenches, pliers and Hardware specialties.

Jersey City, N. J.— The Perfection Wire Goods Co. has been incorporated. Capital stock $50,000. Incorporators, C. C. Diboil, W. J. Hendrick and Clarence Linn.

Middletown, Conn.—The Universal Machine Screw Co. has been incorporated by Christopher M. Spencer, of Windsor, Reinhold Hakewessel and F. A. Betts of Hartford, Charles Phelps and George E. Sykes of Rockville. The capital is $1,000,000. The company will begin with a paid-in capital of $50,000.

Milwaukee, Wis.—The Greenland Stove Co. has been incorporated, capital stock, $25,000, by Harrison S. Green, Edward A. Conway and Lawrence J. Conway.

New York, N. Y.—James L. Robertson & Sons, has been incorporated to manufacture tools. Capital $75,000 and directors: J. L. Robertson, Bayonne City, N. J.; J. L. Robertson, Jr., Ramsey, N. J.; Frank Robertson, New York.

New York, N. Y.—Roth Jack and Tool Company has been incorporated; capital, $250,000; directors, C. E. Roth, O. B. Bergstrum, C. R. Cook and W. R. Elliot, of New York, and Henry A. Taylor, of Milford, Conn.

New York, N. Y.—The Ideal Window Screen Co. has been incorporated. Capital $20,000. Directors: Henry Paulson, C. H. Sageman, Brooklyn; T. J. Van Horen, New York.

New York, N. Y.—The Keyless Can Opener Co. has been incorporated. Capital, $100,000, and directors, F. C. B. Page, F. H. Quinby, Gustave Ulbricht, Brooklyn.

New York, N. Y.—The Louis Furnace & Range Co. has been incorporated. Capital stock, $20,000. Directors: Samuel Turansky, M. S. Feiler and Morris Halperin, New York.

Oshkosh, Wis.—The Wilkin-Challoner Company, recently organized in this city, for the purpose of manufacturing saw mill machinery and other tools, has secured a site for its plant and the contract for erecting the main building has been let.

Peoria, Ill.—The Carroll Barbed Wire Fence Co. of Peoria has been incorporated with a capital stock of $100,000. The names given as those of the incorporators are: F. C. Carroll, W. A. Wittick and L. V. Metzger. He said that at present the wire is being manufactured at the plant of the Hart Grain Weigher Co., where four machines are in operation. Upon the future success of the company depends the erection of a factory. The stockholders of the concern are: F. C. Carroll, Fred L. Block, W. G. Putnam, L. V. Metzger, C. F. Reichardt, Wm. Nolden, J. P. Purcell, Gerald B. Franks, F. Fischer, D. S. Brown, A. V. Herbert, Henry Simoneau, W. A. Wittick, J. N. Ward, Edward Leisy, D. W. Jones and E. A. Kilmer. Mr. Kilmer comes from Cleveland, and is the inventor of the machines which make the wire.

Ridgway, Pa.—The Ridgway Machine Tool Co. has completed its plant at Ridgway and has begun the manufacture of machines. Many of the stockholders are residents of Philadelphia.

Rockford, Ill.—The Smith Improved Lock Nut Co. has been incorporated. The capital stock of the company is $15,000 and the incorporators are H. D. Ticknor, C. Berger and C. H. Smith. The plant will be in the West End.

Scottdale, Pa.—The Continental Silver Co. has been incorporated for the manufacture of Hardware and metallic castings. Directors, H. F. Overholt, F. R. Bailey, H. C. Rich, A. C. Overholt, Clyde Overholt, Scottdale; Albert H. Kelley, Allegheny.

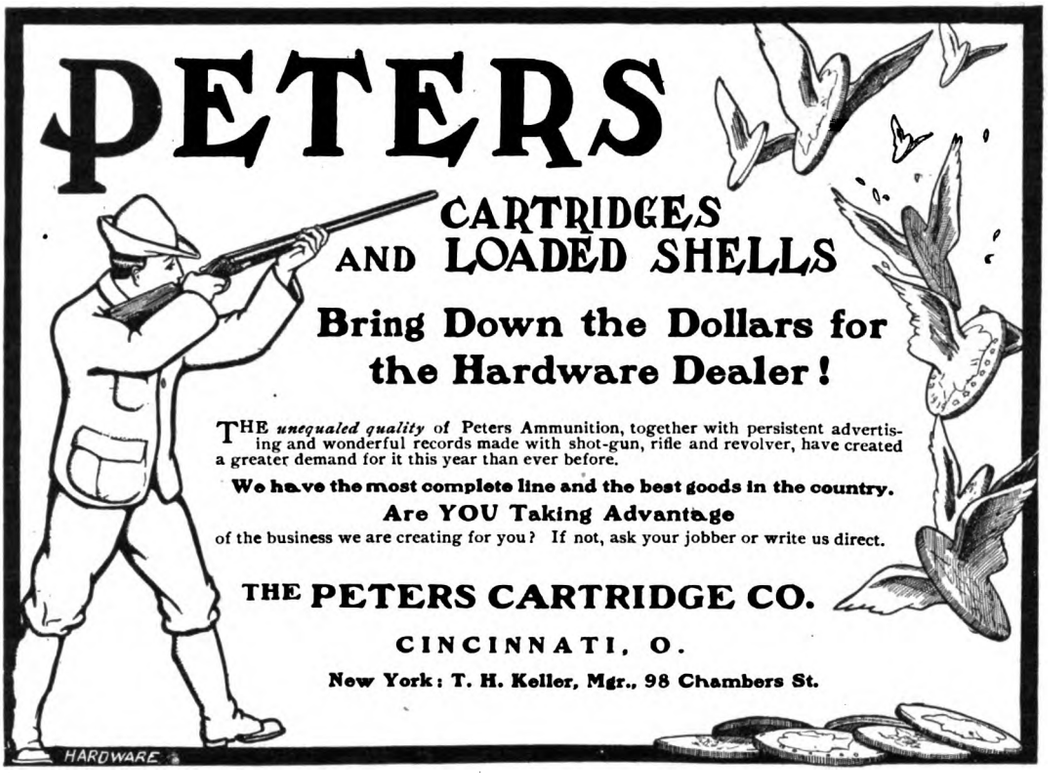
Toledo, O.—The Holding Heater Co., of Toledo, $50,000 capital, was incorporated to-day by Clem V. Wagner, C. B. Holding, Wm. H. Tucker, A. H. Smith, James L. Stark, Rollo G. Manning and Robert H. Finch. The company, which will manufacture a gas heating stove patented by C. B. Hodling, expects to operate a large size plant in Toledo, which will turn out stoves and furnaces that will consume all kinds of fuel.

Wallingford, Conn.—A new manufacturing concern for Wallingford has been incorporated with a capital stock of $5,000. They will engage in the manufacture of Hardware specialties. The company was incorporated by the following: Zera F. Beach, Lorenzo R. Beach and A. T. Kingsley.

Changes.

Ashland, O.—F. E. Myers & Bro., are erecting an addition to be used for foundry purposes and a new machine shop, both of brick and stone, one story in height.

Bridgeport , Conn.—John, A. Hurley, president of the Hurwood company, announced that his company had sold its Hurwood tool business to the Stamford Rule & Level Co. of New Britain. The price paid is reported to be in the neighborhood of $50,000. While the Hurwood company has disposed of its tool business, it will continue to make lanterns and food choppers.



Dundee, Ill.—The Angleweight Scale Co of Chicago has leased from Cutter & Crossette, the old Dundee shirt factory. Eventually the Chicago company will purchase the property. Sixty skilled workmen will be employed at first and this number will be gradually increased to 100.

New Orleans, La.—E. C. Atkins & Co. of Indianapolis, Ind., saw and tool manufacturers, a corporation with a capital and surplus of $1,500,000, has decided to open a branch house in this city, and has leased the Laxard property, corner Canal and North Peters streets, for five years. The primary purpose of the move is to put the company in closer touch with the trade of this section, where its product is well known and finds ready sale. In addition to keeping a large stock in New Orleans, the company will establish here a fully-equipped repair shop for repairing all kinds of saws, and will furnish employment to a number of skilled mechanics, besides the neccessary complement of stockkeepers and salesmen. Harvey Avery, well known in this city, will be general sales agent for the New Orleans branch.

PETERS

CARTRIDGES AND LOADED SHELLS

Bring Down the Dollars for the Hardware Dealer!

THE *unequaled quality* of Peters Ammunition, together with persistent advertising and wonderful records made with shot-gun, rifle and revolver, have created a greater demand for it this year than ever before.

We have the most complete line and the best goods in the country.

Are YOU Taking Advantage

of the business we are creating for you? If not, ask your jobber or write us direct.

THE PETERS CARTRIDGE CO.

CINCINNATI, O.

New York: T. H. Keller, Mgr., 98 Chambers St.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

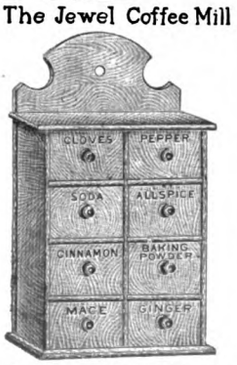
We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill



You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Akron, Ohio.—The rubber department of the Whitman & Barnes Co.'s Akron plant will be dismantled, the machinery will be loaded on cars and taken to Cincinnati, and what has been an important Akron industry for several years will become a part of the Cincinnati Rubber Manufacturing Co. The latter concern had negotiated for the purchase of this plant for some time, and the deal was completed a month ago. The Cincinnati Rubber Manufacturing Co., which purchased the plant is a large and important rubber making concern. The rubber plant of the Whitman & Barnes Co. is estimated to be worth about $100,000.

Bridgeport, Conn.—The Jennings Bros.' Manufacturing Co. has purchased the plant and building formerly used by the Bridgeport Gun Implement Company with a frontage of several hundred feet on Elm Street, and of about 70 feet on Harrison Street. The price for the property is said to have been between $40,000 and $45,000. Jennings Brothers do not intend to use the plant for their own business as they have recently bought land adjacent to their own plant on Union Square and are building big additions to their plant of the best mill construction.

Defiance, Ohio.—The Waverly Arms Co., is a new corporation which has been organized in this city for the manufacture of shotguns, with a capital stock of $40,000. The company is composed entirely of Defiance citizens, and the plant will employ quite a large number of men.

Newark, N. J.—The Reliable Smokeless Powder Co., No. 164 Market Street, has been incorporated to manufacture powder, guns, pistols, revolvers, cartridges, etc.; capital, $75,000. Incorporators: Albert B. Hagre, No. 99 Mulberry Street: Alfred M. Brink, William J. Young and Harry R. Brink, No. 48 Burnett Street, all of Newark, N. J.

New York, N. Y.—Harry S. Lyons, the well-known athlete of the N. Y. A. C., has opened an agency for the Wagner Motor Cycle of St. Paul, Minn., in this city.

Old Town, Me.—Moosehead Snow Shoe Co. has been organized for the purpose of manufacturing and selling snow shoes, moccassins, canoes, boats, sporting goods, etc., with $10,000 capital stock. The officers are: President, A. J. Bradbury of Old Town; treasurer, E. A. Merrill of Old Town.

Changes.

Chicago, Ill.—The Steel Ball Company will resume the manufacture of steel balls on a large scale. Several years ago this company was the largest producer of steel balls in this country.

Danbury, Conn.—William C. Hiem is moving his piano and bicycle business from Elm Street to 270 Main Street.

Hagarstown, Md.—The Pope Manufacturing Co. is making preparations to operate its automobile and bicycle factory in Hagarstown on an extensive scale. Plans are laid to make between 30,000 and 40,000 bicycles next season, and at least 2,000 automobiles.

Rockford, Ill.—The America Co. is taking steps to increase its capital stock from $50,000 to $100,000. The company manufactures patented specialties, such as fishing reels, small sewing machines, wrenches and gasolene flat irons.

St. Louis, Mo.—The Olive Automobile Co., a $15,000 paid-up corporation, has taken over the business of Morgan & Harding. Although the new company will handle automobiles, it will continue to handle Pierce bicycles exclusively, in which line the Morgan & Harding firm had built up a good trade. W. Lingenbrink is president of the new company, P. A. Ferbos, secretary, and E. L. Morgan has been retained as manager.

Torrington, Conn.—A change has been made in the name of the Standard Spoke & Nipple Company, which is to be known hereafter as The Standard Company; it will continue the manufacture of the Standard two-speed and automatic coaster brake, Diamond E spokes, Star and Bridgeport pedals and Star and Sager toe clips.

Explosion.

Bridgeport, Conn.—By an explosion of powder the dry house of the Union Metallic Cartridge Company was destroyed. No one was near the building and no one was injured. Jerome Orcott, general manager for the company, said spontaneous combustion was probably the cause of the explosion. The damage is estimated at $10,000.

Fires.

Meriden, Conn.—The loss by the fire at the Meriden Fire Arms Co. factory on July 28th will not, it is now estimated, exceed $10,000. The fire was confined to the engine room, where it started. The steam boilers and engine are ruined, as part of the big plant is run by electricity only, that portion which depended on steam power was compelled to remain idle. About one hundred hands were thrown out of work, temporarily. The single barrel piston and gun department was somewhat damaged by water. Work of rebuilding will begin at once.

HARDWARE DEALERS' RECORD.

(Continued.)

Petersboro, Ont.—Vincent Eastwood has acquired a controlling interest in the Petersboro Hardware Co.

Portsmouth, Iowa.—C. M. Walker has sold his Hardware business to Cooper Brothers.

Reinbeck, Iowa.—Watson & Shimer have sold their Hardware business to A. E. Glines of Belle Plains.

Richfield, Utah.—Muter Bros. have sold their Hardware business to Young & Jensen.

Riverton, Iowa.—McKissick & Wynn have sold their harness business, but will continue in the Hardware line.

Savannah, Mo.—McLean & Whiteford have been succeeded in the Hardware business by Whiteford & Townsend.

Staplehurst, Neb.—Jorgenson & Bausch have sold their Hardware business to Philipsen & Dahl.

Sweetwater, Tenn.—King Jones, John Bradley and T. B. Gutherie have bought out McCaslin & Jones' Hardware store, and will take charge at once.

Texarkana, Tex.—The Hardware firm of Cotton & Bernard has been dissolved. Mr. Bernard will continue the business alone.

Vancouver, Wash.—The Crawford-Marshall Co. have sold out their implement, but will continue in the Hardware business.

Victor, Colo.—W. J. Donnelly has been succeeded in business by the Victor Hardware & Supply Co.

Weatherford, Texas.—The Lowe-Carter Hardware Co. has increased its capital stock to $120,000.

Webb City, Mo.—The firm of Franz-Howell Hardware Company has changed its name to Franz-McCain Hardware Co., and has increased its capital stock from $18,000 to $50,000.

Weiser, Idaho.—Opp & Davis have sold their business to the Taylor Hardware Co.

Wheaton, Kan.—M. J. Gallagher has purchased the Hardware and furniture business of Louis Bothl.

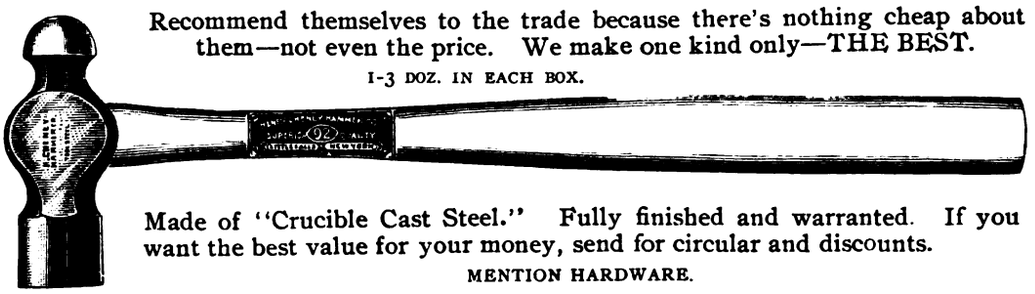
Wisner, Neb.—A. A. Beeher has succeeded to the Hardware business of Degner & Beeher.

Wynoka, Okla.—Murrow & Murrow have sold their Hardware and implement business to Franley & McGurn.

HARDWARE MFRS'. RECORD.

(Continued.)

Newark, N. J.—Work has been started on an extension to the plant of J. Wiss & Sons, at 31 Littleton avenue. The plans call for a three story brick building. The building will cost $6,000.



Norway, Me.—The Novelty Turning Co. of Fitchburg, Mass. have announced that they have discontinued manufacturing at Fitchburg, to re-open manufacturing at Norway. This company composed of B. F. Brown and W. C. Brown of that city, are to occupy the Steep Falls mill, with a manufactory of turned wood novelties, comprising knife handles, pail handles and similar work, employing some 25 or 30 hands.

Toledo, Ohio.—The Toledo Machine and Tool Company will erect a new office building. The structure will be 50 by 100 feet and one story high and will be built to accommodate the offices and salesrooms of the company. The walls of the building will be of heavy construction so that three additional stories may be added in the future.

Youngstown, Ohio.—Plans for the Morris Hardware Warehouse to be erected in East Commerce Street have been completed. The building will be the largest in the city. It will extend along the Erie tracks and Commerce Street, a distance of 310 feet 6 inches and will be 45 feet 10 inches on Walnut Street. The building will be three stories high and will be built of brick and stone. There will be two elevators in the structure which will be one of the most complete warehouses in the State.

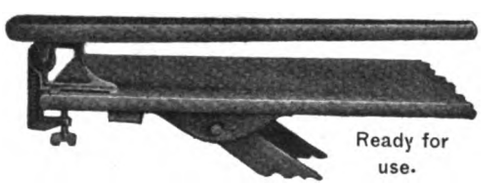
CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.



Put up in coils 300 feet each.
Patent Metal Reel Frame with each coil.
Straps made in four widths: ½, ⅝, ¾ and 1 inch.
Patented in all countries.

CARY MFG. CO,
19 & 21 Roosevelt Street, New York.
Cable Address: CARLEIO

AUXILIARY IRONING BOARD

Turned back out of way.

Ready for use.

A Money Maker

USED THE YEAR 'ROUND - USED THE WORLD 'ROUND

A most substantial and satisfactory auxiliary to table or regular ironing board for ironing sleeves, shirt waists, etc. The turn-back feature is its great convenience. None other has it. Always in place. Never in the way.
It is not a cheaply-constructed article, but one built for every-day use and for universal satisfaction.

We have further information we will be glad to give you.
Better write for it.

W. H. GLENNY AND COMPANY, SPECIALTY MFG. DEPT.

ROCHESTER, N. Y., U. S. A.

Digitized by Google

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

"SEEING IS BELIEVING."

ADVERTISE JUDICIOUSLY

But before you advertise at all see that your stock of goods is "*right.*"

The man to whom you sell cheap stuff may be satisfied for the moment, but later when he is disappointed in the service, the short life of the article, and its poor appearance—all the advertising on earth will not coax him into your store again. You may have given him what he *wanted*, or thought he did, but should have given him what he *needed.*

Quality goods are good advertising, they not only hold your old trade but bring in new customers as well.

Our line of quality goods, spring hinges, jamb, floor, cabinet, show case, lavatory, etc., door springs and pulls, and kindred articles, we guarantee to be no higher in price than inferior grades.

Invest a penny—drop us a postal asking for our Builders' Hardware Catalog No. 12 and price list and we'll introduce to you our "business getters."

NOW READY, THE

WINCHESTER

MODEL 1905

.32 and .35 Caliber Self-Loading Rifle

Standard rifle take-down 22 inch round barrel, plain walnut stock and forearm, not checked, weight about 7½ pounds, number of shots 6, list price $28.00

WE are now ready to fill orders through the regular trade channels for this rifle. It is the first rifle of the self-loading type made for center fire ammunition, and, as the cartridges it handles are desirable either for hunting or target practice, it is bound to be a ready seller. For this reason, and also because the big game hunting season is almost here, we urge the trade to place their orders at once for this rifle and the cartridges it handles. The cartridges this rifle handles are of the modern smokeless type, using metal patched bullets, and are furnished either full metal patched or soft point metal patched.

Soft point or full metal patched, list price per 1000 $27.50

Soft point or full metal patched, list price per 1000 $27.00

LAMSON & GOODNOW
Carving Sets

HAVING had "quality" for our watchword for sixty-eight years, we are turning out Carvers that are looked up to as the standard of quality.

Putting the best material into all our Carvers, and exercising scrupulous care in finishing them.

L. & G. Excellence

is the inevitable result. More than that: They are the most popular—the most profitable to buy and sell.

If you are not acquainted with the L. & G. proposition, write us. We'll send you our L. & G. Catalogue and quote you L. & G. prices on our entire line of cutlery.

Mention HARDWARE

LOUISIANA PURCHASE EXPOSITION

CORRUGATED PATTERN.

THE CAPEWELL HORSE NAIL CO.,
Hartford, Conn.

St. Louis, U. S. A., Feb. 22, 1905.

Gentlemen:—We have used the Capewell Nail for the last seven years in the shops of the Columbia Transfer Company, of which I am President, and we have also used the Capewell Nail in the shops of this Company on all horses, some 450 in number, used in placing the exhibits and doing other teaming work during the World's Fair. *It has given us excellent satisfaction and our smiths prefer it to any other nail on the market.*

Yours very truly,
GENERAL SERVICE CO., J. M. Allen, Vice-President and General Manager.

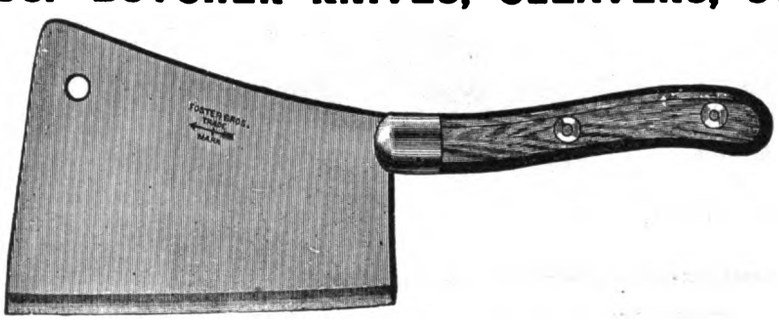
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York.

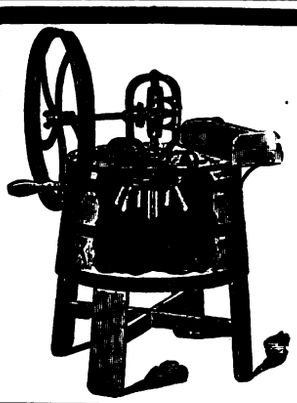
and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.



Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

Leaks are Dangerous

Small leaks sap profit from your business. To stop these leaks and give you time to attend to the big features of your business—increase of sales, gaining new customers and proper management of your store—you must have system to take care of these details. System is as essential as capital. Business requires careful study and encouragement of new ideas and mechanical devices to relieve you from all unnecessary worry and detail.

A National Cash Register does not cost as much as a clerk in consideration that you pay a clerk a certain rate per week indefinitely. You pay for a National Cash Register from the small leaks which it prevents.

Let our representative call and explain our system to you.

Cut off here and mail to us today

MODEL 1905

.32 and .35 Caliber Self-Loading Rifle

Standard rifle take-down 22 inch round barrel, plain walnut stock and forearm, not checked, weight about 7½ pounds, number of shots 6, list price $28.00

WE are now ready to fill orders through the regular trade channels for this rifle. It is the first rifle of the self-loading type made for center fire ammunition, and, as the cartridges it handles are desirable either for hunting or target practice, it is bound to be a ready seller. For this reason, and also because the big game hunting season is almost here, we urge the trade to place their orders at once for this rifle and the cartridges it handles. The cartridges this rifle handles are of the modern smokeless type, using metal patched bullets, and are furnished either full metal patched or soft point metal patched.

Soft point or full metal patched, list price per 1000 $27.50

Soft point or full metal patched, list price per 1000 $27.00

HARDWARE

THE BISSELL CARPET SWEEPER COMPANY, Grand Rapids, Mich., contemplates quite a large addition to its factory, though plans are not as yet entirely completed. One four-story brick structure has been determined upon for general factory purposes and for the accommodation of large offices.

✤

Within the next twelve months the American Can Company will move its general offices from the Bowling Green Building to its new office and factory building, on West Fourteenth Street, New York. The new building is now under way and will cover a plot of ground about 75x150 feet, and will be six stories in height. Part of the building will be devoted to office purposes, and the balance will be given up to a new manufacturing plant, which will take the place of an old plant belonging to the company uptown.

✤

There were 767 failures reported to Bradstreet's for the full calendar month of August, an increase of 9 per cent. from the month of August a year ago. Liabilities of the failing traders for August aggregated $7,111,209, a decrease of 32 per cent. from the large July total, and of 25 per cent. from the August, 1904, total.

✤

The Avery Stamping Co., of Cleveland, Ohio, manufacturers of "Never-Break" steel cooking utensils and shovels, also having a plant for doing their own tinning of kettles, have lately fitted up to do retinning of steel, malleable iron, brass and copper, but not cast iron, for outside parties. Estimates will be furnished on application.

PROTECT AGAINST THE STORMS OF WINTER.

The weakening effect of rust on steel work and metal surfaces is a source of expense and annoyance to those who have not adopted thorough methods of protection.

It is the heat of the Summer's sun that brings about most rapidly those changes, which result in the loss of elasticity and protective power in protective coatings.

The rain and snow storms of Winter, with their excess of moisture, naturally result in the corrosion of metal surfaces on which the protective coating has been thus weakened by the heat of Summer.

Paints applied in the Fall dry about as quickly as in the Summer, yet the complete oxidation of the upper portions of the film is not hastened as it is in the hotter days of the Summer. Therefore, the original elasticity is maintained longer and the coating is much more durable. The clear, dry weather and the absence of sudden showers of the Fall season, provide conditions most favorable for the proper application and drying of paints.

Particular attention should be given to the selection of capable painters, the right kind of brushes and good paints.

Great care should be used in selecting good paints that will hold practically their original shade, and resist corrosive agencies for a long length of time.

Dixon's Silica-Graphite Paint has the advantage of retaining practically its original shade during its long protective life. Provide in your painting contract that Dixon's Silica-Graphite Paint be purchased in the original packages, ready mixed for use. Then you will be sure of the quality of oil and pigments.

RED JACKET PROSPERITY.

RUNNING DAY AND NIGHT.

The Red Jacket Manufacturing Co. has been compelled to put on a night shift at its new plant in Davenport, Iowa, and the big manufacturing concern is now running 22½ hours every day in an attempt to keep up with its orders. The foundry is also running full blast and is being taxed to its utmost capacity to keep up with its end of the work. The company has more than doubled its working capacity within the past year, and when the big plant in the west end of the city was built it was thought that it could easily keep up with its work. Despite the increased capacity, however, the management has found that it must put on a night shift in order to catch up, and the force was installed at once.

THE NATIONAL SWEEPER CO.'S NEW OFFICES.

The National Sweeper Co., Marion, Ind., has opened a branch office in New York City at 296 Broadway, where they have handsomely fitted up offices and reception rooms in a most attractive and ornate manner. I. J. Allen will be in charge of all their Metropolitan and Eastern business, as well as of their entire export trade, and who will be pleased to receive all of their old customers, as well as all those interested in learning of "something different, something better," in Carpet Sweepers. Spacious warerooms in connection with the offices will enable callers to examine thoroughly the large and varied line of Sweepers manufactured under the name National, and at the same time this departure will permit of immediate shipments in case of urgent necessity arising for prompt replenishment of a local dealer's stock. Among those interested it is believed that the establishment of a New York office on this scale is a most decided step in the right direction, and it is to be hoped that this announcement will serve as a cordial invitation to the trade to call at 296 Broadway and make themselves better acquainted with National's Roller Bearing Carpet Sweepers. This makes the fourth important branch which they have added, as follows: Eastern & Export Branch, 296 Broadway, New York; Chicago Branch, 1411 Michigan Avenue, Chicago; Pacific Coast Branch, office and warehouse, Turk and Jones Streets, San Francisco; Canadian Branch, office and warehouse, 45 Colborne Street, Toronto.

TRADING STAMPS—PUBLIC POLICY.

The United States Circuit Court for the District of Massachusetts held, in the case of The Sperry & Hutchinson Company vs. Temple, that where the defendant had been in the employment of the complainant long enough to know that the necessities of the complainant's business in selling and redeeming trading stamps required that such stamps should not be dealt in by the public generally, he was not an innocent purchaser without notice in purchasing issued stamps for resale, and that the business of issuing trading stamps to merchants, to be given to purchasers of small bills for cash, when honestly conducted, was not contrary to public policy.

"THE CRY IS, STILL THEY COME."

At Centralia, Ill., August 15, W. D. Stannard was high professional, H. W. Cadwallader, second high professional; Mr. Shanks, of Centralia, high amateur, and Mr. P. Neal, third high amateur; all using Peters factory loaded shells.

At San Marcos, Texas, August 14 and 15, M. E. Atchinson was high amateur and C. F. Gilstrap second amateur. Wallace R. Miller was high professional on the second day, and Ivey Johnson of San Marcos won the Peters cup with 45 out of 50, breaking his last 25 straight. All these gentlemen used Peters factory loads.

At the Interstate Shoot, Kansas City, Mo., August 16, Wm. Veach won high average over all amateurs and professionals, score 192 out of 200, using Peters factory loaded shells.

Mr. A. W. Kirby of Greenville, Ohio, in a series of contests ending August 14, cleaned up about all the prizes in sight, winning first prize, the Hunter Arms Co. trophy, and the Peters medal. Mr. Kirby used Peters Ideal Shells exclusively, and in this contest scored 632 out of a possible 750 from the 20 yard mark.

At the Interstate shoot, Kansas City, Mo., August 16, 17 and 18, the high general average for the first day, and the high amateur average for three days was won by Mr. William Veach of Falls City, Neb. Mr. Veach was third in the general averages and Mr. E. W. Arnold of Larned, Kan., landed the third amateur average. Both gentlemen used Peters shells.

On August 15, the newly organized gun club at Durand, Wis., gave a very successful one-day shoot. It was managed by Mr. B. O. Seymour, and everything went off in fine shape. Mr. Seymour was high professional, and first and second amateur averages were won by Mr. H. Nickels and Mr. J. H. Stearns, respectively. All these gentlemen used Peters factory loaded shells.

Mr. J. E. Vaughan, representing the Peters Cartridge Company in Southern California, recently made a very excellent record, shooting at 650 targets in five different towns and breaking 96.1 per cent. Mr. Vaughan is demonstrating to the sportsmen of California the superior qualities of Peters factory loaded shells.

At the tournament of the Orange County Gun Club, Middletown, N. Y., August 15, 16 and 17, Neaf Apgar won the high general average with Peters factory loaded shells.

At the Bound Brook, N. J., tournament, August 19, Mr. Apgar was again high man, breaking 143 out of 150.

SEPTEMBER 10, 1905.

Editorial Trade Review

The Fall trade opens with the present month with unusual vigor, and finds the jobber alert and in readiness to meet it with an eager welcome, after a vacation spell in which he has been recuperating from the toils of Spring.

There is an indication of an excess of work being offered for the consideration of the skilled mechanics, in the general demand that is noticed for labor saving appliances, in the sale of special lines of tools. The workman is replenishing his tool chest with the latest and best of the kind, and it behooves the enterprising dealer to be prepared for his sales by adding to his stock, if such goods are not already in hand.

The Salesmen have all returned from their vacations, and have sought the company of their individual trade, finding the stocks need replenishing badly; and are securing good, big orders anticipatory of a line of business they could scarcely have believed possible. The fact is, customers know and feel that the overwhelming crops so freely prognosticated, augur well for the future; and, fearful of being caught napping, are ordering full supplies of all Fall and Winter goods, without having to be urged any more strongly than giving a hint that the goods, especially leading kinds, are apt to be hard to get later in the season. It is a wise old chap who fills his wants now.

The stiffening up of almost everything but a few heavy goods for which manufacturers are afraid they won't get their share of the orders and refuse to hold advance rates, is having a good effect on the market, which by no means a speculative one, still finds the buyers eager for their customary wants. Everything tends towards a steady trade until after the holidays, anyway, and the country dealer intuitively knows it, and refuses to be a laggard, especially on a rising market for nine articles out of ten. With the manufacturer filled to the muzzle, even orders may reach the point when in the face of an active bestowal of orders, he will have to decline a few with dates attached that he well knows he cannot reach.

Copper goods of every description are in demand, as the market is pointing upward from higher quotations prevailing for copper over last season, which warrants the buying movement. The purchasing judgment of the buyer was never more at stake than in the present state of affairs, which justifies the hopeful and buoyant condition which is the prevailing characteristic of the Fall trade.

As a condition of the market, which was foreseen to the extent of manufacturing a reduced output, wire nails and other goods in this line are firm and steady, although not as unassailable as the tone of the market would bring conviction. Billets and wire rods are being held at figures so close to the estimated cost of the product, that unless the maker controls his supplies of this raw material, his profit on the manufactured product would be found to be *nil*.

The manufacturers of builders' Hardware find it impossible to deliver certain stock orders on leading goods on anything like time, and back orders will have to embarrass the makers more than usual. Bronze goods of some popular styles especially, bother them more particularly. The prevailing prices of copper holding up the manufacture of the goods during the spell of hesitancy. The growing demand for better grades of goods is a prevailing feature in the market. Building is making a record year in all the leading cities, and the furnishing of builders' Hardware makes it a better year for the manufacturers, who are only too thankful their sales do not find the cheapest goods in amount form the most noticeable part of their product as in former days.

RESIGNATION OF A. EUGENE BOLLES.

A. Eugene Bolles, who for five years has been the Manager of HARDWARE, has resigned that position in order to become part owner and business manager of the *Municipal News*, a new weekly paper devoted to the advancement of practical and helpful civic improvement. He has made an efficient manager of HARDWARE, devoted to its interests, and giving to his work the intelligent labor of a well directed energy that produced results. He brings to his new field the same mental vigor and enthusiastic effort that made his connection with HARDWARE an eminently successful one. He has our best wishes for unequivocal success.

TRAFFIC ON THE GREAT LAKES.

Internal movements of commerce during July, as indicated by receipts and shipments at important Lake points, reported to the Department of Commerce and Labor through its Bureau of Statistics, present marked improvements, if compared with similar movements in 1904.

The traffic on the Great Lakes continued to be of heavy volume during July, 9,321,097 net tons of freight having been received at the various ports, in contrast with a similar inbound movement in 1904 of 8,507,192 tons and in 1903 of 7,876,410 tons. During the first seven months of the current year similar receipts amounted to 29,127,418 tons, as against 15,161,455 tons in 1904, and 26,951,018 tons in 1903. The current year's inbound movement was divided into 396,563 tons of flour, 52,123,957 bushels of grain and flaxseed, 5,734,486 tons of coal, 15,518,752 gross tons of ore and minerals, 869,975 M feet of logs and lumber, and 2,347,431 net tons of unclassified freight.

The commerce through the Sault Ste. Marie canals at Sault Ste. Marie, Mich., and Ontario, Canada, during July totaled 6,703,760 tons, as against a corresponding movement in 1904 of 5,609,079 tons and in 1903 of 5,279,428 tons. Of the movement for the seventh month of the current year, 5,494,878 tons moved eastward and 1,208,882 tons westward, while of the total movement in both directions 5,873,743 net tons through the the United States canal and 830,017 net tons through the Canadian canal. Among the items prominent in the eastbound movement may be mentioned 5,044,012 tons of iron ore, 2,701,165 bushels of wheat, and 1,551,251 bushels of grain other than wheat. The principal item in the westbound movement consisted of 940,884 net tons of soft coal. During the present season, to and including July 31, 19,837,204 net tons of freight passed through the canals at Sault Ste. Marie, an amount over 10½ million tons in excess of a similar movement in 1904, and considerably over 2½ million tons heavier than that for 1903. Of the present year's movement, 16,490,111 tons represented an eastbound movement and 3,347,093 tons a westbound movement, while of the freight passing in both directions, 16,689,042 tons moved through the United States canal and 3,148,162 tons through the canal in Canadian territory.

PROFIT MAKING LINES

FIREARMS IN THE REGULAR HARDWARE STORE.

Twenty-five years ago Firearms, Fishing Tackle and general sporting goods were sold almost entirely by exclusive "Gun Stores," who were in evidence in every small town, and usually obtained old-time profits on everything they sold. Gradually the Hardware merchants added guns, sporting goods, etc., until they have almost entirely driven out the old-time "Gun Man."

Nearly every up-to-date Hardware stock now contains sporting goods. Some Hardware merchants have a very complete assortment and if judiciously handled should be one of their most profitable lines, but many do not handle the line intelligently. Study the line; no one can make a success of goods they are not posted on—carry the numbers staple in that section—have catalogues priced up to give a prospective purchaser the desired information, not only about the goods, but prices as well, if desired—see that your stock is complete for your trade during the season, which in some sections is Spring, others Fall and others Winter—reduce the stock when season is over, so as to have new fresh goods when the next season opens.

All sporting goods manufacturers will supply attractive hangers, etc. Write for a supply and ask to be put on their mailing list, they are pleased to furnish, even if they do refer the merchant to the jobber for his goods. All the largest makers of firearms prefer to sell the jobbers and will protect them so the retailer cannot buy cheaper from the factory than from his jobber and sometimes not as low.

The factories are also pleased to supply electrotypes for advertising, and cuts improve an "Ad." Advertise early in the season, the staples, also the novelties. In season make attractive displays, if windows will permit, dress the window with sporting goods and kindred goods entirely. Good assortments well displayed, properly advertised and with intelligent salesmen, are not half sold, but nine-tenths sold.

Sporting goods are proving every year more and more desirable for the Hardwareman to handle, and to those who do not find it so, would state the main trouble usually is lack of salesmanship first, poor assortment second. Many proprietors and their salesmen trying to sell guns do not know what the difference is between a Twist and Damascus barrel, or why the "Twist" in a rifle barrel. If one cannot talk his wares intelligently, can he expect to find them salable or profitable? And he who only sells what the trade calls for, is not a merchant or salesman, but a storekeeper or order taker.

Modern merchandising is growing to be a science, the same as the professions, and it is only the ones who keep abreast of the times, who can expect to succeed. Sporting Goods are in a sense luxuries and as such should be profitable and if not, the merchant should blame himself and not the line. Do not expect to make 100 per cent. on everything, but many of the small items will bear even more and the average per cent. will be quite satisfactory, better than the general average of the store. C. F. M.

SELLING SPORTING GOODS BRINGS BUSINESS.

Men Buy Sporting Goods—The Hardware Is the Man's Store—Fishing Tackle Must be Displayed.

You may know the story of the man selling soda water fountains. He worked hard to sell one to an old druggist; and could only get the response that the druggist had never had any call for soda water. The up-to-date druggist on the opposite corner put in a soda water fountain and in a few weeks, and during the hot Summer days, the profits from it paid the rent of the store. Now, the old, fossilized druggist would not put in the soda water fountain, because he had never had any call for soda water. It's so with many Hardware merchants—they do not put in stock, good paying lines, which belong to their business, simply because people do not come and ask for the goods as they do for nails or hammers. The business, however, is there, and it is only ready for the Hardwareman to reach out and take up if he only knew it.

SPORTING GOODS AS HARDWARE.

The story of the druggist and the soda water fountain applies well to many Hardware stores with the line of Sporting Goods—baseball supplies, fishing tackle, guns and ammunition are just as much Hardware as they are anything—and belong to the Hardware stock and in the Hardware store.

The best proof that the average Hardware dealer has found Sporting Goods profitable is in the fact that it's very rare that the line is dropped, when once taken up, and it's always found to be a positive *Business Bringer*. Brings customers into the store—men customers, the buyers of Hardware; men buy Sporting Goods, and the Hardware store is a man's store. This is one reason why department stores have been and usually are, unsuccessful in selling fishing tackle or other sporting goods; because the department store is not a man's store, and women seldom buy their husband's fishing tackle or his gun goods, although they may buy his shirts or even his neckwear. But when it comes to picking out his fishing outfit or camping goods he draws the line; if he's a sportsman he finds as much pleasure in buying the goods as in using them. So it comes about that men are the buyers of sporting goods—and, as before stated, the Hardware store being the man's store, is by far the best store to handle the line.

THE HARDWARE—A MAN'S STORE.

And so it is, that the Hardware dealer will find the handling of sporting goods will bring more men, and therefore more prospective Hardware customers into his store. For it's true that nearly 80 per cent. of the average Hardware dealers' customers are men. Now the more customers a dealer has coming to his store—no matter for what they may come—the more trade that dealer is going to have in Hardware. It may be only a fish line or a box of cartridges, the customer buys to-day. He may formerly have been buying what little pick-up Hardware he needed at another store—but if he is well waited on—gets a good fish line or box of cartridges at the right price, sees a good display of Hardware—a well-arranged and well-kept store—you can rest assured that it's only a question of time that man will become a regular customer of the store. So it's true that the selling of sporting goods, more than any other side line, will prove to be a business bringer for the Hardware merchant.

GOODS MUST BE DISPLAYED.

It's been carefully estimated that in Fishing Tackle not over 50 per cent. of the goods sold at retail are ever used by the original purchasers. It goes without saying that the reason for a large amount of the tackle being bought is, because the sportsman sees something he fancies—or fancies the fish will fancy. We all have heard about the country boy who caught all the big trout with a bit of white string, a bent pin and hickory pole for his outfit. Many of us know that in our younger days as country boys that with a ten-cent outfit we used to catch more fish down by the big swimming hole than we ever have since, even with the best tackle and most attractive assortment of flies. But, of course, in those days, there were more fish, and it was easier to get them. And that is just another reason why a better class of fishing tackle is constantly being sold. Fishing is becoming here in many parts of our own country more of a science, and better tackle, lighter rods and lines and leaders and smaller flies are necessary. But all this still bears out my statement that very much of the tackle bought is really never used, and therefore, to be sold, it must be displayed.

I went into a store the other day in one of the large Western cities, and, seeing but a very small display of fishing tackle, thought my customer must have sold out well. In reply to my question how the trade had been, he said: "It's been very poor this year; I'm only selling the very cheapest grade of goods." "But where is your stock?" I asked. we were shown the stock, away back in the rear of the store, in a dark corner, tucked back on the shelf. Now, that dealer was complaining about poor trade—said that there had been nothing but cheap goods sold in his town—but right across the street is another store. That merchant said his trade had been good; at first flush it seemed as though he had a big trade—two large cases filled with fishing tackle. "A good display you still have there," I remarked. "Yes, but do you know, right there in those two cases is all the tackle I've got in stock; and I've just had to string it out, and even put those trunk and vest pocket rods, and some cutlery in one of those cases to make a show during the past two weeks. We have had the best season yet, and sold more high-priced stuff and all our fancy tackle." And the order he made up for 1906 proved what he said was true.

Now, there is the whole thing in successfully selling sporting goods. A man may come into your store and buy almost anything in Hardware, without having his attention drawn to it. He knows pretty well about tools, or files, or locks, but when it comes down to sporting goods—the only way to sell the goods—except ringed fish hooks and 22. short cartridges—is to properly display the line. EDWARD D. IBBOTSON.

MAINTAINING THE PRICE.

Kampfe Brothers, as patentees and manufacturers of Star Safety Razors and Supplies, have experienced some difficulty in having their customers maintain their regular retail selling prices, as when numerous firms in a city had bought their products, there was more or less cutting of prices, each one trying to undersell the other.

As they extensively advertise their various patented articles (Star Safety Razors, Star Interchangeable Razors, Stropping Device, Strops and Star Safety Corn Razors) in the numerous magazines, thereby creating a market for their goods for the benefit of the dealers, and to overcome the cutting of prices and to give every dealer a fair margin of profit on their lines of goods, they are able in the future to strictly maintain their retail prices by a court decision rendered in the United States Circuit Court of Appeals for the Seventh Circuit. (Victor Talking Machine Co., et. al., vs. The Fair), and published in HARDWARE, February 10, 1905. This decision gives them the privilege of fixing their retail prices, as the law distinctly says that any person who has a patented article for which the United States Government has granted him a United States patent, or, in other words, given him a monopoly to manufacture this particular article exclusively, said person has the privilege of disposing of the patent outright or under any other special agreement that he may choose to make.

If a person or firm were to manufacture or utilize any part of their patent in constructing a *fac-simile* article, or were to sell the patented article contrary to agreements of conditions made by the manufacturer, they would be liable to a suit for damages as well as give the firm the privilege of obtaining an injunction, restraining them from selling or making this patented article. By affixing a label on the goods, giving the various patents and trademarks, owned and controlled exclusively by them, under which the said article must be sold at a stipulated price; and by stamping or mentioning on the face of the bill, that any person, who accepts the merchandise and bill as rendered, and the article as stamped, the aforesaid conditions have been agreed to, and should any person break this agreement, he is liable to a law suit for damages.

It is not with the idea of putting a prohibitive price on the articles manufactured, as every manufacturer is anxious to dispose of as large a quantity as possible. It is simply to assure the dealer of a fair margin of profit.

SAGE OBSERVATIONS ABOUT SELLING GOODS.

By JAMES H. REID.

The man who sells goods for fun sooner or later realizes that he does not even get the fun. He hears laughter, but it is not his own, although it is not for him. He then becomes aware that it is his discount and not his goods that are popular.

The man who talks quality and builds quality makes his own market. He creates an exclusive business for himself and his customers. This is the man that is hard to beat; and if, by reason of his system or local environment he is able to offer good goods at popular prices, such a man is well-nigh invincible in the market which he seeks.

Salesmen on the road should never remain away from the house for too long a period. Money expended for railroad fare to headquarters at reasonably frequent intervals is money well spent. A salesman's environment while on the road is such that if he is not brought home and put through a revitalizing process he will yield to the adverse suggestions of his trade and lose his force.

It is important that the salesman should receive friendly letters from his house while on the road. An unfriendly letter will cost his house money, for a salesman's sensitiveness is abnormal by reason of the character of his work.

The house advertising has in its power to give needed stimulation to salesmen and to divert their efforts into desired channels. Advertisements intended for salesmen should be written as though intended for their customers. These advertisements, operating upon a salesman's mind, build up within him a force which, when directed toward an individual buyer, becomes intensified power for selling the goods it is intended he should sell.

Articles sold through advertising cease to sell the moment the advertising ceases. A salesman's energy is like an advertisement—the moment he ceases to urge his customers to activity on his goods that moment marks the beginning of a decline.

It sometimes happens that a salesman on the road develops a complaining spirit. He becomes saturated with the idea that if his house would only follow his guidance it would do a better business, and if this condition long prevails it will develop the habit of grumbling about those who are in authority over him.

This is an unfailing sign that the man is suffering from a condition of mind that is fatal to success. There is but one prescription for that ailment, and that is the one written by Elbert Hubbard: "Get out, or get in line."

THE MANUFACTURERS' PURE FOOD AND INDUSTRIAL EXPOSITION AT JACKSONVILLE, FLA.

Owing to a general desire on the part of many prospective exhibitors for more time in which to arrange for their displays, it has been decided to postpone the Manufacturers' Pure Food and Industrial Exposition, which was to be held at Jacksonville, Fla., in November, to January 4 to 18, 1906. The citizens of Jacksonville purpose making this affair the greatest of its kind ever held in the South. While the primary purpose of the exposition was to exploit the products of Florida, the desire on the part of manufacturers throughout the country to be represented has caused the exposition to be widened into a general one. Every winter thousands of tourists from all parts of the world pass through Jacksonville daily enroute to their winter homes and while the larger part of those tarry in the Florida metropolis for a day or two to break their journey, the merchants of the city believe that if some big attraction were provided these travelers would prolong their stay in the city. Jacksonville is no longer merely a winter resort, but a thriving, growing and progressive industrial center, and this exposition is planned for the purpose of showing to the business world the advantages of the city as a trade center. The exposition hall which will be erected in the new St. Johns Park, a pleasure resort on the banks of the St. Johns River, four minutes from the heart of the business district, will have a floor space of 315 by 210 feet. Applications for space have been filed so rapidly since the inception of the exposition that those having the affair in charge are considering the advisability of constructing an annex in order to accommodate all the exhibitors.

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

The members of the Southern Hardware Jobbers' Association have received the following communication from the president:

FT. SMITH, Ark., Aug. 26th, 1905.

To the Members of the Southern Hardware Jobbers' Association:

GENTLEMEN—

SELECTION OF DATES FOR NEXT ANNUAL CONVENTION.

Your committee appointed to select dates for our next annual convention, begs to report that they have decided upon

JUNE 12TH, 13TH, 14TH AND 15TH, 1906.

The committee, through the secretary-treasurer, has made careful and thorough investigations among all our members as to the most convenient and satisfactory dates for the convention, and finds that the above-mentioned dates are the most favorable taking everything into consideration. Such being the case, the indications would seem most auspicious for the largest attendance from our members next year than at any previous gathering. The dates of the meeting having been decided at such an early date, we trust that any member who ordinarily might not attend by reason of not having sufficient notice, may now be enabled to make their arrangements so as to be with us. It is the purpose of your officers to make this year the banner year in the way of accomplishing actual monetary benefits for the membership. The recent Hot Springs Convention mapped out plenty of work and already there has been "something doing" all along the line.

As you have been advised before, the place for the next annual convention is Hot Springs, Va., this having been unanimously decided upon during the recent convention, and the dates will be June 12th, 13th, 14th and 15th, 1906.

Yours very truly,

F. B. DUNLOP,
President.

EXPOSITION IN INDIA.

Consul-General Patterson, of Calcutta, furnishes a prospectus of the Indian Industrial and Agricultural Exhibition to be held at Benares about the time the Indian Congress meets in that city in December next. It is stated that the exhibition is intended to give an idea of the present condition of Indian industries and agriculture and the possibilities of their future development. It will aim to bring together specimens of the natural products of India and modern appliances by which Indian industries may be improved. Mr. Patterson says there is a large field in India for American agricultural machinery, especially threshing and winnowing machinery that can be moved from place to place, as the farms in India are small. He believes that the coming exhibition at Benares will afford an excellent opportunity to place harvesting and other machinery before the people of India, and that such exhibition of American appliances will create a market for them.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Promissory Note—Statute of Limitations.

QUESTION: Some time after a note was outlawed, the maker wrote and signed a letter to this effect: "I am not yet able to take up the note and have no definite prospect of being able to do so, but if you are disposed to name some small sum that you will take for the note, I shall be glad, if I can, to buy it." Would this acknowledgment revive the note?

REPLY: It depends upon the State where the action is brought. In New York and most States it is held that to revive a debt which has been barred by the statute, there must be an express promise to pay, or an acknowledgment of the debt which contains nothing inconsistent with an intention on the part of the debtor to pay it. This letter does not contain a promise to pay the note or an admission that it is an existing debt. On the contrary it expressly states that the writer is not able to take up the note and has no prospect of being able to do so. It is not, therefore, such an acknowledgment as will revive the debt, so as to enable the creditor to sue thereon.

Legacy in Lieu of Dower—Election.

QUESTION: A resident of the State of New York dies, leaving a wife, and four children by a former wife. In his will he divides his estate into five equal shares and gives one to each of his children and one to his wife "in lieu of dower." Most of his property being real estate, the dower right is more valuable than one-fifth of the estate given to the wife by the will. Can she take both the dower and the interest under the will? Or must she take what the will gives her?

REPLY: It is generally held that a wife may take a provision under her husband's will and her dower right also, unless the bequest or provision is expressly stated by the will to be in lieu of dower. When it is so stated, as in this case, the widow cannot take both, but in most States, as in New York, is put to an election. She can waive her dower and take the legacy or she can waive the legacy and take her dower. The New York Statute provides that she is deemed to have accepted the legacy or pecuniary provision in the will, unless she brings an action for her dower within one year.

Bill of Lading—Issued for Goods not in Existence.

QUESTION: Kindly answer the following question: A local freight agent of a railroad issued to one Smith, a bill of lading for one hundred barrels of beans, shipped to Jones, as consignee. Smith drew a draft on the consignee with the bill of lading attached and discounted it at a local bank. It turned out that no barrels of beans were shipped and the bill of lading was a fraud, committed by the freight agent. As between the bank and the railroad company, who must lose the money?

REPLY: Your question presents a much disputed point of law. In some States as Maryland, North Carolina and Minnesota, it is held that the railroad company is not bound by its agent's acts, when the agent is engaged in a scheme to defraud the company. But in others, as in New York—and this is the better view—it is settled that the railroad company is responsible for its agent's fraud. The principle is that where an agent has been given power to do an act upon the existence of some intrinsic fact necessarily within the agent's knowledge (i. e., in this case the value of the beans to the railroad company for shipment), and of the existence of which the act is itself a representation, a third person dealing with the agent in entire good faith, may rely upon such representation, and the company is estopped from denying its truth. The reason is obvious. If it were once understood that a railroad company could escape liability on a bill of lading by showing that it never had the goods for which its agent, authorized to sign bills of lading, has signed, it would fill the business world with distrust. No bank could advance money on a bill of lading with security. The practical rule is not, let the indorsee beware of the statement of the bill, but rather let the carrier beware of its agent's want of integrity in putting a false bill afloat.

It "Came True."

Howell—Are you a believer in astrology?

Powell—Sure; an astrologer once told me that I would meet with an accident and the next day I fell off the water wagon.—*Town Topics.*

A REVIVAL OF CYCLING ABROAD.

The present year is already being distinguished by a remarkable increase in the use of bicycles comparable only to that which took place in 1896. From the earliest times in the history of the bicycle—that is, from the time, upwards of thirty years ago, when the machine had come to be regarded as an instrument of practical utility—it has enjoyed an uninterrupted flow of prosperity, with a steady and continuous increase in the numbers employed and a growing appreciation of its merits. Some eleven years ago it experienced a period of inflation due entirely to the fact that society had decided to countenance it and make it the toy of a season or two. Knowing no restraint, fashion demanded bicycles at any cost, and in such numbers as to tax the resources of the manufactories to the utmost. Prices naturally rose, until 100 per cent. was the most moderate profit with which the makers were content. Although the immediate advantage to the industry was very considerable, most of the money fell into the hands of unscrupulous company promoters, the only others to benefit being the shrewder men of business, who seized the propitious time for selling their works and plant to these financiers. The fickle goddess Fashion showed her usual inconstancy and soon tired of her latest plaything, and the boom subsided, leaving the trade in a thoroughly disorganized condition. A reaction set in, and the period of depression which followed has existed up to the present year. When it became evident that the high fancy prices that ruled during the boom could no longer be obtained, these had to be dropped year by year in order to keep up the demand, which was no longer confined to people in affluent circumstances. The numbers of genuine makers, as well as the so-called makers or assemblers of ready-made components doing mainly a local trade, that were called into existence during the period of inflation was very great, and in the late years of depression many of these have gone to the wall owing to the unremunerative nature of their business, for the cutting of prices that commenced a few years ago so reduced the profit that those only who had sufficient capital to stand the strain, and facilities for the most economical production of machines on a large scale, were able to survive. The recent severe competition had been somewhat ruinous for all concerned, for prices have been so reduced that the maker now calculates his profits in shillings instead of pounds for the cheaper grades of machines.

One consequence of the excessively low prices at which bicycles have been lately selling is that the machine has been brought within the reach of vast numbers of people to whom it has been hitherto inaccessible owing to its cost. A result of the cheapening of new machines has been to induce a great many riders to invest in new mounts and to discard their old ones prematurely, and these second-hand bicycles, still serviceable, or capable of being made so, have been thrown on the market in such numbers that they are to be obtained at ridiculously low prices, so much so that the ordinary working man or the errand boy now finds the possession of a bicycle to be within his means, and, from all appearances, he is largely taking advantage of his opportunities. The advantages which the bicycle offers to the poorer classes in saving time and money in getting to and from work and in other directions soon becomes recognized by those in similar circumstances who still have to walk or pay fares, and the examples thus set are readily followed by others. It is no doubt due to the fact that the bicycle is being pressed more and more into the service of everyday life that there has been an increase in the demand this year that has reached the proportions of a second boom. The great majority of the machines are of the cheapest grade, but, even so, when made by the more responsible firms they are strong and serviceable, and answers every purpose of those who are not exacting as to weight and finish. Were there any doubt as to the enormous extension of bicycling amongst the lower classes, it would be dispelled by observing the numbers and characters of the riders who throng suburban roads on Saturday afternoons and Sundays, and the high percentage of incapable and irresponsible novices encountered. In no years has there been any approach to the streams of riders who may be seen wending their way out of the towns for a day in the country, thus making their bicycles minister to pleasure as well as to business. In addition to the large numbers of machines thus employed, bicycles are to be seen in use in every village and hamlet in the country—not old type specimens, obsolete in design and equipment, but of modern construction and fitted with pneumatic tires. Indeed, it is now practically impossible to escape the ubiquitous bicycle even in the most remote and secluded highways. The expiration last year of the master patents on pneumatic tires has had a certain influence on the lowering of prices, for these indispensable accessories were never cheaper than they are at present, though the high and increasing price of rubber is not likely to permit of any further reduction in the case of tires in which pure material of this kind is used.—*London Field.*

CONCERNING TRADE JOURNAL ADVERTISING.

The purpose of advertising is admittedly two fold; to create new business and strengthen one's grip on that already enjoyed. Whatever therefore in the way of commercial publicity that can be employed to bring about such results is to be recommended.

The Trade Journals, so called (and this includes publications technical and scientific in character) unquestionably offer the means to manufacturers and others of reaching buyers and users of their product, effectively and economically. This is attested by the fact that those who have employed them for this purpose most liberally and persistently in the past are the acknowledged leaders in their several lines to-day and continue to enlist their aid. I question seriously however, if the majority of advertisers in the Trade Journals have any very definite idea of what they actually receive in the way of returns from investments in this direction and few I believe have ever endeavored to figure the matter out fairly to themselves and the papers.

Orders do not ordinarily choke the mails upon the first few insertions of an advertisement, be it ever so expertly fashioned and judiciously placed, and who so gauges the profitableness of advertising in this class of publications will arrive at conclusions that are in the main unsound. Those of experience or who pause to consider the matter at all thoroughly do not look for anything more direct in the way of results than inquiries. And this is much. For it should be recognized that advertising machinery and other high priced articles is a vastly different proposition from mail order advertising. One can not ship an 80-ton electric traveling crane or a 150-h.p. water tube boiler by rural free delivery yet, nor is it convenient to remit payment in stamps.

The matter is too weighty a one to be so lightly disposed of. It is those benefits derived from advertising which create conditions that make for the more tangible "inquiry" and "order" that are apt to be overlooked in considering results. That these can be purchased is fortunate, and especially with so cheap a thing as money. They obtain more or less whenever advertising is done with understanding, though much necessarily depends upon individual conditions.

Too often underestimated, I take it, is the "life" and "ginger" that a brisk and well directed advertising campaign injects into a business, awakening and stimulating each and every one from mailing clerk to the board of directors in a way that tells mightily for profit when the balance sheet is made up later on. To the "man on the road" and the "manager of the branch office" the fact that there is "something doing" in the "front office" at the other end of the line bestirs him in turn to greater effort, that he, too, may "keep his end up." Again, there is the profitableness that lies in the impression created by intelligent advertising. Appearances count largely for or against in trade, especially where a closer acquaintance is impracticable.

The qualities of respectability, stability, and bigness are to be cultivated, for they beget that degree of confidence which is the forerunner of all trading operations. These are unconsciously accredited a business that advertises forcibly and persistently. There is, too, the natural drift of trade towards enterprising concerns and the pride in using products that are known and quoted until they have become veritable standards. Of value, too, is the weekly or monthly opportunity that is the advertisers' to communicate to the trade matters new and important, and in a way that is unequaled by any other means in completeness of territory covered and economy of distribution. Beyond this the concern that advertises receives the moral endorsement of the publications in which its announcements appear, and in many instances this is well worth the having. With this may be reckoned the benefit derived from association with other advertisers of prominence using the same mediums. Taken altogether the value of this "reflected light" is greater than is generally supposed.

The various indexes which are prominent features of the trade journals are moreover often utilized as directories, because they are corrected weekly or monthly to date, and a concern that advertises and is properly listed in these is always on the ground and in line for business. There is also the opportunity afforded through advertising of securing agents in distant cities and foreign countries. It is not an unusual occurrence for advertisers to receive requests from individuals and concerns of standing to represent them in their particular territory, connections being frequently made in this way that would not have been accomplished otherwise. It will of course occur to most minds that the full advantages of trade journal advertising will not be secured if the proper publications are not used, but that is a matter deserving consideration by itself.

There are publications that can be employed to advantage in every branch of trade, and which will return value received and more if advertisers will use them as they are designed to be used. When one considers the large expenditures in every direction that are made by the representative trade paper publishers that their columns may prove profitable to the advertiser, it is strange that they should have to seek patronage as assiduously as they do. Certainly as conducted to-day the trade papers of standing deserve and should command the hearty support of the trade generally. It should be remembered, moreover, that only in proportion as this is given can they thrive and become still more valuable to the advertiser.

One thing trade paper advertising demands in common with all sorts of advertising, for satisfactory results, namely, that the article advertised must be worthy and the matter given the same constant thought and attention that is granted other departments of business. Given a device, tool, or product that has merit, one for which a need is indicated or can reasonably be created, and which can be sold at a price the prospective user can afford to pay and it remains but to make the facts rightly known, and keep doing so, to sell it.

There is an art in doing the work well, of course, and it is also true that every one has not a natural bent for the business, yet even under the most adverse conditions advertising can do and has done a great deal. The most desirable wares will not, however, sell themselves very extensively. Buyers and users must be told about them, constantly and convincingly. It is my opinion, after some years in the business of manufacturers' advertising, that the most natural, economical and withal effective way of doing this is through the aid of trade papers, which are published largely to do just this very thing.—W. Hull Western in *Trade Press List*, Boston.

"THE MODERN IRONMONGER."

This is the title of a comprehensive little volume of 300 pages which is published as a guide to the management of the business of the twentieth century complete ironmonger, *The Ironmonger*, 42 Cannon Street, London, E. C., England. This handy volume is written with a view to benefiting the dealer in his business, by suggesting a number of things that probably would never occur to him, and so systemizing the details of everything connected with conducting a business successfully and with absence of friction, that would serve as a guide to the beginner or be a help to the oldest dealer. Beginning with the shop and its equipment, fully illustrated by plans, and going through the work of organization and management, stocktaking, business systems used in modern methods; and ending with a discussion of various side lines, which includes Electrical Supplies, China and Glass, Paints and Oils, Cycles, Sporting Goods, etc. Included in the equipment, illustrations are given of Drawers and Filing Cabinets, etc., Racks and Bins, etc., at the same time showing the necessary cards, labels and tags required in the business; ledger entries, balance sheets, form letters and specimen bills, all of which will be found of the greatest utility to a beginner in business or an old merchant who wants to see how another firm accomplishes similar results to his own. Included in its contents are a number of useful tables constantly required in the transaction of a legitimate business. Altogether it is a very useful and painstaking work, the price of which is five shillings net.

AMERICAN FORK & TOOL CO.'S NEW CATALOGUE.

American Fork & Tool Company, Cleveland, Ohio, have given the trade a very handsome and complete catalogue of Steel Goods recently, in "Catalogue F," forming a pamphlet of 175 pages elegantly printed on excellent paper in two colors in a very attractive manner. They say in introducing the catalogue, "Outside of certain patented specialties which have their own specific labels our customers can be assured of having a full line under some one factory label and thus avoid a mixed stock." Our facilities are unequalled. We offer the product of twelve large factories, equipped with the most modern machinery and under the management of men who have had a life-long experience in the manufacture of steel goods. Factories are so located as to insure quick and prompt delivery to each and every jobbing center." The catalogue is devoted to everything that could possibly come under the head of Steel Goods including all "regular goods" known to the trade, as well as the numerous specialties which formerly emanated from, or were controlled by individual makers, to whom this company succeeded; such as Warren Hoes, Harper's goods, Evans Cultivators, Victor Cultivators, Wood Hand Hay Rakes, Cabbage Harvesters, Ox Yokes and Bows, Etc. A full line of wood goods is shown ranging from Wheelbarrows to Hoe Handles. A catalogue such as this has become, covering so large an assortment of goods sold by the Hardwaremen, is indispensable to the business and should be written for at once, as many of the styles suited to special industries are an education in themselves.

JOHN CHATILLON & SONS' NEW CATALOGUE.

John Chatillon & Sons, 85-93 Cliff Street, New York, have issued for the trade a handcome cloth-bound catalogue, comprising 280 pages, which embraces in its contents the line of Spring Balances and other Scales, Butchers' Cutlery, Etc., with the manufacture of which the firm has been identified for so many years. This catalogue commemorating the Seventieth Anniversary of its establishment in 1835. In the early pages of the book they give in fac simile one of their new style dials of their spring balances, showing 50 pounds, yet the scale weighing 150 pounds with three revolutions of the pointer. The dial is marked every half pound, every pound showing in black, every five pounds in red, making the reading of the dial at any weight an exceedingly simple matter. In addition to the large assortment of Spring Scales listed and illustrated in this catalogue, they make a great variety to order, for special purposes and of various capacities—some to register as fine as one-hundredth part of an ounce, used for skeining silk, and others as heavy as twenty-five hundred pounds, for weighing coal. Spring Scales are used for other purposes than weighing, as, for instance, assorting, counting, multiplying, estimating, and also for various purposes of testing. The catalogue shows large additions to their line over any previous catalogue, as well as many changes and improvements in their usual styles. Among the most noted changes in their goods a new Butcher Scale is shown with extra large dials and patented device for limiting the vibration of the pointer, so as to cause it to stop instantly at the exact weight denoted. Laundry Scales with improved platform. Spring Platform Scales to use on counter. Automatic Weighing Machines, designed especially for weighing quickly and accurately every description of package for express or mail in bulk, and similar machines for weighing freight at the Railroad Stations and Warehouses, or even for use by merchants receiving or shipping freight. About 40 pages are devoted to knives, cleavers, steels and other butcher tools of Foster Bros. & Chatillon Company, for whom John Chatillon & Sons are sole Selling Agents. These 40 pages follow the classification given to the Spring Balances. In Carvers, Slicers and Butcher Knives there are a number of new patterns. The company make a specialty of knives for the use of hotel chefs, which command attention. They have a much larger line of Butchers' Steels than they ever before presented. A large number of out-of-the-way goods in an esppecial line that is devoted to butchers and cooks will be found in this volume. For general distribution on request to anybody, they have printed a small edition in pocket size that is an exact reproduction of the contents of the bound catolague.

Norfolk Hardware Company, Inc., 42 Washington Street, Norfolk, Va., wholesale and retail dealers in Hardware, would be pleased to receive manufacturers' catalogues for anything relating to general lines of Hardware.

ROBESON CUTLERY COMPANY.

We recently took occasion to commend the Robeson Cutlery Co., Rochester, N. Y., for the attractive manner in which they help the dealer by using the small easel to individualize the advertising and make each article more effective. We present herewith an illustration which graphically shows the effect of a show window thus ornamented.

EVOLUTION OF THE FISH HOOK.

The art of fishing has undoubtedly existed since very remote times, for man evidently was driven by hunger to catch fish as well as to hunt animals. The weapons and implements used in other ages to hunt mammals show considerable variety in manufacture, and in the evolution of such weapons there have been noted some wonderful changes. But the implements used by fishermen to-day, and especially the fish hooks, are not radically different from those used by the ancient angler.

Implements of stone and a combination of stone and wood used in catching fish have been preserved from ancient times. The invention of fishing paraphernalia did not require the exercise of any great ingenuity or mechanical skill. By watching the fish snatch at pieces of meat, etc., in the water, the early man evolved the idea of tying a piece of bait on the end of a line, and later the fisherman tied a sliver of wood on the end of a string and stuck the wood through the bait.

This led to the use of pieces of bone or wood sharpened at each end and stuck through the bait. After swallowing the bait the ends of the wood caught in the gills of the fish as the angler pulled taut the line. This method is still used by the Esquimos for catching sea gulls.

Practically the only advance in fish hooks of this day over the rude original inventions is in the better material used. Fishermen along the lakes of Switzerland in prehistoric days used hooks of bronze fashioned very similar to the steel hooks used in this day. Fish hooks fashioned out of the tusks of wild boars were also used by the fishermen who plied their vocation along the Swiss lakes.

Bronze hooks, almost identical in style to those used now, were used by the ancients who angled in Lake Morat, and clipped flint hooks of ancient manufacture have been found in Sweden. The aborigines of Wisconsin used native copper in the manufacture of fish hooks, and many of these implements have been found in the mounds along the lakes in that State. The ancients used much larger hooks, however, than those employed by modern anglers, which would indicate that they fished for larger game than do the fishermen of this age. The addition of the barb on the sharp end of the hook is a comparatively modern invention.—*Sporting Goods Dealer.*

TRADE AWAY IN THE NORTHWEST.

Business Never Better—Much New Building—Entire Northwest in Prosperous Condition.

Ten years brings about big changes in some of these Northwestern cities. From small towns they have grown to be large business centers—and the Hardware stores and Hardware stocks have grown in like proportion—in some instances have even grown more rapidly than the city. One such case is that of the Seattle Hardware Co., of Seattle, Wash. It is true that few towns on the globe have had as marvelous and sound growth as has this city—twenty years ago, with but few brick buildings, now with its sixteen-story fireproof, iron and steel structures—and on all sides new and larger buildings being built and being rented as fast as completed. But the Seattle Hardware Co. here has even grown more rapidly, and its trade now extends away up into Alaska, and down the coast into California and back into the Rocky Mountain country. The new building, which will be occupied this month, is perfect in its appointments. A spur from the Northern Pacific Railroad running through the rear end, thus enabling the loading and unloading of freight into their own warehouse. When located in the new building the Seattle Hardware Co. will discontinue the retail trade, devoting their entire attention to the wholesale business. The Seattle Hardware Co. have built up a large business in sporting goods, which branch is in charge of F. S. Clewley, one of the best posted sporting goods men in the West.

Another of the large wholesale houses of the far Northwest is the Schwabacher Hardware Co., of Seattle. This concern is back in its old location, and has fast recovered from the fire which occurred soon after moving into the new building. A number of salesmen represent this concern on the road, and the business is constantly growing.

Among the retail Hardware houses of Seattle, the store of the Thedinga Hardware Co. takes first rank. A special feature of this store is the window displays. In referring to this part of storekeeping, Mr. Thedinga, Jr., said: "In the line of tools and cutlery an attractive window display will sell more goods than any other method of advertising. We mark the goods in plain figures, and generally have a large sign with the prices, so that one passing the window can easily see just what we sell the goods for." Mr. Thedinga explained that it was his opinion that many people did not know how cheaply goods could be bought, and by marking prices on articles in the window much new trade was made.

An attractive store is that of the Whiton Hardware Co. The stock is especially well arranged, the store being light and bright, and goods are displayed to fine advantage. Double plate-glass cases run down the sides and center of the store and are lighted with small electric lights, giving an attractive and pleasing effect.

A feature used in many of the stores out here, and adding room, is a balcony running along the sides and around the rear of the store. In a high-ceiling store this is a great advantage. In this way the Union Hardware Co. have their store arranged, and are able to wait on their customers more quickly and to be able to display a larger stock of goods.

In Seattle, Pike Street might well be termed Hardware Row, for here within a few blocks are located five well-stocked retail stores. At 300 Pike is located the C. W. Boynton Saw and Hardware Co.; the attractive window displays are always a feature. A general Hardware stock is carried and a specialty is made of saws and tools, which was the general line. Business was reported good—it ought to be, especially in builders' Hardware, hardly a block in the city but that can boast of either a new building, or one being erected, or the plans of one being made.

At 506 Pike is the large double store of Ernst Bros., where an up-to-date stock of Hardware, tools, cutlery and sporting goods is carried. Mr. Ernst said business was increasing each year and that the outlook for Fall trade never had been better. The store of Ernst Bros. is especially well arranged, builders' Hardware, house furnishing goods, being on one side, while the other half of the store is devoted to sporting goods, including guns, ammunition and fishing tackle.

Another of Pike Street's Hardware stores is that of Stewart Bros., at Number 415. This concern have succeeded in building up a good retail trade, and have an especially large business in pick-up Hardware, household and family trade, which Mr. Stewart said was, after all, the most profitable of all the Hardware line.

Up at 610 Pike is the up-to-date store of Kleespus-Ferguson Co. This concern make a special effort to secure fine trade, especially on cutlery and tools, and carry a large, well-assorted stock.

All the Hardware dealers of Seattle seen by your correspondent reported business as booming, and it would be hard to handle any more business with the present force. Still, in many lines prices are being cut badly, and some lines, especially sporting goods, are being retailed out here in Seattle at lower prices than in New York City or Boston.

SPOKANE AS A JOBBING CENTER.

Spokane, Wash., is fast becoming a prominent business jobbing center. The country on all sides is being rapidly built up and the big ranches are being cut into smaller farms; more varied and diversified farming is being taken up, all of which is making a good demand for all building materials. And the dealers here in Spokane are carrying the stock and doing the business. It was not many years ago that the big Hardware jobbers of the Middle West were able to get and held this trade, but as the local jobber here gradually became stronger and carried larger stocks, the country Hardware dealer found that he could get his orders filled more quickly, at just as low a price, and get goods many times that were better suited to the local needs; and this is why the Spokane Hardware jobbers are all doing a constantly increasing business. This was the way in which Mr. O. C. Jensen, of Jensen, King, Byrd Co., put it. This concern are now well located in their new store, which is a model in every way, being built especially for the Hardware business. The retail store occupies the ground floor, which is one of the largest Hardware stores in the State, occupying as it does three stores, but being opened into one large room. The store is light and bright, and every up-to-date idea is used in displaying goods to advantage. The offices occupy a gallery in the rear of the main floor, while shipping is done from the rear—a well-appointed shipping room. The three floors above are devoted to wholesale stock. A big business is done in sporting goods by Jensen, King, Byrd Co., which branch is in charge of W. E. Henry, who keeps well posted as where the best fishing or shooting is to be found, and knows what is the best tackle to use.

Holley, Mason, Marks & Co. also carry on both a wholesale and retail business, and issue a thoroughly up-to-date catalogue.

The retail store of the Spokane Hardware Co. is well arranged, and much attention is paid to builders' and mechanics' trade, a large stock being carried of goods in these lines.

A pushing, progressive Hardware concern is that of McGowan Bros., who job and retail everything in Hardware and sporting goods. The latter line has only recently been added, but has been found most satisfactory. When first established McGowan Bros. did a comparatively small retail business; the trade has constantly grown until to-day the three traveling salesmen of the firm closely cover the central and eastern part of the State. Mr. McGowan said that business was very good, and that the outlook never had been better for Fall and Winter trade. A. C. Tyler is the general manager, and always has a kind word for all callers. A large business is done in heavy Hardware, as well as wagons and stoves, and, to facilitate the handling of these goods, a warehouse was erected last year on the railroad, where all the heavy goods are carried, and from which place wholesale trade is handled.

TACOMA PROSPEROUS.

The prosperity that is sweeping over this far Northwest country has not forgotten to stop here in Tacoma. Rumors of new railroad extensions that will make Tacoma the Western terminal, its fast growing manufacturing interests, the large, increasing export and shipping trade, to say nothing of a large amount of new building, are all working together to boom business in Tacoma.

The Henry Mohr Hardware Co. carry on both a wholesale and retail business, and each year are enlarging their sales. In speaking of business growth, Mr. Mohr said: "I started not so very many years ago right here in the Hardware business. I did not have much capital and you might say that all my stock was in my window. It would not be as easy to do it now. But, of course, then we were able to make better profits and the demands were not as large for a big variety of goods." Mr. Mohr has been very successful and it's due to hard work, close attention to business, good management, a thorough knowledge of customers' wants and a close adherence to the rule, "Honest Goods at Honest Prices."

The Washington Hardware Co., of Tacoma, carry a well assorted retail stock of shelf and light Hardware. The firm is composed of Messrs. Cowles and Reynolds. In speaking of trade conditions, Mr. Reynolds said: "We have no fault to find with business, and the general conditions here in Tacoma are better than for years past."

From a large number of Hardware dealers seen by your correspondent the only complaint was the one of goods being sold on too close a margin of profit, and that is no fault of conditions. It seems strange that when almost every Hardware man is doing all the business he can well take care of, that he should be willing to take on business at a margin that does not show him a paying profit.

Legal Matters

OF INTEREST TO HARDWAREMEN

RECENT DECISIONS.

(From Bradstreets.)

Defective Machinery—Negligence.

The Supreme Court of Minnesota held, in the case of Shalgren vs. Red Cliff Lumber Company, that where an employee complained to his employer of a defective condition of machinery, and the employer promised to correct such defect and directed the employee to continue his work until the repairs could be made, and the employee, in reliance upon such promise, continued to work with the defective instrumentality without harm for a period of ten days, the danger was not so great nor the risk so imminent as to impose upon him as a matter of law the assumption of the risk involved. In this case it appeared that the plaintiff's hand was caught in the shavings pocket of a shavings baler and there crushed by its advancing packer bar. It was alleged that the loose roller over which the bar passed was worn off from its cylindrical form; that thereby a plate which passed over the bar as it advanced was made to jump up and catch the plaintiff's hand while down in the pocket to adjust the board used to evenly apply the impact of the bar against the shavings. There was a conflict of evidence as to whether or not such irregular motion could have been produced by the defective or loose roller, and the court held that this question, as well as one as to whether the plaintiff was guilty of contributory negligence, was properly presented to the jury.

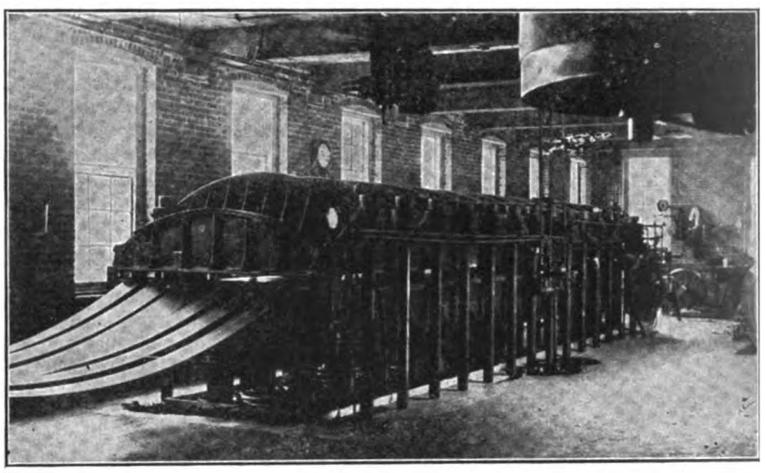
NOTE—MORTGAGE—SECURITY.

The Supreme Court of Wisconsin held, in the case of Thorpe vs. Mindeman, that the provisions of a mortgage securing a contemporaneous note which merely relate to the preservation of the security was not made a part of it so as to destroy its negotiability by the rule that contemporaneous instruments relating to the same subject matter are to be construed together.

LARCENY—CONSIGNMENT—OTHER STATE.

The Supreme Court of Missouri held, in the case of The State vs Mintz, that where the defendant induced one who had previously been employed by a dray company authorized to receive goods for a consignee of certain shoes, and who was known to the servants of the carrier holding such goods for delivery to the freight depot of the carrier in Illinois after his employment by the dray company had terminated and procure a load of the shoes from the latter, and he obtained such shoes and delivered them to a person other than the consignee in Missouri, such act constituted larceny, and was therefore punishable under a statute providing that every person who should steal the property of another in any other State and should bring the same into Missouri might be convicted and punished for larceny as though the property were stolen in Missouri.

INSURANCE—MILL—OPERATION.



The Supreme Court of Washington held, in the case of The Brehm Lumber Company vs. Svea Insurance Company, that getting shingle bolts to a mill, selling and shipping shingles therefrom, and placing some shingles in the dry kiln wilhout turning on the steam, did not constitute an operation of the mill when the machinery was stopped so as to prevent the operation of a clause in an insurance policy making it void if the property was shut down or idle for more than thirty days without permission.

AMERICAN FORK & HOE CO.'S NEW PLANT.

An immense and model plant, in which the whole Hardware trade in the lower Mississippi Valley, and west and southwest of that section, is particularly interested, is that which the American Fork & Hoe Company is establishing at Memphis, Tenn. They have purchased a tract of 15 acres of land, with substantial mill construction brick buildings, completely equipped and with steam heating and fire sprinkling system, and exceeding 75 by 1200 feet of floor space. This property has not only large track facilities for carload business, but is in the immediate proximity of the railroad freight houses. These works (one of thirteen of the American Fork & Hoe Company) are laid out on a grand scale, to provide for the rapid growth of this great and rich section of the country. A full and complete line of Light, Heavy and Special Steel Goods, as well as Wood Goods, will be made and carried in stock there, ready for delivery to the trade the coming season. These works will be in the immediate charge of men of large experience in both the manufacture and selling of Steel and Wood Goods, and the trade may feel fully assured of being promptly supplied with strictly high grade goods.

VOORHEES RUBBER MFG. CO.

In the manufacture of Rubber Belting and other rubber specialties, the Voorhees Rubber Mfg. Co., Jersey City, are noted for their superior product, which is obtained by their advanced grade of machinery, such as shown in the illustration submitted herewith. It represents one of the monster belt presses used by

them, on which they are able to manufacture the highest grades of Rubber goods only, and especially for severe service in mines, mills, on railroads, etc. All their machinery is up to date and in like proportion to the above belt press, an idea of the size of which may be had by counting the windows at the side of the building. It weighs 120 tons and has a pressing capacity of 2,500 pounds to the square inch. They received the highest award for rubber belting at the Louisiana Purchase Exhibition at St. Louis in 1904, and also the Gold Medal for mechanical rubber goods, of which they are leading manufacturers, embracing such goods as Rubber Hose, Packings, Valves and Tubing, Mats, Mattings, Gaskets, and Rubber-Lined Cotton Mill and Fire Hose.

RECENT TRADE PUBLICATIONS.

BEECH NOVELTY CO., Mansfield, Ohio, have issued a very handsome booklet giving the actual letters of commendation from their satisfied patrons who have had their Mop Wringers and Pails. The Beech Mop Wringer has been on the market for years, during which period it has made many friends, which they are pleased to show in this shape. It is very attractively gotten up. In connection with it they send us several circulars devoted to the Beech Mop Wringer, in which they say "The old method of wringing the mop by twisting with the hands leaves the dirt in the center, while our method not only excludes the water, but at the same time carries with it all impurities, leaving the mop clean." Those handling this descripton of goods should write for one of these booklets.

W. G. CREAMER & CO., 96 John Street, New York, issue a 36-page pamphlet Catalogue of Registers and Ventilators, in all the varied and conventional patterns and sizes demanded by the trade, including black and white Japanned, nickel plated, also gold, silver, copper and bronzed finish. Embraced in its contents are Lock or Asylum Registers, Improved Anchor Wall Frames, which secure the Register firmly in the wall. Creamer's patent novelty or half-convex Registers; Full Convex Side Wall Registers; Ventilating Plates and self-indicating ventilators, etc., etc. The information is presented in this catalogue that they manufacture Brass Railings for the exterior and interior of public buildings, dwellings, etc., and copper adjustable Ventilators for forcing air between decks on steamships and yachts, made to order any size.

NEW YORK ROLL WRAPPING PAPER COMPANY, 346 Pearl Street, New York, 24-page pamphlet of the Hopking Roll Paper and Cutter in all the styles; this cutter is made from 6 to 18 inches wide; this includes a large variety adapted to a number of uses.

AD. PROVERBS.

First get good goods before you advertise. The fellow who placed the wagon before the horse was a Solomon, when compared with the advertiser who thinks he can build up a good trade through selling trashy goods.

When there's a will to advertise, there's always a way. The merchant may not find the way as easily as he imagined he would, but with the aid of good trade journals, ad writers, et al., he will eventually find the right way.

Its a dry ad. that gives no prices. Perhaps such advertisers wish to convey the impression to the readers, that they are philanthropists engaged in business solely for the purpose of giving poor humanity a chance to buy at their stores.

One ad. doesn't make a business, any more than one swallow makes a summer. It requires many ads.—all good ones—to build up any kind of a retail business nowadays. One step won't take you very far, you've got to keep on going. Ads. ditto.

Never put off till to-morrow the ad. you should run to-day. Some merchants are always going to advertise next week. To listen to them, one would think, with Uncle Rastus, that "it 'pears nex' week is goin' to be a mighty pow'ful busy time."

Too many words spoil the ad. A little white space in an ad. makes it stand out prominently on the printed page, but with some ads the more white space the better for the advertiser, as then there is less chance for him to prove his foolishness by his words.

Space in need is a "cinch" indeed. The merchant who advertises all the year, who pays advertising bills promptly, will have no difficulty in getting choice positions from the publisher and all the space he can use around the busy seasons, while his competitor—the-once-in-a-while advertiser—will have to take the "leavings" in space, or go without.

Lots of fellows reach third base only to die there—like some new advertisers who think they have a sure thing and then lie back.

Some advertisers try a paper three times and quit. Remember the times the bases have been full, when a fellow swats the ball out and brings them all home.

Just because business is good some men think they can get along without advertising, but they'll not condemn fire insurance simply because they haven't had a fire since they took out their policy.

Advertising is a trade tonic that can be depended upon to remove sluggish stocks if given in doses of the proper size, at the right intervals, and through the proper mediums.

Don't deceive yourself. A trolley car will back down hill if the current is cut off—so will your business if the advertising is cut off.

Nobody has a mortgage on success. There hasn't been a thing done since the world began that cannot be duplicated. and this applies to the advertising world as well as anything else.

When Alkali Ike visited New York and Delmonico's for the first time he ordered "$20 worth of ham-and-eggs—just to show them he was no piker." Some advertisers apparently use big space for similar reasons. Simply as a bluff—a splurge—a proof of nerve. The doctrine of big space is all right—*provided* the advertiser gets something to show for his money. "Something is show" means filling the dearly-bought space with facts, reasons, convictions.

Knock not at all.

He that knocketh shall himself be knocked, and with a much heavier hammer withal shall he be knocked than that wherewith he himself did knock.

Yea, if in his advertisements, he knock his competitors, even with a tack hammer, the public shall rise up and knock him with claw hammers and sledges. Yea, verily, they shall maul him with mauls.

Speak up! Advertising is the voice of business, nothing more. Use it to say something for yourself. If all the stores in your town are silent there is a rare opportunity for you to become articulate. If half of them are talking, the silent half will have little attention—be not one of them. If all are talking, endeavor to speak out above them all. This is a bustling world; bashfulness and silence are not business virtues. The business man who thrives is the one who has an advertising voice and uses it. So speak up!

Did you ever happen to be riding on a train through the country when a farm dog would rush out and run along after the car, barking to the fullest capacity of his lungs? The dog attracts a little attention from the passengers at first, but the train soon pulls away from him, and he and his wail are soon lost in the distance. The train hasn't been injured a particle, but the dog is tired and out of wind. The owner of the dog doesn't like the train because the engine sometimes scares his stock. But when he wants to go any place he goes to the station and pays his fare for a ride, and when the train hauls express to the town with his address on it he never refuses to accept it.

Well, that dog is just like a whole lot of men in this world. They lose no opportunity to bark at the trains of successful newspaper men in Kansas, but every once in a while some little fellow will jump up and with his handbill commence to bark at the big paper. The people listen to him and may side with him for a while, but when they want to go any place or send anything away they always go to the big paper. The dog imagines that the train is running away because it does not fight back, but the train is always back the next day. And it will continue to come around long after the dog is out of wind and has gone to the happy hunting grounds.

So when you get into a field don't bid for business with a bark at your competitor. In this present rush of business affairs people have no time to pay attention to a barker. Attend strictly to your own knitting, and saw wood, and after a while you will get big enough so you won't have to bark.

MODERN EDGE-TOOL MAKING.

The suppression of hand labor by mechanical processes in the old craft trades of Sheffield continues to make rapid progress, says the Ironmonger, and we are able to report a further development of this tendency which possesses peculiar interest, since it relates to a branch of industry which has been regarded as quite outside the application of machinery. We refer to the making of edge and joiners' tools. The term covers a wide range of goods which present many variations of shape, and are required to perform work which necessitates the highest effectiveness and durability. Machinery, however, lends itself more to straightforward work, and is most valuable on repetition articles. Until very recently, therefore, the opinion was stoutly and almost universally maintained by makers of edge and joiners' tools that whatever might happen in other industries it would be impossible to use machinery to any appreciable extent in their trade. That belief has now been completely shattered, and if the innovations carried out in one or two of the Sheffield works be followed generally, hand labor will play but a minor part in the production of the goods referred to in the near future.

A Sheffield tool works in which machinery had been introduced presents more the appearance of an engineering establishment than the home of one of the oldest of the city's handicrafts. Nearly every kind of cutting tool was being forged under power hammers, some of them of a special and ingenious design. Chisels, bits, and even plane irons were included, the most awkward shapes being successfully formed. The familiar forger and striker with their anvil and hearth had been dispersed in wholesale fashion, the machines which rendered them unnecessary being tended by young fellows who had undergone but a brief training for the work. Milling machines were extensively employed in forming teeth and cutting parts of tools, and turning out grosses more quickly than dozens under the old system when such processes were done by men using a file. Special machines had been installed for performing several other minor processes and the effect of the whole innovation has been enormously to economize production, and to place the makers on more equal terms as regards cost with their rivals abroad, who have enjoyed the advantage of machinery for years. In other similar works in the city machinery is being gradually introduced, and skilled workmen are being sent adrift. It is unfortunate for these men that few of them are able to adapt themselves to the new conditions, the result being that the victims of the industrial revolution which is in progress are increasing. The employers are certainly doing their best to mitigate the hardships which progress imposes on the few, and it is a fact that scarcely any apprentices have come into the trades for a number of years. The change means a serious increase to the capital outlay of the firms concerned, and owing to the enormously increased output they will have to seek for a corresponding increase of turnover.

A similar and even more drastic revolution is proceeding in the razor trade on account of the introduction from Germany of machinery for grinding blades hollow. To grind hollow blades by hand is a slow and costly process, but the machine turns them out with marvelous rapidity, and in such a condition that they can be quickly finished off by a trained youth. The blades are also forged by mechanical hammers. By these means the cost of producing razors has been greatly reduced, and already the firm possessing the plant we are referring to has been able to reopen accounts in the United States which had been closed for years in consequence of German underselling. More razors are bought per head of population in the United States than in any country in the world, and the Germans have captured a large slice of the trade with improved facilities for cheap production combined with high finish. Sheffield razors should soon regain their footing in that valuable market. Many razor grinders and forgers are earning very scanty wages or even nothing at all, and it is stated that some of them have punished themselves unnecessarily by refusing to follow the machines.

RECENT TRADE PUBLICATIONS.

WHITMAN & BARNES MFG. CO., Chicago, Ill. Catalogue of Diamond Hay Carriers, together with Forks, Pulleys, Slings and Supplies. A pamphlet catalogue of 20 large pages, showing on each and every page the many styles of Carriers made by them, and the several parts thereof needed for repairs. Together with the Harpoon and Lock Lever Forks used in connection therewith; and a large line of Pulleys in great variety, demanded by this class of trade.

MOSS MANUFACTURING CO., Baltimore, Md. Circulars showing the latest improved Pulley Mortising Machines, Boring Bits and Pulley Gauges made by this company. Cuts are also shown of the Pulleys that are made to be used by this Mortiser, which are presented as an additional circular, all of them actual size. Suitable for any want of the builder in Public Buildings and other large edifices, and suitable to be used for Sash Cord, Cable or Chain.

THE ADVANCE MACHINERY CO., Toledo, Ohio, have issued a catalogue of Copper Appliances in great variety, such as those necessary for heating Glue, which are scientifically constructed from the largest in dimensions to the smallest in size. This catalogue is devoted to a variety of appliances for the scientific heating of glue, and they are especially adapted for the use of Endless Belt Makers, Pattern Makers, Book Binders, etc., where a limited quantity of glue is required and easy portability desired.

THE KILBOURNE MFG. CO., Troy, N. Y., have recently issued an illustrated catalogue of Strainers and other Specialties, which they say are not shown in their regular Wire Goods and Hardware Specialty Catalogue. This includes Black Enamel Handle Strainers, Wire Handle Strainers in large varieties, Tea Strainers, Tea and Coffee Balls, Bowl Strainers in large variety. It also includes nickel-plated Towel Racks and Bird Cage Hooks, which they manufacture. They also include a circular called "A Long Distance Telephone Call," which is cleverly gotten up.

ART METAL CONSTRUCTION COMPANY, Jamestown, N. Y., have presented to their patrons and customers a large and very handsome book exploiting their Metallic Filing Devices, Fixtures and Furniture for public buildings and general fire rooms. The product is built to meet the fundamental requirement for such equipments—incombustibility. It has other merits: Durability, convenience, attractiveness, economy of space and perfect sanitation. They claim no fixtures are so impervious to moisture, dust, microbes and vermin; none so readily kept clean. The material chiefly employed in the production is fine steel plates. It is now generally recognized that the first essential to a good filing system is that of security. Metal, therefore, is rapidly superceding wood for this purpose. This fact is attested by the very large growth in these lines during the past decade. Art Metal Construction Company solicit inquiries, and estimates and submission plans for any work will be furnished on application.

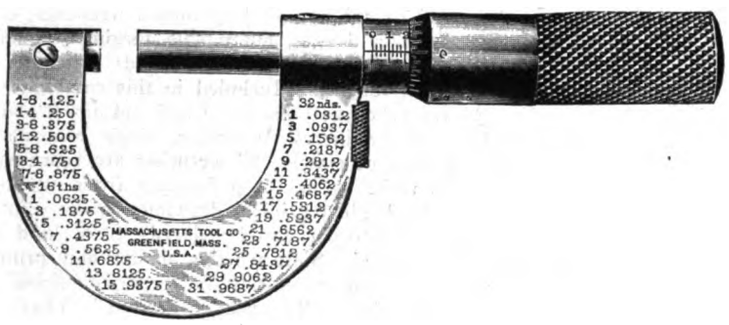
HENRY DISSTON & SONS FILE COMPANY, Philadelphia, Pa., have issued a large and pretentious price list of Files and Rasps which they have recently sent out to the trade. They state that in publishing this book they have endeavored to illustrate the different shapes and cuts of files most generally used. This will enable the customer to readily determine the file required for a particular purpose, and save both the dealer and buyer considerable trouble by enabling them to specify correct names, etc. The Disston brand files are made of the finest crucible steel. They are the only manufacturers in the United States who make the steel from which their files are produced, and thereby are enabled to secure an absolute uniformity of quality. The blanks are carefully forged to the most approved patterns adapted for the various classes of work. A number of shapes were originated by them, such as the Great American Cross-Cut Saw File, Chisel Point File for inserted teeth, Acme, with safe back for filing handsaws, etc., which are accepted by the trade as regular stock goods. The teeth are formed to give the greatest amount of strength, with sharp, keen, cutting edges, and at the same time to allow sufficient clearance to prevent clogging. Hardened by their special process, which imparts strength and durability, they state they are warranted in making the claim that for wearing qualities the Disston Brand Files are unequalled. Send for one of their Price Lists.

JOHN B. VARICK CO., Manchester, N. H., issue a stiff hanger in which they advertise "Sporting goods of every description," and add a synopsis of New Hampshire and Vermont Game Laws 1905 and 1906, which conveys information enough to warrant its being kept by the party who receives it.

INDIANAPOLIS DROP FORGING CO., Indianapolis, Ind., have recently issued a special catalogue of drop forged wrenches, combination pliers, ammonia flanges, automobile forgings, connecting rods, chisels, punches, and such other goods as come under the head of drop forgings. Included in this catalogue are "Always Ready" Wrenches, both black finished and nickel plated; Tiger Wrenches and Engineers' Wrenches, single and double head in a great variety of sizes. "S" wrenches are represented largely. They also make special drop forgings from estimates. They say "Send us model, blue print or drawing of piece wanted; state quantity for which order will be placed. State kind and quality of material wanted. State whether model, blue print or drawing shows 'forged dimensions' or 'finished dimensions.' If the latter, state how much allowance is desired." They also state that "All drop forgings made by us are inspected before leaving our factory. We guarantee workmanship and material, and replace without charge all defective forgings."

OLIVER IRON & STEEL CO., Pittsburgh, Pa., have recently issued their Standard Price List No. 32, which they call the Wagon Hardware Edition, and which is a pamphlet catalogue of 46 pages. Included in the contents are bolts, nuts, washers, picks, mattocks, grub hoes, etc. They say, "We are the pioneers in the line of Wrought Iron and Soft Steel Wagon Hardware, being the first to make this specialty a merchantable commodity, and having made the product a study for over thirty-five years. We believe we can safely guarantee our specialties in this line superior to any made." Included in this catalogue is every description of Hardware needed for wagon manufacture, and to those handling this class of goods it is a very valuable catalogue. They accompany the same with a Standard Price List of Telegraph and Telephone Line material, which is a pamphlet catalogue of 75 pages to which they refer. "In handing to the trade this edition of our 'Telegraph and Telephone Line Construction' Price List, we desire to call attention to the fact that, in addition to the material listed therein, we are in position to furnish promptly Railroad Track Screw Spikes, Drift Pins, Car Forgings and other kinds of material for the construction, equipment and maintenance of railways, as shown in our General Catalogue." They give an easy method of using code words in telegraphing, which is original with them. Embraced in this catalogue is every description of Hardware that would be embodied in the title, such as Terminal Pins, Cross Arm Braces, Cross Arm Bolts, Brace Bolts, Eye Bolts, Staple Bolts, Steel Guy Clamps, Etc. Write for catalogue.

THE H. C. TACK CO., Cleveland, Ohio, have issued a catalogue which they illustrate in colors of the number of styles in which they furnish tacks to the dealers. It is a very pretty catalogue in pamphlet form of 64 pages, and is devoted to their goods put up in attractive selling forms, all of which are illustrated in colors in this pamphlet. It embraces a great variety of tacks and small nails among the many different trade names by which they are known, such as Cut and Carpet Tacks, Cheese Box Tacks, Double Pointed Tacks, Furniture Nails, Hob Nails, Hungarian Nails, Etc. They put up Carpet Tacks in a number of attractive styles, such as Buck Eye, Golden Eagle, Honest Count, Standard Time, Indian Head, Colonial, Etc., which are demanded by the trade. Add this catalogue to your assortment.



M. EBERHART & SON COMPANY, First Avenue and Seventy-sixth Street. Catalogue of imported and domestic specialties, including nudel cutters, bean cutters and dog clippers; with which is included a number of American specialties of acknowledged merit. A circular directs attention to an evolution in razor grinding, showing an improved method patented in 1902, in the use of which absolute satisfaction is guaranteed.

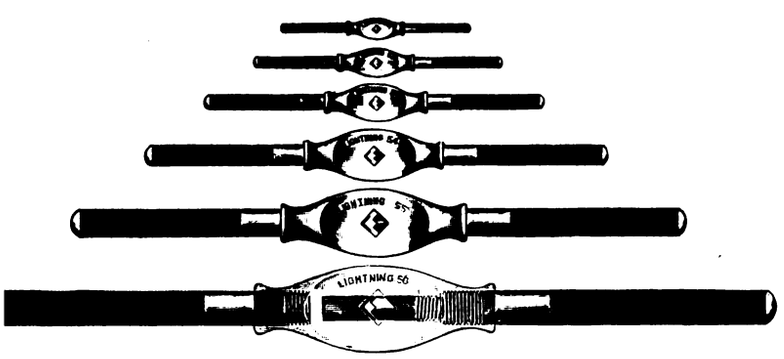
NEW GOODS AND SPECIALTIES.

ONE INCH MICROMETER CALIPER NO. 12.

The Massachusetts Tool Co., Greenfield, Mass., are manufacturing a line of Micrometer Calipers with the merits of which the Hardware trade should become familiar. Their One Inch Micrometer Caliper No. 12, an illustration of which we present herewith, is shown nearly full size, has frame drop forged from steel bar. Has decimal equivalents stamped on frame. Has every necessary compensation for wear, and the following special



ONE INCH MICROMETER CALIPER NO. 12.

features: An eccentric locking device, convenient to operate, and which holds the screw at any desired position where transfers are desired. A square end thimble, designed to meet the ideas of those preferring this style. A Finer Graduation than is usually found upon Micrometers, is being marked for reading half-thousandths. A hardened cast steel spindle running in a hardened steel bushing, obviating any possible chance of roughing up or wear. A Hardened Steel Anvil, having face, shoulder and stem in perfect alignment with spindle and admitting of accurate adjustment from this end. They also manufacture this caliper with metric measurements. No. 12 M. prices same as No. 12.

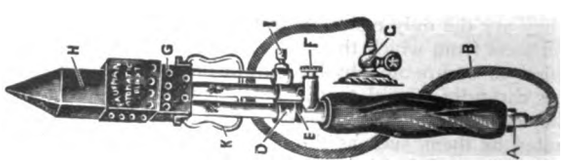
A NEW TAP WRENCH.

The Wiley & Russell Mfg. Co., of Greenfield, Mass., have recently put on the market a new departure Tap Wrench. The accompanying cut shows this handsome and strong tool. This was gotten out with the view of furnishing a strong and handy wrench and also one that would sell at a price within the reach of every machinist and manufacturer. This tap wrench em-

bodies entirely new principles in regard to the working of the movable jaw, so as to obtain the greatest strength, and, at the same time, to have a very light and well-proportioned tool. The strength of this new tap wrench can readily be realized, as during the tests it was subjected to, as many as four men pulled with all their strength and it was found impossible to distort it or even throw jaws out of line. The detailed description of this wrench is as follows: The stocks are drop forged; the jaws of tool steel; the handles of finest bicycle tubing, capped and knurled. A quick motion to the jaw is given through differential screws by turning one handle. The tap is firmly gripped and cannot drop out. There are six sizes made, holding taps from the smallest to the 1½-inch diameter.

YALE SAUSAGE STUFFING, LARD AND FRUIT PRESS.

The Johnson Foundry and Machine Works, Battle Creek, Mich., are introducing through the Hardware and house furnishing trades the Yale Sausage Stuffing, Lard and Fruit Press, of which we give an illustration. The "Yale" Press is constructed of a steel cylinder, with convex steel bottom, which gives it great strength and facilitates the operation of pressing. It rests upon feet of malleable iron, into which clamps may be

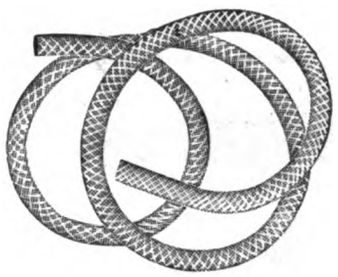


YALE SAUSAGE STUFFING, LARD AND FRUIT PRESS.

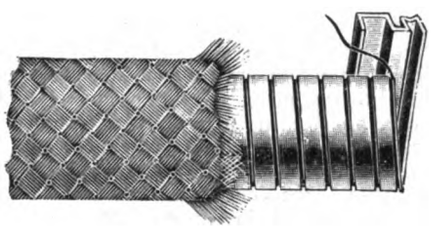
affixed for attaching firmly to any table. The top of the cylinder is provided with malleable iron ears, into which the beam, also of malleable iron, is hinged. The pins which retain the beam, are of malleable iron, and chained to the ears. The screw is provided with hand wheel to which a crank may be attached, for the purpose of exerting leverage upon the wheel; thus the screw is turned with ease. To the end of the screw is attached a steel concavo-convex follow-head, fortified by malleable spider, which will withstand any necessary pressure exerted upon it. The colander, of steel, fitted within the cylinder, is provided with handles for the convenience of removing it during the operation of pressing. The whole apparatus is finished with a heavy plate of tin, which will wear as long as the press itself. Thus all parts are constructed with a view of providing a press from the best material, with best workmanship, of greatest convenience, utility and strength. It is made in three sizes, 2, 4 and 8 quart; the 4 and 8 quart being provided with the Sausage Stuffing Attachment, but the 2 quart size is not.

KAUFMAN'S SELF-HEATING SOLDERING TOOLS.

A. G. Kaufman Manufacturing Co., 24-26 Murray Street, New York, are introducing to the trade the Automatic Blast Self-Heating Gas Soldering Tools. A practical improvement that in its work does away with the obnoxious furnace, troublesome



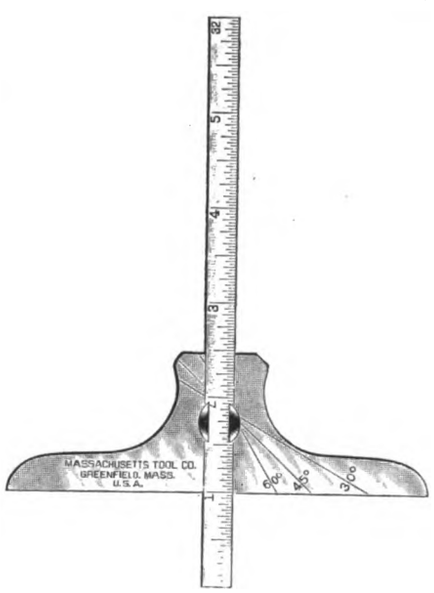
SELF-HEATING SOLDERING IRON.



blower and dangerous fire pot. The tool consists of specially constructed double air blue burners (patented), on one side of which a handle and the other a copper point is adjustably attached These burners generate a tremendously hot and Powerful Blue

Digitized by Google

Blast, which plays on the underside of the copper, bringing the soldering point to the desired temperature in a few minutes, keeping a steady heat throughout the day. A flexible tubing of any desired length is attached from the gas main to the handle. The

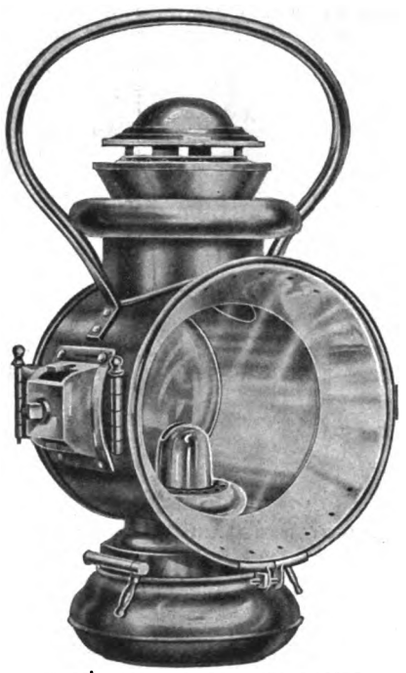


gas and air passing through the conducting tube directly to the burner can be regulated according to the weight of copper required. The flame is protected by an iron guard and the tool can be placed by means of the adjustable rest anywhere on the

bench without danger to fire. They can be placed anywhere depending upon the length of tubing and they take up but little room on the bench. The tools are adaptable for machine, coal and natural gas. Both the air and gas are adjusted independently of each other, therefore adaptable for various purposes.

RULE DEPTH GAUGE.

Among the high-grade tools manufactured by the Massachusetts Tool Company, Greenfield, Mass., is a Rule Depth Gauge, of which we give an illustration herewith. This Depth Gauge is made with 4-inch or 6-inch narrow tempered steel rule. Blade can be turned parallel with base, so as to occupy but little room



RULE DEPTH GAUGE.

in the tool chest, or it can easily be carried in one's pocket. Head is graduated with lines showing 30, 45 and 60 degrees. It can be made a useful T square. Rule graduated in 1-32 or 1-64.

HAM'S COLD BLAST AUTO LAMPS.

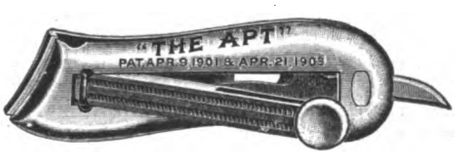
Among the lamps constructed for special purposes, made by the C. T. Ham Mfg. Co., Rochester, N. Y., John H. Graham, Agent, 113 Chambers Street, New York, the Cold Blast Automobile Lamp, so called, is exciting the most attention. To overcome the disagreeable features and weak points usually found in oil lamps, they have, in constructing their Auto Lamps, embodied the well-known principle which they have invented and applied, called the cold blast, which provides a forced supply of fresh air to the burner, thus insuring plenty of oxygen to feed the flame and producing a strong, brilliant and powerful white light. We present an illustration of the Auto Cold Blast Lamp, "Aurora," which is handsome in appearance and finish and possesses a

HAM'S COLD BLAST AUTO LAMPS.

combined strength and sturdiness of construction to withstand the hard usage an Auto Lamp is necessarily subjected to on account of the jolting of the machine in passing over rough roads. Heavy brass is used in its manufacture and all parts are securely riveted; wherever there is an extra strain the parts are strongly reinforced. Its dimensions are as follows: Extreme length, 8 inches; extreme height, 14 inches; height to top of dome, 12 inches; diameter of flange, 6½ inches; diameter of front glass, 6⅜ inches.

SMITH'S LINEMAN'S CLIMBERS.

H. D. Smith & Co., Plantsville, Conn., are making a superior article of Lineman's Climbers, which they are engaged in marketing through the Hardware and Electrical Supply trade, as shown in the cut herewith. They are made of the very best material, such as experience has proven to be the best for the



LINEMAN'S CLIMBERS.

purpose, and are fully guaranteed. The Spur is of the finest, of proper weight and length, properly angled, and of Whalebone temper, which is claimed to be the "toughest of tempers." Where the foot rests they are made broad and comfortable. They are made in sizes running from 15 inches by ½ to 18 inches.

THE APT NAIL CUTTER.

Louis A. Boettiger, of 48 Leonard Street, New York, is the manufacturer of the Apt Nail Cutter, of which we give an illustration. It is a useful little appliance, made from the best tool steel, hardened and tempered, and provided with self-sharpening

THE APT NAIL CUTTER.

jaws. The cut we show is full size and the cutter can be conveniently carried in the vest pocket. The nail cleaner slides into frame when not in use, and it may be used equally well in

Digitized by Google

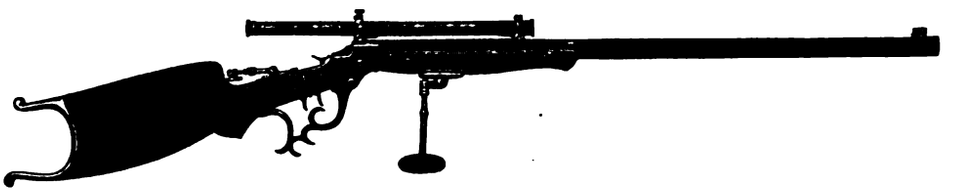
either hand. They are handsomely nickel-plated, and with every dozen sold the manufacturer provides an attractive display stand, with nickel-plated base and aluminum disc.

THE ACME BROOM AND DUST PAN HOLDER.

E. E. Josef Mfg. Co., Buffalo, N. Y., are the manufacturers of this little device, which they are introducing through the trade. It is intended to screw up in some convenient place, about 5½ feet from the floor, where the housekeeper can prevent her broom from getting out of shape by using the device and suspending the broom therein. Can also be used to securely hold the dust pan as well. They are made to be sold at a moderate price.

THE ACME BROOM AND DUST PAN HOLDER.

FLEXIBLE FLYER SLED NO. 6.



S. L. Allen & Co., 1107 Market Street, Philadelphia, Pa., have this year increased their line of Flexible Flyer Sleds by adding the one which we present in the illustration herewith. They previously made but five sizes of this sled, but the one exhibited is designed to carry six adults and is intended to compete especially with double runners or bob sleds. It is mentioned by the makers as being particularly fast but especially strong and light. The No. 6 is 101 inches in length, 8¾ inches high, 16 inches wide and weighs 41 pounds. It is steered in the same style as the other sizes of these sleds, without touching the feet to the snow or ice.

FLEXIBLE FLYER SLED NO. 6.

STEVENS-POPE TELESCOPE RIFLE.

We present herewith an illustration of the famous Stevens-Pope Rifle, equipped with Stevens Telescope, and manufactured by the J. Stevens Arms & Tool Co., Chicopee Falls, Mass. This model and the Stevens Ideal "Schuetzen" Rifle have scored such a remarkable series of consistent, notable victories during the past year that they have been declared to be practically invincible at competitive target shoots. At the National Meet of the Sharpshooters, known as the Bundesfest (Union Hill, N. J., June, 1904); at the U. S. .22-Caliber Rifle League Competition (Pittsburgh, Pa., January, 1905), at Zettler Club Shoot (New York City, March, 1905), at Charleston, S. C., Schuetzen Verein Jubilee (May, 1905), and at New England Shoot of Rifle Clubs (held at Springfield, Mass., August, 1905), Stevens and Stevens-Pope Rifles carried off Premier Honors by an overwhelming majority in each instance and strikingly demonstrated their marked superiority in every particular. The Stevens always put the shots where most needed. In the hands of a marksman they are an unconquerable factor at every competitive shoot in which they are entered. With the exception of the Charleston, S. C., and Union Hill, N. J., tournaments referred to above, the use of Stevens Telescopes was permitted in each of the important National Contests enumerated, and materially contributed toward raising records. The field for this most efficient and practical accessory is rapidly expanding—the day is not far distant when the Telescope will be just as popular and essential at a tournament as a Stevens Target Rifle is itself. Stevens Target Rifles are all listed in Stevens Catalogue No. 51. The Stevens-Pope Model, fitted with Stevens Telescope, is illustrated and described in detail on pages 20 and 21 of Stevens-Pope Catalogue. Stevens Rifle and Pistol Telescopes are fully described in a special telescope catalogue—beautifully printed and illustrated. Any or all of these valuable reference books will be mailed upon application to J. Stevens Arms & Tool Co., Chicopee Falls, Mass., U. S. A.

STEVENS-POPE RIFLE EQUIPPED WITH TELESCOPE.

SWISS TARIFF RATES.

Consul-General Guenther, of Frankfort, Germany, writes that the Swiss Diet has decided to allow, from January 1, 1906, goods from the United States to enter under the rates of the Swiss treaty tariff. Hitherto many of the products of the United States were only admitted upon paying the customs rates of the Swiss general tariff, which rates were much higher. This new departure secures to United States products the most-favored-nation clause. The action was no doubt induced by the conviction that the loss of the United States market for Swiss manufactures could not be made up and would injuriously affect Switzerland's economic life.

CONDITIONS IN CHINA.

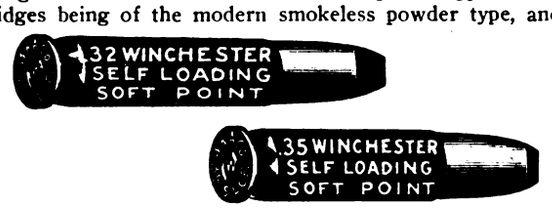
Consul Cloud, of Hangchow, in answer to numerous inquiries from the United States about the real conditions in China, writes:

Hangchow is a city of 500,000 or more people, and was made an open port at the close of the Chino-Japanese war in 1896. At present, however, there are no foreign firms, aside from a few Japanese notion shops in Hangchow, and the immediate future does not promise any change in this direction. The amount and value of imports during these few years have nevertheless increased greatly and there appears to be scarcely any limit to the possibilities of the import trade in this region.

Hangchow is not a seaport, and all, or nearly all, of the goods imported are purchased from Shanghai jobbers and reshipped at that port. As far as I can learn, no goods are imported direct from America or from any other foreign country. The fact that the native merchants can find in Shanghai by personal purchases the kind and quality of goods most suited to their customers, and thus see just what they are buying and at the same time secure favorable terms of credit, renders it undesirable on their part to import the goods on their own responsibility.

ARTICLES THAT ARE NEEDED.

There are large lines of goods, such as notions, toys, kerosene lamps, straw hats, clocks, watches, garden tools, shoes, rubbers, patent medicines, kodaks, photographic supplies, cheap motor-boats, soap, towels, tinned provisions, etc., that would find a large market here, if these various articles could be placed directly before the people by live, up-to-date salesmen, and then followed by persistent and intelligent advertising. But the present practice of American firms of sending out catalogues in English to the various consulates, with the idea that they will reap a rich harvest, is as foolish as it is expensive. Not one Chinese in 100,000 can read English, and if he could, would not understand what it was all about, for the reason that the article advertised would be new to him.



The Chinese, for the most part, are coming to appreciate foreign-made goods, and are only waiting to be shown what a given

Digitized by Google

article is made for and how it will add to their comfort and convenience. For foreign firms to depend on elegantly printed and embossed catalogues in the English language to secure trade in China is to follow a policy based on utter misapprehension as to the requirements of trade in China. The opportunities are here, and the firm or firms willing to spend a few thousand dollars in putting agents out among the Chinese to show their wares and mix with the people, and who, too, are willing to make a class of articles especially adapted to the needs of the Chinese, are the ones that will reap rich harvests in the next few years.

A NEW WINCHESTER RIFLE.

The Winchester Repeating Arms Co. announce through their advertisement this week a new gun called the Model 1905 Self-Loading Rifle. The new rifle is made in .32 and .35 calibres, the cartridges being of the modern smokeless powder type, and are

A NEW WINCHESTER RIFLE.

furnished with either full metal patched or soft point bullets. The ballistic data given in the announcement indicates that the new cartridges are desirable both for hunting and target shooting. The operation of this rifle should not be confounded with that of machine guns, which reload and fire to the extent of their magazine's capacity without stopping after the trigger is first pulled. In using the Winchester Self-Loading Rifle, it is absolutely necessary to pull the trigger for each shot, which places its operation as completely under the control of the operator as that of any repeating rifle. The self-loading system permits rapid shooting with great accuracy, and on account of the ease and novelty of its operation adds much to the pleasure of shooting at either target or game. The Winchester Model 1905 Self-Loading Rifle is made with blued trimmings and a plain walnut stock, and forearm not checked. The barrel is round, 22 inches long and is fitted with Sporting front and rear sights. Octagon or half octagon barrels, or barrels longer than 22 inches cannot be furnished for this rifle. The stock is 14 inches long and finished with a rubber butt plate; drop at comb, 1⅜ inches; drop at heel, 2¾ inches; length of gun over all, 40 inches. Fancy walnut stocks and forearms, plain or fancy walnut pistol grip stocks, checked or unchecked, and stocks having special length or drop can be furnished for this gun when so ordered at the same prices as for other models.

WINCHESTER MODEL 1905 SELF-LOADING RIFLE.

♣

A. GEISEL MFG. CO., St. Louis, Mo. Catalogue of pieced tinware and galvanized ware for the trade. Japanned ware and shallow and deep stamped ware of all the accustomed styles. Included in the contents are stove sets and dripping pans in large variety. The catalogue comprises 96 pages and contains the usual assortment of these various styles of goods.

THE OAK RUBY.

The South Erie Iron Works, Erie, Pa., the manufacturers of the celebrated Parlor Stove called the "Oak Ruby," which is manufactured for hard coal, soft coal, coke or wood, and of which we present an illustration. The constituent features of this stove include a heavy inside fire pot, which, connected with a combination duplex and shaking grate and hot blast ring, forms an important feature. It is provided also with a large magazine and a large bailed ash pan. Among the nickel trimmings with which the stove is provided and which adds so much to its ornamental beauty, is the heavy nickel ring, the nickel swing top, foot rail and door panel. It has also nickel screw bars and hinge pins. It is made in three sizes, Nos. 2-18, 2-16 and 2-14, and can be furnished with or without the inside fire pot or magazine. The manufacturers state that prices will be quoted upon application.

SPECIAL BRANDS.

Referring to Special Brands, J. E. Janssen, of Eureka, Cal., writes as follows:

In my opinion the matter of Special Brands in jobbers' hands cannot be approved, nor can it be entirely condemned. That the jobber's own interest is the prime motive cannot be gainsaid. When the Manufacturers' Standard Brands—especially in Mechanics' Tools—are crowded out to aid this practice, it must prove a distinct cause for protest on the part of the retailer. The last thing that could be expected of the progressive retail dealer is to attempt to convert his customer to the use of Special Brands.

The faith of any user of a manufactured article is unavoidably increased by having the name of the manufacturer identified with it. With limited exceptions the jobber has not so far become known as a manufacturer. The small country trade especially in farming sections probably does not draw the line very close as to brands; but it would be absurd to assume that intelligent mechanics would readily accept substitutes for their particular requirements, and whenever the retail dealer finds that he cannot procure the desired article through the jobber he will be sure to do so through some other channel. On the other hand the mechanic, if backed in his wishes, will be tempted to apply to the Catalogue House.

THE OAK RUBY.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

WHEN WE TELL YOU

that JAP-A-LAC is positively the best selling colored varnish made, you may wonder if it is true.

We don't hesitate to say it. Here are a few points which ought to convince you.

JAP-A-LAC has over TWO HUNDRED THOUSAND DOLLARS in advertising back of it. The consumers know about it and buy it.

JAP-A-LAC is being ADVERTISED EVERY DAY in the year. More people are learning about it and asking for it.

JAP-A-LAC is unquestionably the BEST QUALITY colored varnish on the market. When a woman uses one she comes back for more.

JAP-A-LAC is EASILY APPLIED and DRIES QUICKLY. Women like to do their varnishing with JAP-A-LAC.

JAP-A-LAC may be used for finishing EVERYTHING ABOUT THE HOME—and is.

JAP-A-LAC has MILLIONS of FRIENDS and sells itself. You don't lose a minute's time talking about it, "Time is money."

JAP-A-LAC MAKES CUSTOMERS for you—when you handle it. A JAP-A-LAC customer bought $50.00 worth of other goods from a dealer a few days ago; he said so.

JAP-A-LAC is put up in SPECIMEN ASSORTMENTS of $26.46 each. If that's too much, try a $10.00 ASSORTMENT. Send us your order for one of them to-day; you'll begin to reap your profit when the goods arrive.

CLEVELAND, OHIO

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED AUGUST 14, 1905.

387,738. DOOR CHECK. W. D. Scarborough, Pennington, Tex.
387,781. WINDOW SCREEN. G. H. Gould, West Lebanon, Me.
387,873. WRENCH. H. T. Glazebrook, Simcoe, Ontario, Canada.
387,905. SAD IRON. H. S. Pease, Cincinnati, Ohio.
387,942. LEMON JUICE EXTRACTOR. E. Baltzley, Philadelphia, Pa.
387,976. LANTERN. W. W. Hutchins, Newport, Vt.
388,000. COUNTERSINKING SCREW. J. T. Rider, South Oil City, Pa.

PATENTS EXPIRED AUGUST 21, 1905.

388,074. DOOR CHECK. Dennis A. Reardon, South Boston, and Charles A. Gardner, Hyde Park, Mass.
388,111. PRUNING IMPLEMENT. Andrew Bethscheider, Hebron, Neb.
388,114. WASHING MACHINE. David K. Breazeale, Rayne La.
388,125. CORKSCREW. Leroy W. Fairchild, New York, N. Y.
388,148. ADJUSTABLE CHAMBER GAUGE FOR DRAWING KNIVES. Hazen H. Perkins, Kewanee, Ill.
388,170. SKATE. John H. Young, Concord, N. H.
388,197. HANDLE ATTACHMENT FOR FILES AND SIMILAR TOOLS. Daniel Harkins, Hudson, Mass.
388,352. LEMON SQUEEZER. Charles M. Foottit, Marlow, County of Bucks, England.
388,376. CARPET SWEEPER. Hiram W. Ruton, Goshen, Ind.

PATENTS ISSUED AUGUST 22, 1905.

797,546. WRENCH. L. F. Atkinson, Battle Creek, Mich.
797,560. WRENCH. H. J. Conrath, Marietta, Ohio.
797,595. WRENCH. G. McKercher, Jackson, Mich.
797,609. TOOL HANDLE. E. A. Schade, New Britain, Conn.
797,660. COOKING DEVICE. S. R. Brooks, Alleghany, N. Y.
797,662. WRENCH. F. G. Cornell, Louisville, Ky.
797,795. SOAP RETAILER FOR WASH BOARDS. J. Derr, Toledo, Ohio.
797,836. PIPE WRENCH. W. H. Brock, Seaford, N. Y.

PATENTS EXPIRED AUGUST 28, 1905.

388,409. HINGE. J. M. Grau, Fort Leavenworth, Kan.
388,500. COOKING VESSEL. C. J. Parker, Alberton, Md.
388,599. STEP LADDER. O. M. Sweet, Silver Creek, N. Y.
388,710. MOP WRINGER. E. H. Noble and C. E. Warren, Postville, Iowa.

PATENTS ISSUED AUGUST 29, 1905.

798,113. LAWN MOWER. J. Peterson, Colorado Springs, Colo.
798,117. STEP LADDER. H. C. Rush, Dawson, Pa.
798,125. TOOL HOLDER. W. N. Ager, Cleveland, Ohio.
798,134. CONVERTIBLE BRUSH AND MOP HOLDER. M. R. Kelley and S. C. Sutton, Wilette, Tenn.
798,144. ASH SIFTER. E. McCauley, Newport News, Va.
798,209. KNOB FOR DOORS AND LATCHES. B. Phelps, Seattle, Wash.
798,303. NUT HOLDING WRENCH. A. Schurr, Jr., Lloyd, Mont.
798,325. WRENCH. G. H. Daddysman, Jr., Washington, D. C.
798,388. LADDER. J. H. W. Bodendieck and Van E. Pribble, East St. Louis, Ill.
798,412. COMBINED HOE AND EDGE TRIMMER. J. C. Hough, Dallas, Texas.
798,424. MONKEY WRENCH. J. S. Laitinen, Columbus, Ohio.
798,583. DOOR BOLT OR FASTENER. S. L. Harris, Proctor, Vt.

THE WHITMAN & BARNES MANUFACTURING CO., Chicago, Ill., have issued their Lawn Mower Catalogue for 1906 in pamphlet form, in which are illustrated various Lawn Mowers that will be their product the coming season. They have added to the line the new Diamond Ball Bearing and new Electrical Ball Bearing Mowers, and they now have a very interesting line of mowers, one worthy of the attention of all dealers. The final pages of the catalogue are devoted to showing the details of the ball bearing devices and the adjusting and locking devices used on these mowers.

REVIEW OF THE MARKETS.

WIRE NAILS: There was a large number of orders placed for Wire Nails during August for Fall trade, at quotations that had few concessions in price from the prevailing rates. The deliveries it is feared will share with the moving of the large crops anticipated in the past congestion at a later date for which freight requirements are being provided along the grain carrying roads. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers.....$1.80
Carloads to retailers..... 1.85

New York.—The local market is firm and reports a good business prevailing, the demand being excellent and representing a better condition of trade than prevailed at any time this year. Quotations are as follows for small lots from store: $1.95 to $2.

CUT NAILS: The low quotations prevailing on Cut Nails has resulted in an improved condition of the market and the lowest quotations are likely to be withdrawn if the demand is continued. Quotations are as follows: $1.60, base, for carload lots, f.o.b. maker's mill. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities are held at about $1.70, base, in carload lots.

New York.—The local demand is moderate and prices prevail as usual. Quotations are as follows: $1.90 for small lots from store.

BARB WIRE: The jobbers anticipating to a great extent a large trade resulting from such promising crops have placed orders with the mills exceedingly liberal, taking advantage of the concessions in quotations given them for large orders. All indications are that the Fall consumption will be large. The official quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.95	$2.25
Retailers, carload lots	2.00	2.30
Retailers, less than carload lots	2.10	2.40

SMOOTH FENCE WIRE: The demand is increasing in volume and bids fair to find conditions of the market satisfactory in themselves to warrant a continuance, the official range of prices being held without concession. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads.....$1.65
Retailers, carloads..... 1.70

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

SCYTHES: The manufacturers have advanced the price of Scythes 25 cents per dozen, the said advance taking effect September 1.

RIVETS AND BURRS: Copper Rivets and Burrs are now quoted at 15, 10, and 5 per cent. discount to average buyers with a concession to large purchasers.

BRASS AND COPPER WIRE: Brass Wire is variously quoted at 22½ and 2 per cent. discount from list while in some quarters 20 per cent. is asked for medium quantities. Copper Wire is now quoted to regular trade at 25 per cent. discount.

SHEET COPPER, COPPER BOTTOMS, ETC.: Sheet Copper has been increased in price under date of August 30, to 21 cents per pound, while copper bottoms, pits, and flats, in harmony with the sheet copper list, experienced the same advance of one cent per pound under the above mentioned date, making them 23 cents per pound base, the price named being contingent on fair sized orders, there being current both lower and higher quotations according to the quality desired.

COPPER AND BRASS TUBING: Brazed tubing, both Copper and Brass, is now quoted at from 27½ and 2½ to 27½ and 7½ per cent. discount, the range in price depending mainly on the quantity taken.

SOLDERING COPPERS were advanced on August 29 one cent to 20½ cents per pound base, which is the present market price for fairly round lots.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	11½ to 12¼
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8

Less ¼ to ½ cent to the large trade.

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....54 cents per gallon.
In lots of 5 barrels or more.....53 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE PHILADELPHIA TRADE.

Fall trade has opened auspiciously and orders are coming in quite freely. This is by no means confined to the Hardware business, but we hear similar reports from almost all other lines. In going over our sales for the year we are surprised to find an unusual demand for Tools. This is always a gratifying sign, as it indicates that work is plentiful and that a large amount of money is being paid out for wages. Notwithstandnig the fact that the cost of building is high, 1905 promises to be a record year in Philadelphia for building, and this is probably an indication of the conditions in the country at large. The instructions to salesmen contain notices of many advances in prices, and there is some difficulty in getting goods, so much so, that actual wants should be anticipated in order to insure prompt delivery. Collections are only on the average, although better conditions should be expected as soon as Fall trade is in full swing.

BIDDLE HARDWARE CO.

THE DAVENPORT TRADE.

There is very little of interest to report in general Hardware trade. The Summer stocks of seasonable goods have sold out more completely than usual and in some lines there were hardly enough to go around. Orders for the coming Autumn are being booked freely and in many lines are being shipped to fill present wants. There is already a scarcity of cars to move merchandise freight. The market on staple Hardware is strong and an advance is looked for by conservative buyers. The weather has been absolutely perfect for health, comfort and pleasure of the people, as well as for harvesting and for the benefit of growing crops. The prospects for a bountiful corn crop were never better at this season of the year. There have been a few bank failures, but these were largely confined to private or individual banks. There is a movement on foot favoring some sort of legislation placing all banks under State supervision. This would seem to be a protection to depositors and really to the advantage of the financially solid banking institutions. The banks report active demand of discounts, but have an ample supply of money to meet these demands. Volume of trade about normal, with collections fair.

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

This week St. Paul is having an immense crowd of visitors, because of the State Fair being held here. The attendance at the State Fair is the greatest ever anywhere. This State has a national reputation of having the best of any State and the result is that it attracts visitors from all neighboring States and others farther away, as many people interested in certain lines are sure of seeing the best there is in those lines. We are having a very busy week, entertaining our customers, showing them around our place of business and showing up new goods, but sales do not correspond with the number of callers, still it gets us acquainted with our trade and is a good thing. The market is advancing in some lines. As Tin, Lead, Zinc, Copper and Leather have advanced, more or less, goods requiring these raw materials are and should advance. Business is certainly good.

THE SAN FRANCISCO TRADE.

It is really surprising how business keeps up. It is now about eight years since the current prosperity began with the election of President McKinley, and there are no signs of any trade reaction yet. Conditions on this coast, as reported from time to time, continue bright. All classes of trade, domestic and foreign, except the exportation of grain from this port, are reported flourishing. Our fruits, fresh, dried and canned, are meeting with a very brisk demand, the two latter especially. Our dairies and creameries are enjoying a period of large production and high prices. Grain is selling comparatively high. Hops and wool are both away above cost of production. Hides are in excellent demand, with prices marked up every now and then. In short, almost every product of the California farm is meeting with a brisk demand at prices which net the farmers handsome returns. The city and interior banks report money abundant and interest rates moderate, and there are few complaints of slow collections. Building operations continue extensive and real estate transactions frequent and large and easily negotiated. On all sides is heard the same cheerful note of commercial activity and good times.

Committeeman H. C. Bennett, president of the State Association; C. H. Philpott, chairman of the State Finance Committee, and F. H. Dickson, State Organizer, went to San Jose several weeks ago and the result is that the San Jose Retail Hardware and Implement Association has been formed within the past fortnight with the following list of officers: President, A. E. Holmes, of the San Jose Hardware Co.; vice-president, W. J. Boschkin, of the Boschkin Hardware Co.; secretary and treasurer, C. L. Snyder, of Mangrum & Otter Co. The executive committee are A. E. Holmes, W. J. Boschkin, C. L. Snyder, Frank Stock, of the John Stock Sons and W. C. Andrews, of the Farmers' Union.

The charter members of the association are: Garden City Hardware Company, San Jose Implement Company, Mangrum & Otter Company, Garden City Implement and Vehicle Company, The John Stock Sons, Boschkin Hardware Company, The City Store, San Jose Hardware Company, The Farmers' Union, Wright Hardware Company, Home Union, A. Greeninger Sons.

To all who are eligible to membership the following committee, A. E. Holmes, C. L. Snyder and A. M. Turel, have sent out circular letters declaring that "the following Declaration of Principals is the cornerstone of our organization:

"We believe that better results can be obtained by united, rather than by individual action. We also believe that the broad principle of corporation is better than that of unjust competition. Co-operation tends to conserve our energies, and promotes our interests, by bringing about a better feeling, and eliminates distrust and jealousy.

"We desire the co-operation and good will of the wholesalers, and we recognize that each have rights and equities, which the other should respect.

"This association is not formed to assist any particular firm or firms, or any particular branch of the Hardware or implement business, but for the general welfare of the Hardware and implement trade. It aims to discourage unfair and unmercantile competition, to remove by concert of action, all evils and customs that are against good policy and sound business principles, and to take such action from time to time, as will subserve the best interests and increase the prosperity of all."

The trade is well pleased with HARDWARE editorial remarks in August 10 issue, relating to the Parcels Post promoters, and now Secretary Henry Gracey of the State Association of Retail Dealers is sending to every retail Hardwareman in California the following letter:

"You very well remember the elegant fight put up a few months ago by the retail Hardware dealers all over the country against the proposed "Parcels Post" bill, and which succeeded in putting that measure to sleep.

"That it was only sleeping, fresh evidence is frequently given, as witness the stand lately taken by the Chicago Federation of Labor. The chief obstacle to the settlement of the teamsters' strike was the absolute refusal of the express companies to reinstate any of their old employees. Now comes the Parcels Post interests and points out to the federation a way in which the unions may "get even" with the express companies. A petition was drawn up beseeching President Roosevelt to assist the measure and that his next message to congress contain recommendations for its passage. In addition, word has been passed along to the unions to support the bill. In the meantime what are the opponents doing? Very little. If it comes around to the point where Uncle Sam is carrying eleven pound packages for a quarter, many of you will find the Hardware business a rough road. It looks as though it is up to you to do something. It is suggested that you resume the campaign with your Congressmen; where possible, make it a personal interview, but in any event start petitions, get as many good names attached as you can by individual effort and then put it in the hands of other interested parties. Most of the congressmen are at home among you, and can be reached and labored with, with much less effort than during the session. This is a vital question and your immediate attention is urged."

The San Francisco Retail Hardware Association has elected G. M. Hickman president and George L. Everett, secretary, and the following excellent executive board: F. W. Wright, of the Wright Hardware Co.; F. H. Ellis, of the Palace Hardware

THE SAN FRANCISCO TRADE.

(*Continued from page 36.*)

Co.; C. H. Philpott, of the C. H. Philpott Hardware and Sporting Goods Co.; Edwin Jones, of the Alexander-Yost Hardware Co., and W. A. Etting, of the W. A. Etting Hardware Co.

C. H. Philpott & Co., proprietors of one Hardware and one sporting goods store in San Francisco, have been appointed California agents for the Truscott Boat Manufacturing Co., of St. Joseph, Michigan, producers of the well-known Truscott launches. This State is supplied with waterways to such an enormous extent that the lovers of boating will hail with delight the advent of the appearance of the Truscott launch. Every season of the year launching is a sought after pastime in California, and to be able to purchase a "Truscott" in San Francisco has never entered the minds of sportsmen and launch lovers. The Truscott Company has had experience of eighteen years in the construction of boats and their equipment for customers in every portion of the globe, has made them more or less familiar with the requirements to meet all-round purpose of making a thoroughly safe, seaworthy, easily managed boat, and still maintaining a handsome appearance. INDUSTRIAL PRESS ASSOCIATION.

ALL ABOUT CUTLERY.

The use of knives dates from the earliest times, and begins with primeval man, who rubbed flint flakes until a sharp edge was obtained, thus forming a knife. So right through the ages of man's existence upon this earth—many thousands of years in point of time—a steady development in the manufacture of knives has been going on.

In early records knives and swords are intermixed, pointing to the offensive and defensive purposes for which knives were made. Indeed the term "cutlery," says the *Ironmonger's Chronicle*, applies to edge knives of various forms and shapes, many of which were used, concurrently, for warlike and peaceful purposes. Cutlery denotes knives, scissors, razors, and any other sharp-edged cutting instruments. The process of evolution from the flint and stone celts to knives of iron and steel, included in its march bronze knives and copperswords, and, incidentally, bronze reaping-hooks and other articles of husbandry. This development has been steadily going on until the present time.

Homer says the knives carried at the girdle in his day were of triangular form. Many of the knives found in British barrows have long, narrow blades, others again are broad and of dagger form. Both Normans and Anglo-Saxons carried about with them a met-soex, or eating-knife. King Athelstan left his knife on the altar of Beverley Minster as a pledge for his redemption of a vow of benefaction. Up to the end of the fifteenth century knives do not appear to have been used much at table, but as every one carried a knife at his girdle possibly it served to cut meat with in common with many other uses. Meat knives of Queen Elizabeth's day had handles of white bone with jewels set in them, thus being antitypes of the bone-handled table cutlery of later days.

Spring shears of Roman form were the only kinds of cutlery known with springs up to Norman times. Of course spring pocket-knives are, comparatively, a modern invention, but previous to their introduction "jack" knives, which shut into a groove or handle without any spring or lock, were made. The manufacture of metallic knives in England was doubtless at first isolated, and confined to those village smiths, who were cleverer than some of their neighbors. As time went on "cutlers," as makers of cutting weapons and tools were called, banded together in larger centers for mutual protection, and later were granted special charters in the manner customary in those days when guilds of traders were no sinecures, and when power to deal with commercial matters was needed, the law courts of the period not being competent to understand trade disputes.

The arms of the cutlers of London were granted by Thomas Holme, Clarencieux Knight of Arms, in the sixteenth year of the reign of King Edward IV., and later, cutlers were granted a crest, which consisted of an elephant bearing a castle.

Knives have been made in England for many centuries, but in the early days they were coarse, rough and crude. As time went on British cutlers advanced in the knowledge of their craft, and when James I. sat upon the throne of Great Britain it was generally acknowledged that the finest and best knives in the world were made in London. It is said that Richard Matthew, whose workshop was at Fleet Bridge, was the first Englishman who attained any great skill in making fine knives. During the reign of Elizabeth he obtained a prohibition against all strangers, preventing them from bringing any knives into England from beyond the seas (at that time the great place for making cutlery was Flanders.) The same Richard Matthew also obtained a patent from Queen Elizabeth for making knives and daggers with a new kind of handle, but complaints were lodged against him by other cutlers in the city of London; it being urged that the prices charged were prejudicial to Her Majesty's subjects.

In the London Hall of the Cutlers' Company there is an ancient picture of a cutler named Crawthorne, who gave certain charitable bequests to the cutlers of London in trust. The London Company of Cutlers were divided into three sections, namely, those who were smiths and forged blades, and consequently they were known as Bladers; the men who made hafts for the bladers, who were known as Haftmakers; and lastly, the Sheathmakers, who made the sheaths for knives, swords and daggers. In the reign of Henry VI. these three companies were incorporated in the one fraternity, under the name of the Cutlers' Company.

Sheffield has long been associated with the manufacture of cutlery, and 1565 it is recorded that at a Court of the Rolls of the Manor of Sheffield a jury of cutlers was impannelled "to assign marks to the different manufacturers, whereby their respective knives could be identified." In 1624 the Sheffield cutlers, who had been protected hitherto by the Lords of Hallamshire, received an Act of Incorporation "for the good order and government of the makers of knives, sickles, shears, scissors and other cutlery ware." In 1638 a hall was built in which they could transact business, and the "Feast," still given annually by the Master Cutler on his official appointment, was inaugurated. The trade marks granted mostly belong to one of three classes—(1) one or more letters, as IXL; (2) single words as names of persons or places, such as Carver, China, etc.; (3) designs, as a dagger, a cross, or an anchor.

The commencement of the manufacture of knives with springs in Sheffield is attributed to the seventeenth century, but, as a matter of fact, very few knives with spring blades were manufactured before the close of the eighteenth century. One of the earliest references to Sheffield cutlery occurs in Chaucer, in which it is said, "Sheffield thwitel bare he in his hose."

Dr. Johnson asserts that knives as table appointments were not introduced in Scotland before the Revolution. Before that period every man had a knife of his own as a companion to his dirk or dagger. The men cut the meat in small portions for the women, who put them into their mouths with their fingers; the use of forks at table was then considered a superfluous luxury, and in Scotland was forbidden to the Covenanters by the decrees of their Church. Princes and nobles carried knives at all times, substituting in later days swords. Spenser, in his "Faerie Queene," uses the word "knife" for a sword—"And after all his war to rest his wearie knife." Shakespeare, in the old quarto of 1597, makes Juliet wear a knife at the friar's cell. In the South Kensington Museum the dagger mark is to be seen on six of a set of fourteen knives, which have handles of ivory carved with portrait figures representing English sovereigns, all of which, with the exception of Edward V., are represented with jewelled crowns. Nine of these figures are shown with swords, four of them holding a sceptre in the right hand. On thirteen of the knives there is another stamped mark, which may be described as a diamond, joined at one point to a trident; the knives are of English make, and bear date 1607.

Although the manufacture of knives had been carried on for some time previously, it was not until 1820, when the first Lord Wharncliffe introduced his famous blade, that spring pocket-knives came into common use and were carried regularly in the pocket. The Wharncliffe blade had a long term of popularity, and is still sold in some localities.

To return to the practical side of cutlery, as far as it relates to knives, it is surely unnecessary to remind Hardwaremen what kind of knives are sold at the present day, nor yet to relate the various types in common use. Table knives have blades of different shapes, and handles of various materials, and different hues. Pocket knives have gone through many revolutions, and both large and small examples of cutlery have been produced. Knives with hundreds of blades and curious fittings have been made up, showing to what perfection the cutler's art has reached.

The manufacture of cutlery is no longer confined to Sheffield and London, indeed, the exclusive production has long passed from Great Britain. The great works at Solingen show how Germany has cultivated the industry, and Americans know that the fame of the cutler has crossed the Atlantic. Nevertheless British manufacturers may take heart, for Sheffield still leads the van, and by far the greater quantity of cutlery sold by ironmongers in this country is made there.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Brownwood, Mo.—Cooper-Broad Hardware Co. has been incorporated. Capital, $25,000. The incorporators are: P. J. A. Cooper, I. L. Cooper and Howard Broad.

Canajoharie, N. Y.—The Klinkhart-St. John Company, which was incorporated recently with a capital of $15,000, will conduct a Hardware business at the old L. S. Davis store, which has been remodeled.

Cincinnati, Ohio.—The G. Cluthe Company has been incorporated; Hardware and tools, capital, $15,000, by C. F. Wendeler, W. J. Wendeler, Charles Cluthe, Catherine Cluthe.

Connersville, Ind.—The Triumph Safe & Lock Company has been incorporated with a capital stock of $15,000. Directors are: Charles E. Blechschmidt, Charles J. Blechschmidt, and James A. Collins.

Conway, Ark.—The Grummer Hardware Company has filed articles of incorporation to do a general Hardware business. The capital stock of the company is $6,000. The incorporators are A. Sachowosky, H. Grummer and W. J. Grummer.

Cooper, Texas.—Cooper-Broad Hardware Company has been incorporated; capital stock, $25,000; purpose, manufacture and sale of saddles, etc.; incorporators, W. J. A. Cooper, J. L. Cooper and H. J. Broad.

Dayton, Wash.—J. L. Castle has established himself in the Hardware business.

Echo, Ore.—L. W. McAdam has engaged in the Hardware business.

Elvins, Mo.—Union Furniture and Hardware Company has been incorporated. Capital, $5,000, one-half paid. Incorporators—S. L. D. Smith, C. C. Short and Artie Smith.

Edison, Neb.—Chas. Wahffer is about to open a new Hardware store.

Everly, Iowa.—M. N. & C. A. Wilkins have engaged in the Hardware business.

Johnstown, Pa.—Lowman & Miller Hardware Company has been incorporated. Capital, $10,000.

Loomis, Neb.—Bloom & Loritson have engaged in the Hardware business.

Mountain View, Okla.—The Ware-Briston Hardware Co. has been incorporated with a capital stock of $5,000.

Newport News, Va.—The Hendricks-Goodman Hardware Company, Inc., has been granted a charter to conduct a general Hardware and merchandise business, with capital ranging from $2,000 to $5,000. The officers are W. W. Hendricks, president and general manager; W. W. Washburn, vice-president, and C. L. Goodman, treasurer and secretary.

North Yakima, Wash.—Moxee Hardware Company has been incorporated; capital, $30,000, with J. B. Bannerman, E. T. J. Abeling and H. S. Irwin, incorporators.

Norfolk, Va.—Norfolk Hardware Company has been granted a charter to do a general Hardware business, with capital ranging from $2,000 to $5,000. The officers of the company are: M. E. Sewell, Windsor, N. C., president; I. Evans Rodgers, Baltimore, vice-president, and H. B. Price, Norfolk, secretary and treasurer.

Plymouth, Mass.—Plymouth Hardware Company has been incorporated; capital, $10,000. President, Frank Harlow; treasurer, Austin R. Mosman; clerk, Edgar F. Bliss, all of No. 18 Main Street, Plymouth, Mass.

Ponderay, Idaho.—J. Pilligmeier is opening a new Hardware store.

Providence, R. I.—Cohen's Hardware & Electric Supply Co. has been incorporated with $50,000 capital. Incorporators: Joseph B. Cohen, Adolph Lederer and Geo. D. Langley.

Scott's Bluff, Neb.—King & Hall are opening a new Hardware store.

Siloam Springs, Ark.—The Benton Hardware Co. has been incorporated; capital, $50,000. Incorporators are: Connelly Harrington, L. P. Kempner and W. J. Doke.

St. Paul, Minn.—Raymer Hardware Co. has been incorporated; capital, $50,000; incorporators, Arthur C. Raymer, Walter J. Raymer and Joseph H. Farman.

Victor, Colo.—The Victor Hardware & Supply Co. has been incorporated with a capital stock of $25,000.

Changes.

Austin, Tex.—John Munro, Hardware merchant, is erecting a new business house.

Bult, Colo.—Sponer & Mead have succeeded to the Hardware business of P. J. Sponer.

Clarinda, Iowa.—The Clarinda Hardware Co. has succeeded to the business of Tharp & Klise.

Des Moines, Iowa.—The Acme Heating Co., under the management of C. R. Smith, has recently consolidated with the Stark Hardware Co.

Delhi, N. Y.—The new firm, Cavan & Anderson, took possession last week of the Hardware business of M. D. Sears.

Ensley, Ala.—Smith Hardware Company, which is located at Blocton, Ala., will move their entire business to Ensley on or about October 1st.

Goodlettsville, Tenn.—Bond & Patton have been succeeded in the Hardware business by George B. Bond.

Huntington, Mass.—George W. Ford has purchased E. A. Allen's Hardware store.

Heyburn, Idaho.—J. H. Dauer has succeeded to the Hardware business of Dauer & Hoggan.

Kingston, Ont.—John Lemmon, of the firm of Lemmon & Lawrenson, Hardware dealers, has purchased the interest held by the latter partner. The firm will hereafter be known as Lemmon & Sons.

Keswick, Iowa.—Ed. F. Smith has sold his Hardware business to R. L. Crumford.

Le Mars, Iowa.—C. E. Haas has purchased the Hardware business of Haas & Ruebach.

Malone, Tex.—L. F. Weeks has succeeded to the Hardware business of Weeks & Weeks.

Portland, Mich.—W. P. Culver, the local Hardware dealer, has sold his entire stock to George W. Allen.

Plainville, Conn.—The Hardware and plumbing business of J. W. Beard has been transferred to Frederick Hoerle, of Bridgeport.

Sedalia, Mo.—The Smith-Marshall-Howe Hardware Company has changed its name to K.-M.-H. Hardware Company.

St. Peter, Minn.—Evanson Bros. have sold their Hardware store to Smeby, Krohn & Bell.

Smith Center, Kan.—E. W. Luse has purchased the Hardware business of E. S. Barger & Son.

Standish, Mich.—The well-known Hardware firm of Dougherty & Bealon has been succeeded by W. M. Dougherty.

Stockport, Ia.—Leaverton & Tuller have succeeded to the Hardware business of Leaverton & Blackledge, in Stockport, Ia.

Strang, Neb.—E. E. Wheeler has been succeeded in the Hardware business by Wheeler & Mesman.

Readlyn, Iowa.—J. A. Beckins has purchased the Hardware business of C. J. Kuenster & Sons, in Readlyn, Iowa.

Roland, Iowa.—Fred John & Co. have sold their Hardware business to J. E. Waugh.

Miscellaneous.

For the six months ending with June, England's cycle export trade attained a value of £450,462, as against £369,320 for the first half of 1904. The number of bicycles represented by these values was 19,500—average value £6 12s. 6d.—exactly 449 machines in excess of the corresponding period of the previous year. The bulk of the increase was attributable to parts, the exportation of which amounted to £319,921.

The Austrian Motorcyclists' Association has decided to weigh racing motorcycles without tires and to fix a limit weight for the tires also. Ninety-nine pounds is suggested for the former and eleven for the latter. It is pointed out that as it is obvious that where tire makers have a fixed margin to work to, and not, as heretofore, restricted to a possible margin, a more durable sample will be evolved. The stability of the tires counts integral with the frame and engine in the chances of a competing machine. The weight limit of the frame is already known, possibly, too, of the engine, but with the addition of a fixed standard for the tires the third important item may be said to be standardized.

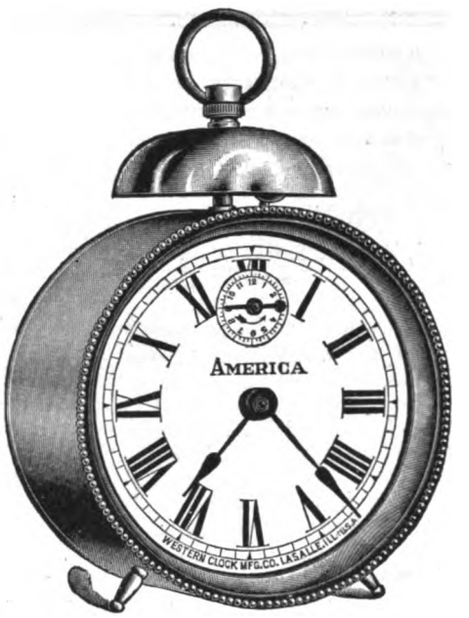
THE VITAL PART

of any razor strop is the quality of the leather fibre. If too coarse it will give the finest razor a saw edge and draw its temper—if too loose and open grained it will mat down to a glassy uneven surface that rounds the edge.



GIBFORD'S
RED—E—FOR USE
RAZOR STROPS

are made of the finest horse hide and calf skin for the sharpening and finishing strops and they must pass a rigid examination as to grain and strength of the leather fibre before they are sent to the factory where they are put through the patented process of treatment, which brings out that quality that gives the smooth, keen shaving edge to a razor.

Your razor counter isn't complete without RED-E-FOR USE razor strops. Try a sample dozen. Your jobber sells them.

GIBFORD MFG. CO.
ADRIAN, MICH.

The America Alarm

Gives you an opportunity to offer a clock, accurate, efficient, guaranteed, at a remarkably low price and is sold at a figure that leaves you plenty of room for profits. Your jobber has the "America."

THE BISSELL SWEEPER

LIKE the Steinway Piano, prides itself upon its age and its reputation. This is an age when mediocrity frequently takes refuge behind the claim of "novelty," "something new," as if novelty necessarily meant superiority.

It therefore behooves the trade to carefully consider the difference between the article of recognized merit and established reputation, and that which rests its hope for patronage chiefly upon the claims of "novelty," "something new," etc.

The Bissell Sweeper of to-day represents the highest point of development in the sweeper art, and logically so. We have been engaged in this business exclusively for twenty-nine years, and have developed mechanics in this highly specialized line that are veritable artists, and that necessarily cannot be found outside our factory. The reasons are plain; we have furnished the only opportunity in all this wide world for this particular development of mechanical skill.

Back of all this mechanical development which time and opportunity alone accomplishes, the Bissell Sweeper is absolutely the only one ever put upon the market under a sound, sincere price maintenance policy, that insures to the dealer a good profit in the sale of our product.

Write for our special State and County Fair Offer.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Brooklyn, N. Y.—The Safety Wash Line Pulley Co. has been incorporated. Capital, $1,000.

Columbia, Tenn.—The charter of the All Purpose Harrow Co. has been filed. The capital stock is $5,000, and the incorporators are John W. Fry, H. F. Alexander, W. C. Salmon, Ernest Lovan and W. B. Turner. The company will manufacture and sell the all-purpose harrows, hay presses, wagons and other farming implements.

Dover, Del.—The Independent Steel & Wire Co. has been incorporated with a capital stock of $250,000.

Fort Worth, Tex.—Axtell-McKee Manufacturing Company has been incorporated; capital stock, $100,000. Purpose, Hardware manufacture. Incorporators: F. W. Axtell, J. H. McKee and J. D. Vroom.

Hamilton, Ohio.—The Niles Tool Company of Hamilton will soon acquire control of the John Bertram & Son Company, limited, makers of machine tools, Dundas, Ontario, Canada and the purchase will give the company a practical monopoly in the Canadian trade. The capital of the Canadian Company is $300,000.

Jersey City, N. J.—The Erst Tool Company has been incorporated; capital, $300,000. Incorporators—John Howard Wainright, Victor H. Erst and George B. Flaacke.

Lancaster, Ohio.—The Ohio Lock, Nut & Bolt Company, with $50,000 capital, has been incorporated by C. M. Rowlee, F. P. Barr, C. T. Moore, C. C. Florida and J. S. Sites.

Leavenworth, Kansas.—Great Western Stove Company has been incorporated; capital stock, $500,000. Incorporators: E. P. Wilson, N. H. Burt, F. C. Tuttle, Henry Devlin and O. Willson, of Leavenworth. Eugene Burt, of Oklahoma City, is territorial agent.

Lebanon, Pa.—The Lebanon Stove Works Company of this city, was chartered recently at Harrisburg with a capital of $50,000.

Menominee, Mich.—The Dudly Tool Co. has been organized, purchasing the interests of the A. Dudly Manufacturing Company of that city. The new company is capitalized at $15,000, wholly paid in, and was organized by Attorney F. J. Trudell. The following officers were elected: President and manager, Herman Heinrichs of Green Bay; vice-president, Albert Dudly, Sr., of Menominee; secretary and treasurer, William A. Greene, of Marinette. The following directors were also elected: Geo. G. Greene, Green Bay; Albert Dudly, Sr., William A. Greene, Herman Heinrichs.

Monessen, Pa.—Monessen Manufacturing Company has been incorporated for the manufacture of castings, forgings, fittings, tools, machines and machinery; capital, $5,000. Directors—Robert F. Luce, E. B. Graham, William Mitchner, Bellevernon; H. N. Odbert, Monessen; D. M. McCloskey, Charleroi.

Nashville, Tenn.—The new foundry of the Gray & Dudley Hardware Company has commenced operation. The building is 204 by 124 feet.

New York, N. Y.—The Soss Sash-Balance Manufacturing Company, manufacture a patented article and builders' Hardware; capital, $100,000. Incorporators, Henry T. P. Hopper, Frank Goodwillie and Morris P. Altman, Joseph Soss, John M. Quinn, all of New York.

New York, N. Y.—Greeb Bros. Co., manufacture and deal in building materials, tools and implements; capital, $1,200. Incorporators: Samuel C. Pulis, No. 31 Nassau Street; Louis A. Cuvillier, No. 103 West 80th Street, both of New York; Ella Westaway, No. 342 99th Street, Brooklyn.

Sheboygan, Wis.—The Sheboygan Sash Lock Co. is a new firm organized with $25,000 capital stock, to manufacture the Diehl storm sash hangers and fasteners, and other Hardware specialties.

Springfield, Mass.—The plans of the International Machine and Screw Company organized in December, 1904, with a capital of $500,000, have so far progressed that the company is looking for a location and hopes to start manufacturing within a few months. T. W. Leete is president and treasurer of the company and George T. Warwick is vice-president and general manager.

St. Louis, Mo.—The W. B. Knight Machinery Co. has been incorporated. Capital stock is $10,000. Purpose, to manufacture tools, Hardware and metal goods.

Wallingford, Conn.—The Kingsley Manufacturing Co. has been incorporated with a capital stock of $5,000. Purpose is to manufacture a certain kind of hasp lock.

Changes.

Hamden, Conn.—The Hamden Manufacturing Company, makers of Hardware and harness specialties, will buy the old factory of the Housatonic Company of Wallingford, and will occupy the building soon. The company has a paid-up capital stock of $50,000 and employs about fifty skilled workmen besides helpers and assistants.

Middleport, N. Y.—The Niagara Sprayer Company will move its plant from Perry Street, Buffalo, to Middleport, and locate in the Opera House Block. This company manufactures spraying machines. Power will be furnished by the A. L. Swett Electric Company of Medina.

New Haven, Conn.—The William Schollhorn Company, manufacturers of Hardware, has made plans for the erection of a five-story 100 by 40 addition to its plant.

Philadelphia, Pa.—The National Cutlery Company has purchased the three-story factory, at the southeast corner of Westmoreland and Boudinor Streets, lot 97.6 by 74.6 feet, from John M. Kennedy, Jr., for a nominal consideration. The assessed value is $12,000.

Springfield, Ohio.—The Western Tool & Manufacturing Company has increased its capital stock from $15,000 to $25,000.

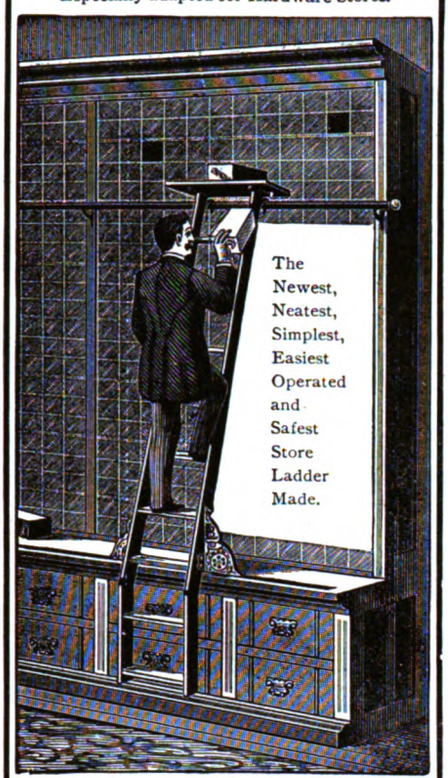
NICE

BARN AND ROOF PAINT

has made more friends among consumers for Dealers and more friends among Dealers than any other Barn or Roof Paint ever made.

While price is low, quality has not been sacrificed.

Dealers find it a pleasure to sell goods of this class, because while realizing a good profit they can feel sure they are making a permanent customer who will be satisfied — yes pleased, with results and tell others about it.



What better advertisement for any Dealer?

EUGENE E. NICE
272-274 So. 2d St.
Philadelphia

At the eighth annual International Automobile, Sporting and Cycle Exposition, held under the auspices of the Automobile Club of France, which will take place from the 8th to the 24th of December next at the Grand Palais of the Champs Elysees and at the Municipal Conservatories of the Cours la Reine, it is anticipated that the most comprehensive showing of motorcycles and bicycles that has ever been shown together will be placed on view.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Cleveland, Ohio.—The Smokeless Powder & Cartridge Co. has organized with a capital of $5,000, and will soon begin the manufacture of smokeless powder.

Clinton, Iowa.—Herman Kossengens and Henry Krischner have formed a boat building partnership, and will engage in the building, not only of launches, but boats of all sizes. Both are experienced boat builders and will doubtless achieve success.

Defiance, Ohio.—The Waverly Arms Co. is a new $40,000 corporation formed to manufacture a moderate-priced double-barrel shot gun. It takes over the business of the La Fave Arms Co. The American Steel Package Co. is at the head, of which is C. M. Willock of Pittsburgh, who controls a stock in the arms company and will be interested in the new gun plant.

Emporium, Pa.—The Sinnamahoning Powder Manufacturing Co., with a capital of $100,000, was organized. The new company has purchased a large tract of land and contemplate erecting a large plant.

Fulton, Ky.—The Fulton Manufacturing Company has filed application for a charter with the County Register. The capital stock is $15,000, and the incorporators are John T. Stubblefield, W. J. Cox, W. E. Hall, J. J. Oliver, J. H. McClure, L. M. Smith, W. D. Swiggart, Ed Thomas and Herschel T. Smith. The firm will manufacture from rough lumber—spokes, baseball bats, golf sticks, gun rods, stirrups, singletrees and other small wares.

Frederickton, N. B.—R. Chestnut & Sons have started a new industry in connection with their business in the shape of a new canvas canoe, which they claim is the only one of its kind made in Canada. Its principal feature is that it is non-leakable, and can be left out of the water any length of time without any fear of its spreading or leaking. It is wider than the ordinary canoe and is built more for pleasure trips. The factory is already working night and day filling orders, as there has been a big demand for these canoes. The makers are looking for agents. A catalogue will be sent to anyone interested.

Marlow, Tenn.—The Rand Powder Co., whose manufactory is being established on the Louisville & Nashville and the Southern railroads, near Dossett, has begun operations. The company will have a capacity of 600 or 700 kegs of powder a day. The plant has a power of 1,200 kegs a day. It is probable that after a short while its capacity will be increased to that extent.

Nacogdoches, Tex.—Richardson, Seale & Co. has been incorporated to do a general retail Hardware and sporting goods business. Charles E. Richardson, Edgar Thomason and James Seale are the incorporators. Capital, $20,000.

Newark, N. J.—Articles of incorporation of the Reliable Smokeless Powder Company of 164 Market Street, formed to manufacture and sell powder and other explosives, as well as guns, pistols and cartridges, have been filed in the county clerk's office. The concern is empowered to do business all over the world, and has an authorized capital stock of $75,000, of which $1,000 has been paid in by the incorporators, Albert B. Hague, Alfred M. Brink, William J. Young and Harvey R. Brink.

Rockford, Ill.—The America Co. is taking steps to increase its capital stock from $50,000 to $100,000. The company manufactures patented specialties, such as fishing rods, small sewing machines, wrenches and gasolene flat irons.

Springfield, Minn.—The Schmid & Lehrer Co. has been incorporated as dealers in Hardware and sporting goods with a capital stock of $75,000.

St. Louis, Mo.—A. B. Post, a resident of Kalamazoo, Mich., and for two years a traveling representative of the Simmons Hardware Company, has purchased the business of the Sperry Hardware Company of this city, and will continue the business at the present stand.

Terre Haute, Ind.—Majestic Powder Co. has been incorporated to manufacture and sell explosives and chemicals. Capital stock, $50,000. Edward Shirkie, Hugh Shirkie, J. C. Kolsem.

New Stores, Incorporations, Etc.

Bowling Green, Ohio.—The Lefever Arms Company has their new gun factory, for the manufacture of shot guns of a high grade, now in operation.

Chattanooga, Tenn.—The Chattanooga Automobile Company has been incorporated for the purpose of building, repairing, buying, selling and dealing in automobiles, motorcycles, bicycles, etc. The capital stock is $10,000, and these are the incorporators: Charles Forstner, Joseph C. Forstner, W. S. White, J. L. Foust and A. S. Dickey.

Chicago, Ill.—Chicago Hammock Company has been incorporated; capital, $5,000. Incorporators, George Ericksen, Bertine G. Berentson, Henry B. M. Brenson.

Chicopee Falls, Mass.—They are making ready to add still another wing to the already expansive plant of the Fisk Rubber Company. The addition will be 60 by 160 feet, three floors and basement.

Genoa, Italy.—The Board of Directors of the Terni Steel Works, Genoa, Italy, have decided to form a new company for the manufacture of artillery and munitions of war. Among the subscribers to the new undertaking are Vickers, Sons & Maxim, of London.

Hartford, Conn.—The Hartford Rubber Works is adding another factory to its already large plant. The new building will be built on the east side of Bartholomew avenue, running parallel with and on the east side of the present factory No. 2. It will cost $50,000, and will be used for storage purposes, although the arrangements will be such that it can be devoted to manufacturing purposes. The building will be 150 feet long and 43 feet deep, three stories high with a basement and a sub-basement. Work has already been started in laying the concrete foundations.

New York, N. Y.—Palmer Rankin Company has been incorporated to manufacture electric motors and drills; capital, $10,000. Incorporators: Herbert W. Grindal, No. 10 Wall Street; N. A. McCarthy and F. M. Daly, No. 80 Wall Street, all of New York.

Pittsburgh, Pa.—John W. Grove Company will conduct a store for the sale of toys, sporting, athletic and pyrotechnic goods, trunks, bags, etc., Pittsburgh, capital $25,000; directors, John W. Grove, J. Kambach, Pittsburgh; Robert S. Chess, Chartiers. Beaver Metallurgical Company, Beaver Falls, capital, $15,000; directors, Edward L. Hutchinson, Beaver Falls; Thomas C. Griggs, A. J. Pitcairn, Pittsburgh.

San Jose, Cal.—J. H. Issott has recently purchased the C. N. Smith property adjoining the livery stable, and is adding a business room to the building, in which he will conduct a cyclery and general jobbing estabishment.

Changes.

Burlington, N. J.—William Arbor and Benjamin Goldie have purchased the bicycle repair and sundry business of the Gray Manufacturing Co., at No. 27 East Broad Street.

Chicago, Ill.—After the first of September the Armac Motor Company, which has recently undergone a reorganization, will be doing business in its new quarters at No. 401 Carroll Avenue, a larger and more complete plant than was afforded them at the old location in St. Paul. The Armac people state that they will now be in a position to produce motor cycles with side cars and fore carriages fast enough to supply the market.

Elkhart, Ind.—The Buescher Toe Clip Co., of Elkhart, Ind., have disposed of their patents and good will of the No. 3 patent Buescher Toe Clip and the new improved L. A. W. lock to Stevens & Co., No. 99 Chambers Street, New York City. The New York concern will continue to manufacture these well-known articles and fill orders direct from this city.

Hartford, Conn.—R. C. Rueschaw, sales manager of the Pope Manufacturing Co., Hartford, has tendered his resignation, to take effect August 24. He has engaged with the Reo Motor Car Co., Lansing, Mich., in a similar capacity. Rueschaw will be succeeded by J. F. Cox, long the Pope purchasing agent, who in turn will be succeeded by J. P. Fogarty, assistant manager of the Pope Company's Chicago factory.

Mechanicsburg, Pa.—The D. Wilcox Manufacturing Co., manufacturers of carriage Hardware and bicycle, gun and special forgings, has increased its capital stock from $90,000 to $150,000, for the purpose of extending its factory and making improvements. Structural material has already been ordered for a 90-foot addition to the forging department.

Richmond, Ind.—Adolph Mansfield has sold out to H. M. Kramer and C. P. Hatfield.

Hartford, Conn.—On Thursday, the 17th ult., the officers and heads of departments of the Pope Manufacturing Co. enjoyed their annual outing. Ninety persons were included in the party, which made the trip to New Haven and Savin Rock, and there spent the day in an informal manner. The event serves to forge another link in the bond which has always signalized the organization of the Pope Company.

Every Housewife

Knows the superiority of grated corn for fritters and other dishes. Makes the cooking so much more tasty than corn cut from the cob. With the

Favorite Corn Grater

the inside of the kernel is extracted, leaving the hull on the cob. Pass the corn forward over the teeth, which will puncture the grain and the smooth edge will scrape out all the nutritious elements and leave the shell of the grain on the cob.

The grater is made of hardwood, fine steel and handsomely finished.

Size 12x3 inches. Dozen packed in paper box. Gross lots in cases. Weight, 70 pounds per gross.

Dealers have always found it a good summer seller.

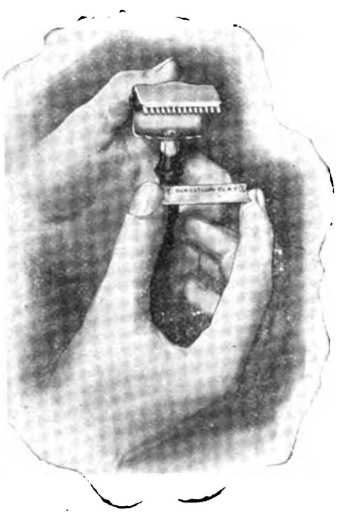
Zinn

Automatic Razor



Have you only a bowing acquaintance with the Zinn? Then let's get acquainted. It's

The Razor With the Always Keen Blades

Twenty-four of them. They are so thin that 200 of them are only an inch thick!

They are electrically tempered and so hard they will cut glass and any and all kinds of whiskers. None too tough for the Zinn.

A Wonder of Simplicity and Efficiency . . . . .

Only two parts to it: Holder and blade.

Each blade packed in a separate envelope that absolutely protects it from dampness.

And each blade lasts a month!

Its capacity for giving a better shave in half the time with half the skill is unequalled.

NO HONING NO STROPPING

The Zinn Has Made Friends Fast and---Fast Friends--

through our extensive advertising in the best popular magazines among its millions of readers. We have sown for a plentiful harvest—**Now is the time to reap.**

Get in line, Mr. Hardware dealer. Get hold of the other end of our proposition. Stock up with the Zinn. Display Zinn. Talk Zinn. We protect you against cut-prices.

No. 1 Contains One Razor and 24 Blades, $5.00.

No. 2 Contains one Razor, 24 Blades, Telescope Badger Hair Shaving Brush and Williams' Shaving Stick, $6.50.

Don't argue--don't delay. Write for particulars to

NIAGARA COW CHAINS

"OHIO" PATTERN

Provided with our latest patented attachments. Steel Swivel and Ring--Two Toggles.

"DE KOL BUTTER BOY PRINCE"

REGISTERED HOLSTEIN-FRIESAN BULL, NO. 30,369.

NIAGARA COW TIES are an indispensable necessity in the new "Model" Dairies, which are being formed on so large a scale, and which are becoming so numerous and so successful throughout the country; for here, an equipment which provides not alone for a neat and attractive appearance but also for the actual welfare and security of the animals, is a matter of paramount importance. The adoption of **NIAGARA COW TIES** is now considered the first step toward attaining to the modern standard of improved Dairy conditions.

Every Hardware dealer should carry NIAGARA COW TIES in stock. Your customers will ask for them.

The Blount Door Check is a Great Seller

because it is popular—it's popular because it's good; it's good because it's well designed and *well made*—better made than any other door check, and from better material. ¶ Experience has shown that the Blount Door Check and Spring will give perfect satisfaction under conditions that send checks of other makes to the repair shop or scrap heap. ¶ The Blount Check is well advertised and we assist dealers to give it local publicity. To those who handle the Blount Check, we furnish, on request, illustrated printed matter as listed below, bearing name and address of dealer. (Our name and address does not appear.) Write us for samples of our

Blount Check Catalogues,
Blount Check Brochures,
Blount Check Folders,
Blount Check Envelopes,
Blount Check Seals,
Blount Check Display Cards,
Blount Check Electrotypes for Advertising

and state quantities wanted; also send your card or letter head for the printer's use. ¶ We have a number of ideas that *sell* Checks: ask us about them when writing for the above samples.

INDIA OILSTONES

Were placed upon the market in the year 1897, since which time their merits have been rapidly recognized and their uses have widely increased, so that they are now demanded for all kinds of sharpening work in every part of the world.

Up to the time of the introduction of the India Oilstones, the idea prevailed that artificially made sharpening stones could not replace those produced from the natural rock. The fallacy of this has been positively proven by the rapid and complete success of the

"INDIA OILSTONES—Sharp and Quick!"

The uniformity in grit and grade had much to do with their immediate popularity, but probably the greatest factor in bringing them to universal use was the fact that they could be produced with accuracy in any degree of coarseness or hardness to suit the particular work for which they are intended.

The fifty-four shapes in which they are regularly made and stocked, practically cover all the ordinary demands of the general trade, but when anything in special size, shape, grit or grade is called for, it can be made to order and delivered in reasonable time.

The materials of which they are composed are very carefully selected and prepared, and have peculiar qualities, which make the stones especially fitted for sharpening, *i. e.*, quick, cool cutting, combined with great durability. The seams and uneven spots with which it is necessary to contend in the natural product, do not occur in these stones.

Every stone is sold subject to the following guarantee, made good in any part of the world, "If this article should prove in any respect unsatisfactory, we agree to exchange or refund the full price paid for same."

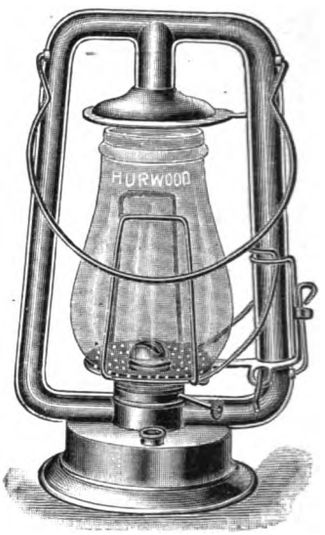
Bishop Lanterns

Have proved themselves to be up-to date goods for up-to-date dealers.



If you are looking for a lantern that is most easily filled, lighted and trimmed; one that gives a clear white flame and is wind and jar proof.—Buy the Bishop.

It puts all others in the shade as a seller. Drop us a line.

Mention HARDWARE.

The Hurwood Mfg. Co.

Bridgeport, Conn.

JUST HOW A FILE OR RASP IS MADE.

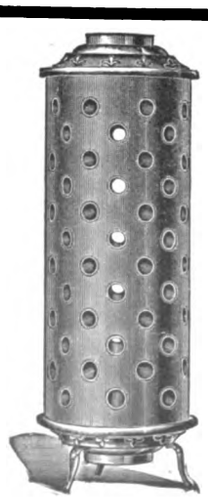
They Pass Through Many Hands.

Few persons who use a file or rasp, which, though it costs but a few cents, is an almost necessary article in many branches of manufacture, and in the household, have any idea of the care and skill needed to perfect them. It would doubtless surprise many such persons to learn that a file must pass through thirty or forty hands before it can be called ready for the market. An inspection of the big file works of Heller & Bros., in Woodside, gives a good idea of the process now in vogue.

The material used in making files is melted and rolled into strips of twenty feet at the Heller & Bros.' steel works at Forest Hill. These strips are then taken to the file works, where they go into the hands of the shearsman, who cuts them into required lengths, after which they go to the forger, who puts the "tong" on them. They are then annealed in large ovens of brick, where they remain for a period of four days to cool. After being removed from the oven the straightener handles them, and when he is through with them they are sent to the grinding room in a wooden car by an overhead trolley. They are then inspected and the trade-mark put on by the stamper.

When this is done they are put in the stock rack, from which the machine cutter takes them, who puts the first cut on them, commonly known as "over cut." When they are over cut the stripper files off the rough edges, raised by the process of over cutting.

The hopper is the next man to handle them. He puts the first cut on the edges, which is known as "hopping." The edger then puts the second cut on the finished edge, and is followed by the cutter, who puts on the cross or "up cut." The files are then inspected for the second time and the poor ones are rejected. The first-class ones go to the punching room, where the rasp or punch tooth is put on, and this is followed by a third inspection. The cropper is the next to handle them. He cuts them off to a uniform size with a powerful clipping machine. This completes the journey through the machines, and they then enter the hardening shop.



Here the oil used in the cutting process is removed and they are then covered with a secret preparation of chemicals to protect the teeth during the processes through which they have yet to pass, and are then placed away to dry.

After they are thoroughly dry they are put into furnaces heated by charcoal, until they become red, and then submerged in large tanks of salina. From the salina they are taken out and straightened, all curves being removed while they are still warm. The scrubber then removes the paste that still remains, with stiff wire brushes, and they are then placed into the cleaning furnace, where a powerful stream of steam and sand removes the last vestige of dirt and leaves them as bright as though polished. They are then placed in lime tubs and then to the drying furnace, which drys the lime on them, preventing rust. They are then oiled with sperm or lard oil, which keeps them in any climate for a long period without rusting. The temper is then drawn on the tong, which is done to prevent them from cracking in case of a fall.

They then arrive in the packing room, where they are tested for uniform hardness, straightness and to discover any other imperfections that may exist. They are then wrapped in waterproof paper and one-half dozen fill a box, the boxes are labeled and tied up and then put in fireproof vaults. The end of the journey is reached and they are not handled again until shipped away.

There are a great number of different style rasps and files made at the Heller works, such as a sixteen-inch horse rasp, half-file horse rasp, tonged half-file horse rasp, quarter-file horse rasp, beveled-edge horse rasp, half-file, half round or hot rasp, flat wood rasp, half round cabinet rasp, half-round shoe rasp, twenty-inch horse tooth rasp, twenty-two jointed horse tooth rasp, twenty-inch adjustable horse tooth rasp, flout-rasp cut, flout-file cut, ten-inch incisor tooth file, thirteen-inch bent incisor tooth file, flat bastard file, hand-bastard file, warding bastard file, mill bastard single cut, round bastard file, half-round bastard file, square bastard file, knife bastard file, taper saw file, single cut; slim taper saw file, single cut; double ended taper saw file, single cut; cross cut saw file, single cut; band saw file, single cut; cant saw file, single cut, and four-inch farriers' round knife file.

This company was established in 1836, and manufactures American horse rasps, files, farriers' tools, machinists' hammers and clay crucible cast steel. All these are made from their own production of special refined clay crucible cast steel and manufactured under machines of their own patented construction, as well as tempered by a secret process.

SAVE ONE-HALF YOUR FUEL

by using the

ROCHESTER RADIATOR

Satisfaction guaranteed or money refunded. Over 100,000 of them in use. Fits any stove or furnace. For Hard or Soft Coal or Wood or Gas. Price from $2.00 to $12.00. One square inch of radiating surface directly over the hot current is better than six in a drum, or a side heater with perpendicular tubes. We guarantee our radiators not to interfere with or choke the draft. They are easily cleaned. Write for descriptive catalogue and prices.

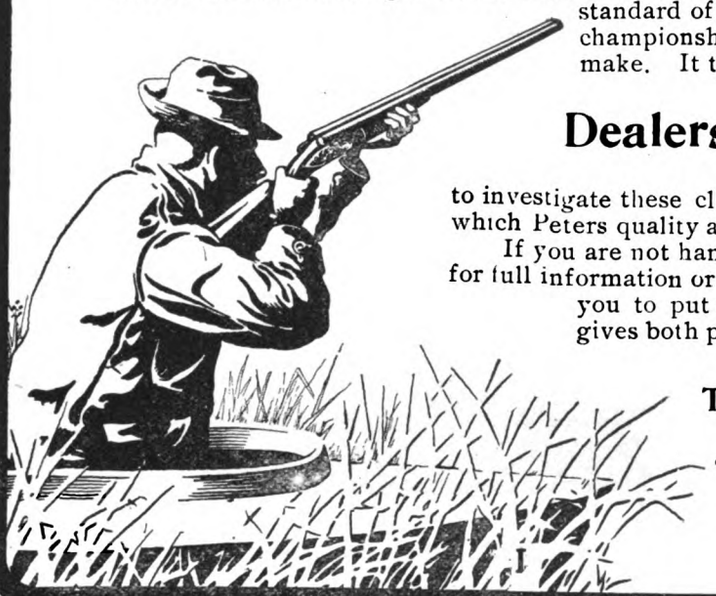
A Clean Shot



One of the beauties of **Peters** "Referee" shells is their clean way of bringing down game. They develop as much velocity and killing power as smokeless. Being loaded with semi-smokless powder, they are extremely clean and do not foul the gun.

Peters "League" loaded with black powder is the best shell of its grade on the market.

Peters smokeless shells, "Ideal," "Target," "High Gun" and "Premier" are preferred and used with great success by multitudes of sportsmen in every section of the country.

Peters Metalic Cartridges loaded with the famous Semi-Smokeless powder have attained a standard of quality and have won victories in the great championship matches, not approached by any other make. It therefore behooves

Dealers in Ammunition

to investigate these claims and take advantage of the business which Peters quality and Peters advertising are making.

If you are not handling this line at present, ask your jobber for full information or if you prefer, write us direct. It will pay you to put in a stock of Peters goods, the line that gives both profit and satisfaction.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

The Blackstone Rotary Washer

It's very name is a mark of merit and a guarantee of its superior workmanship and working qualities.

* * *

It is a genuine washday worry killer.

* * *

No woman ever invested in a Blackstone Rotary without immediately finding out that it adds to her purse, subtracts from her worries and compounds her interests in life.

The Blackstone Rotary Washer is a washday favorite.

* * *

For these very reasons it has been, and always will be, a good seller.

* * *

You miss an opportunity by not handling it and displaying it in your store.

* * *

You ought to have our catalogue and prices. It puts other washers in the shade when it comes to giving all-round satisfaction.

The Blackstone Mfg. Co., Jamestown, N. Y.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL

with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

The Gem Mop Head.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

The Jewel Coffee Mill

THE JEWEL COFFEE MILL

with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture

THE EIGHT SPACE SPICE CABINET

is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

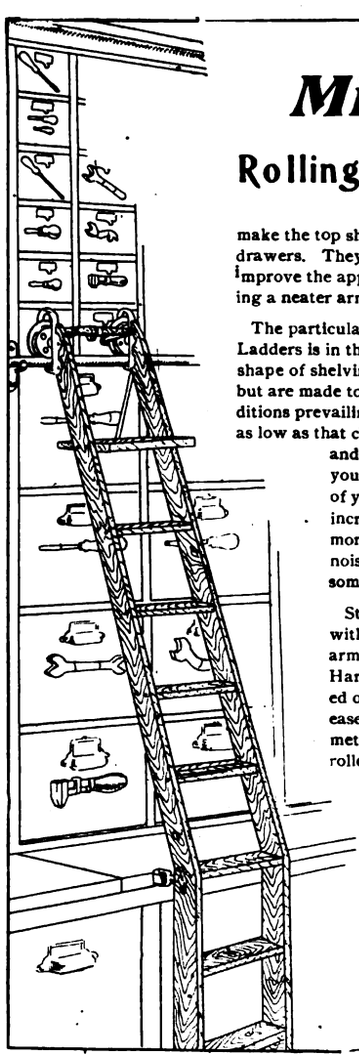
Don't Take Chances

on cheap Hack Saws. You can't afford it. They cost too much. Besides, they spoil both your trade and reputation.
Buy the "Best By Test" Kind—



The Sterling

HACK SAW

It will enhance your reputation, bring you "repeat" orders and "round up" the Dollars you're after.
Sell? A single order will convince you.

Diamond Saw & Stamping Works
BUFFALO, N. Y., U. S. A.

Milbradt

Rolling Step Ladders

make the top shelf as accessible as the lower drawers. They increase the shelf capacity and improve the appearance of the store by allowing a neater arrangement of the upper shelves.

The particular advantage in using Milbradt Ladders is in their adaptability to any size or shape of shelving. They are *not* kept in stock, but are made to order to meet the special conditions prevailing in *your* store. The price is as low as that charged for ready made ladders and the service is far superior. If you would save the time and labor of your clerks, if you would gain increased shelf room install one or more Milbradt Ladders. They are noiseless, safe, durable and handsome.

Style No. 1, (illustrated) equipped with either stationary or swinging arms is particularly adapted to Hardware stores. Made of selected oak with extra wide top step for ease in handling goods. Runs on metal or wood track, with rubber rollers running against base.

Descriptive catalog, with measurement instructions mailed on request.

LOUISIANA PURCHASE EXPOSITION

CORRUGATED PATTERN.

THE CAPEWELL HORSE NAIL CO., Hartford, Conn.
St. Louis, U. S. A., Feb. 27, 1905.

Gentlemen:—We have used the Capewell Nail for the last seven years in the shops of the Columbia Transfer Company, of which I am President, and we have also used the Capewell Nail in the shops of this Company on all horses, some 450 in number, used in placing the exhibits and doing other teaming work during the World's Fair. *It has given us excellent satisfaction and our smiths prefer it to any other nail on the market.*

Yours very truly,
GENERAL SERVICE CO., J. M. ALLEN, Vice-President and General Manager.

This machine gives a powerful light that brightens every corner of the store.
Its cheerful brilliancy attracts customers and tempts them to look over the store display.
The American System is the *only* one that works *Automatically*. It requires no hand attention. It will not smoke, smell, flicker nor buzz.
It makes money by attracting customers and saves money by its economical consumption of fuel.
Mail us plan and dimensions of your store and we will forward you an estimate of the number of lights and cost of lighting it properly.
AMERICAN GAS MACHINE CO.
ALBERT LEA, MINN.

Think It Over!
Before placing your Fall orders for Axle Grease it behooves you to consider that the best is none too good for your trade—none other than

Frazer's Axle Grease
It is the standard by which other kinds are ad judged good, bad or indifferent.
The U. S. Government uses it—why shouldn't you? Think it over.
Frazer Lubricator Co.,
85 Murray St., New York.

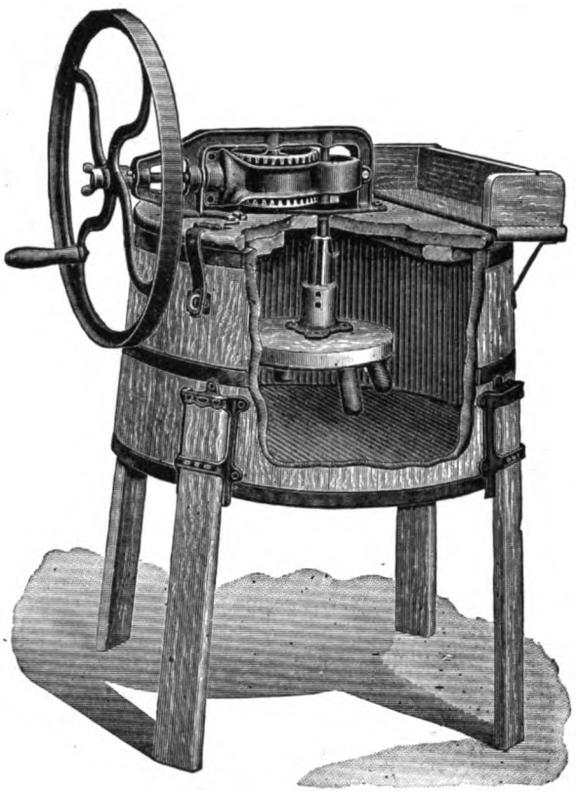
"BOSS" WASHING MACHINES

Illustrations represent our two best selling washers.

They are non-competition, therefore, most profitable to handle and sell.

Write at once for catalogue and price list, also our nearest distributing point to your location.



The only line of Washers not found in the catalogues of Catalogue Houses, therefore appeal to every dealer for support.

ADDRESS

Boss Washing Machine Co.

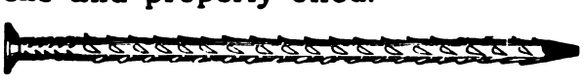
CINCINNATI, OHIO

BOSS DOUBLE ACTION

This machine is built on the true principle of rubbing clothes, similar to rubbing them on the old fashioned board, only that it just rubs a quantity at one time, and without the slightest injury to the finest of fabric including laces.

IMPROVED BOSS ROTARY

Has gears protected by shield or cover.
Has Telescopic dasher post.
Has large cypress tub and rub block.
Has either stave or detachable legs.
Has Highest Speed of any rotary.

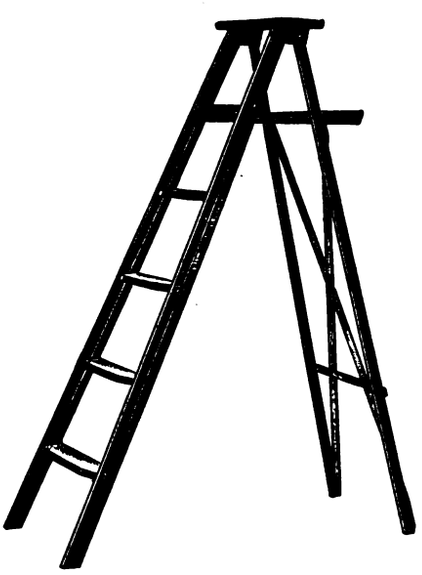


Nothing can compensate you for the loss of prestige and trade that may be caused by the breakage of one of your step ladders

There is one way to overcome the possibility of such accidents—Sell

UDELL LADDERS

The strongest — The safest — The most durable —



because they are made of the best selected lumber, carefully joined with our patent BARBED WIRE NAILS and stamped steel bracket finished to prevent weather checks and properly oiled.

We use every precaution to insure the security of Udell Ladders.

They can be depended on to bring most satisfactory profits and a satisfied trade.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—If you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

Leaks are Dangerous

Small leaks sap profit from your business. To stop these leaks and give you time to attend to the big features of your business—increase of sales, gaining new customers and proper management of your store—you must have system to take care of these details. System is as essential as capital. Business requires careful study and encouragement of new ideas and mechanical devices to relieve you from all unnecessary worry and detail.

A National Cash Register does not cost as much as a clerk in consideration that you pay a clerk a certain rate per week indefinitely. You pay for a National Cash Register from the small leaks which it prevents.

Let our representative call and explain our system to you.

Cut off here and mail to us today

SENSATIONAL SAD IRON ADVERTISING

WE are determined to make **"ASBESTOS SAD IRONS"** a household word throughout the country. **Every woman** is our prospective customer, and we won't rest until every woman is convinced that she must have Asbestos Sad Irons.

In order to accomplish this result, we are spending thousands of dollars in general advertising. And for the benefit of the trade we offer

$1,000.00 IN CASH PRIZES

for the best local advertisements and Window Displays of Asbestos Sad Irons.

If any Hardware Dealer who reads this advertisement has not received the details of our Advertising and Window Display Contests, he should write for full information at once.

These contests have been planned for the benefit of the retail dealer. Every Asbestos Sad Iron that is sold passes through the hands of some dealer, who makes a good, clean profit on that iron. Are you coming in for your share of the sales?

The way to be assured of your share is by letting the people of your community know that you sell Asbestos Sad Irons. Enter our contests and you will get publicity, sales, profits—besides standing the chance of getting a substantial cash prize.

We take it that every Hardware Dealer is acquainted with the merits of Asbestos Sad Irons. If **you** are not, send for our complete descriptive booklet. Return the attached coupon and we shall immediately send the booklet and details of our Advertising and Window Display Contests.

A Square Deal

— FOR —

Square Dealers

Square dealers, we take it, are those who try to give their customers goods that are "square" — honest all through. For forty years we have been giving all dealers the "square deal."

We make all the "ENTERPRISE" hardware specialties just as good as we know how—then we go out and tell the public, of all the world, about their merits. Square Dealers *distribute* them — they are already *sold.* Just ahead is the big demand for

"ENTERPRISE"

Meat and Food Choppers and "ENTERPRISE" Sausage Stuffers, Lard and Fruit Presses. They are being widely advertised now to the public. Write for our literature about them, including our new catalogue of all the "ENTERPRISE" specialties. Get ready for the biggest season you have ever seen on "ENTERPRISE" goods. We are ready. Get your share.

Increase your sale of "Enterprise" Meat and Food Choppers by using our new booklet: "The Cook, Her Critic and—". We will send you a supply of these on request.

The Enterprise Manufacturing Co. of Pa.

HARDWARE

The American Wringer Co. on September 1st moved their Auburn plant to Woonsocket, R. I., where they now have all their manufacturing under one head. This merger was made possible by the recent increase in their Woonsocket plant, at which factory they are now in a position to turn out 2,000 Wringers and 6,000 Rolls daily.

✤

A meeting has been called by Secretary T. James Fernley, of the secretaries of all trade organizations in the United States, to be held in St. Louis on Wednesday, September 27, the object of the meeting being to confer on the Catalogue House question and the Parcels Post legislation.

✤

The Glidden Varnish Co., of Cleveland, will move their general offices October 1st from the "Williamson Building," where they have been for the past five years, to the magnificent new "Rockefeller Building," just completed. They have taken the entire twelfth floor of the building, some twelve thousand square feet, embracing about thirty-six rooms, which are being especially arranged for the various departments of the company's business. The company is also making improvements and extensions to its work, involving an expenditure of seventy thousand dollars, all to be completed by November 1st.

✤

The Richmond Cedar Works has just decided to manufacture ice cream freezers. This will be good news for Richmond, says the *Richmond Leader,* as it will mean that this company will find it necessary to build additional plants and to employ from 100 to 200 additional men in the next two or three months. The type of freezer to be manufactured is to be known as the "Snow Ball," and it will be made from the very best material in every detail. The castings for the freezers are to be made by a Richmond concern, the Richmond Foundry and Manufacturing Company, which is virtually the only plant in the South making a specialty of high-grade small castings. All other parts of the freezer are to be made by the Richmond Cedar Works. This freezer will be the only one made that will have Virginia white cedar tubs with patent electric welded wire hoops.

SUMMARY OF SANTO DOMINGO'S COMMERCE.

The Bureau of Insular Affairs of the War Department has on hand a limited number of copies of the April Summary of Commerce of the Republic of Santo Domingo recently compiled in the office of the Controller and General Receiver, Customs Service of Santo Domingo. The publication is printed in Spanish and English, and copies may be obtained upon request to the Insular Bureau.

THE WARREN HARDWARE SHELVING.

The J. D. Warren Manufacturing Co. of Chicago have just printed illustrations of their most recent designed Cabinets and Bases of the Warren Hardware Shelving, also including illustrations of the cabinets exhibited at the St. Louis World's Fair, many of which are printed in four colors, and in variety and number they furnish the most extensive assortment we have ever issued, among which are a number of combinations 25½ feet in length arranged as their experience and judgment suggests, costing from $3.00 per lineal foot and up. They also have issued a neatly arranged and finely printed net price list of over 300 patterns of their own designs, manufacture of store fixtures, which will be forwarded to any inquiries for same.

AN EXCELLENT SHOWING.

Secretary Peck says in reference to the Wisconsin Retail Hardware Association: "Our Association is growing slowly but steadily, and the Insurance feature is being appreciated by our membership more and more every day. We have written up $970,000 since we started sixteen months ago, and to-day show a handsome balance for dividends at our next Annual. Our Insurance Company saved its patrons the first eight months over $1,200. Only ninety-seven have their full limit. Why not 300?"

IOWA HARDWARE DEALERS' ASSOCIATION.

On September 22d the Executive Committee of the Iowa Retail Hardware Dealers' Association meets at the office of the president, in Ft. Dodge, to arrange the details of the Eighth Annual Convention of the Iowa Association, which meets in Des Moines on February 14, 15, 16, 1906. An elaborate programme is to be outlined and an adjustment of the many details of the convention itself will be before the committee for final settlement. The membres of this committee consist of President H. S. Vincent, Ft. Dodge; C. E. Haas, Le Mars; S. R. Miles, Mason City.

At the same time and place, a meeting of the Executive Committee of the Iowa Hardware Mutual Insurance Association will be held to canvass the quarterly business of the association. These meetings are usually held at the official headquarters of the association in Mason City, Iowa, but for the convenience of the committee and the saving of expense, President Miles issued his call for the present quarterly meeting at Ft. Dodge. The members of the committee consist of President S. R. Miles, Mason City; C. E. Haas, Le Mars; L. Lindenberg, Dubuque. The Hardware Mutual is making a fine growth and is becoming very popular with the members of the trade in Iowa and adjacent States. Plans will be consummated at this meeting for a special effort to bring the Iowa Association up to the fine standard reached by some of the older Hardware Insurance Mutuals. Association is saving large sums of money for its policy holders, and is making a specialty of prompt and satisfactory adjustments of all claims for loss and damage. They are now paying a cash rebate of 25% on stock company rates, and the officers of the association are confident that a substantial increase in the percentage of rebate will be made at the next annual meeting in January, 1906.

RUSSIA'S DISCRIMINATING TARIFF DISCONTINUED.

The recent announcement that the Russian Government has ordered that the levying of discriminating import duties on a number of articles, the products of the United States, be discontinued, lends some interest to the figures below, presented by the Department of Commerce and Labor through its bureau of statistics, showing the total imports into Russia from the United States during the calendar years 1900-1904, inclusive, as well as the imports during the period 1900-1903 into Russia from the United States of the articles affected by the adverse tariff legislation.

The application of the higher discriminating rates dates back to the beginning of the year 1901, when, in retaliation of the countervailing duty imposed upon sugar of Russian origin in accordance with section 5 of the Dingley tariff, the Russian minister of finance ordered the application of the penal tariff rates to imports of manufactures of cast iron, of hand tools, machinery, and numerous other articles classed under the general head of manufactures of iron and steel. These articles, which were subject until then to the same conventional rates as were paid by like articles coming from Germany and other European countries, became subject to rates from 30 to 50 per cent. higher.

It is interesting to note that the total imports into Russia from the United States, as shown by the official trade returns of the Russian Government, show but little the effects of the adverse tariff legislation. Thus the total imports from this country are stated by the Russian returns as follows:

	Dollars.
1900	22,748,000
1901	17,984,000
1902	20,574,000
1903	32,531,000

An analysis of the figures showing the imports from the United States of the various articles affected by the discriminating tariff legislation furthermore shows that these imports have, on the whole, increased during the period in question. Thus, the imports of manufactures of cast iron increased from $19,955 in value during the year 1900 (which, for purposes of this comparison, may be taken as a normal year) to $45,722 in 1903. The imports of hand tools, which were $15,315 in value in 1900, increased to $64,532 in 1903. Those of machinery increased from $223,524 in 1900 to $338,694 in 1903, while the imports of the various articles under the general head of manufactures of iron and steel increased from $45,373 in 1900 to $363,555 in 1902, and fell off to $67,555 during the following year. The same is true of bicycles, the imports of which, from $10,836 in 1900, increased to $43,087 in 1902, but fell to $30,377 during the following year. The imports of the articles under the general head of naval stores more than doubled—from $186,552 in 1900 to $404,226 in 1903. The combined figures of imports from the United States of the articles subject to discriminating duties show an increase from $501,558 in 1900 to $951,106 in 1903.

SEPTEMBER 25, 1905.

Editorial Trade Review

There has been a large and satisfactory amount of business done during this month, indicating that the year will show up well when compared with previous years, both in the manufacturers' statistics and in the jobbers' records. The demands of the jobbers have been of such persistency that already the manufacturers find difficulty in making specified deliveries, and their patrons are getting nervous about the goods being delayed at the factory, during the time when the shipment of our farming products will be apt to find congested conditions arising from that source.

The crops have been found so full and perfect that the trade has been led to believe that there has never been a time when the future looked so promising to every one in business; where agricultural products could be depended upon and the confident feeling regarding the future is felt generally by all those whose hopes are being so greatly realized.

The corn crop is estimated to be a phenomenal one, largely in excess of any previous season, and as the present price is certainly a remunerative one, a large amount of money will prove to be the result. The effect of this on general trade will be felt later to a certainty. The present business on corn huskers and corn knives has surpassed all expectations.

The travelers in every direction are sending in large and well-assorted orders, that keep the jobbers busy above all other times, even extending into the evenings, and the orders are from retail dealers whose stocks were well drawn upon in the Spring, leaving less stock than usual upon the dealers' shelves, which the travelers are doing their best to fill up by placing orders of extreme length on record for future delivery.

The advances that have gradually taken place show the natural trend resulting from the condition of prosperity visible on every hand. No speculation is noted from any special section of trade, the demand being a general one, and with a rational desire to fill the forthcoming wants of a good long season to come, with goods needed to make a local market full enough to meet all demands. The advances have all shown a conservative bias for present wants. The recent advance in nails and other wire products, of one dollar a ton, is viewed by the trade as being a stiffening of loose quotations that succeeded in making the market a steadier one than we have had for weeks.

The larger orders for goods in general have been already secured, and although not all in course of delivery, they have been sufficient to cause special quotations and concessions to purchasers to be withdrawn, and the business of the country to settle down to work and reap some of the fruit of the harvest.

The feeling pervading the trade is one of superabundant confidence in its strength, that augurs well for the growing demands of business that is founded on the growth of our agricultural prosperity, which is the foundation of our commercial energy and industrial wealth.

The builders' Hardware stock is still difficult to get. and the manufacturers are working nobly to catch up. Orders have in many cases been of the most sanguine character, and the liberal amounts have not been so fully anticipated by makers that the stock was manufactured ahead to meet it. The orders are forwarded as complete as possible, but the jobbers are restive over the unexpected delays and the anticipated back orders. Many of the seasonable goods are prolific of delays in reaching the retail dealers from the jobber, on account of the non-fulfilment of conditions that are virtually beyond his reach. such as those affecting deliveries of stove boards, coal hods and elbows, etc., and that class of goods that are usually slow in the season's delivery.

THE POST OFFICE DEPARTMENT WORKING IN THE INTEREST OF CATALOGUE HOUSES.

The Washington correspondent of the *Iron Age* announces in the issue of September 21, that the Post Office Department has issued an order that will raise a storm of protest from the retail merchants who are fighting the catalogue houses. The action just taken is in direct reversal of the department's policy heretofore enforced. It relates to the number of rural mail boxes, and the directions that are given in regard to the delivery of mail matter by the number of the box, without regard to the name of the party to whom the mail is to be delivered. The order changes, it will be observed, the policy which has been pursued by the Post Office Department and permits the sending of mail of all kinds without the knowledge on the part of the sender of the names of the parties to whom it is to be delivered. Supplementing the above form of regulations the Post Office Department is notifying the postmasters in routine correspondence, that they must furnish number of routes radiating from their office and the number of boxes on each route to all the applicants. All this is directly contrary to the policy of the department, which has guarded the names of parties on the free delivery route as it permits access to such parties without the trouble of ascertaining or writing their names on their mail matter. It thus affords the Catalogue Houses and others who desire to circulate miscellaneous printed matter an opportunity for which they have been waiting, but with facilities which make their task much simpler and easier than they had ventured to fancy.

In further explanation it is considered that lock boxes in all postoffices have for many years been known by number and that postmasters have been under instructions to deliver matter addressed to such boxes by number alone. Of course, this has no bearing upon the case in point. Lock boxes are usually maintained by business firms and their renters are about the last class of people the mail order houses would think of reaching with their catalogues. What the catalogue concern has wanted, and has wanted so badly that efforts have been made to corrupt rural carriers to obtain them, have been the addresses of millions of thrifty farmers living on their rural routes. This information the Post Office Department now proposes to supply "free gratis for nothing" beginning October 1, but an appeal lies from the Fourth Assistant to Postmaster General George B. Cortelyou, and it is up to the retail merchants of the country to lose no time in checking it.

PROFIT MAKING LINES

TRAPS AND TRAPPERS OF TO-DAY.

Civilization in North America has, during the last fifty years, made an immense advance, covering that vast area of prairie and forest land known as the "Great West," and converting it into a prosperous and peopled country. Almost unbelievable changes and growths have occurred, and the conditions of life and the pursuits of men have widely altered. To the invaders of the wilderness the gun and the steel trap (that indispensable little article which precedes the axe and the plow in the march of civilization) were weapons necessary alike for defense and for subsistence. To-day these utensils no longer have the same

WORKS OF ONEIDA COMMUNITY IN 1848, WHERE THE CELEBRATED NEWHOUSE TRAP WAS INVENTED.

significance and can, in the greater part of the country, be safely discarded as an actual means of defense. In Siberia and in South America, traps fill the position they formerly held here; but to one unacquainted with the subject it might well seem that, in this country the demand for traps must decrease with the settlement of it. The reverse of this theory is, however, the actual truth.

The Oneida Community undertook the manufacture of the

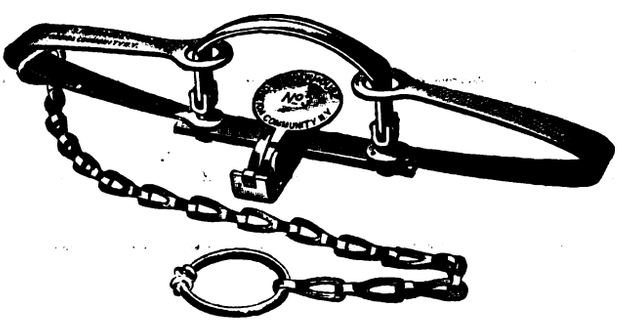
MAIN OFFICES OF ONEIDA COMMUNITY, 1905.

now world-famous Newhouse Game Traps in 1848. Since that time all other traps which have attempted to win the attention of trappers have been either modifications or imitations of this trap. The Oneida Community established its manufactory in a little shop 15 by 25 feet in size. The tools consisted of a common forge and bellows, hand-press, swaging-mould, anvil, hammer and files. The fabrication of the steel spring, a most intricate operation, was executed wholly by hand. Two stalwart men with a two-hand sledge and a heavy hammer reduced the steel to its elementary shape by about one hundred and twenty blows, and it was afterwards finished by a long series of lighter manipulations. One by one these difficulties were overcome by patience and ingenuity, until at length the whole process was executed by machinery.

With the progress of improvements in the process of manufacture, the cost and price of traps correspondingly diminished, so that now traps of far better quality than the clumsy articles in former use can be obtained at much less price. The trap of fifty years ago, bent and hammered into shape by painstaking individual labor, does not differ more essentially from the trap of to-day, perfectly tempered, constructed and turned out by thousands, than does its present practical value differ from its

SHOWS TRAP OVER 40 YEARS OLD WHICH WAS FOUND BY A PARTY IN MISSOURI, TRAP IS IN PERFECT WORKING CONDITION TO-DAY.

value in the past. The development in manufacture has only kept pace with the development in utility.



The use of traps has assumed a new significance, a significance in keeping with the times, but one far from commonly realized—an active money-making value. For example: New York State in a wild condition could support perhaps one million inhabitants, whereas in its present highly cultivated state it can afford an

PRESENT STYLE OF SINGLE SPRING NEWHOUSE GAME TRAPS.

ample income to ten or twenty times that number. Similar conditions are equally favorable to the small fur-bearing animals, who, finding security from the larger wild animals that early fell prey to the hunter, have constantly increased in the farm lands of both the eastern and western States.

It is an unquestionable fact that trappers, in North America,

PRESENT STYLE OF DOUBLE SPRING NEWHOUSE GAME TRAPS.

never have had more numerous game at their disposal, better weapons with which to capture them, or higher prices for the furs thus procurable than at present. The fur market was never so favorable, and it will undoubtedly continue to improve. It would be difficult, indeed, to discover a more pleasant and well repaid task for the sportsman, or a more profitable employment for the leisure hours of farmers than the business of trapping to-day.

HELPING THE DEALER

ADVERTISING SUCCESSES.

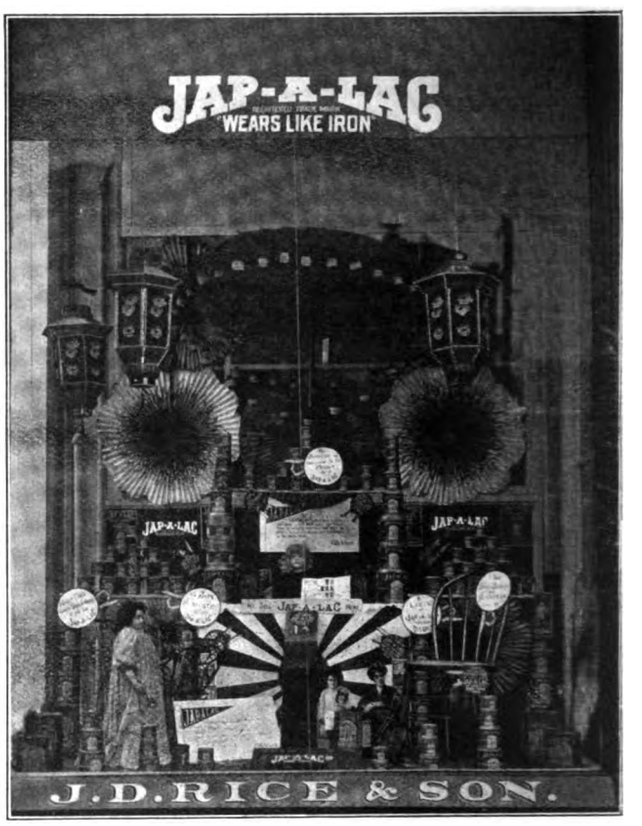
Perhaps the most notable advertising success of the year is the campaign conducted by the Glidden Varnish Company, advertising Jap-a-Lac.

They began in April numbers of the popular magazines and spent $60,000 during the Spring months alone. Embodied in this advertising campaign was the largest advertisement ever placed

WINDOW DISPLAY OF HUMPHREY-JONES MERCANTILE CO., DENVER, COLO. WINNER OF 1ST PRIZE, CLASS "A."

in any one publication. *The Butterick Trio* carried one advertisement showing in May issue a four-page colored insert, advertising the merits of Jap-a-Lac and illustrating its uses. For this advertisement alone, the manufacturers paid $15,000. The month previous they had an $8,000 advertisement in the *Ladies' Home Journal*, and, taken altogether, we think, the success that Jap-a-Lac has attained by virtue of its enormous advertising is significant of the value of present day advertising methods.

We find upon getting details of the campaign which was conducted on Jap-a-Lac, that the advertising manager, Mr. Ash-



WINDOW DISPLAY OF BURHANS & BLACK CO., SYRACUSE, N. Y. WINNER OF 3D PRIZE, CLASS "A."

brook, was not satisfied with merely placing the advertisements in the magazines, but he inaugurated a strong follow-up system which he used with telling effect upon the dealers throughout the country. He informs us that he believes that publicity advertising in itself is of great value in obtaining customers for the article advertised, but that in order to get the fullest value out of so large an expenditure as they made this Spring, it was necessary to bring to the attention of the dealers throughout the country the splendid results they could obtain by using this advertising for their personal behoof. He went into an exhaustive campaign of education on advertising in general, specifically calling attention to Jap-a-Lac as the central issue for the dealers who could profitably handle it.

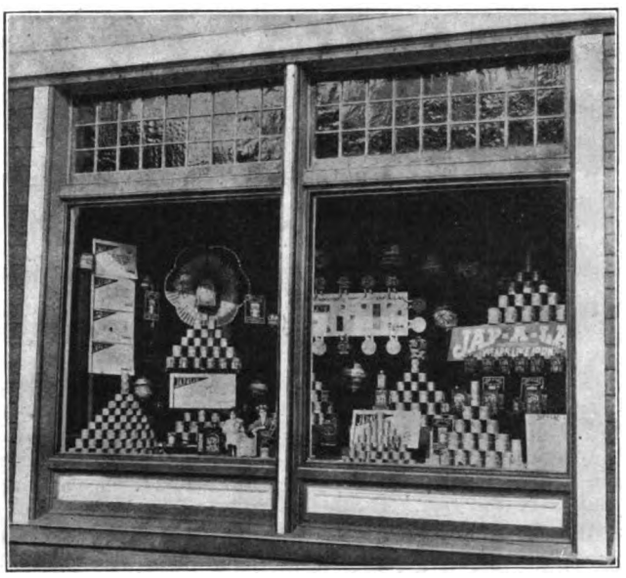
Publicity advertising convinces the readers of the popular magazines that an article advertised so extensively as Jap-a-Lac is something which they want. It gives strong reasons why they should use it, and they are thus prepared to buy the advertised article, if they know where it can be obtained.

Mr. Ashbrook found that some dealers did not realize the importance of making known the fact that they stocked advertised aritcles. When a man or woman wants to purchase an advertised article, they are sure to go where they know they can get it. Any dealer who takes the pains to acquaint his local public of the fact that he keeps widely advertised articles is sure to reap

WINDOW DISPLAY OF J. D. RICE & SON, AURORA, ILL. WINNER OF 3D PRIZE, CLASS "B."

the benefits of all of the advertising which is done in his neighborhood, and to make his store the center for such articles as he advertises to keep. In this way, a dealer's business on advertised articles can be very greatly increased along the line of least resistance.

There are other benefits far in excess of those above mentioned which some dealers have never taken into consideration, chief among which is the obtaining of new customers, not only for the advertised article, but for other articles which they keep in stock. If any courteous dealer can induce a new customer to enter his store for an advertised article, he stands a good chance of obtaining his entire trade as long as he treats that customer properly.



In order to help the dealers, and to give them an example of just what could be done with an advertised article, the Glidden Varnish Company offered prizes amounting to $1,000, divided into separate classes and of separate amounts, for the best window displays, photographs of which they were to receive, made during the week of April 10th.

We illustrate herewith a few of the prize winners. Altogether 126 prizes were given, and besides photos from those who were fortunate enough to obtain a prize, there were a great many photographs sent in which the judges thought should at least have had honorable mention. Almost every dealer who took the trou-

Digitized by Google

ble to have a photograph made of his window showed exceptional good taste in window dressing, and out of the innumerable letters received regarding the effect of the window display on the sales of Jap-a-Lac and other articles, there were very few that did not state that the window display had been a very profitable investment.

The Jap-a-Lac sales for the first six months of the year were 10% in excess of the entire sales of last year. This very creditable showing is no doubt due to their advertising and the protection given it.

WINDOW DISPLAY OF C. H. GOSS & CO., ST. JOHNSBURY, VT. WINNER OF 1ST PRIZE, CLASS "C."

Jap-a-Lac is one of the many advertised articles which the dealer could profitably give his attention to, and we cannot too strongly indorse the views of Mr. Ashbrook on the benefits possible to be obtained by the dealers who co-operate with the manufacturers who advertise their commodities, as we believe it will be only a question of time when most manufacturers will find it will be absolutely necessary for them to use general mediums of publicity if they wish to have the co-operation of the dealers, and also that the dealers will realize within the near future that it is very greatly to their advantage to back up the advertising of the manufacturers and take advantage of such publicity as is given a manufactured article in their own locality.

FINDS NEW USE FOR THE PHONOGRAPH.

Manufacturer Will Address Conventions of Agents by Means of Talking Machines.

A new use has been found for that versatile machine, the phonograph. It is to be used by the maker of another wonderful machine to perfect the system whereby the latter is marketed.

John H. Patterson, president of a big manufacturing concern in Dayton, has discovered that the phonograph can be put at work more practical than that of entertainment.

Few persons have thought to put it to a practical use in the world of industry. It has not been used heretofore as plows and reapers and engines are used, to aid in general production.

Mr. Patterson purposes, through the machine, to talk directly at least once a month to every one of the agents selling the product of his factory throughout the United States.

Sitting in his office in Dayton, this busy manufacturer will deliver addresses on different phases of the business. These will be kept on the phonograph records and will later be relayed by the machine to the ears of agents throughout the country.

The phonograph will get in its greatest work at the conventions where once each year in the large cities of the country the agents of a given district meet. It has been the custom of the company to have a number of officials from the Dayton headquarters attend each of these conventions, and lecture to the agents, explaining new points, giving suggestions about the work and making "ginger" talks to inspire the men with a spirit of hustle and determination.

A trip around the circuit of the conventions lasting six weeks was too irksome for one man. Hence Mr. Patterson began wondering what arrangement he could make to secure the same results with less labor and time.

He could not bring all the agents to Dayton each year, nor would a personal representative quite take his place. Finally he thought of the phonograph. That would reproduce his own words in his own voice. Immediately he set about to put the scheme into effect, and at all the coming conventions President Patterson and other leading officials of his company will address the salesmen through the phonograph.

Mr. Patterson has thus solved the old problem of inability to attend more than one meeting at the same time, for he will often be speaking at two or three conventions the same day, and just as many times will be delivering a different speech at each place.

NEW COPPER WELDING PROCESS.

Consul Shank, of Winnipeg, Canada, reports that scientific circles are interested in the discovery of a process for welding copper, which has been made by a local blacksmith. It is said the process has been thoroughly tested and found perfect, and that copper can be welded to copper or to other metals without impairing the electrical conductivity and other properties of the metal. The process is said to be very simple and no more costly than the welding of steel. The work can be done with a forge, blowpipe, or any apparatus which will heat the metal cherry red. Patents have been applied for in the United States and Canada.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

DOWER RIGHT—EFFECT OF DIVORCE.

QUESTION: If a husband secures a divorce against his wife and then dies without remarrying, has the wife a dower right in his real estate?

REPLY: At the common law and in the absence of statute it is settled that an absolute divorce for whose ever fault will always bar dower. This has been changed by statute in many States and the local statute always governs in respect of real property situated within the State. Under the New York statutes the only divorce which will bar a wife's dower right is one obtained for the widow's "misconduct." The term "misconduct" has been interpreted to mean adultery. So it has been held in New York that a divorce obtained in Indiana against a wife on the ground of desertion did not bar her dower right in lands situated in the State of New York.

MORTGAGE—EFFECT OF TENDER.

QUESTION: A mortgage became due on the 22d day of April. On that day the mortgagor went to the owner of the mortgage and tendered the mortgage debt with interest and costs, which the owner of the mortgage refused to take, saying that he proposed to foreclose the mortgage. He is now bringing suit to foreclose. Can he do so after the mortgagor has offered to pay the money?

REPLY: A tender of the mortgage debt with interest and costs discharges the mortgage so far as any attempt to enforce it by the mortgagee is concerned. It is a defence to an action to foreclose. But the mortgage still remains on the property, and in order to have it cancelled of record, so that it will no longer appear as an encumbrance, the mortgagor must bring an action in a court of equity. And this court will require, on the principle that he who seeks equity must do equity, that before the mortgage is cancelled of record, the mortgagor shall pay the mortgage debt. So long as the mortgagor does not seek this equitable relief, his tender is a complete defence to the foreclosure suit, even though the tender is not kept good.

UNINCORPORATED ASSOCIATION—LIABILITY FOR DEBTS.

QUESTION: A man rendered services as a linotype operator in printing a newspaper which was the official party organ of the social labor party. This is not a corporation, but has a constitution, officers and regular members, who are required to pay monthly dues. Are the members responsible individually to pay for these services rendered in printing the newspaper?

REPLY: It is settled that in order to maintain an action against the president or treasurer of an unincorporated association, the plaintiff must prove that all the members of the association are liable to pay his claim. And it is also held that the members are not individually liable for debts contracted by the officers or committees merely because these officers have a general power to attend to and transact the business of the association. There is no presumption that these officers have power to pledge the personal credit of the members. And unless it can be shown that the individual members authorized their officers or committees to pledge their credit, they cannot be held responsible for the expense incurred in printing the paper.

SEWING MACHINES AND THE HARDWARE DEALER.

A Special Line That Pays to Handle.

One name is so inseparably connected with the history of sewing machines that a short sketch of this man's life will, I feel sure, prove interesting to the Hardware merchant.

Elias Howe, Jr., was one of eight children of a poor family and was born in Spencer, Mass., in the year 1819. When Howe was inventing and perfecting his sewing machine his family were often in actual want. He persisted, however, and in the year 1846, with money borrowed from his father and a friend named Fisher, a sewing machine patent was issued to him. He was now ready to sell his machine, but the public did not take kindly to the idea, and finally, after several years spent in trying to exploit his machine without success, and oppressed with heavy debts, he assigned his United States patent to his father and his friend Fisher, to satisfy their claims against him.

Howe then went to England where he expected to find a more enlightened people ready to take up and accept his wonderful sewing machine. Here, he finally sold his English patent right to a Mr. William Thomas for $1,250, sent for his family from the United States, and went to work for Thomas at $2.50 per day; but, after eight months, when his machine was in fair working order and his services were no longer required, he was discharged.

We read that Howe was soon in debt again and was finally thrown into prison for debt, but was bailed out by his brother who paid the claims against him. Howe then again returned to the United States and went back to work in a shop at daily wages. He died a poor man at the age of forty-eight.

The sewing machine which Howe invented and had patented in 1846 made what is termed the lock stitch and was the first sewing machine we know of capable of making such a stitch.

To-day, eight-tenths of the family machines used make the lock stitch which Elias Howe gave to the world. The shuttle, the grooved needle, the thread take up and the thread tension for sewing machines, it can be fairly said, were given us by Howe. The Howe machine, of course, had a feed, but it was a very crude one. While Howe made the first lock stitch machine, of which we have any authentic record, other machines making the chain or embroidery stitch were in practical use before Howe's time, although he was unaware of them.

One Barthelmy Thimmonnier had eighty large wooden chain stitch machines running in Paris, sewing army clothing and making two hundred stitches per minute and which were destroyed by a mob in 1841.

A Mr. A. B. Wilson of Watertown, New York, invented the "four motion feed," so called because the feed moved up to come in contact with the cloth, to be in position to rise again ready for feeding the next stitch.

It remained, however, for Isaac M. Singer to adopt a stand and foot power, thus equipping the sewing machine for family use. It was through Singer's versatile and administrative abilities that the greatest sewing machine organization in the world was successfully built up and established.

The modern sewing machine has been specially adapted to a multitude of purposes, some most surprising. Sewing machines, in addition to exclusive family use are now made to sew on buttons, to sew leather, harness, hats, straw goods, umbrellas, books, gloves, carpets; in fact, almost anything.

Sewing machines are one of the lines of which Hardware merchants have taken hold during the past few years to their satisfaction and profit. It is a line that naturally belongs to the Hardware trade, but still, I am of the opinion that the ground has hardly been scratched and that if the Hardware dealer will take hold of the line in earnest and *plow deep*, the harvest will yield returns in the way of profits far in excess of their highest expectations.

Those Hardware dealers now in the business will reap results from the efforts of those to begin and if every Hardware merchant in the country carried sewing machines, there is enough for all and the trade now already established could be enlarged to good and profitable advantage. Sewing machines are sold all over the United States, in every little town and settlement. Wherever a family lives, you will find sewing machines and there is no side line the possibilities of which can be counted with more certainty than selling a line of dependable well-made family sewing machines.

Every hour devoted to the sale of sewing machines is time well spent and will eventually bring good results. There are various other special lines that have their seasons, but the sewing machine is always seasonable. The manufacture and sale of sewing machines each year runs into the millions.

If the Hardware dealer will exert the same efforts to sell a sewing machine that he does to sell a heating stove, he will meet with better results. The heating stoves are strictly seasonable, and often large stocks of them are carried over. One hundred dollars invested will carry a fine assortment of sewing machines that will never have to be increased and are seasonable the year round. They are salable goods and if offered at popular prices will pay a nice profit on amount invested. Sewing machines are an attractive line for any first-class Hardware house.

G. H. DIRHOLD, St. Louis, Mo.

POPULAR TALKS ON LAW.

Copyrighted, 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

Landlord and Tenant.

NO. 6. THE DURATION OF THE TENANT'S TERM.

It is usual to stipulate in the lease or rental agreement the time when the tenant's occupancy of the premises is to terminate. Frequently the length of the term is stipulated, with a provision added to the effect that the term may be renewed or the premises retained by the tenant for a certain time longer, at his option.

But there are cases where the term is not definitely stated, or where the provision in the lease is not valid for the length of time agreed on. If the length of the term is stipulated, and the stipulation is valid, little difficulty can arise; but where the length of the term is for any reason uncertain, questions arise that frequently lead to trouble between the landlord and the tenant.

Where the length of the term is not stated, the intention of the parties must be determined by the conditions and circumstances of the case. The main factor going to determine the intention of the parties is the manner in which the rent is payable; as, if the rent is so much a week, or month, or year, as the case may be. But it has been held that where the property has been leased for farming purposes, the presumption is that the tenacy was for a year at least. The rent-paying periods is not taken as conclusive evidence of the intentions of the parties; it is only taken as presumptive, and evidence may be introduced to show that the tenancy was for a greater or less period than as indicated by the rent periods.

The mere fact that the rent is payable monthly, quarterly, yearly, does not control in all cases. As, where a lease provides for an annual rent, payable monthly, it is held to be a tenancy from year to year, or from month to month, according to the rent paying periods.

It is a general rule that every agreement as to the duration of a tenancy must, in order to be binding, fix its termination, either by date or by some circumstance other than the pleasure of the parties.

As stated, the time of termination may be stated in the alternative; that is, a certain time or a certain other time, at the option of the tenant. It is said that an agreement that a tenant may occupy premises until they are sold is valid.

Frequently leases read to make the tenancy for a fixed time, subject to termination at any time upon so many days' notice. Such agreements are valid, but it should be understood here that so many days,' weeks," or months' notice in the lease means so long a notice before the termination of one of the rent periods. So that if a lease is by the month, subject to termination at any time on a week's notice, this is implied to mean a notice given one week before the expiration of the monthly period. So that if the notice were given only two days before the end of the month, the tenancy would not expire seven days after the giving of the notice, but at the end of the following month.

Much trouble has arisen over the misconception of the meaning of the expressions "week's notice," "ten days' notice," and so on. The meaning is so many days' notice ending with the last day of the rent paying period.

Of course there is nothing to prevent the parties from agreeing that on certain notice a tenancy may expire at any time during a month, but such intention should be clearly expressed by saying, for instance, that if the notice expires in the middle of the month, rent shall be paid for the fractional part of the month up to the date on which the notice expires.

A tenancy does not expire until midnight of the last day of the term.

(To be continued.)

A meeting of the Wholesale and Retail Joint Committee of the National Hardware Association will be held at St. Louis September 25, 26 and 27, the special object being the consideration of the Catalogue House question, and to map out lines for the future.

"FIFTY YEARS OF PROGRESS."

Under the title of "Fifty Years of Progress" Hibbard, Spencer, Bartlett & Co., Chicago, publish an exceedingly artistic brochure, commemorating the semi-centennial anniversary of the founding of that famous jobbing house. It forms a pamphlet of over 30 pages and a great deal of care has been bestowed upon its preparation. It gives the history of the house from the early days when it started as Tuttle, Hibbard & Co.—which was in 1855—commencing a career which has culminated in its present important position in the trade. Tuttle, Hibbard & Co.'s store was 24 feet wide, of the usual depth and four stories in height, directly opposite the location now occupied by their successors.

The conditions under which the old time jobber had to contend in those days now almost forgotten are described as follows: "The force of men, aside from the members of the firm, included a salesman, bookkeeper, receiving and shipping clerk combined, packer and porter. The stock of merchandise consisted mainly of staple and builders' Hardware, tinners' supplies and house-furnishing goods. At that early date, the modern idea of assembling a great variety of goods under one roof, making it possible for the retailer to purchase small and frequent bills and to have them promptly and economically shipped, had not been born. The country merchant came to market each Spring and Fall, selected and purchased enough goods presumably to answer the requirements of his trade for six months and then depended upon a few, *a very few*, orders by mail to keep good his assortment during the interim between his visits. The traveling salesman had not made his appearance in the commercial world and the illustrated catalogue had not been thought of by the wildest dreamer. A monthly price list covering a single page, giving market values of tin plate, sheet iron, nails, etc., was sent out with more or less regularity and before the firm changed its name it had issued a little pamphlet containing prices of quite a large number of articles and which it dignified with the name of catalogue."

In March, 1857, the stock of Tuttle, Hibbard & Co. was destroyed by fire, the business being continued at 32 Lake Street, and continued in that location three years. From 1860 to 1865 the business was removed to 62 Lake when the firm went out of existence, the stock being purchased by the new firm of Hibbard & Spencer. A third removal was made in 1867 to 92 and 94 Michigan Avenue where in 1871 the building and stock was destroyed by the great Chicago fire. In 1872 a new building was erected for the firm at 30 and 32 Lake Street, year by year additional stores were rented until they extended from 16 to 32 Lake Street, and a large warehouse fronting on Michigan Street was entirely occupied with surplus stock.

In 1877 the firm name became Hibbard, Spencer & Co., and in 1882 the name was changed to its present form, the officers being Wm. G. Hibbard, president and treasurer; Charles H. Conover and James W. Nye, directors. On the death of Mr. Spencer, in 1890, Mr. Bartlett became vice-president and Mr. Conover secretary. The business of late years has been conducted on a profit-sharing basis in that trusted employees were rewarded with shares in the stock or the earnings. There are many such partners in the business now, including the following who hold titles: A. C. Bartlett, president; Charles H. Conover, vice-president; W. G. Hibbard, Jr., second vice-president; J. J. Charles, third vice-president; Frank Hibbard, fourth vice-president; A. M. Graves, secretary; C. B. Whipple, assistant secretary; E. G. Clark, treasurer; P. L. Macomber, manager of credits; F. D. Hoag, cashier; F. C. Bartlett, H. B. Lyford, F. H. Warren, Henry Beneke, H. W. Chester, Pritchard Stewart, W. A. Sickels, directors.

One of the most interesting features of this brochure is the incorporation in its contents of the reproduction of the portraits of 58 employees who have for over 20 years formed the "Old Guard" on whose fidelity to their interests no doubt a good portion of their abundant success is due. It speaks well for the concern to be able to keep their continued services for so many years. Portraits of Messrs. Hibbard and Spencer and of the present officers and directors are shown, and the various premises occupied by the concern in its business career are among the illustrations that tend to make this pamphlet as unique as it is interesting.

NATIONAL HARDWARE ASSOCIATION.

The following letter was mailed to all the members of the National Hardware Association, September 9:

Gentlemen—As you have already been advised, the Eleventh Annual Convention of our association will be held in the city of Washington, D. C., November 8th, 9th and 10th. We have absolute assurances that this will be the most successful meeting our association has ever held. Details as to the programme will be furnished in ample time.

The feature of hotel accommodations is one that gives much trouble merely because strictly first-class hotels are seldom in a position to take care of a large number of people in the month of November, who come for a stay of less than one week. We have made arrangements to have the official headquarters at The Arlington Hotel and The Shoreham. These two hotels are among the best in the country, and are located within about three hundred feet of each other.

The Arlington.

At this hotel the rates will be, on the American plan, $4.00 and $5.00 per day, each person. Where two persons occupy the same room the rate will be $4.00 per day. Bath rooms will be $2.00 per day extra. This expense to be divided among the persons using the bath. European plan, $2.00 to $4.00 per day, each person.

The Shoreham.

Rates will be $5.00 per day. Where two persons occupy the same room, $4.50 per day. Rooms with bath will be $1.00 per day extra.

The Ebbitt House.

This hotel is only about three blocks removed from The Arlington and The Shoreham, and we have secured a rate of $3.00, $4.50 and $4.00 per day on the American plan, parlor and bath extra.

The rooming of delegates will be in charge of F. P. May, of F. P. May & Co., Washington, D. C., and we would advise you to correspond with him immediately, stating just what accommodations are required, and the names of those for whom you desire them. Mr. May will do his utmost to see that you are comfortably situated.

Yours truly,

T. JAMES FERNLEY,
Secretary-Treasurer.

ENGLAND HAS HER TROUBLES.

Profit, like the bustle, is a thing of the past. It was originally invented, says a writer in the *Ironmonger*, so that those who wished to work might make a living. But nowadays anyone found making a profit must either hand it over to Government under the name of income-tax, or is summoned under the Secret Commissions Act. If he escapes these his profit is dragged from him to provide for those who are willing to work but won't, called "the poor." Hence that beautiful ballad which has just come out, entitled "It's The Poor That Helps The Poor." Everybody is pleased with that song, because everybody thinks it's meant for him. Some folks would like profit to come into fashion again, but others won't have it back at any price. As for the latter, if they get enough to pay their expenses that's all they want, and they'll take good care no one else gets any more.

One blithering idiot can spoil the profit of a whole town. He's generally a sad, unhappy-looking creature, who prides himself on having "no style." He peeps in his opponents' shop windows and cuts everything except his own throat, which is the one thing the others would like him to cut. He does a big trade, lives on his "turnover," and ruins those who struggle to live on profit. There is no need to say much about his popularity. Associations have been formed to try to revive profit, but many ironmongers, although members of such associations, still think it rude of an association to "dictate" to them at what price they shall mark their goods. Journalists always write of "these times of keen competition" (how I loathe the phrase!) when they ought to write "keen lunacy." If there is a big contract in a town the man who loses most gets it.

Manufacturers are now trying to make out lists with such a small margin of profit that the "idiot" shall not be able to cut prices any more, but up to now the idiot wins. He gives the public a small fee to come and buy some of his goods at cost price, and he spoils all the fun for the manufacturer and everyone else. That is called a "leading line." They are very nice things, are "leading lines." They were introduced to lead the public to buy other things at that shop. But the public nowadays knows a thing or two, or even three. The public as a rule is in business itself, and understands all about these things. So it goes about, does the public, buying "leading lines" where it can get them, and nothing else; and hence it comes to pass that every tradesman says that he is doing lots of business but making nothing. Everybody is supposed to work for profit, but until everybody realizes that the fruits can only be reaped by the combination of the whole of a trade, nobody will get any. But if the same article were the same price all over the town the public would be satisfied, and would go to the tradesman whose "manners" and stock they liked best.

THE J. STEVENS ARMS & TOOL CO.'S ADDITIONAL PLANT.

The prominence that has been obtained in so short a period by the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., is of a character to deserve more than a passing notice; for under the old management nine years ago they were employing but 44 men, while to-day they have on the pay roll over 1400, and have continually, even with that force, had to back order goods. At

ORIGINAL PLANT OF THE J. STEVENS ARMS & TOOL CO.

the former period they owned and occupied the "River Plant" only, as shown in the small illustration herewith; since which time the capacity of this plant alone has been nearly doubled. In 1899 they purchased what is known as the Hill Plant, formerly owned and occupied by the Overman Wheel Company, and in 1902 they purchased their No. 3 factory, as shown in the illus-

PRESENT PLANT.

tration, or as it is frequently called, the Power Plant, from the Lamb Manufacturing Co. This was originally the plant of the Spalding Bicycle Co. This Fall, finding themselves still short of room, they are adding two stories to what is known as Mill No. 2 of the Power Plant, which was formerly a four-story building. This is made necessary by the demands of its increasing automobile business. The addition of the two stories gives them additional floor space of about 25,000 square feet, or about one-third additional room. The company expects to use the upper floor of this addition as a repository for finished cars, and the lower floor for a paint room. They are building a seven-story tower for the stairways, elevator, lavatories, etc. The clear floor space which they gain by these improvements will yield more in the aggregate than the two floors of 215 by 45, which they are building, and which will be ready for occupancy the last of this month.

AMERICAN WRINGER CO.'S NEW CATALOGUE.

The American Wringer Co., 99 Chambers Street, New York, N. Y., present to the trade a handsomely illustrated catalogue, which they call "Modern Wringing," attractively gotten up and finely printed on excellent paper. The book is exceedingly artistic, a large number of the illustrations being delicately tinted. They make mention of the care taken in the preparation of their catalogue in the following extract: "In the production of our Catalogue No. 8 we have had in view the interests of the merchant. Our object has been to produce a book useful, descriptive as well as interesting, and one that would enable a buyer to obtain information helpful to him in purchasing as well as in selling. The illustrations have been carefully prepared, intending to do justice to the Horse Shoe Brand Wringers, which have and always will be manufactured with the strictest adherence to quality." A series of views running through the book, showing the various methods of washing clothes in different parts of the world, is very interesting and tends to magnify the usefulness of wringers in general and the products of "The American Wringer Company" in particular. The attention of the reader is first called to the "Royal," which they style the "King of Wringers," representing as it does the highest development in the art of modern wringing. Mention is made of eight "Royal" Wringers, each differing from the other in some respect according to the kind of tub to which it is intended to be attached. The same general scheme is followed throughout the book with regard to their other makes of Wringers, as, for instance, the "Universal," "Novelty," "Keystone," "Excelsior," "Empire," etc., each of which is described and illustrated in detail. The last few pages of the catalogue call attention to the "Empire Clothes Dryer," "Household Folding Bench," "Universal Mop Wringers," "Gem Toy Wringers," "Eclipse," "American" and "Universal" Mangles, also "Universal Power Wringers" for use in steam laundries, hotels and factories. The catalogue is indexed and a "Wholesale Price List" will be found enclosed. A copy of this interesting booklet will be sent upon request.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED SEPTEMBER 4, 1905.

388,814. SASH CORD FASTENER. J. L. Bohannan, Frankfort, Ky.
388,818. SEAL LOCK. L. A. Brown, St. Louis, Mo.
388,945. CORKSCREW. W. N. Barrett, Meadville, Pa.
388,957. BOLT CUTTER. G. B. DeArment, Evansburg, Pa.
388,990. DISH WASHER. W. D. Miller, Florence, Mass.
389,012. TOOL REST FOR HAND LATCHES. E. Rivett, Boston, Mass.
389,039. WASHING MACHINE. A. M. Wilson, Greenleaf, Kans.
389,083. LANTERN. H. L. Jewell, Bangor, Me.
389,084. LANTERN. H. L. Jewell, Bangor, Me.
389,110. DOOR CATCH. C. H. Roselius, Nebraska City, Neb.

PATENTS ISSUED SEPTEMBER 5, 1905.

798,613. EGG BEATER. W. R. Marie, Brighton, Mass.
798,636. ASH SIFTER. E. W. Stokien, New York, N. Y.
798,694. FASTENING FOR DOORS, WINDOWS, ETC. J. M. Newall, Seaforth, England.
798,765. CARPET SWEEPER. A. Crossman, Chicago, Ill.
798,793. WASHBOARD. T. J. & W. W. Hubbard, Lamoille, Ill.
798,955. WRENCH. W. Frazer, Sherrett, Pa.
798,999. CURTAIN POLE SUPPORT. S. M. Ferguson, Louisa, Ky.

PATENTS EXPIRED SEPTEMBER 11, 1905.

389,215. PADLOCK. J. Friedmann, San Francisco, Cal.
389,248. SASH BALANCE. J. A. Rogers, Hartsells, Ala.
389,256. MANGLE OR IRONING MACHINE. H. J. Skinner, Buffalo, N. Y.
389,293. CAN OPENER. J. F. French, Philadelphia, Pa.
389,302. TRANSOM LIFTER. R. Hittinger, Belmont, Mass.
389,304. LOCK AND LATCH COMBINED. A. A. Kellogg, Clinton, Mo.
389,345. LOCK FOR SLIDING DOORS. J. M. Tunis and W. F. Bedford, Madison, N. J.
389,355. LOCK. J. Bergman, Galveston, Tex.
389,366. DUST PAN. E. C. Cunningham, Altoona, Pa.
389,384. COMBINED HAMMER, WRENCH AND STAPLE PULLER. J. H. Hebblewaite, Rock Falls, Ill.
389,390. LATCH. E. E. Knowles, Syracuse, N. Y.
389,400. WRENCH. E. C. Mead, Elkhart, Ind.
389,401. WINDOW SCREEN. P. Miller, Kingston, Pa.
389,418. WEATHER STRIP. E. Stalker, Westfield, Ind.
389,492. LOCK. E. G. Asmus, Milwaukee, Wis.

PATENTS ISSUED SEPTEMBER 12, 1905.

799,026. APPARATUS FOR HOLDING PLIERS. D. W. Barrow, Chattanooga, Tenn.
799,109. CORK SCREW. H. Sturm, New York, N. Y.
799,112. WASH BOILER COVER. A. R. Thomas, Detroit, Mich.
799,119. CAN OPENER. T. A. Watrous, Elmira, N. Y.
799,155. PIPE WRENCH. M. D. Gill, Medford, and W. A. Henderson, Boston, Mass.
799,217. WRENCH. W. N. Bee, Pittsburgh, Pa.
799,234. CARPENTER'S PLANE. J. Jett, San Francisco, Cal.
799,275. HINGE. C. S. Stevens, New Britain, Conn.
799,330. LOCK. J. A. Horne, Stamford, Conn.
799,345. MOP WRINGER. A. F. Lifvendahl, Chicago, Ill.
799,432. WRENCH. H. Aue, Gradatim, Pa.
799,539. COMBINATION WRENCH. H. A. Corwin, Belle Vernon, Pa.

UNSATISFACTORY.

The man who was forced to eat his words said the meal reminded him of wind pudding.—*Boston Transcript.*

RECENT TRADE PUBLICATIONS.

THE HERO FRUIT JAR CO., Philadelphia, Pa., have sent to their patrons an envelope sized catalogue of their Oilers, Can Screws, Sprinkler Heads, Bottle Caps, Collapsible Tubes and Sheet Metal Specialties, illustrating and pricing the different kinds of Oilers manufactured by them, such as Chace's Zinc and Brass Oilers, Automatic Oilers, Mowing and Sewing Machine Oilers, Etc. Prices are also quoted for Engineers' Drip Oilers, Zinc, Brass and Copper Oil Fillers, Engineer Sets of Paragon Oilers and Miners' and Drivers' Lamps, all of which are illustrated.

THE OHIO STRUCTURAL IRON CO., Sandusky, Ohio, manufacturers of Ornamental and Light Structural Iron and Wire Work, are presenting to the trade a new catalogue in large pamphlet form, finely printed and well arranged. This catalogue contains illustrations and descriptions of fire escapes, iron stairs, fencing, entrance gates, window guards, area gates, iron and steel doors, balconies, iron shutters, jail cells, and in fact mention is made of everything in this class of iron, steel and wire work. A copy of the pamphlet will prove interesting and useful to anyone desiring same. Send for Catalogue C.

E. W. BLISS CO., Brooklyn, N. Y., have recently issued a new and attractive catalogue of Minting Machinery which they are pleased to place in the hands of those using this class of machines. They claim that the coining machines manufactured by them embody the latest and best ideas brought out by experiment and by actual use, their engineers having made the coining of money the subject of very careful study. The catalogue is printed on excellent paper and is illustrated throughout, and the author has carefully explained the different processes used in the manufacture of coins from the time the stock enters the melting furnace until the various coins are embossed with designs to suit their denomination. If you are interested in Bliss mint machines write for a catalogue.

LINCOLN-WILLIAMS TWIST DRILL CO., Taunton, Mass. An 18-page pamphlet catalogue of High Speed and Carbon Steel Drills, manufactured by them. In the catalogue they state "We make a specialty of the within tools. Should a customer find a defect in one by sending to this office or to the party from whom he purchased, he can get a perfect one free of charge." In the contents of this catalogue list prices are given of Taper Shank or Straight Shank Drills; Jobbers' and Machinists' Sets, Wire Gauges, Three and Four Groove Chucking Reamers, Etc. Taper Square Shank Drills for Ratchets; Straight Shank Machine Bits for wood, and Straight Centre Drills, Etc., are also included in contents.

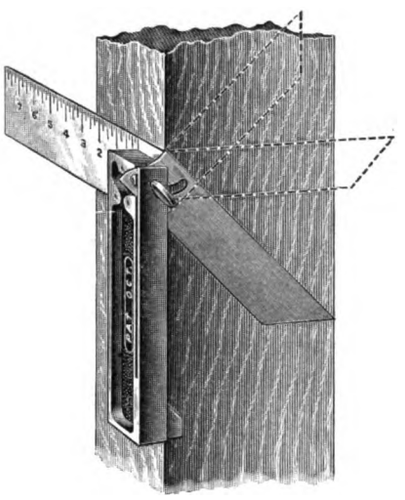
THE GOULDS MANUFACTURING CO., Seneca Falls, N. Y., have made us the recipients of a very extensive catalogue, describing and illustrating the products of their factory, which include power pumps of every description. The company claims that for nearly all pumping operations the Goulds are the best and most economical. They will last longer, require less expenditure for repairs, and the operating expenses will be less than any other type, proof of which may be found in the fact that one of the first large water works they installed, over twelve years ago, is still in operation and has cost nothing for repairs during this time beyond an occasional repacking. They have innumerable references of a similar character. These pumps are guaranteed to properly perform the work for which they are recommended and sold, and the company will supply, without charge, any part returned to them within a year of shipment, which bears unmistakable evidence of imperfection in material or workmanship. The catalogue is well gotten up, engravings being shown for every kind of pump mentioned and specifications being given for each. If you have not received one of these instructive books and you are interested send for a copy at once.

I. DURLACH, 54 Vesey Street, New York, has recently issued a six-page folder showing a few of the specialties manufactured by him, such as Roofers' Tar Pails, Asphalt Scrapers, Steel Gravel or Sand Pails, and Engineers' Steel Galvanized and Original Patented Indestructible Ash and Garbage Cans. These ash and garbage cans have special protected sides and strapped bottoms, and the garbage cans are guaranteed not to leak. One of these folders will be mailed free on request.

THE BLACKSTONE MANUFACTURING CO., Jamestown, N. Y., have sent us a copy of a booklet recently issued by them, in which they state that it is their aim and intention in presenting the same to the trade to furnish the most desirable and complete line of Hand Washing Machines made by any manufacturer in the country. Their experience of thirty-two years in the manufacture of Washers enables them to produce goods that are superior in quality, workmanship and finish, and they guarantee every Washer to do perfect work. The catalogue describes the various kinds of Washing Machines manufactured by them, such as the Blackstone Rotary Washer, the New Blackstone "Stave Leg" Rotary Washer, the Improved Pan-American Washer, the New Challenge Washer, the Old Reliable Western Washer, Etc., and is illustrated throughout in colors. They also call attention to their Blackstone Non-Warping Bottom Feature, which insures against warping, and thereby prevents leaking. The latter half of the booklet is devoted to illustrating and pricing the extra parts used on these Washers, both old style and new, all of which are shown in detail. Send for catalogue for further information; it will be gladly and promptly sent upon request.

THE CHAPIN-STEPHENS CO., Pine Meadow, Conn., have recently published a new illustrated catalogue and price list of Boxwood and Ivory Rules, Plumbs and Levels, Planes, Gauges, Hand Screws, Box Scrapers, Chisel Handles, Door Stops, Etc. It has been their aim in preparing this catalogue to make it as plain as possible for the buyer, and a careful study of its pages will give the reader a good idea of the different styles of tools they make. The factory was established in 1826 and has become well known to the trade. The present company was formed in 1901 by the consolidation of the plants of the H. Chapin's Son Co. and Stephens & Co., the two oldest manufacturers of Rules, Levels, Planes, Etc., in the United States. By utilizing the best features of the two old plants and improvements made they have developed their facilities largely, and have one of the best equipped factories for the production of these goods in existence to-day. The catalogue is freely illustrated and is indexed, and each page contains a list of the prices of all the different sizes and qualities of the articles mentioned on same. This book will be found valuable to select from and is handy and useful to those interested in this particular line of goods. If you have not received one of these interesting catalogues the Chapin-Stephens Company will be glad to send you one upon request.

THE LAMSON & SESSIONS CO., Cleveland, Ohio, are again bringing into prominence their Bolts, Nuts, Wrenches, Etc., by the use of a carefully prepared and exceedingly well arranged price list which is gotten up in book form with flexible cloth cover, 7½ by 4½ inches. This book is a valuable one to those interested in this line, the idea uppermost in the author's mind being to arrange the particulars in regard to each article in such a manner as to make them easy of access, and a thumb index has been inserted, enabling one to see at a glance on which page the information is that he wants, thus making it a very useful reference book. The wrenches manufactured by the Lamson & Sessions Company are made from the best quality steel and are thoroughly case-hardened, and all their goods, including many varieties of bolts, screws, nuts, rivets, burrs and rods, are claimed to be of the highest grade. Send for their price list for further information.



S. R. SLAYMAKER, Lancaster, Pa., John H. Graham & Co., Sole Agents, 113 Chambers Street, New York, manufacturer of Padlocks of every description, has issued Catalogue No. 40, descriptive and illustrative of the products of his factory, showing "all that is good in Padlocks in present active demand for every purpose." A very attractive line is shown of moderate priced night latches, railroad locks, dog collar locks, bicycle locks, French rim locks, etc., and the book is extensively illustrated, some of the locks showing in natural colors a few of the finishes in which the padlocks are made. The catalogue is well arranged and printed on excellent paper, and will prove of value to those interested in this line. Send for one.

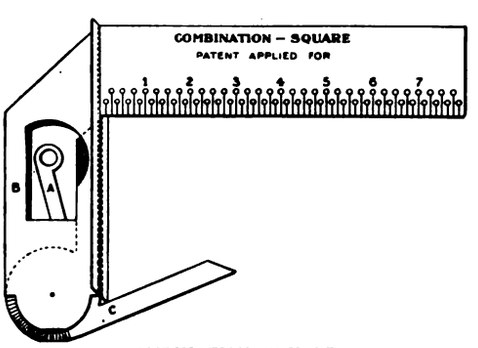
NEW GOODS AND SPECIALTIES.

IDEAL BEVEL-TRY SQUARE.

Nicholls Mfg. Company, Ottumwa, Iowa, is placing on the market the Ideal Bevel-Try Square, of which we give an illustration. This is a combination of a bevel and try square by which the square and bevel cut can be marked off with one continuous stroke of a pencil without having to change the square. The bevel blade is easily changed to any angle, as the slot in the bevel blade will allow shifting it so it will always come to the corner of the try square blade. By setting the bevel blade at right angles to the try square blade both marks are obtained without changing the position of the square. For beveling a board on edge the bevel blade is swung over to the back of the handle, which gives a straight surface on the handle. When the bevel blade is not needed it can be closed in the handle, leaving a regular try square. The try square blade is graduated

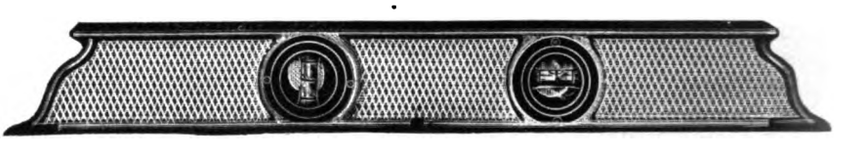


IDEAL BEVEL-TRY SQUARE.

in eighths, the figures being plainly stamped. All parts are made of best steel except the handle, which is made of composition metal to prevent rusting. The tool is made in one size only, No. 1, 8 inch, in polished steel and nickel plated.

COMBINATION SQUARE.

The Ballard Drop Forge Company, Ballard, Wash., is manufacturing the ingenious Combination Square shown herewith. It is a well finished instrument, all steel, made of 18 gauge stock and graduated in eighths of an inch. Perforations in the blade render it practicable as a gauge for any width as well as a miter on a corner. To operate for a given angle or pitch, the lever A

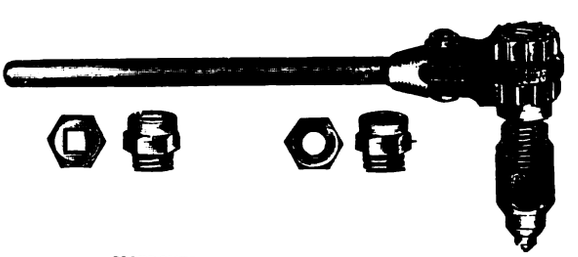


COMBINATION SQUARE.

is moved toward B to fasten sector C. The under side of the disk of sector C is laid off in spaces of 5 degrees each, while the top gives inches from 1 to 12 and from 12 to 1 on the tongue of the square. After the sector is set at the desired angle, indicated by a figure in the left hand series, and applied to a drawing on the tongue line, it is only necessary to reverse the sector to the same figure in the right hand series, turn the square over and it will conform to the other line. In other words, the same number on either side of the sector cuts the top and bottom for any brace, rafter, etc. All the combinations of the instrument are available at the same time without alteration.

"COOK'S" ALUMINUM LEVEL.

Davis & Cook Company, Watertown, N. Y., are offering to the trade Cook's Patent Plumb and Level, as illustrated herewith. These Levels are made in a variety of glued and solid woods, and iron and aluminum frames. Among the prominent features of this Level are the following: The leveling glass being placed across the center of the opening can be seen from either side, and is "never out of sight," whether used over the casing or under the sill. As to the method of adjustment, the inside ring is made of solid drawn brass, the two ends being provided with



"COOK'S" ALUMINUM LEVEL.

a flange which is accurately fitted to a groove in the outside ring, and securely fastened to the fence. It will therefore be seen that the only motion to the inside ring, which carries the bulb tube, is an "axial" motion, or "on its own center." Consequently, it is impossible to move the inside ring, or throw the Level out of adjustment, by a fall or jar. Every Level is made of the finest material, and in the best manner, by skilled workmen. The accuracy of all Levels is guaranteed. A large variety of Levels, for all classes of mechanics, is manufactured by this firm. Carpenters, masons and machinists have each their special design. These Levels are for sale by the jobbers generally, or catalogue will be mailed by addressing Davis & Cook Company direct.

IMPROVED WESTON RATCHET, STYLE H.

The Joseph F. McCoy Co., 157 Chambers Street, New York, are placing before the trade the newly improved Weston Ratchet, of which we present an illustration. This Ratchet is equal in quality with other Ratchets of this brand, but is improved by adding a feature in the taking either a square shank or a round taper shank twist drill. To change from the square shank to the round it is only necessary to remove the square nut on the

IMPROVED WESTON RATCHET, STYLE H.

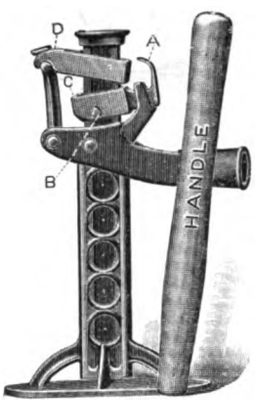
end of the socket and replace it with the round nut. It is made in all sizes from 12 to 14 inches long, and in changing the nut of the square shank drill it is not lost, as it screws in and is held in position. Other ratchets that have extra sleeves, and only fit in the sockets are apt to drop out when not in use, while the advantage of this small nut is it can be carried in the pocket.

THE DUPLEX COASTER.

The Household Manufacturing Company, Royersford, Pa., is introducing the coaster of which we give an illustration. It is manufactured from the best seasoned oak, which is used for the entire sled. Each runner is bolted fast with two bolts which run through the entire width of the runner. It is intended that each sled should carry safely all the passengers who can be seated on it. It is provided with a patent steering gear by which both the front and rear bobs are acted upon, enabling the operator to

Digitized by Google

coast easily and surely by approaching teams, pedestrians or other objects in less time than any other kind of sled. The same slight push of the feet that turns the forward bob also turns the rear bob. The simultaneous turning of both bobs brings the sled to

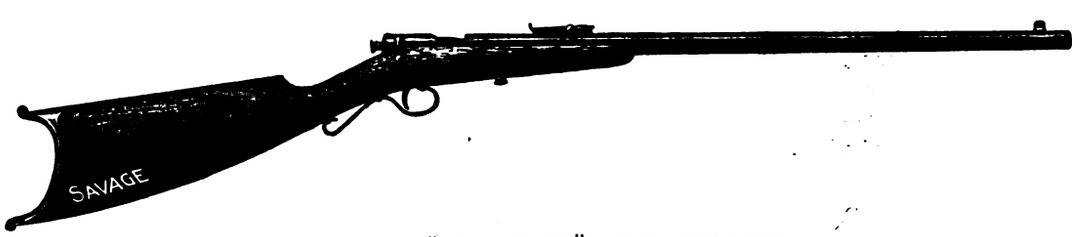


DUPLEX COASTER.

the desired point swiftly and easily. It is provided with foot rests to enable each rider to keep his feet out of the snow. By means of a patent slot in the rear bob and a pivot joint at the front the Duplex always adapts itself to the contour of the street, thus insuring easy and comfortable riding. The coaster will be furnished in three styles of two sizes, ranging in length over-all from 63 to 87 inches and from 48 to 72 inches length of board.

QUICK LIFT AUTO JACK.

Covert Saddlery Works, Interlaken, N. Y., are the manufacturers of the Quick Lift Auto Jack, of which we present an illustration. It is well named for a handy and useful Jack, that



QUICK LIFT AUTO JACK.

is not only a quick lift for any load it may have to raise, but requires little exertion in order to raise a Touring Car, as its leverage is powerful indeed. It is substantially made of steel and malleable iron, and will be found quite convenient to carry with an automobile, as it occupies a space of only one-fifth cubic foot and weighs but six pounds. The Quick Lift Jack can be obtained of all Jobbers at manufacturers' prices.

THE SAVAGE "TARGET MODEL" SINGLE SHOT RIFLE.

The Savage Arms Company, Utica, N. Y., are placing on the market through the Hardware and Sporting Goods trade the Savage "Target Model" Single Shot Rifle, which is calculated to appeal to the target shooter who desires to use the inexpensive .22-calibre ammunition. It is chambered for the use of short, long and long-rifle cartridges only, and for special rifling

THE SAVAGE "TARGET MODEL" SINGLE SHOT RIFLE.

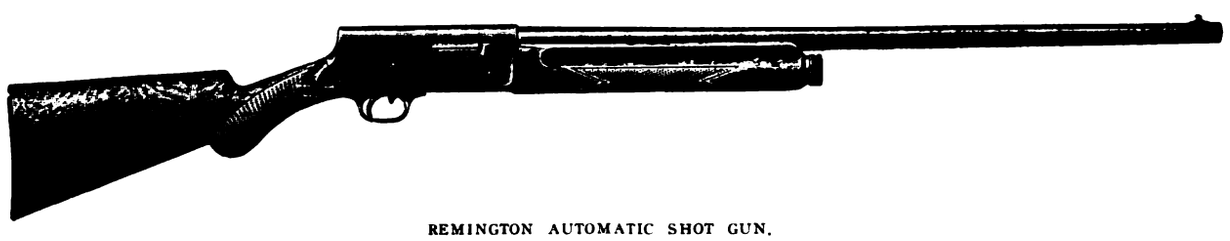
gives the greatest accuracy with the loads. The rifle weighs 4¾ pounds and is beautifully balanced. It is especially for off-hand shooting. We give an illustration of the same. The Swiss buck plate and heavy barrel, twenty-two inches in length, are two of its especial features. Longer or heavier barrels cannot be supplied. More important, however, is the adjustable screw which regulates the pull. No matter what may be the idea one has of the trigger pull, it may be obtained by this new Savage device. The adjusting screw is located on the under side of the trigger in our illustration, and may be instantly reached by simply taking off the stock.

PALMER'S INFANT HAMMOCK WITH SUPPORT.

I. E. Palmer, Middletown, Conn., in addition to his well-known line of hammocks is manufacturing something new and novel in the way of Infant Hammocks with Support as shown in accompanying illustration. This addition to the regular line is complete, being light and attractive in appearance and supplies a want frequently referred to by the trade. The construc-

PALMER'S INFANT HAMMOCK WITH SUPPORT.

tion of the hammock is box shape and closed at each end; the side walls make it incomparably more safe for children than the ordinarily constructed hammock. The hammock is closed over the top by a netting which attaches with two simple snap hooks. Length of body part 40 inches.



CONCRETE IN BUILDING.

"The comparatively recent advent of hollow concrete blocks into building construction is probably one of the most important innovations in the building industry, and one that is yet in its infancy," says the *Scientific American*. "The use of concrete as building material is not recent, however, as there are still in existence dikes, dams, roadways, etc., built by the Romans of material corresponding almost exactly with our present-day concrete; it is the introduction of the hollow concrete building block machine that has made possible the gigantic strides taken by this new industry. Experiments along this line have been in progress for many years, but it is only in the past few years that the results have been tangible. The natural cement which was formerly used in concrete construction has been almost entirely replaced by its superior, artificial cement, and it is only with the latter cement that any advantageous results have been accomplished. It is interesting to note that where formerly a European Portland cement was specified as the standard of excellence, in recent years American Portland cement has been so improved by exhaustive and expensive experiments that the domestic production is now conceded to be superior in every way to the foreign article. That an industry so new to this country, and one requiring so high a degree of technical knowledge, has leaped to first place, is doubtless due to the superiority of both raw material and method of production. Probably the best proof of the superiority of our product will be shown by a comparison of our production in 1890—of 300,000 barrels—with that in 1903—of 21,000,000 barrels."

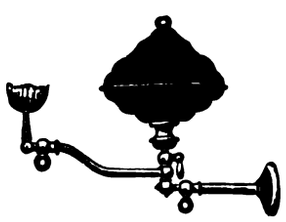
REMINGTON AUTOMATIC SHOT GUN.

The Remington Arms Company, Ilion, N. Y., and 313-315 Broadway, New York, are placing before the Hardware and Sporting Goods trades a new Automatic Shot Gun made in 12 gauge only, of which the accompanying illustration gives the general style. It is made in 6 grades as follows: No. 1, "Standard" Grade, walnut stock, plain pistol grip; No. 2, "Special" Grade, selected English walnut stock, checkered pistol grip and forearm; No. 3, "Trap" Grade, selected English walnut stock, checkered straight grip and forearm; No. 4, "Tournament" Grade, fine English walnut stock, checkered pistol grip and forearm, neatly engraved; No. 5, "Expert" Grade, best English walnut stock, finely checkered pistol grip and forearm, finely engraved; No. 6, "Premier" Grade, Circassian walnut stock, extra finely checkered pistol grip and forearm, elaborately engraved; No. O, "Riot" Grade, walnut stock, plain pistol grip, 20 inch barrel only. Regular length barrel is 28 inches. Extra barrels can be supplied in 26 or 28 inches, either choke or cylinder bore. The dimensions are: Regular drop, 2½ inches at heel and 1⅞ inches at cone. Length, 14 and 14⅜ inches. Unless otherwise specified, 14⅜ inch will be sent.

REMINGTON AUTOMATIC SHOT GUN.



THE RADION GAS JET HEATER.

A. H. Kaufmann Manufacturing Co., Inc., 24-26 Murray Street, New York, are placing before the Hardware and house furnishing goods trades "The Radion Gas Jet Heater," which can be used as a miniature cooking stove when required to act in that capacity.

THE RADION GAS JET HEATER.

We give three illustrations showing its great utility. It is artistically designed of gun metal, and when placed over an ordinary

WITH GAS JET ATTACHED.

gas heater converts the flame into a powerful blue burner radiating the heat around the room without smoke or odor, keeping the air in the room particularly pure, while the flame being enclosed renders it absolutely safe against danger from fire. It is provided with an internal conical disk which is surrounded by intensely hot blue flames and protected by an iron guard. It can be taken apart, cleaned and adjusted with great ease, and is claimed to heat a fair sized room in a surprisingly short time. By unscrewing the brass burner base the heater will come apart and can then be readily cleaned, avoiding clogging up by the formation of soot on the inside as well as the outside. When used as a miniature stove it needs no extra fixtures or rubber tubing or fittings. The concave surface under the dome of the Radion Heater forms an air space with the bottom of the cooking vessel,

AS A MINIATURE STOVE.

creating a partial vacuum, which, becoming superheated, causes the water to boil quickly.

STEVENS NAME CONTEST—STATISTICS AND RESULTS.

Names were received from all sections of this country and the Dominion of Canada. Also heard from British West Indies and Mexico.

Total number of letters received.....4,642
Total number of names suggested.....36,768

The Board of Directors of the J. Stevens Arms & Tool Co., after careful consideration of each list of names submitted, has decided that the prizes were won by the following:

NAME AND ADDRESS.

1st Prize—C. F. Meroney, care Odell Hardware Co., Greensboro, N. C. "Little Scout" Rifle.

2d Prize—Charles B. Saunders, Box 3, Wytheville, Va. "Nimrod" Rifle.

3d Prize—Harry W. Smith, 315 N. Poplar Street, Centralia, Ill. "Little Chum" Rifle.

4th Prize—Lacy Currie, Jackson Springs, N. C. "Comrade" Rifle.

5th Prize—Robert Kerr, P. O. Box 227, Lee, Mass. "Rex" Rifle.

Messrs. C. F. Meroney, Charles B. Saunders, Harry W. Smith, Lacy Currie and Robert Kerr, will receive Favorite No. 17 Rifle, "Little Krag" Rifle, "Crack Shot" Rifle, "Stevens-Maynard, Jr.," Rifle and Stevens "Tip Up" Pistol, respectively, express prepaid, as per terms of contest. They embrace this opportunity to express their hearty thanks and appreciation to the thousands of contestants, and genuinely regret that prizes are not numerous enough to insure each competitor being the recipient of one. Their new Rifle will be known as Stevens "Little Scout" No. 14, and will be ready for the market after January 1, 1906.

WHERE IT CAME FROM.

Mayme—Notice that couple we just passed? They're Mr. and Mrs. Pyrrh-Simmons. Their courtship was one of the most romantic affairs of the season.

Maybelle—Why, she's as homely as a telegraph pole.

Mayme—I know it, and he's as poor as a church mouse. That's what made it so romantic.—*Chicago Tribune.*

OUR NEW ORLEANS LETTER

(*Special Correspondence, New Orleans, September* 18.)

Now that the worst of the yellow fever freight quarantines have been broken, and the end of the partial trade stagnation is in sight, local Hardware merchants are beginning to take stock of what the actual results of the epidemic in New Orleans have been, and just what the outlook is for the autumn domestic and export trade.

Summed up, to the outbreak of fever, the business was running a fair percentage ahead of the previous season. This applied both to export and to domestic trade. The domestic trade was held to that level only through the very extraordinary local demand for building Hardware and all the items that go with that branch of the business. The export trade was held to that high level through the fact that threatened curtailment of the local and domestic markets earlier in the year had forced the local merchants to seek outside markets. After the outbreak of the fever, quarantine restrictions and unfriendly treatment at the hands of the wholesalers and the jobbers of competitive cities began to affect business. During late July trade fell off until it only ran equal with the July of the previous year. During August, trade managed to run about even with the year before. In both months, this applied only to domestic business. Strictly local business and export business continued ahead of the previous year. During September, thus far, the total volume of trade, judging from the statement made by the various firms in the city, has been running about ten per cent. behind 1905. It is held to this level by the export and local business. However, the outlook is brighter now by odds, than for some weeks. Freight quarantines, through the efficacious announcements of Surgeon General Wyman, and through those of Surgeon J. H. White, have been lifted in many localities. Recently, Surgeon J. H. White declared that the United States Public Health and Marine Hospital Service would hereafter, for the localities requesting it, fumigate freight cars after they were loaded, and would then seal the cars with the guarantee that there were no live mosquitoes within, and that by no possible means could the cars convey infection.

COUNTRY JOBBERS SOLD OUT.

Reports from all parts of the quarantine affected districts are to the effect that the local retailers and jobbers as well, are very completely sold out, and that they are only awaiting the lifting of restrictions to purchase heavily in order to meet the requirements of a trade that has been starved out during the past six weeks.

Mississippi is the State most difficult for traveling men to reach and for goods to be distributed through. Recently the Mississippi detachment of drummers for one big New Orleans firm was forced to go to New York, and thence to the districts to which the members were allotted. The detachment for Florida went to New York also, thence back to Jacksonville. The ordinary custom, however, is for the drummers to go into detention camp and then enter the State. In Mississippi, however, there are many towns that have quarantined against the world, and have council meetings and act on the application to enter. This difficulty is being met through an increased use of mail matter, circulars, catalogues, etc., which are being sent to all customers, together with personal letters, etc., to all regular purchasers.

Goods that have weathered the quarantine restrictions best have been Hardware, of course, and of the Hardware articles, corrugated iron roofing, nails and other building and builders' Hardware, have led all else. Tools have sold well. Implements have been very lax, but the outlook for Autumn trade in that line is excellent. Already it is evident that the cotton planters are going to put in every acre next season, either in cotton or in food stuffs. This season a tremendous acreage lay idle, but this will not be repeated. Mill supplies have been backward, for the planters have had great difficulty in getting their repairing gangs out of the towns and into the country. Both sugar houses and cotton gins are usually overhauled in late August and early September, and big mill supply business usually accompanies the opening of the cropping season. Many devices and expedients have been resorted to to get the country factories started, with more or less success, but many individuals have been forced to curtail their work, and get along as best they might with their plants in the condition they were when the last season closed.

In the city vehicles have been going excellently, although the sale of pleasure vehicles has lagged behind what was expected. The threatened strike of teamsters here has made many of the bosses wait a while on their purchases of supplies for the Autumn business.

BUILDING ACTIVITY.

As has been the rule for many months, the local building supply demand has remained the striking feature of the situation. As has thus far been observed, market conditions have had little effect on local trade.

A leading Hardware merchant's view expressed to your correspondent to-day as thus expressed: "During the fortnight heavy tonnage in Bessemer pig iron has been placed at prices ranging from 50 to 75 cents per ton higher than prevailed two weeks ago. In steel billets buyers say that it is difficult to find mills that are in a position to accept orders for prompt delivery, all being booked up for their full capacity for the balance of the year and well into the first and second quarters of 1906. For prompt deliveries in small lots, $2 to $3 per ton premium is being paid. Bar iron has already advanced $1 per ton. Carriage and machine bolts, nuts, washers, trace chains, coil and log chains have all advanced about 10 per cent. Iron pipe is very firm, and likely to advance. The leading sizes are to-day selling at prices that net less profit than the iron from which the pipe is made.

"However, all these conditions prevail to a less extent down here than in the Northern markets. The demand is springing up in many other leading lines beside those mentioned."

From other sources it would seem that the volume of trade here has been affected more by local conditions than by any anticipation of increase in ruling values. Very certain it is that the entire Southern field affected by quarantine has been more or less sold out, and if prices advance, will have to buy at the newer and higher levels.

EXPORT TRADE.

The records during the past few weeks on exports have been most excellent. Machinery, plows, building materials, general Hardware, have continued to go out to Cuba in very increasing quantities. All the Havana shipments have gone direct. Shipments to other parts of the island have gone via Mobile and the Munson Line. Trade to Central America has also improved materially, and the lessening of the fever in Honduras has opened that territory in a remarkable manner.

Many of the leading individuals of the Hardware world down here, who have been away during the Summer, are beginning to return. The holiday season is over, and plans are being made for a better Autumn than the town has ever witnessed. The cotton crop is sure of bringing good prices. The cane growers have an excellent crop that will bring a fair valuation. Through the timbering districts activity has never slackened and bids fair to continue to improve. No one in the city admits the possibility of any permanent injury through the yellow fever infection of the past Summer.

The stockholders of Landers, Frary & Clark, New Britain, Conn., Hardware manufacturers, have voted to increase the capital stock of the corporation from $750,000 to $1,000,000, the meeting being held September 7, when this favorable action was taken on the recommendation of the Board of Directors. The additional capital will be used to acquire such new lines of goods, to provide such facilities for making them in the way of new buildings and machinery and to make such other improvements in the property as will in the opinion of the directors increase the profits of the business.

The war is helping the German brush trade at the expense of its Japanese competitor. In the manufacture of brushes Schonheide, in Saxony, is what Osaka is to Japan. Before the war American importers purchased more brushes in Japan than in Germany, but since the war began conditions are reversed. Brushmaking was a prosperous industry in Japan, employing 1,000 laborers in Osaka alone. The daily production of tooth, nail and hair brushes was 16,000 pieces. Apart from Osaka city brushmaking was a house industry in the surrounding country. In 1903 Japan exported $295,000 worth of brushes, 80 per cent. to the United States, and bought $100,000 worth of hog bristles here. When the war ends Japan will lose much time in getting that trade back.

JAP-A-LAC

REGISTERED TRADE MARK

"WEARS LIKE IRON"

WHEN WE TELL YOU

that JAP-A-LAC is positively the best selling colored varnish made, you may wonder if it is true.

We don't hesitate to say it. Here are a few points which ought to convince you.

JAP-A-LAC has over TWO HUNDRED THOUSAND DOLLARS in advertising back of it. The consumers know about it and buy it.

JAP-A-LAC is being ADVERTISED EVERY DAY in the year. More people are learning about it and asking for it.

JAP-A-LAC is unquestionably the BEST QUALITY colored varnish on the market. When a woman uses one she comes back for more.

JAP-A-LAC is EASILY APPLIED and DRIES QUICKLY. Women like to do their varnishing with JAP-A-LAC.

JAP-A-LAC may be used for finishing EVERYTHING ABOUT THE HOME—and is.

JAP-A-LAC has MILLIONS of FRIENDS and sells itself. You don't lose a minute's time talking about it, "Time is money."

JAP-A-LAC MAKES CUSTOMERS for you—when you handle it. A JAP-A-LAC customer bought $50.00 worth of other goods from a dealer a few days ago; he said so.

JAP-A-LAC is put up in SPECIMEN ASSORTMENTS of $26.46 each. If that's too much, try a $10.00 ASSORTMENT. Send us your order for one of them to-day; you'll begin to reap your profit when the goods arrive.

THE GLIDDEN VARNISH COMPANY,

MAKERS OF HIGH-GRADE VARNISHES FOR ALL PURPOSES

641 WILLIAMSON BUILDING,

CLEVELAND, OHIO

PROFIT.

There is an apparent necessity of pointing out to many tradesmen that all customers for whom they work can afford to pay a profit. In securing this profit the tradesman will participate in a prosperity which is well earned. In those communities where each tradesman is deriving a profit from his business enterprise there is general prosperity. A profit on business of all kinds assures fair payment to all who may be engaged in it as principals or employees. Periods of depression are always intensified by tradesmen endeavoring to secure an increase of patronage through cuts in prices and consequent reductions in profit. On the other hand, it is a matter of common experience that the period of depression is broken as soon as some one takes the lead in securing better prices, and consequently better profits. The man who is neglectful of the details of his business and who has no system of keeping accounts is a menace, not only to his own net income, but to that of all his fellow tradesmen. He cannot tell the cost of his work or the cost of carrying on his business, and whatever price he may set gives him no idea as to whether or not he is securing a just recompense. He may be working so cheaply that loss and failure are escaped only for the time being, but his demoralizing influence on profitable business is, unfortunately, continued a little longer.

To do business at a profit all of the small things in accounting—caring for odd stock, caring for tools, and using the time of employees to advantage—must receive not only careful attention, but intelligent management, to turn them to a profitable account. Even as the little leaks may finally swamp the ship, the little things neglected may lead the business man to ultimate disaster. To be successful in securing profit a man must have not only the perseverance to attend to the drudgery which sagacious management entails, but also the forbearance to allow customers who are not willing to pay a profit to shop among other tradesmen. To let such a customer pass often means the loss of a profit, but sales without profit do not help a business; instead, they often set a price which, as stated, influences adversely all sales. An intelligent canvass by a thoroughly competent master of his line of business is sure to bring in enough lucrative business to more than pay both in satisfaction and cash balance.—*Metal Worker.*

FINE SHOOTING IN EVIDENCE.

At the Portland State Shoot September 4th, Mr. G. M. Wheeler, shooting Peters shells, won the Elmhouse cup from the 20 yard mark, score 23 out of 25. In the team race, won by the Portland team, four out of five of the winners shot Peters shells. Mr. Wheeler was second high professional at Worcester, Mass., September 5th and 6th.

The International Live Bird Championship and the Gillman & Barnes trophy were won September 9th at the Detroit tournament by Mr. H. I. Gillespie of Pittsburgh, who killed 15 straight and 6 straight in the shoot-off. Mr. Gillespie gives a full measure of credit for this victory to the Peters factory loaded shells which he used.

Dr. O. F. Britton of the Indianapolis Gun Club, one of the best and most popular of the older generation of shooters, made a most remarkable score on the Indianapolis Gun Club grounds September 9, breaking 117 straight from the 18 and 19 yard marks. This not only proves that Dr. Britton has not lost his cunning, but also that Peters factory loaded shells are perfection itself.

Some excellent scores were made with Peters shells at the Trinidad tournament, September 4, 5 and 6. In the Free For All Handicap, one of the main events of the tournament, Mr. Wm Veach of Falls City, Neb., tied with two others on a score of 97 from the 19 yard mark. In the first shoot off, Mr. Veach broke 20 straight and in the second again scored 20 straight, making a total of 137 out of 140, all from the 19 yard line. Inasmuch as Mr. Veach by virtue of this score won a handsome $75 watch, it may be assumed that he will know when it is time to order his next lot of Peters Ideals.

At Austin, Texas, September 9, Mr. Wallace R. Miller, shooting Peters Ideal shells loaded with 3 drams of powder and 1⅛ ounces of shot, broke 98 out of 100.

Mr. L. H. Reid, representing the Peters Cartridge Company, at the Kendallville tournament, September 12, won high average for the day, breaking 193 out of 200 targets. Mr. Reid uses Peters regular factory loaded No. D167 ⅛ ch.

At York, Pa., September 4 and 5, the high amateur average was won by Mr. E. C. Hummer, and high expert average by Mr Neaf Apgar, both using Peters factory loaded shells.

REVIEW OF THE MARKETS.

WIRE NAILS: Since the recent definite action taken on September 11, by which official prices were modified, which resulted in an authorized advance from bottom rates at which the large trade were buying, the market has been greatly improved. The prices have been strictly held to and orders were increased, the market being virtually advanced on all wire products $1.00 a ton. Quotations are as follows, f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers	$1.75
Carloads to retailers	1.80

New York.—The local business is in active condition, and, with the exception that deliveries are impeded in various ways, exceptionally good. Quotations for small lots from store are based on a price of $1.95 to $2.00.

CUT NAILS: The definite price now asked for Wire Nails has had a very satisfactory effect on the market for Cut Nails, the market prices for which will undoubtedly be officially strengthened on September 27, when the Cut Nail Association has its meeting. The low prices ruling have stimulated buying and business has been very good. Quotations are as follows: $1.60 to $1.65 base, for carload lots, f.o.b. maker's mill. Iron Cut Nails for delivery at Pittsburgh, Buffalo and all points west of these cities are held at about $1.70, base, in carload lots.

New York.—Trade has been good in the local market, with no change in price. Quotations are as follows: $1.90 for small lots from store.

BARB WIRE: The definite prices announced have improved the market and orders have increased accordingly. There is every reason to believe that the Fall trade will be a heavy one, and the jobbers have prepared for it. Quotations are as follows, f. o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$1.90	$2.20
Retailers, carload lots	1.95	2.25
Retailers. less than carload lots	2.05	2.30

SMOOTH FENCE WIRE: The improved condition of the wire market, noted since the change in prices, has had its beneficial effect with an active demand. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.60
Retailers, carloads	1.65

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BRASS COCKS: At the recent meeting of the Brass Goods Manufacturers' Association concerted action was taken looking to an advance in the prices of Brass Cocks, including Compression, Plain Bibs, Globe, Kerosene, Racking, etc., which are now quoted at 70 and 5 to 70 and 10 and 5 per cent. discount.

WROUGHT BRASS BUTTS: The associated manufacturers of Wrought Brass Butts advanced the price of this line September 6 to 20 per cent. discount, base, instead of 30 per cent. discount, base, as formerly, the same extras to the jobbing trade being given as heretofore.

ROPE: The following prices may be said to represent the market:

	Cents per pound.
Pure Manila, 7-16 and larger	11½ to 12
Pure Sisal, 7-16 and larger	10
No. 2 Sisal, 7-16 and larger	8

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co:

In lots of less than 5 barrels.....54 cents per gallon.
In lots of 5 barrels or more.....53 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil.....60 cents per gallon.

THE PHILADELPHIA TRADE.

We are now well into the Fall of 1905, and trade has set in auspiciously. In almost every section there seems to be a heavy demand for goods. Orders are coming in with gratifying frequency and for liberal quantities. It is quite evident that stocks are low, and that goods are going fast into consumption. There is also a complaint of a scarcity of labor—some mills and factories stating they are very short handed and that production is curtailed in consequence. Winter goods are also beginning to move freely, but as the Winters of the last two years have been both long and severe, it is thought that dealers have carried over very small stocks in these lines, and that all Winter articles should have a large call. As might be expected, under such circumstances, the market is strong, advances being of frequent occurrence. This is especially true of brass and copper goods, everything in these lines tending upwards, and higher quotations being announced from day to day. It is also pleasant to report that now crops are being harvested, money seems to be more plentiful and collections are improving. There is ample room for a change for the better in this respect, as collections have not been, perhaps, up to the average, considering the fair volume of trade which has been enjoyed throughout the year. We hope on this score there will be no further ground for complaint.

BIDDLE HARDWARE CO.

THE ALBANY TRADE.

Trade is good and indications point to a continuance of this condition throughout the Fall. The strength in prices of leading staples gives an excellent tone to the whole market. The early Fall trade in season goods has started in a spirited way greatly assisted by the cooler weather which marked the incoming of September. The large factories, the extensive public work jobs now going on and, in fact, about every place where many hands are employed are all busy and the merchant is participating with others in getting the benefit of the excellent condition of affairs. There is nothing of special interest to report in addition to the above. ALBANY HARDWARE & IRON CO.

THE PITTSBURGH TRADE.

Business conditions in Pittsburgh are good, especially in manufacturing lines. The large demand for steel and its products which has developed within the past month or two has resulted in advanced prices for billets, structural material, wire and nails. Prompt deliveries are not to be had in some of these items as the mills are sold up to their capacity months ahead. Railroads have been large buyers of rail, locomotives and cars. The coke industry in sympathy with the demand for steel has shown great activity and the region is running to its capacity. With the arrival of September coal has also shown quite an improvement. There are no strikes of any serious nature to interfere with work and employment for all is quite general. We notice a slight stiffening in rates for money, but the supply is ample for all legitimate needs. In the jobbing mercantile department we find trade quite active showing quite an improvement upon Spring business, which was hardly up to expectations. We look for a good Fall business and see no reason why it should not be good for at least a year ahead. LOGAN-GREGG HARDWARE CO.

THE SAN FRANCISCO TRADE.

The local situation shows no new features of great importance. The crops are on the same basis as previously noted, hardly any of them being over the average, and a number falling below it, though the high prices ruling for most products fully offset the deficiency in the yields. Local bond brokers report that the supply of money in the interior banks has become so liberal that the banks have sent a good deal of it here for investment in good bonds. The city banks have been doing the same, which accounts to some extent for the activity in the bond market during the past several weeks. It is not at all a bad sign when money becomes so plentiful that the large interests handling it are obliged to pry about in various directions for channels in which to profitably invest it. Not in modern times has there been such a plethora of actual money in this section of the world as there has been for the past several years. In other words the California section of the world is flush.

The keels have been laid for the two mammoth freighters of the American-Hawaiian Steamship line that are to be built by the Union Iron Works of San Francisco to go into the service

between this port, Honolulu and New York. They will both be equal in size to the Texan, the biggest of that fleet of steamships. The trade of the American-Hawaiian Company has grown immensely during the last few years. When bids were offered for the construction of these ships, a large number of Eastern firms competed, but the Union Iron Works bid lowest and was awarded the contract.

State Organizer, F. B. Dickson, is doing good work for the California State Retail Hardware Association. His report, just in, says: "Three days spent in Alameda County resulted in the enrollment of several new firms for the Alameda County Retail Hardware Association and more new members were added to the Hardware and Implement Association. At a meeting held in Oakland the interest taken was very gratifying to all present. Several days spent in Sacramento resulted in two meetings being held and the conditions there surely look brighter. Sacramento has never been together, but now they expect to organize a local chapter next week, taking in every Hardware and Implement dealer in the city. Leaving Sacramento, I took in the country from Palo Alto to San Francisco in company with Secretary George L. Everett of the San Francisco Retail Dealers' Hardware Association, and succeeded in enrolling five of the firms in that locality for the San Francisco Association, making a very nice clean up for San Mateo County, including Palo Alto.

Chicago and Colorado men are behind the filing at Olympia of papers incorporating the Copper and Lead Smelting Company, having a capital stock of $5,000,000. The incorporators are Leslie E. Mathis, Leonard L. Mathis, of Chicago and H. A. Noble, who represents Colorado mine owners. Noble announces the company's intention of building a large smelter on Puget Sound. The exact location has not been selected. The plant will be one of the largest in the Northwest. It will apparently be a rival of the Tacoma smelter. Mining men believe that the capital for building the new plant will be forthcoming as a result of the high price at which the Tacoma smelter was recently sold.

The wholesale trade and exporters are plentiously expressive in clever words for the Czar for withdrawing the extreme duties or maximum tariff rates on certain American articles of importation, principally machinery and metal goods, American cast and wrought metal work, tools, machinery, portable engines, locomotives and many other important staple exports, which were being fairly driven out of the Russian market by the competition of German and English machinery favored by the minimum tariff rates, and now expect enormous sales, not only in Russia proper, but in Siberia.

Traveling men report that J. L. Castle is starting a Hardware store at Dayton, Ore.; John Nissou & Son are starting an implement store at Pendleton, Ore.; F. A. Woodin & Company, at Colfax, Wash., have incorporated for $10,000; The Dayton Hardware Company, at Portland, Ore., has been disincorporated; L. E. P. McAden has succeeded McPhail & Company, Hardware, at Vancouver, B. C.; A. G. Young and Morten Jensen have succeeded Meeter Bros., Hardware, at Richfield, Utah; W. K. C. Manly's Hardware store at Grand Forks, B. C., was damaged $600 by fire last week; C. T. Conrad at Marysville, Wash., has filed a petition in bankruptcy; the receiver for the Hunter-Eaton Company's store at Shelton, Wash., has been discharged; Dean Blanchard at Rainer, Ore., lost a warehouse by fire last week; loss $2,000, no insurance; Nathan Weil at Spokane has moved into his new store at 408 Riverside Avenue; the John Smith Company of Walla Walla and Waitsburg, are about to start a Hardware and implement store at Prescott, Wash; The Vale Trading Company has been incorporated at Vale, Ore., and has succeeded I. S. Smith & Company; The Crawford-Marshal Company, Hardware and implements, Vancouver, Wash., has sold the implement stock to Packard & Smith; the Palace store at Spokane has been incorporated for $150,000 by Mrs. R. Weil, Nathan Weil and W. D. Lloyd of that city; the Agnew Hardware Company at Everett, Wash., has let the contract for a four-story brick store building and a one-story warehouse, cost $35,000; fire at Davenport, Wash., destroyed the Hardware store of A. Knox; partly insured; Jones & Dillingham, wholesale and retail paints, oil and glass, at Spokane, have secured a five-year lease on a brick building at Lewiston, Idaho, where a branch wholesale house will be established.

INDUSTRIAL PRESS ASSOCIATION.

LOS ANGELES PROSPEROUS.

The past four years have brought great prosperity to all the merchants in Los Angeles, especially to the Hardware dealers. During this time there has been great activity in the building trade, the city has been growing rapidly, and has been built up in a very substantial manner. In fact, there are few cities of the size—180,000—anywhere in the United States with better buildings or finer residents; and Los Angeles was a small town at the time of the Centennial Exposition. The surrounding country is being developed rapidly, and Los Angeles is the natural distributing point and market for all of this Southern California country. The recent opening of the San Pedro, Los Angeles and Salt Lake Railroad is bringing no small amount of new business into the hands of the jobbers here. Much of the Goldfield and Bullfrog, Nevada, mining business is now coming to Los Angeles over this new road. San Pedro, which is the natural seaport for Southern California is but twenty miles distant and there docks are being built, the harbor is being deepened and in a very few years a large import and South American export business will be done by the business interests here.

C. W. Damerel of the Cass-Damerel Hardware Co. pointed out to your correspondent that here in Southern California building operations went on the year round. Continuing Mr. Damerel

Zinn

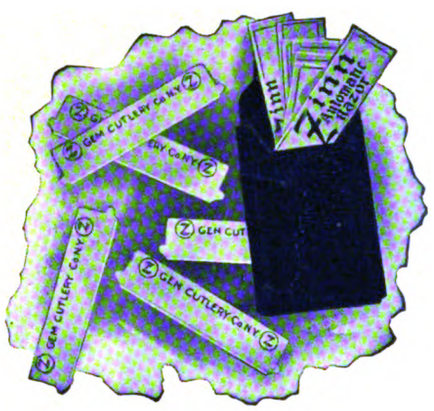
Automatic Razor

Have you only a bowing acquaintance with the Zinn? Then let's get acquainted. It's

The Razor With the Always Keen Blades

Twenty-four of them. They are so thin that 200 of them are only an inch thick!

They are electrically tempered and so hard they will cut glass and any and all kinds of whiskers. None too tough for the Zinn.



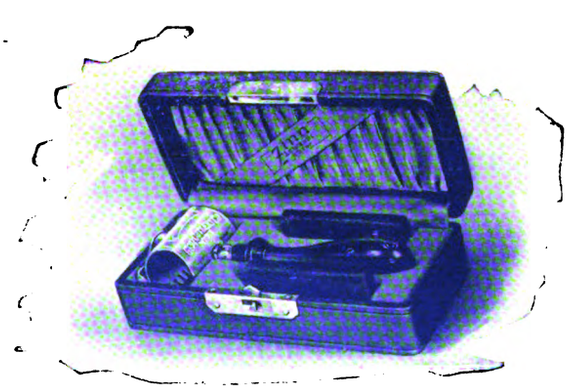
A Wonder of Simplicity and Efficiency . . . . .

Only two parts to it: Holder and blade.

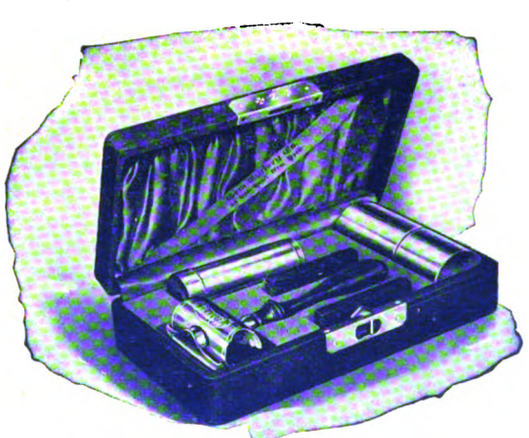
Each blade packed in a separate envelope that absolutely protects it from dampness.

And each blade lasts a month!

Its capacity for giving a better shave in half the time with half the skill is unequalled.



NO HONING ✂ NO STROPPING



The Zinn Has Made Friends Fast and---Fast Friends--

through our extensive advertising in the best popular magazines among its millions of readers. We have sown for a plentiful harvest—**Now is the time to reap.**

Get in line, Mr. Hardware dealer. Get hold of the other end of our proposition. Stock up with the Zinn. Display Zinn. Talk Zinn. We protect you against cut-prices.

THE SMOKELESS BROILER Wanted in every HOME

Says the Smokeless Broiler Maid:

"In every home where the SMOKELESS BROILER is used contentment reigns.

"In every home where the old-style broiler is used a welcome awaits the SMOKELESS BROILER.

"Don't you want to be the Hardware dealer in your territory to supply the universal demand? Your order should be sent promptly, through your jobber or direct. Make it for a liberal quantity. SMOKELESS BROILERS SELL ON SIGHT."

Our family of swift selling wire specialties continues to grow. Send for our new catalogue which tells of the new SOAP TRAYS and BRACKETS for kitchen and bath use, the new EVER-LEVEL LAUNDRY SOAP BRACKET, our new TUMBLER HOLDER, DIAMOND SINK CLEANERS, patented SINK BRUSHES and TEA STRAINERS. Dealers everywhere report these goods as swift sellers, and an ideal line for the Hardware man.

said: "We have been here in our present location seven years, and for the past four years business has been booming. We do a good trade in gas and gasoline stoves and ranges and have pushed this end of the business—finding it profitable." The Cass-Damerel Hardware Co.'s store is located at 414 Broadway and is an attractive up-to-date store in its fixtures. The large double windows are used to good advantage in displaying tools and house furnishing goods.

Another of Los Angeles' leading retail Hardware stores is the Kremer Hardware Co., located at 888 South Broadway. When called on by your correspondent, this concern was doing some progressive business building by practically demonstrating a line of new gas ranges. Many women were there in the store seeing the gas range do the work, and were being served with hot tea biscuits, cake and coffee that had been made in the store while they looked on. The crowds coming to the store proved that the Kremer Hardware Co. had been doing some good advertising, and the actual business being done proved another thing, interesting to all Hardware dealers, i. e., that when the Hardwareman has something to sell, that appeals to the woman, it will positively pay to advertise. It may be an open question as to whether it pays to advertise for the man's trade, but it's a proven fact that women are readers of advertisements and are always on the lookout for labor-saving or money-saving goods.

A pleasing feature of the big Hardware store of J. W. Hellman is the fine large windows and the attractive manner in which goods are displayed. In addition to general Hardware, J. W. Hellman does an extensive retail business in house furnishing goods as well as electrical supplies. This latter, being somewhat out of the Hardware line, is given special attention and a prominent place in the windows and in the store. It's a good line for any Hardware store and is profitable when properly handled.

Another of Los Angeles' pushing Hardware concerns is the Cass & Smurr Stove Co., handling a general Hardware line, including house furnishing goods and stoves. Like all progressive retail concerns the Cass & Smurr Co. use their windows to very good advantage and feel that the attention given window displays is one of the best investments.

One of the largest Pacific Coast Hardware concerns is the Harper & Reynolds Company located here in Los Angeles. The business was one of the first exclusively Hardware concerns established in the city, and has kept pace in its growth with the city, and in development with the country of Southern California. New lines have been added as the conditions required; stoves and ranges, plumbing and plumbing supplies, sporting goods and fishermen's supplies, until to-day the stock carried by the Harper & Reynolds Co. fills completely the large four-story warehouse and store running through from N.— Maine to Los Angeles Streets. The arrangement is most ideal for a wholesale and retail business. The main store and offices are in the front on Main Street, while the shipping is done from the rear basement which faces Los Angeles Street. A sub-basement is used for heavy Hardware. In referring to business conditions Mr. C. C. Reynolds said that business was constantly growing, and that new country was being opened up, and a great deal of new building was taking place in all parts of Southern California. The irrigation that is being done by the federal government in Nevada and Arizona is helping all business here in Los Angeles, as much of this new country is now being reached by the jobbers here.

Baker & Hamilton of San Francisco has established a wholesale warehouse here to better care for their fast growing Southern trade in Hardware, implements, wagons and boilers and engines. Baker and Hamilton are now located at 130-136 Los Angeles Street.

Another concern doing a large wholesale business is the Union Hardware & Metal Co. Not only do they work the city trade closely, but also all the towns and cities of Southern and Central California.

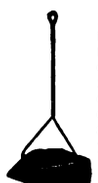
Another of Los Angeles' large wholesale concerns is the California Hardware Co., occupying the large double store and warehouse located at 115-117 South Los Angeles Street. The entire three-story building is used by the California Hardware Co. and is now hardly large enough to accommodate their fast growing trade. This concern hold their business pretty close to staple and shelf Hardware, making a specialty of Builders' Hardware.

The Hoffman Hardware Co. do an exclusively wholesale business and are working up a lot of new trade on the line of the Salt Lake road which has just been opened. This concern is now well located in their new five-story building which was erected especially for their wholesale Hardware business. The Hoffman Hardware Co. reported business in splendid condition and said the outlook was exceedingly good for the next six months. It was pointed out to your correspondent that the development in the Southern California firm's business the past ten years, and the general influx of settlers, as well as the large number of tourists who annually visit Southern California, was all helping the building trade and making business for the Hardwareman.

Among the retailers of Los Angeles the store of McWhorter Brothers stands in the first rank. The attractive plate glass show cases are well filled with high grade cutlery, tools and specialties. Like most of the retailers here a large business in gas stoves is being done by McWhorter Bros., who job this line having the agency for one of the best makes on the market.

The attractive Spring Street Hardware store of Henry Guyot has an air of prosperity, which shows at a glance the large retail business that is being carried on by Henry Guyot.

At 322 Los Angeles Street is located the large store of the Western Hardware Co., who deal in general Hardware, mining supplies and tools. Like all the Los Angeles dealers the reports here were of good business and active demand for all Hardware.

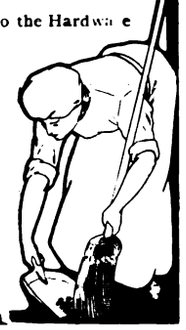


Although there are a large number of well stocked Hardware stores here in Los Angeles, prices are fairly well maintained. Many articles here at retail bring better figures than in any of the other large Pacific Coast towns. Of course one reason is

She Can't Resist It.

No woman who has ever used the old fashioned, back straining dust pan, can resist buying our

Schofield Acme Dust Pan



on sight.

It is not necessary to stoop to fill it. It can be pressed to the floor so tightly that every bit of dust is gathered. The dust falls into the pocket when raised, allowing its removal without spilling. It is made of steel and will outwear 10 ordinary pans.

Digitized by Google

that demand is good, and the market is not overstocked. The building operations or rather permits for the month of August were upwards of $1,500,000, which is undoubtedly more than any other city of its size in the entire United States. In fact it ranks fifth in the cities of the United States in amount of building permits for the month of August, being close to St. Louis, and even with Baltimore. And this is only an average month—building going on the same in Winter as in Summer. The amount of building taking place and the difficulty of procuring a desirable location, is pretty good evidence of a city's prosperity.

The sporting goods business of Los Angeles has been left pretty much to two or three exclusively sporting goods dealers. Probably due to the fact that the Hardwaremen have had all the business that they could well handle without taking on sporting goods. The largest, or at least, one of the largest, retail sporting goods stores in the country is that of William H. Hoegee Co. here. They occupy three numbers on Maine Street, opened in to one large store going through the block with rear entrance on Los Angeles Street. The stock carried is large, embracing everything in the line from a fish hook to a steam launch.

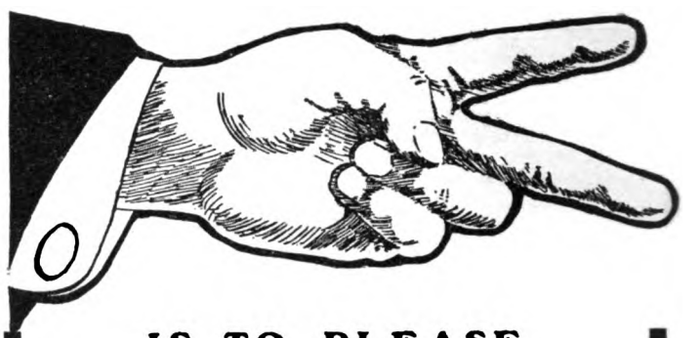
It would seem that it is only a question of time when the Hardwaremen would have to take on sporting goods—there is a large trade in the line here and it is constantly growing.

HAMMERNAIL.

NEW IMPETUS TO RECIPROCITY.

With the adoption of resolutions advocating "immediate reciprocal concessions by means of a dual or maximum and minimum tariff," the National Reciprocity convention concluded its sessions at Chicago where representatives of more than two hundred commercial, agricultural and industrial associations from every section of the country united in an effort to preserve and increase the foreign markets of the American producer. Their recommendations—brief business-like and to the point—have given the necessary impetus to the reciprocity movement. A committee of fifteen will pursue the campaign and insist upon definite action by the next national legislature. They will place the issue squarely before the people, relying upon public sentiment, as reflected in Congress, to secure for them those concessions which have been systematically blocked of late years by a handful of high-tariff advocates in the Senate.

The discussions of the Chicago delegates were concerned little with a defense of the reciprocity system. They took the ground that its installation must be reckoned one of the natural steps in a nation's industrial growth. They merely declared that our present tariff system has served its purpose. Designed to protect to the American producer the home markets, it succeeded so well that he has been enabled, not only to supply the complete domestic demand, but to reach out gradually across the boundary, and place his commodities in foreign fields.



The protective tariff, it is generally admitted, has been one of the chief contributors to our present prosperity. But American markets are now securely ours; except along lines which cannot be produced in this country our imports are comparatively small; American ingenuity and vigorous business methods have given domestic industries protection more secure than that of tariffs; we are turning out vastly more than we can consume and the maintenance and enlargement of our markets abroad must be regarded as an object of natural concern.

The action of the Chicago meeting crystallizes into definite form a sentiment which has been growing steadily since President McKinley in his last memorable address said "we should sell everywhere we can and buy wherever the buying will enlarge our sales and productions and thereby make a greater demand for home labor. Exporters have been closely watching the trend of affairs since this great exponent of protection urged concessions to secure trade. They have seen our exports to France materially checked by retaliation duties there imposed; they have watched with alarm the building of a new German tariff system with only favors for our competitors in a rich market. Now in addition they are confronted with a surtax ranging up to the value of the goods in the event we engage in a tariff war against Germany.

Advocates of the dual tariff system disclaim any conflict with the idea of protection. There is neither intention nor willingness to subject the local producer to the dangers of foreign competition. Certain small interests will be harmed, for probably no tariff regulation was ever framed without working injury in limited fields; but their extent is not material and their loss only an incident in a great operation.

The nation's business interests have united in demanding better trade arrangements; the public, believing that industrial and commercial welfare means general prosperity, has rallied to their support; repeated declarations of the President have assured his loyal favor. In the face of these powerful forces, the "standpat" advocates must show unexpected strength if they are again to succeed in stifling efforts at tariff reform.—*Iron Trade Review.*

The Gillette Safety Razor--

Has the FIRST, and only NEW idea in RAZOR BLADES for OVER FOUR HUNDRED YEARS

Exact Size Complete Razor.

Although on the market for less than two years, the **Gillette Safety Razor,** judging alone by actual sales, is to-day used, appreciated and endorsed by *more* enthusiastic, discriminating shavers during this time than *all* of *the rest* of the so-called safety razor purchasers in the same period.

There is a reason for the success of the **Gillette Safety Razor.**

It is as *different* from other *so-called* safety razors as *other so-called* safety razors are from the old-fashioned razor.

The dealer who handles the **Gillette Razor** makes *liberal* profits, for the fixed retail price of $5.00 for a set *is*, and *will* be *maintained* under U. S. Patent laws, thus assuring every dealer a full profit.

The blades are as thin as paper, as hard as flint, as tough and flexible as whalebone.

The Gillette Safety Razor is made by *automatic machinery insuring perfection* and *uniformity* in every detail and a never varying quality which is so often found in the old-fashioned hand-make razors and blades.

The Gillette's Advantages

Our manufacturing facilities have been increased recently to meet the enormous and growing demand for the **Gillette Razor,** and this demand proves that it will certainly pay YOU to investigate at once the many advantages that are now offered in handling this phenomenal shaving device which is the talk of the civilized world.

Remember -- The Gillette while having *many imitations*, has no direct competitor, *is in a class by itself*, is here to stay, and its patents will be fully protected and all infringements on its rights will be prosecuted.

TWELVE BLADES.

TWENTY-FOUR SHARP EDGES

A Paying Proposition

No shaving proposition to-day offers you the inducements that the Gillette does.

Write to-day for further particulars and do not allow yourself to be persuaded to do otherwise by other *so-called* safety razors that have been put on the market, due solely to the phenomenal success of the **Gillette Safety Razor.**

Gillette Sales Co., 1104 TIMES BUILDING, BROADWAY, NEW YORK CITY.

Are You A Gillette Safety Razor Dealer?

Then you will receive the benefit of the enormous advertising plans that are now being worked out, embracing Magazine publicity, Signboards, extensive catalog distribution, and in fact, *every known* and *up-to-date* method in the science of advertising.

By our publicity methods we are interesting and appealing to *millions* of shavers *every* month.

We are *spending more money* in *making known* the unique advantages of the **Gillette Safety Razor** than is being spent by all the combined, *so-called* safety razor manufacturers in the country, which benefits every Gillette dealer.

That this advertising is producing the desired results is a fact which we will prove to every **Gillette** dealer to his entire satisfaction.

If you are not selling the
GILLETTE SAFETY RAZOR,
Get into line, for once in it, means you are there to stay.

The "Gillette" cannot be put together in any way but the right way, and when so put together the blade is concaved and both edges are in the right position in their relation to the guards to be used with absolute safety.

Exact Size Set, Complete.

Greater Profits--- Greater Satisfaction

There are not only greater profits in handling this razor, but greater satisfaction because the **Gillette Safety Razor** is fully guaranteed, is backed by *responsible* and strong financial interests, and the razor itself is already endorsed by several hundred thousand users who are voicing its merits throughout the civilized world.

You see **Gillette** advertisements everywhere, and up-to-date dealers are joining our ranks every day.

Do not delay, but write us *at once* and let us show you evidence of such a nature that will make you regret the delay which for some reason unknown to us, has resulted in your name not being on our list of dealers.

RAT AND MOUSE TRAPS.

"Oh, yes, we are still selling traps," said a rat and mouse trap manufacturer in the *House Furnishing Review*, "millions of them every year and more and more all the time. The sale of rat and mouse traps keeps right up with the constantly growing population.

"Rat and mouse traps are used everywhere, and I suppose that if, at any time, you should omit the regular census in a country you could make a pretty accurate estimate of that country's population based on its demand for rat and mouse traps at that time, as compared with such a demand at a time when the population was known.

"In some European countries, more densely populated than ours, where every inch of the ground is cultivated and where rats can do comparatively more damage than here, they give a small bounty on rats, just as in some parts of this country there are still paid bounties for the destruction of wolves and other vermin.

"But rats and mice can do great damage, not only in fields, but in warehouses and in many other places, and there is a constant warfare on them all over the world, with a corresponding demand for traps.

"There are now made many kinds of rat and mouse traps, and inventors are constantly producing new ones, but of mouse traps there are still sold enormous numbers of the time-honored trap familiar to many generations of people, known in the trade as a chobker trap, this being the ancient mouse trap, with its wood part stained red, and with holes in the sides for the mice to put their heads through to get at the bait attached to the trap's trigger.

"These are still made in square and in round traps, of from one to six holes in each trap, just as they have always been, and they are all, as they have ever been, stained red. Why red? I don't know, and I've been selling rat and mouse traps for a good many years, too. I suppose red was the most convenient stain at hand when these traps were first made. No manufacturer would think now of having a wood mouse trap blue, and if he did, I doubt if it would sell.

"Other kinds of wooden rat and mouse traps are now sold in great numbers, but are not stained red or any other color, but are finished either oil stained or in the natural wood. These traps were so made to start with and their manufacture is so continued, just as we continue to paint the choker traps red.

"Where rats and mice are numerous, plenty of them are caught in traps without any bait. Of course traps are commonly set near where the rodents come out; but they may be set to advantage in other places.

"For instance, rats and mice do not often, unless they are compelled to, take to the open in a room. They are more likely to skirt the baseboard in going from one point to another. Flat traps, for example, placed along such routes, are likely to catch them even if the traps are unbaited. If a rat or a mouse steps on such a trap in following its way it gets no further.

"There is a more or less common notion that mouse traps that have been much used finally get a mousy odor about them and that the mice avoid them and the traps are useless. Not so, in my own experience. A mouse trap is good for its work as long as it remains in order.

"In temperate countries there are more rat and mouse traps sold in the Fall than at any other season, for it is then that rats and mice come in from the fields and from out of doors generally for the greater comfort they find in human habitations and in barns and other shelters.

"American traps exported? Thousands of gross annually. It is stating simply the fact to say that American rat and mouse traps, like every other sort of American mechanical contrivance, are the best in the world, and they go everywhere. But not without competition, this mostly from the Germans, an active, enterprising people, who never fail to press every trade opportunity energetically.

"In one South American country in which we had long sold many traps we found our business falling off steadily, and when we came to send down there we found Germans underselling us on a trap that we sell at wholesale at a price that would make you laugh, if I should quote it, it is so low; but with cheaper labor the Germans were able to offer it still lower. But while this trap was similar to ours and sold cheaper, it lacked our trap's durability and effectiveness.

"All the parts of our traps are, of course, made and the traps are assembled by machinery, but each and every one of our traps, including the cheapest, is separately tested by the hand before it is sent out. Our traps are so put together that they will stay together, and every one is so nicely adjusted that it will work.

"In these essentials our traps were far superior to the German, as it was easy for us to show, and it was equally easy for us to demonstrate that a trap that wouldn't wear and wouldn't work would be dear at any price and that if they wanted traps that really were serviceable and effective ours were the traps to buy. And now we are shipping to that country as many traps as ever.

"And I suppose that of all the rat and mouse traps used the world over 90 per cent. are of American manufacture."

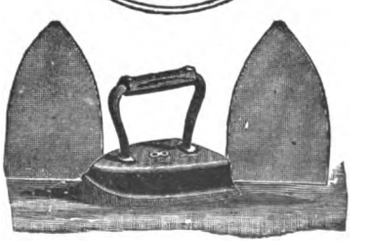
✤

THE SAVAGE ARMS CO., Utica, N. Y., manufacturers of high-grade Hammerless Firearms, Ammunition, Reloading Tools, Sights, Etc., are distributing their new catalogue, which gives a very comprehensive idea of the grade of goods made by them. They state, "The Savage Hammerless Sporting Rifle has been used with the greatest success in nearly every country of the world on all kinds of dangerous game and under the hardest sort of shooting conditions." They call attention to the fact that these rifles excel in accuracy and that the inside mechanism is nicely finished, which makes the gun work smoothly and easily. The catalogue is gotten up in a very characteristic manner, the cover representing a piece of deer skin upon which is the picture of an Indian brandishing a "Savage" rifle, and a series of cuts of wild animals and game runs through the book. Write for catalogue No. 15.

✤

EVANSVILLE TOOL WORKS, Evansville, Ind., Hendricks & Class, 25 West Broadway, New York, Export Agents, have issued a new export price list showing a very complete line of their Nail Hammers, Hatchets, Axes, Adzes, Cleavers, Mauls, Picks, Sledges, Drilling Hammers, Chisels, Etc., also Blacksmiths' Tongs and other tools and Woodchoppers' Wedges and Mauls. A description is given of each of these articles and they are also illustrated. Send for "Export Price List."

It's a pleasure to handle



BLACKLOCK'S SAD IRONS

because they are the good "old fashioned" kind, in shape they are strictly "new fashioned" in finish. They are made in new shapes too—for ironing sleeves, pressing, &c.

Finished in Black, Bronze, Aluminum or Full Nickle.

The name "Blacklock" is on every handle.

Cane Hill, Mo.—Grisham & Dale have been succeeded in the Hardware business by T. A. Dale.

Conway, Ark.—A. Lachowsky has sold his business to the Grumner Hardware Co.

Council Bluffs, Ia.—Petersen & Schoening Hardware Company have completely remodeled the Grahi-Petersen Company building, which new addition adds 12,000 feet of floor space to their already large store.

Elmwood, Neb.—F. C. Voorhees & Co. have sold their Hardware business to W. H. Beaver & Co.

Freedom, Pa.—The John F. Howe Hardware & Supply Co. is erecting a two-story store building.

Goessel, Kan.—Peter Frey has succeeded to the Hardware business of Frey & Franz.

Guthrie, Okla.—J. J. Houston has purchased the business of the Gibson Hardware Co.

Jefferson City, Mo.—The large Hardware business, known as the Jefferson City Hardware Company, has changed hands. The purchasers are Cunningham Bros., of this city and Fletcher, N. C. W. C. Moore will be in charge of the business.

Kahlotus, Wash.—Smith Bros. are erecting a new Hardware store.

Knoxville, Tenn.—The Virginia-Tennessee Hardware Co., recently organized here as the successor of the Barker Hardware Co., has bought the business of the Fairfax-Roberts Hardware Co. George P. Fairfax and G. M. Cowan, of the retiring company, will become stockholders in the new company. This latter company is now doing business on a capital of $75,000.

Lebanon, Kan.—Hendrickson Bros. have purchased the Hardware business of R. Morgan.

LeRoy, Minn.—J. L. Deuel & Co. have sold their Hardware stock to H. J. Soper, of Amery, Wis.

Lexington, Ind.—Guy Campbell has recently purchased the Hardware stock and kindred lines from F. M. Campbell.

Litchfield, Neb.—J. H. Whitman has sold his Hardware business to A. L. Fletcher.

Minneapolis, Minn.—The Janney-Semple Co. are erecting a large addition to their wholesale Hardware block, the building to cost $25,000. It will be five stories high, and will give the company half a block on one street and an entire block on the other.

Monroe, Wis.—The firm of Streiff & Lewis, dealers in Hardware and farm implements, has been dissolved by mutual consent, Josh Streiff retiring. The business hereafter will be conducted under the firm name of Andrew Lewis Hardware Company.

Murray, Ia.—F. M. Danner has sold his business to the Iowa Hardware Co.

Nanaimo, B. C.—A. H. Meakin has purchased the Hardware business of D. Taylor & Co.

Nashville, Tenn.—An amendment was granted to the charter of the Bennett Hardware Company, empowering it to increase its capital stock from $55,000 to $100,000.

Newberry, S. C.—The Newberry Hardware Company is beginning the erection of a two-story brick store.

Novelty, Mo.—Shafstall & Cowles have been succeeded in the Hardware business by W. A. Shafstall.

Pilger, Neb.—W. J. Patterson & Co. have purchased the Hardware business of A. A. Antles & Co.

Pittsburgh, Pa.—The Grafton Hardware Co. is erecting a $20,000 three-story brick store.

Scribner, Neb.—Marquardt & Schoeneck have been succeeded in the Hardware business by C. W. Marquardt.

Shelby, Ia.—The Shelby Hardware & Furniture Co. has succeeded to the business of the Shelby Supply Co.

Springfield, Mass.—The partnership in Hardware stores in Springfield and North Adams, which has existed between O. C. Alderman, of this city, and F. C. Carlisle, of North Adams, under the firm name of Alderman & Carlisle, has been dissolved. Mr. Alderman will conduct the Springfield store in the future, and Mr. Carlisle will have the North Adams store.

Superior, Wis.—J. G. Pease, formerly of the Pease-Humphrey Hardware Company, of this city, and now proprietor of the Pease store, has sold his interest in the Hardware store to a company which was organized under the name of the "Pease Hardware Company." The new concern is headed by O. A. Kruchke, who will be the president and general manager of the store.

Taopi, S. D.—H. F. Berlinke has purchased the Hardware business of P. Dexheimer & Co.

Tecumseh, Neb.—B. E. Seaver and E. H. Bush, of this city, have purchased the C. S. Campbell stock of Hardware here and the new firm will be Seaver & Bush.

Thibodaux, La.—The Planters' Hardware and Mercantile Company will hereafter be known as The Planters' Hardware and Mill Supply Company. Its officers are: President, Thos. Beary; vice-president and manager, R. M. Hereford; secretary-treasurer, Jos. Claudet.

Toledo, Ohio.—The Standart-Simmons Hardware Co. is erecting a new warehouse.

Van Buren, Ark.—The R. P. Allen Hardware Co. has sold its business to Lynch, Creekmore & Co.

Wellington, Ohio.—The name of the M. L. Carpenter Hardware Co. has been changed to that of The Barrick-Daugherty Hardware Co.

Wichita, Kan.—The Shattuck, George Hardware Co. have bought ground for a new three-story brick building.

Wichita, Kan.—The Simmons Hardware Co. is erecting a 140x146 foot building, which will be four stories high.

Woodruff, Kansas.—P. C. Waggner & Co. have sold their Hardware and furniture business to M. Harbaugh & Co.

Woonsocket, R. I.—Hosie Brothers, who have carried on a Hardware and plumbing business for several years, have by mutual consent dissolved partnership. The Hardware business is to be continued by George Hosie in his new store, and the plumbing business by Horace Hosie in the old store.

CUTTING

All hides vary in thickness and quality. The leather from over the hips and back of the animal being thicker and more evenly grained than any other part of the hide.

This leather only is used in making

GIBFORD'S
RED-E-FOR USE
RAZOR STROPS

and in cutting it great care is taken that each strop shall be of one unvarying quality and thickness so that it will not stretch or become uneven with use.

There is but one quality of leather in all **Red-E-For Use Razor Strops** (and that is the best). The difference in price is due to size and trimmings. We wouldn't injure the reputation of our strops by putting shoddy leather in our low priced goods.

Write for Catalog. Sold by all Jobbers.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Albany, N. Y.—Sayer Drill-Socket Company, of this city, was incorporated recently with a capital of $10,000 to manufacture drill sockets. The directors are George A. Sayer, William Marx and Luie Marx, of this city.

Beatrice, Neb.—F. D. Kees, who has just sold his Hardware store and building to P. P. Pearson, late of Plattsmouth, will build a factory and engage in the manufacture of screen door hinges, cornhuskers, etc., on a much larger scale than heretofore.

Boston, Mass.—Bay State Machine Screw Co. has been incorporated. Objects, to deal in machinery for the manufacture of screws, etc.; capital, $100,000. President, Frank Foss; treasurer, Fred. A. Elwell, Boston.

Braddock, Pa.—The Acme Tool & Manufacturing Co. has been incorporated with a capital stock of $10,000 to manufacture Acme reamers, punches, dies, button sets, limit switch, hose, trolleys, etc.

Buffalo, N. Y.—Niagara Specialty Company has been incorporated to manufacture potato peelers; capital, $50,000. Directors: James Hambly, Edna K. Elsheimer, Buffalo; C. S. Crabtree, Toronto.

Camden, N. J.—American Regeneration Furnace Co. has been incorporated to manufacture furnaces, heaters, stoves, ranges, etc.; capital, $25,000. Incorporators: A. Wilson and Isaac H. Bedford, Philadelphia, Pa.; Curtis T. Baker, Camden, N. J.

Cleveland, Ohio.—The Lane Tool Company has been incorporated with a capital of $20,000 by F. E. Lane, R. C. Hillis, W. D. Hillis, J. H. Griswold and W. E. White.

Columbia, Pa.—The E. G. Smith Co. has been incorporated to manufacture mechanical tools. Capital, $15,000.

Detroit, Mich.—The Detroit Pneumatic Tool Co. has been incorporated with a capital of $65,000. The stockholders are: Herman Scheim, Orton W. Albee, Charles C. Bothfeld and John T. Nichols.

Hartford, Conn.—The Austin Manufacturing Company has been incorporated with a capital stock of $1,000 for the purpose of manufacturing and dealing in sheet metal ovens and other household articles. The incorporators are William E. Johnson, Daniel H. Judd and Robert M. Austin.

Milwaukee, Wis. — Economical Tool Company has been incorporated; capital stock, $6,000; incorporators, Lorenz E. Seymer, Charles A. Ast and Charles W. Seyem.

New York, N. Y.—The New York Handle Company has been incorporated. Capital, $10,000. Directors: A. C. Schlesinger, Leon Kauffman and W. J. Clark, New York.

New York, N. Y.—Universal Night Lamp Company. Capital, $5,000. Directors: Giuseppe Genovese, Edwardo Colvi and J. P. Genovese, New York.

Philadelphia, Pa.—The Manhattan Stove Company was recently incorporated to conduct foundry plants for the manufacture of stoves, furnaces and heating appliances. The incorporators are all of Philadelphia; capital stock, $100,000.

Portland, Me.—Dean & Co. has been incorporated for the purpose of manufacturing and dealing in Hardware, stoves, gas and electrical supplies and appliances of all descriptions, with $25,000 capital stock. Officers: President, Frank G. Dean, of Chettenham, Pa.; treasurer, Charles H. Tolman, of Portland.

St. Louis, Mo.—Banner Stove and Manufacturing Company have been incorporated by James H. Howe, Arthur G. Hildreth and William H. Eckert, to manufacture and deal in stoves, ranges, etc. Capital stock, full paid, $10,000.

Torrington, Ct.—The Progressive Manufacturing Company has been organized to engage in the manufacture of screws, etc., with a capital of $100,000. The incorporators are John F. Alvord, George B. Alvord and George E. Hammond, all of Torrington.

Troy, N. Y.—Hygienic Milk Pail Co. has been incorporated to manufacture milk pails, Hardware, etc.; capital, $5,000. Incorporators: Henry Aird, T. C. Boswell, Edwin Blanchard, F. K. Blanchard, Collins and North Lansing Avenues, all of Troy.

Changes.

Austell, Ga.—J. S. Lehman, manufacturer of lawn swings, stepladders, etc., contemplates removal to a plant already constructed in Meridian, Miss., where it is proposed to install machinery for the manufacture of his line.

Bristol, Conn.—The J. H. Session's & Son Company, which has carried on the manufacture of trunk Hardware for forty years, is building six modern factory buildings of the best modern mill construction and there will be 50,000 feet of floor space that can be utilized for factory purposes.

Gardner, Mass.—The Industrial & Mfg. Co., of New Britain, Ct., is erecting a Hardware factory, which will be 50x254 feet, one story high, with monitor roof and a brick power house, 40x50 feet.

Lewiston, Me.—The North Wayne Tool Co., whose factory was recently destroyed by fire, is erecting two new buildings, one 167x42, and the other 147x42, and will require something like 85,000 feet of lumber.

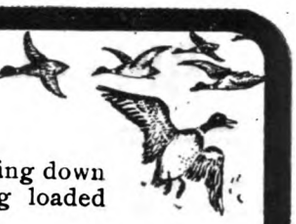
Mt. Pleasant, Pa.—The Pittsburg Automatic Wrench Company is erecting a new plant here and before long, if nothing unforseen happens to prevent, fifty or more employees, the majority of them skilled men, will be at work turning out the latest, and, experts say, the best device in pipe wrenches on the market.

Newark, N. J.—A. T. Steffans & Co., manufacturers of saddlery Hardware, are about to begin operations on an extensive addition to their plant. The plans call for a four-story brick building, 50x75 feet, a three-story brick building, to cover an area of 50x50 feet, and a two-story brick building to measure 25x30 feet. The structures will be equipped with freight elevators, steam heating and electric lighting. The work will cost about $20,000.

New Castle, Pa.—The New Castle Forge & Bolt Company's plant, which was partially destroyed by fire, is being rebuilt. The new building will be iron and steel.

Toronto, Ont.—The Wilson Scale Works Company will erect a new four-story factory, to cost $10,000.

Miscellaneous.



Franklinville, N. Y.—The Board of Trade met recently to consider a proposition from the Ontario Knife factory, which operates a factory at Allegany, to consolidate their factories here. The Ontario people agree to reorganize their company with a capital of $40,000, and employ 100 men or more for seven years, if the citizens will furnish site and buildings to cost $8,000. A committee was appointed consisting of J. D. Case, president of the Board, and ten others. Between $3,000 and $4,000 has already been pledged.

Los Angeles, Cal.—Properly speaking, no city on the Pacific coast can lay claim to more men of capital and business ability who are devoting their time and energy to the building up of great enterprises than can Los Angeles. The men who compose the business head of the large incorporated firm of the Cass-Damerel Hardware Manufacturing Concern belong to this class. They are extensive Hardware manufacturers of steel ranges, tinning, plumbing, refrigerators, hot air furnaces, galvanized iron ware, hotel kitchen appliances and everything pertaining to the Hardware business. The company was established here in 1888 and was incorporated under the laws of the State in 18[illegible]. Its officers are: Bruce H. Cass, president; Charles W. Damerel, secretary, and V. Price Brown, treasurer, all of whom are too well known to the people of this city and territory to need any introduction in this article. The firm do a wholesale and retail business and employ about forty-five experienced artisans and salesmen. Their store and offices are located at 412 South Broadway and factory and warehouses at 2017-2019 Willow Street. They ship to all points in Southern California, Arizona and Nevada.

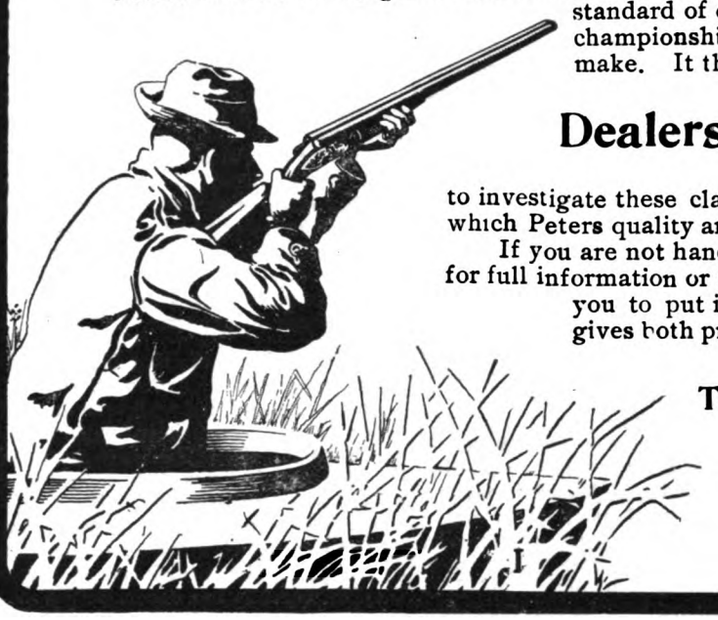
A Clean Shot



One of the beauties of **Peters** "Referee" shells is their clean way of bringing down game. They develop as much velocity and killing power as smokeless. Being loaded with semi-smokless powder, they are extremely clean and do not foul the gun.

Peters "League" loaded with black powder is the best shell of its grade on the market.

Peters smokeless shells, "Ideal," "Target," "High Gun" and "Premier" are preferred and used with great success by multitudes of sportsmen in every section of the country.

Peters Metalic Cartridges loaded with the famous Semi-Smokeless powder have attained a standard of quality and have won victories in the great championship matches, not approached by any other make. It therefore behooves

Dealers in Ammunition

to investigate these claims and take advantage of the business which Peters quality and Peters advertising are making.

If you are not handling this line at present, ask your jobber for full information or if you prefer, write us direct. It will pay you to put in a stock of Peters goods, the line that gives both profit and satisfaction.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

The Jewel Coffee Mill

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE EIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bridgeport, Conn.—The Century Co. has incorporated with $10,000 capital. The company will deal in talking machines, bicycle supplies, etc. The incorporators are George M. Stiff, Louis Boettgar and William Stiff, all of Bridgeport.

Cromwell, Ct.—The Best Ammunition Co. has been incorporated with a capital stock of $50,000, to manufacture a new patented non-mercurial primer for all powders and cartridges and a new patent shot shell, to be put on the market both empty and loaded. The company will begin manufacturing as soon as new automatic machinery is ready.

New York, N. Y.—Auto Rubber Tire Exchange has been incorporated. Capital, $5,000; directors: J. C. Lewis, R. W. Booth, A. H. Lewis.

New York, N. Y.—Leyland Automobile Feeding Oil Cup Co. has been incorporated. Capital, $10,000; directors: William Leyland, Mary J. Leyland, J. W. Leyland.

Oakland, Cal.—William Levy has recently opened a new bicycle store.

Portland, Me.—Continental Manufacturing Company has been incorporated for the purpose of manufacturing, buying, selling and dealing in sporting goods, games, toys, works of art, etc., with $10,000 capital stock. Officers: President, Lewis C. Lock; treasurer, John E. Shearman.

Changes.

Bartow, Fla.—J. D. Crum, of Homeland, has become the owner of the bicycle store previously owned by J. R. Wiggins. The business will be in charge of John Gresham.

Bridgeport, Ct.—The Bridgeport Gun Implement Co. has been sold to the Jennings Bros. Mfg. Co.

Petersburgh, Ont.—F. C. Cubitt, the sporting goods and picture frame merchant, has, owing to extended volume of business, taken into partnership W. F. Porter. The new firm of Cubitt & Porter will extend the scope of the past successful business by adding to their present stock a complete line of musical instruments, guns, rifles, ammunitions, etc.

Philadelphia, Pa.—A. J. Reach & Co., baseball manufacturers, are expending $75,000 for an addition to their plant.

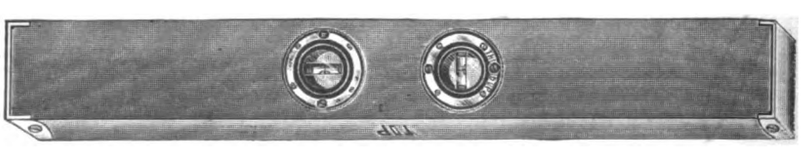
Torrington, Ct.—The Eagle Bicycle Company, which was organized in 1888, has been sold to the Progressive Manufacturing Company, a department of the company for the last four years.

Miscellaneous.

Paris, France.—That bicycling is not on the wane in France is proved by the following statistics for the *Journal de l'Automobile:* 1,520,458 wheels paid into the French treasury as taxes this year, $1,300,000. Thus, on the basis of the last French census, there is one bicycle for each twenty-five citizens; but as more than one-fifth of the bicycles escape taxation, there is really one wheel to every score of Frenchmen.

Switzerland imports American bicycles at the rate of 6,000 a year. Our total export of bicycles in 1905, fiscal year, amounted to $1,378,428. Automobiles of American make were exported in 1905, fiscal year, to the tune of $2,481,243. A very few years ago our entire output was only forty machines a year.

Consul Goding, of Newcastle, New South Wales, writes that the automobile, which has recently been introduced, is growing in favor, and that the number in use is steadily increasing. The Consul says: "In New South Wales there are now 480, while in Victoria there are 530. The total value of those in this State is about $770,000, the most costly bringing $10,000. Two are in use costing $9,000 and $7,000, respectively, while quite a number cost $4,500 each. Throughout New South Wales and Victoria the roads are kept in excellent condition, and, as little rain falls away from the coast districts, an ideal condition of affairs is found for automobiles."



If you have never ridden a bicycle in your life, or if you once made your century runs by the dozen on machines that cost you $100 to $125 each, and have long since wondered why you did it, perhaps you have an idea that the bicycle business is dead. But down on the south side of Chicago, just below Twelfth Street, is a bicycle factory which will sell 35,000 machines this year in America and 7,000 machines this year in Great Britain, to which it adds wants for second-hand bicycles in the proportion of ten needed for the one which it is able to purchase in Chicago and the central group of cities contiguous to the great lakes. All of these figures, however, are markedly larger than they were last year and in the opinion of the factory managers they are to be considerably larger again in 1906. Under present conditions of the second-hand market a bicycle, last of the $100 makes of a few years ago, is worth $5; if it has been exceptionally well cared for and not much used, it may bring $7 or $8 at the factory which is in the side line of making them over for the country trade. But not infrequently a machine is worth making over which is not worth more than $1 to the factory and hundreds of these machines bring no more than $3 each. When the factory has done with the run of these second-hand machines the range of prices to the consumer on the mail order basis is from $6 to $10 for each machine. A second-hand machine, put into the best order, has no longer any name, but they are in such sharp demand in the country towns and rural districts as to cause the Chicago concern a good deal of expensive advertising for more and more of these inexpensive old machines. Yet this same factory is turning out its new machines from a minimum of $11.75 to the maximum of $25 each—the last price covering a wheel that has all the latest equipments, the best of the best tires of any make, a coaster brake, and the one year guarantee. The $125 wheel of twelve years ago never was guaranteed for a longer time.

The English bicycle, that for some years controlled the Belgian market, has almost entirely disappeared therefrom. The cause has been the introduction of the American bicycle, which suits the taste of the Belgian wheelmen, both in quality and price. The British dealers give as a reason for the demand for American bicycles in the continental markets, to the almost exclusion of the British make, that the English wheel is too expensively built for the present demand. It is further asserted that the changes in the style of the wheel are so frequent that bicyclists refuse to pay high prices for a wheel that will be obsolete in about two years, and for which, after being used for that period, little will be paid, say $10 to $20.

It is an unexpected showing which the American made bicycle is making just now in Great Britain. Until within a year or two the American make brought $75 to $85 in the English markets. The American made goods for the British market thus make a record quite at variance with the average "infant industry" products abroad by selling in Great Britain for $10 each more than the best make of wheel will bring at home. But in every way the English wheel as it is exported has deserved the extra $10 that is tacked upon it. It is as unlike the American pattern as can be imagined. It has the old mud guards front and rear; it must have steel rims, such as the American rider will not trust; it must have a doubly heavy pedal crank, made in three pieces instead of the one light piece in the American wheel; the chain must be heavier, the seat must have its attached tool bag, and altogether the wheel must weigh thirty-five pounds where the American wheel weighs twenty-three pounds and is $10 cheaper.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.
